NIFTY CHART

Nifty continued to hover around the 26000 mark, forming another narrow-range candle and reflecting indecision at higher levels. Despite the absence of a decisive breakout, the index maintained its upward trajectory above the 5 DEMA support at 25670, keeping the near-term structure constructive. Global markets offered a relatively supportive backdrop, with most Asian indices advancing amid a recovery in technology stocks, while US markets remained closed for Thanksgiving. Brent crude continues to trade around $94–95/barrel, keeping energy costs and geopolitical risks on the radar. Gold is holding near $3,580/oz, with movements influenced by shifting expectations around the US Federal Reserve's rate outlook. The 26000 mark remains the immediate breakout trigger, while 26400 is likely to act as a stronger supply threshold during the initial phase of the December series. On the downside, 25670 remains the first key support, with successive support levels extending towards 25150. Traders should watch for a sustained close above 26,000 to confirm renewed momentum, while maintaining trailing stops given the stretched momentum setup.
