Gold prices rose driven by safe-haven demand amid escalating tensions in the Russia-Ukraine conflict, while investors awaited remarks from Federal Reserve policymakers on the interest rate outlook. Two Fed governors offered contrasting perspectives on U.S. monetary policy, with one raising concerns about stubborn inflation, while the other remained optimistic about continued progress in reducing price pressures.

Asia Gold - India premiums reach 4 – month peak as price drop attracts customers - Physical gold premiums in India climbed to a near four-month high, driven by a rebound in demand as prices dropped, while top consumer China saw limited retail buying interest. Indian dealers charged a premium of up to \$16 an ounce over official domestic prices, from a premium of \$3 last week. Higher premiums indicate an increase in retail demand. Dealers in China, the world's top consumer of the metal, offered discounts between \$10-\$13 compared with last week's \$15-\$17 discounts. Dealers in Hong Kong charged premiums up to \$1.20 on gold, compared to last week's \$0.20 discount and \$1 premium. In Japan, bullion was sold at par to \$0.5 premium, slightly changed from last week, while traders in Singapore sold it between a \$1.10 to \$2.20 premium.

Gold ETF demand turns positive for year – to – date, says WGC - Global physically-backed gold exchange-traded funds (ETFs) saw inflows for the sixth straight month in October, with year-to-date flows turning positive for the first time this year, the World Gold Council (WGC) said. Demand was supported by North American and Asian flows, the WGC added. Gold-backed ETFs attracted \$4.3 billion of inflows in October to lift collective holdings to 3,244 tons, the WGC said. After three years of outflows, driven by high interest rates, the past six months have seen a marked reversal. Continued inflows and record gold prices lifted global assets under management to a month-end record of \$286 billion in October, the WGC said in a note. The WGC added that worldwide gold trading volumes edged higher, supported by over-the-counter (OTC) and ETF activities.

India's gold demand to hit four – year low amid price rally- India's gold demand in 2024 is likely to fall to its lowest in four years as a rally in prices to a record high is seen denting purchases during the peak festival season in the December quarter, the World Gold Council (WGC) said. Gold demand in the world's second-biggest consumer of the precious metal could stand between 700 and 750 metric tons in 2024, the lowest since 2020 and down from last year's 761 tons, Sachin Jain, CEO of WGC's Indian operations told. Indian gold consumption in the July-September quarter rose 18% to 248.3 tons, as investment demand jumped 41% and jewellery demand increased 10% in the quarter, the WGC said. India's physically backed gold exchange-traded funds (ETFs) have registered a sixth consecutive month of inflows in September and their holdings rose to 52.6 tons, up from 43.3 tons in January, WGC data showed.

Rising investor gold demand offsets lower jewellery buying in Q3 - Global gold demand excluding over-the-counter (OTC) trading was steady year-on-year at 1,176.5 metric tons in the third quarter as higher investment activity offset reduced jewellery consumption, the WGC said. "Resurgent professional flows combined with solid bar and coin investment will offset weaker consumer demand and slower central bank buying" for gold in 2024, the WGC, said in a quarterly report. Total demand for gold, including opaque OTC trading, rose 5% to 1,313 tons, a record for a third quarter, the WGC said. It estimates the OTC flows – investment from institutional, high-net-worth investors and family offices – at 136.5 tons in July-September, up 97%. Physically-backed gold exchange traded funds (ETFs) saw the first positive quarter since the first quarter of 2022 with inflows of 95 tons, while bar and coin investment fell 9%.
