Technical Snapshot

BUY SILVER DEC @ 87800 SL 87200 TGT 88600-89200. MCX

Observations

Silver trading range for the day is 86740-89640.

Silver gains after President-elect Trump pledged to impose tariffs on imports from Canada and Mexico, and additional tariffs on China.

Bullion fell despite Trump pledging big tariffs on US three largest trading partners – Canada, Mexico, and China.

Federal Reserve officials say they are likely to keep reducing interest rates for now.

Markets currently estimate a 59.6% chance of a 25-basis-point U.S. rate cut in December.

Gold dropped as reports that Israel and Hezbollah are nearing a ceasefire agreement lowered demand for safe-haven assets. The precious metal was also hit by a rising US dollar after President-elect Donald Trump announced plans to impose a 25% tariff on all imports from Mexico and Canada starting his first day in office, along with an additional 10% tariff on goods from China. Further impacting gold prices was the nomination of Scott Bessent as Treasury Secretary in the incoming administration.

Gold demand tepid in India, other Asian hubs as prices rebound - Physical gold premiums slipped in India on a pull-back in demand as rising local prices prompted jewellers and retail buyers to stay on the sidelines, while demand for bullion in top consumer China and other major Asian hubs also remained subdued. Indian dealers charged a premium of up to \$3 an ounce over official domestic prices down from last week's premium of \$16. Dealers in China, the world's top consumer of the metal, were charging a premium of up to \$10 an ounce to a discount of \$6/oz this week. In Japan, bullion was sold at par to \$0.5 premium, unchanged from last week, while traders in Singapore sold it between a \$1.20 and \$2.20 premium.

Gold ETF demand turns positive for year – to – date, says WGC - Global physically-backed gold exchange-traded funds (ETFs) saw inflows for the sixth straight month in October, with year-to-date flows turning positive for the first time this year, the World Gold Council (WGC) said. Demand was supported by North American and Asian flows, the WGC added. Gold-backed ETFs attracted \$4.3 billion of inflows in October to lift collective holdings to 3,244 tons, the WGC said. After three years of outflows, driven by high interest rates, the past six months have seen a marked reversal. Continued inflows and record gold prices lifted global assets under management to a month-end record of \$286 billion in October, the WGC said in a note. The WGC added that worldwide gold trading volumes edged higher, supported by over-the-counter (OTC) and ETF activities.

India's gold demand to hit four – year low amid price rally- India's gold demand in 2024 is likely to fall to its lowest in four years as a rally in prices to a record high is seen denting purchases during the peak festival season in the December quarter, the World Gold Council (WGC) said. Gold demand in the world's second-biggest consumer of the precious metal could stand between 700 and 750 metric tons in 2024, the lowest since 2020 and down from last year's 761 tons, Sachin Jain, CEO of WGC's Indian operations told. Indian gold consumption in the July-September quarter rose 18% to 248.3 tons, as investment demand jumped 41% and jewellery demand increased 10% in the quarter, the WGC said. India's physically backed gold exchange-traded funds (ETFs) have registered a sixth consecutive month of inflows in September and their holdings rose to 52.6 tons, up from 43.3 tons in January, WGC data showed.

Rising investor gold demand offsets lower jewellery buying in Q3 - Global gold demand excluding over-the-counter (OTC) trading was steady year-on-year at 1,176.5 metric tons in the third quarter as higher investment activity offset reduced jewellery consumption, the WGC said. "Resurgent professional flows combined with solid bar and coin investment will offset weaker consumer demand and slower central bank buying" for gold in 2024, the WGC, said in a quarterly report. Total demand for gold, including opaque OTC trading, rose 5% to 1,313 tons, a record for a third quarter, the WGC said. It estimates the OTC flows – investment from institutional, high-net-worth investors and family offices – at 136.5 tons in July-September, up 97%. Physically-backed gold exchange traded funds (ETFs) saw the first positive quarter since the first quarter of 2022 with inflows of 95 tons, while bar and coin investment fell 9%.
