## Technical Snapshot

**SELL GOLD JUN @ 93300 SL 93600 TGT 92900-92700. MCX**

## Observations

Gold trading range for the day is 90485-96705.

Gold fell followed by news of a major tariff rollback by the US and China.

US announced it would cut tariffs on Chinese goods from 145% to 30, for a 90-day period.

China will lower levies on US imports from 125% to 10%, for a 90-day period.

Fed warned of rising inflation and labor market risks, with Chair Powell ruling out a preemptive rate cut.

## Technical Snapshot

**SELL SILVER JUL @ 95800 SL 96500 TGT 95000-94200. MCX**

## Observations

Silver trading range for the day is 92500-98070.

Silver prices dropped following a major breakthrough in U.S.-China trade relations.

U.S. tariffs on Chinese goods will be cut from 145% to 30%, while China will lower its duties on U.S. imports from 125% to 10%.

There were 22,859 tons of silver held in London vaults in April, up 3.3 % from March, the LBMA said.

The improved risk sentiment, further bolstered by a fragile but holding ceasefire between India and Pakistan, weighed broadly.

Gold fell as improved investor sentiment and a reduced demand for safe-haven assets followed news of a major tariff rollback by the US and China. After trade negotiations in Switzerland over the weekend, the US announced it would cut tariffs on Chinese goods from 145% to 30%, while China will lower levies on US imports from 125% to 10%, both for a 90-day period. The London Bullion Market Association said that gold held in London vaults totalled 8,536 metric tons at the end of April, up 0.6% from the previous month, as more of the precious metal returned from New York to London after dislocation.

Asia Gold-India demand slows, China purchases seen up post holiday - Indian gold dealers offered price discounts amid weak demand as a weaker rupee lifted local prices to near-record highs, while buying in China picked up after a holiday. Indian dealers offered a discount up to \$16 an ounce over official domestic prices. Dealers had initially offered a discount of up to \$24 per ounce early last week, but started charging a \$3 premium in the second half. Elsewhere, dealers in top gold consumer China charged premiums of \$42-\$49 an ounce over the global benchmark spot price, compared with premiums of \$34-\$48 last week. Meanwhile, China's central bank approved foreign exchange purchases by some commercial banks to pay for gold imports under recently increased quotas. In Hong Kong, gold was sold at par to a \$2 premium, while in Singapore gold traded at par with the global benchmark to a premium of up to \$2.50 per ounce. In Japan, bullion was sold at a discount of \$0.50 to a \$0.50 premium.

Share of gold in India's forex reserves doubles in four years, central bank report shows - The share of gold held by India's central bank in its foreign exchange reserves has doubled in the last four years as on March-end, a report by the Reserve Bank of India showed on Monday. In dollar value terms, the share of gold in the total foreign exchange reserves increased to about 11.70% by end-March, from 9.32% as at end-September 2024 and 5.87% as on end-March 2021, the central bank's half year forex reserves report said. As of end-March, the RBI held 879.59 metric tonnes of gold, compared to 854.73 metric tonnes at the end of September. The proportion of gold held domestically rose to 511.99 metric tonnes as of March 31, against 510.46 metric tonnes at September-end, the RBI said. "While 348.62 metric tonnes of gold were kept in safe custody with the Bank of England and the Bank for International Settlements (BIS), 18.98 metric tonnes were held in the form of gold deposits," the report showed.

Gold Demand Q1 2025: Investment Soars 170% Despite Weak Jewellery and Central Bank Buying - Global gold demand including over-the-counter (OTC) trading rose by 1% year-on-year to 1,206 metric tons in the first quarter of 2025 as investment jumped 170%, the World Gold Council said. Driving up investment demand were massive inflows into physically backed gold exchange-traded funds and 14% growth in demand for gold bars in the first quarter. That offset a 32% slump in demand for coins. However, bar and coin investment in China rose 12% to 124.2 tons, the highest level since the second quarter of 2013's record high, said the WGC. Amid high prices, global gold jewellery consumption, fell 21% to 380.3 tons, the lowest level since the 2020 pandemic. Central banks, another major source of gold demand, cut purchases by 21% to 243.7 tons in the first quarter, the WGC calculated, based on reported purchases and an estimate of unreported buying.

India Gold Trend 2025: Jewellery Demand Hits 15-Year Low as Investment Share Peaks - Share of investment demand in India's total gold consumption will likely rise in 2025, as the price rally curtails jewellery demand but lures investors trying to diversify their portfolios amid geopolitical tensions, the World Gold Council (WGC) said. The country's jewellery demand in the January-March quarter fell 25% from a year ago to 71.4 metric tons, the lowest for that period since 2009. In contrast, investment demand experienced a 7% rise to 46.7 tons, the WGC said in a report. Share of investment demand in total gold demand surged to 39.5% in the first quarter of 2025, the highest in more than a decade, the WGC data showed.
