**Technical Snapshot**

**BUY SILVER MAR @ 88700 SL 88200 TGT 89400-89900. MCX**

**Observations**

Silver trading range for the day is 88160-89930.

Silver gained as the latest inflation data favored the resumption of rate cuts by the Federal Reserve.

Core PCE prices, rose the least in six months in the November print.

Markets are now split between one and two rate cuts for next year.

Concerns of tariffs and expansive fiscal policy by the incoming Trump administration also backed hawkish projections for the Fed.

Gold prices eased on a firmer dollar, as investors sought further clues on the U.S. Federal Reserve's monetary policy for next year after its latest meeting signaled easing would be gradual. Core PCE prices, which are the Fed's preferred gauge of underlying inflation, rose by 0.1% from the previous month in November, below market expectations and the least since May.

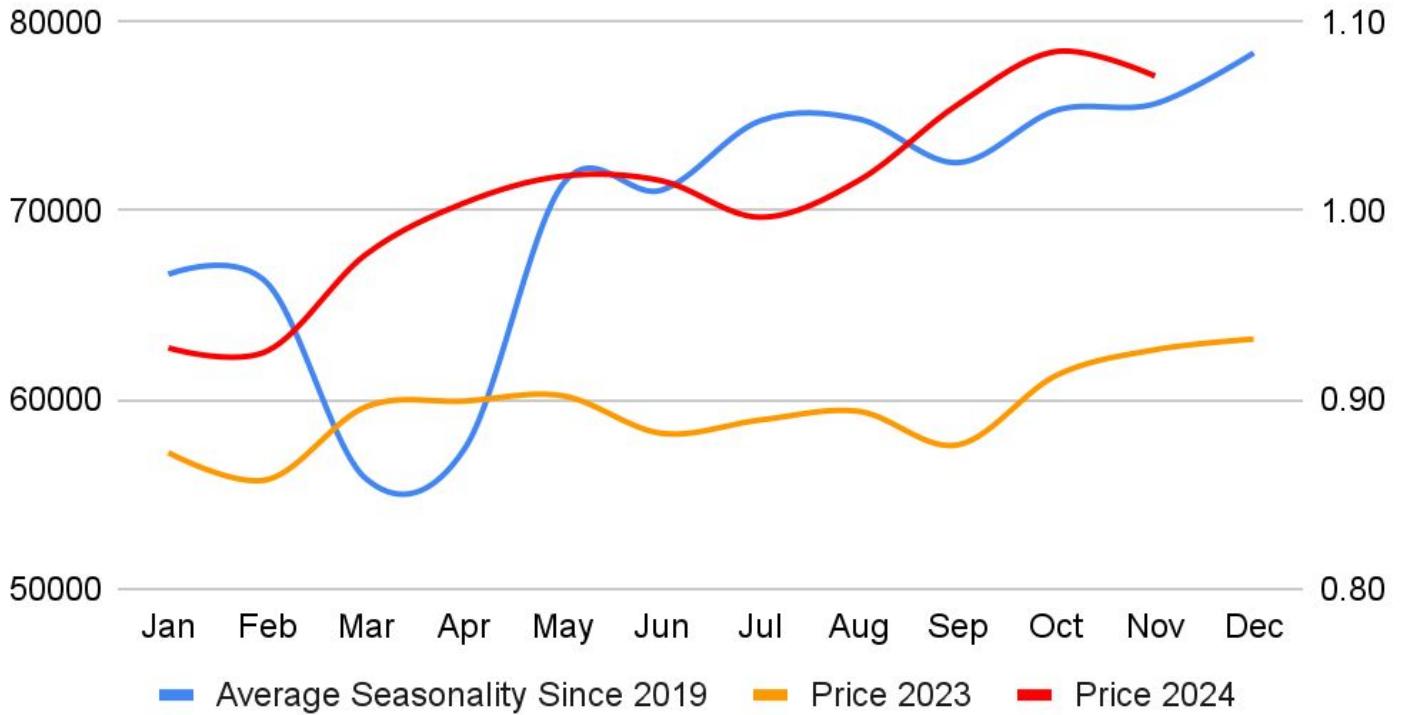

Asia Gold – Price fluctuation dampens demand in India - Gold demand in India remained subdued as volatile prices prompted potential buyers to delay purchases, while higher rates across China are expected to potentially offset upcoming seasonal demand. Indian dealers offered a discount of up to \$8 an ounce over official domestic prices, down from last week's discount of up to \$9. India's gold imports are poised for a sharp slowdown in December, while soaring gold prices have led many Indian families to opt for lightweight and lower-carat jewellery. Gold exports from Switzerland rose in November due to a jump in supplies to India and some revival of deliveries to China and Hong Kong compared with October. High bullion prices also kept demand soft in other Asian regions, including top consumer China, where discounts of around \$5 per ounce to the international price were offered. In Japan, traders quoted a premium of \$1.5 per ounce to discounts up to \$4.5, while in Hong Kong, gold was sold at a \$2.00 premium.

Swiss gold exports rise in November on jump in supplies to India - Gold exports from Switzerland rose in November due to a jump in supplies to India and some revival of deliveries to China and Hong Kong compared with October, Swiss customs data showed. India, the world's second-largest gold consumer and a major importer, is re-examining a surge in gold imports that widened the country's trade deficit to a record in November and pushed the rupee to an all-time low, government sources told. Even if India's total gold imports were miscalculated, exports from Switzerland to India surged to 52.7 tons in November from 11.7 tons in October, indicating very strong demand from buyers ramping up inventories amid November's 3.3%-fall in spot gold prices. India's domestic demand is expected to slow from mid-December to mid-January, considered an inauspicious period for holding weddings and purchasing gold in the Hindu calendar, the World Gold Council said.

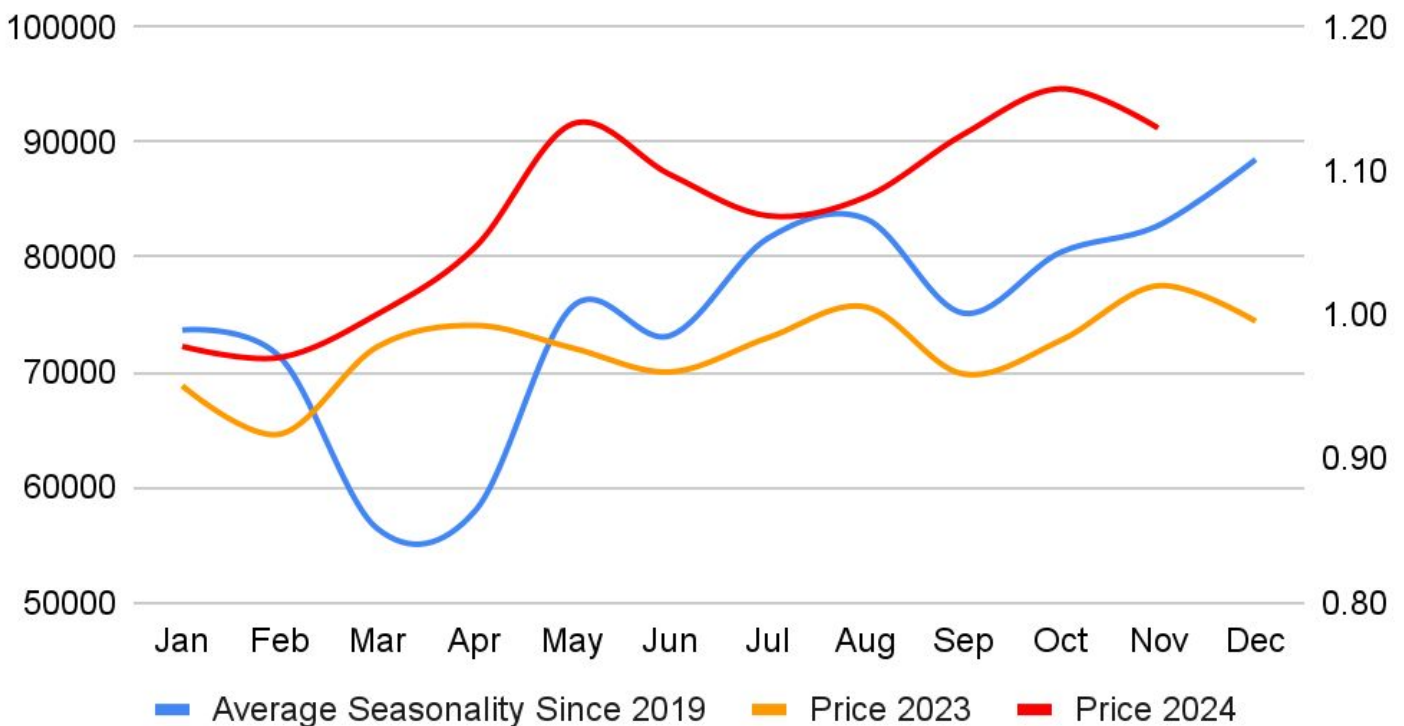

China's central bank resumes gold purchases after six – month hiatus in Nov - China's central bank resumed buying gold for its reserves in November after a six-month pause, official data by the People's Bank of China (PBOC) showed. Resumption of its purchases may support Chinese investor demand which was muted since the PBOC paused its 18-month buying streak in May. China's gold holdings rose to 72.96 million fine troy ounces at the end of November, up from 72.80 million troy ounces a month earlier. The value of China's gold reserves fell to \$193.43 billion at the end of last month from \$199.06 billion at the end of October.

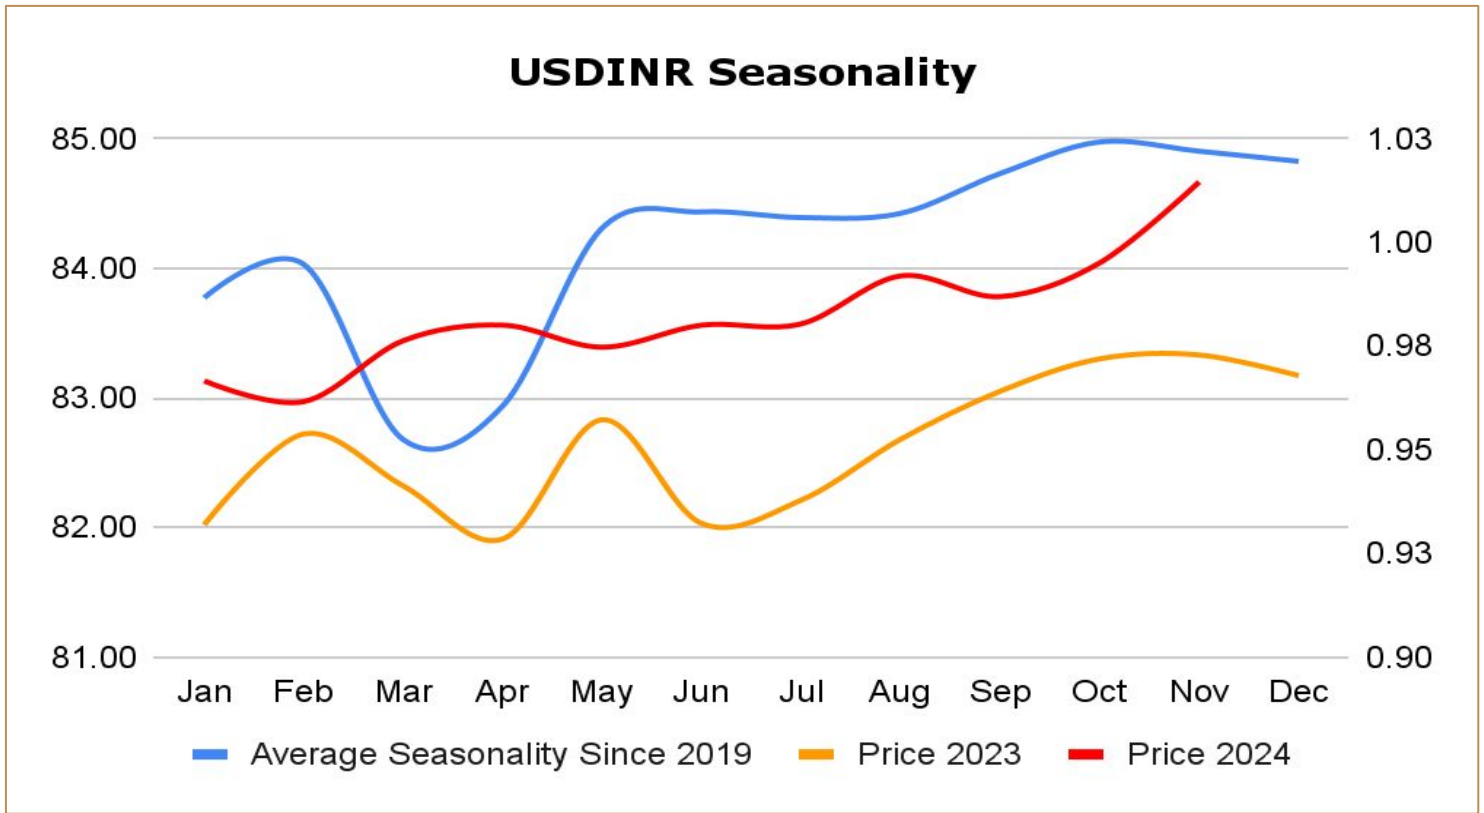

Central bank gold buying skyrockets in October, led by India, Turkey and Poland - Central banks reported 60 tons of net gold purchases in October, the highest amount recorded in 2024, according to the latest figures from the World Gold Council (WGC). The October tally doubled that of the 12-month average with the RBI leading both y-t-d purchases and those reported during the month. India added 27t in October, bringing its total gold purchases to 77t y-t-d. India's y-t-d net buying represents a five-fold increase on its 2023 activity. Emerging market central banks continued to dominate the market with Turkey and Poland adding 72t and 69t y-t-d to their gold reserves, respectively. These three central banks alone account for 60% of total global net purchases reported this year. Several other central banks reported net increases of one ton or more to their gold reserves in October.
