EBITDA in line; PAT miss due to lower-than-expected other income

Valuation and view

- The company is undertaking various projects and initiatives aimed at improving plant efficiencies, expanding its capacities for key products, debottlenecking its existing capacities, capturing a higher market share, and expanding its international presence.
- The stock is trading at ~27x FY27E EPS of INR256 and ~16x FY27E EV/EBITDA. We maintain our earnings and reiterate our BUY rating on the stock. We value the stock at 35x FY27E EPS to arrive at our TP of INR8,975. The upside risk could be a faster-than-expected ramp-up of new projects and products. Downside risks include weaker-than-expected revenue growth and margin compression amid teething issues in new projects.
