TECHNICAL SNAPSHOT

BUY ZINC JUL @ 255 SL 253 TGT 257-259. MCX

OBSERVATIONS

Zinc trading range for the day is 252.1-260.1.

Zinc gained on a weaker dollar but upside capped by fears of tariff-driven demand slowdown.

Trump also warned of an extra 10% levy on BRICS countries for "anti-American" policies

SHFE zinc inventories rose 4% weekly, indicating weaker offtake as factory demand stays sluggish

News you can Use

German industrial production rose more than expected in May thanks to the automotive industry and energy production, the federal statistics office said. Production rose 1.2% over the previous month, while analysts polled had predicted it to be flat at 0%. The German government has approved a tax relief package to stimulate investment and bring the economy back to growth after two years of contraction. Production in May was buoyed by growth of 4.9% in the automotive industry from April and by 10.8% in energy production. The increase in production in the pharmaceutical industry by 10% in May also had a positive impact on the overall result. The less volatile three-month on three-month comparison showed that production was 1.4% higher in the period from March to May than in the previous three months. The statistics office also revised the figure for April to a 1.6% drop in production, more than the 1.4% decline in the provisional figure. German industrial orders fell by 1.4% in May, ending a recent pickup, due to a slump in demand from within the euro zone, data showed .

Confidence among large Japanese manufacturers improved in the three months to June, a central bank survey showed, as firms maintained their bullish long-term spending plans, unfazed by the immediate potential hit from steep U.S. tariffs. However, manufacturers slashed their profit estimates and expect business conditions to worsen three months ahead, the closely watched "tankan" survey showed, suggesting firms see pain from U.S. tariffs deepening later this year. Sentiment among big non-manufacturers worsened slightly as some companies worried about rising labour costs, the impact of higher prices on domestic consumption and softening demand for luxury goods among overseas tourists. The survey suggests the world's fourth-largest economy remains relatively resilient, even with increasing global trade uncertainty. It will be one of the data points the Bank of Japan scrutinises at its next policy meeting on July 30-31. The headline index measuring big manufacturers' business confidence stood at +13 in June, up from +12 in March and beating a median market forecast for a reading of +10. While some firms complained about the hit from U.S. tariffs, others saw profits improve as they passed on rising costs, said a BOJ official briefing reporters on the survey.
