Gold gains on bets President-elect Donald Trump's policies will likely push up inflation. Fed Chair Jerome Powell said that U.S. central bank officials "are going to be cautious about further cuts" after an as-expected quarter-point rate reduction in December. Markets are gearing up for significant U.S. policy shifts in 2025, including potential tariffs, deregulation, and tax changes, as Trump prepares to return to the White House in January.

Discounts widen to three-month high in India; China flips to premium - Gold discounts in India widened to a nearly three-month high this week as rising prices dampened demand, while China shifted to premium as consumers began stocking up for the upcoming Lunar New Year celebrations. Indian dealers offered a discount of up to \$14 an ounce over official domestic prices, up from last week's discount of up to \$8. Jewellers refrained from buying as rising global gold prices, combined with the rupee's depreciation to a record low, significantly increased acquisition costs for Indian buyers. India's gold imports are expected to drop sharply in December on rising prices and in the absence of any major festivals, trade and government officials said. Meanwhile, top consumer China flipped to a small premium for the first time in more than a month. Chinese dealers charged premiums of \$2-\$5 an ounce over global benchmark spot prices, compared to last week's \$5 discount. In Hong Kong, gold was sold at a premium of \$0.2-\$1.90, while dealers in Singapore charged premiums ranging from par to \$2.50.

China's November net gold imports via Hong Kong hit seven-month high - China's net gold imports via Hong Kong in November more than doubled from October, marking the highest level in seven months, Hong Kong Census and Statistics Department data showed. The world's top gold consumer imported a net 33.074 metric tons in November, up 115% from 15.414 tons in October, its highest level since April 2024. Total gold imports via Hong Kong were up 60% at 45.22 metric tons from October, posting its highest level in eight months. Gold exports from Switzerland rose in November due to a jump in supplies to India and some revival of deliveries to China and Hong Kong compared with October, Swiss customs data showed.

Swiss gold exports rise in November on jump in supplies to India - Gold exports from Switzerland rose in November due to a jump in supplies to India and some revival of deliveries to China and Hong Kong compared with October, Swiss customs data showed. India, the world's second-largest gold consumer and a major importer, is re-examining a surge in gold imports that widened the country's trade deficit to a record in November and pushed the rupee to an all-time low, government sources told. Even if India's total gold imports were miscalculated, exports from Switzerland to India surged to 52.7 tons in November from 11.7 tons in October, indicating very strong demand from buyers ramping up inventories amid November's 3.3%-fall in spot gold prices. India's domestic demand is expected to slow from mid-December to mid-January, considered an inauspicious period for holding weddings and purchasing gold in the Hindu calendar, the World Gold Council said.

China's central bank resumes gold purchases after six – month hiatus in Nov - China's central bank resumed buying gold for its reserves in November after a six-month pause, official data by the People's Bank of China (PBOC) showed. Resumption of its purchases may support Chinese investor demand which was muted since the PBOC paused its 18-month buying streak in May. China's gold holdings rose to 72.96 million fine troy ounces at the end of November, up from 72.80 million troy ounces a month earlier. The value of China's gold reserves fell to \$193.43 billion at the end of last month from \$199.06 billion at the end of October.
