Wall Street Closes Lower on Rising Geopolitical Concerns

US markets closed lower on Wednesday as Middle East tensions weighed on investor sentiment, despite encouraging developments on both inflation and trade fronts that provided earlier market support.

Crude oil prices jumped more than 4% to two-month highs after reports emerged that the U.S. was preparing to evacuate its Iraqi embassy amid escalating Middle East security concerns.

Markets opened higher following the Labour Department's closely watched consumer price report, which showed May inflation rising slightly below expectations. The tame reading eased concerns about tariff-induced price pressures that had been weighing on market sentiment.

Additional buying interest emerged after U.S. and Chinese officials announced they had reached a framework agreement in principle to resolve trade disputes between the world's two largest economies.

President Trump confirmed on Wednesday that the U.S.-China agreement has been finalised. Under the terms, China will supply critical magnets and rare earth minerals to the United States, while the U.S. will restore access for Chinese students to American colleges and universities.

Despite these positive developments on inflation and trade, escalating Middle East tensions ultimately overshadowed the encouraging news, leaving markets lower by day's end as investors awaited further clarity on geopolitical developments.

Back home, the Nifty's decisive attempt to breach the 25,200 resistance threshold proved unsuccessful, precipitating a decline of more than hundred points from the session's high of 25,222. A sustained breakout above 25,200 on a closing basis remains imperative for bullish momentum. Conversely, the 25,000-25,050 zone presents immediate technical support.

Key Events

U.S. consumer prices rise by 2.4% in May, slower than anticipated

U.S. consumer prices rose at a slower-than-anticipated annualized pace in May, even as concerns swirled around the potential impact of President Donald Trump's aggressive tariff agenda on inflation. The Labor Department's consumer price index increased by 2.4% year-over-year last month, accelerating from 2.3% in April but cooler than expectations of 2.5%.

On a monthly basis, the measure eased to 0.1%. Economists had projected that the gauge would match April's reading of 0.2%. An uptick in shelter costs underpinned much of May's increase, although this was offset by falling gasoline prices that dragged energy expenses down 1%, the Bureau of Labor Statistics said in a statement.

EIA Crude Oil Inventories Show Slight Recovery; Demand Still Strong

The Energy Information Administration's (EIA) Crude Oil Inventories report, a key indicator of the balance between supply and demand in the US oil market, showed a decrease of 3.644 million barrels for the week. This figure represents a slight recovery from the previous week's decline, but still indicates a robust demand for crude oil. The latest decrease in inventories was less than the forecasted drop of 2.4 million barrels. This suggests that demand for crude oil remains strong, but not as strong as analysts had predicted. Nevertheless, the decrease in inventories is still a bullish sign for crude prices, as it indicates that demand is outstripping supply.

Chart With Interesting Observations

India's Defence Spending Has Declined In Recent Years

- India is the world's fifth-biggest spender on defense. India's defense spending is \$86.1 billion, which is 2.3% of its GDP in 2024 and 2.5% in 2015.
- India's defense spending as a share of GDP has decreased in recent years. India sets aside around 2% of its GDP for defence, slightly more than China's 1.6%, which may seem adequate at first glance. But in absolute terms, China's defence budget is projected at \$314bn, nearly four times that of India's.
- The United States spends \$997 billion and Ukraine has seen a significant hike in its defense spending.

Global Defence Spending

India's Defence Spending Has Yet to Realise its Potential

India is the world's fifth-biggest spender. Like many countries its defence spending as a share of GDP has come down in the past few years. For obvious reasons Ukraine has seen a significant hike
