Margin pressure in UCP dampens robust revenue growth RAC's market share dips 50bp QoQ to 20.5% as of Dec'24

CMP: INR1,269

Voltas (VOLT)'s 3QFY25 EBITDA was largely in line with our estimate as higher-than-estimated revenue was offset by lower-than-estimated margin in UCP (5.9% v/s estimated 7.8%). Revenue grew 18% YoY to INR31.1b (10% beat), while EBITDA surged 6.7x YoY to INR2.0b, albeit on a low base (in line). OPM jumped 5.3pp YoY to 6.4% (-30bp vs. our estimate). It reported a profit of INR1.3b (-14% vs. est. due to lower other income) vs. a loss of INR304m in 3Q.

TP: INR1,640 (+29%)

- Management indicated that the pressure on UCP's margins is due to its focus on gaining market share, which involved significant spending on advertising, promotions, and in-store demonstrations. It aims to retain the UCP segment's margin in the high single digit in 4QFY25. With the upcoming summer season, management remains optimistic about strong demand across product categories, aided by positive consumer sentiment.
- We cut our EPS estimates by 8% for FY25 and 14% for FY26/FY27 each, considering lower margin in the UCP segment (reduced segment margin by 70bp through FY25-27) and higher loss in Voltbek until FY27 as focus on network expansion/branding will continue. We **reiterate our BUY** rating on the stock with a revised SoTP-based TP of INR1,640 with 50x Dec'26E EPS (earlier 55x) for the UCP segment, 25x Dec'26E EPS for the PES and EMPS segments, and INR22/sh for Voltbek (earlier INR38/sh).

UCP's margin contracts 2.4pp YoY and 1.5pp QoQ to 5.9% (est. 7.8%)

- VOLT's consol. revenue/EBITDA stood at INR31.1b/INR2.0b (up 18%/7x YoY and up 10%/4% vs. our estimate) in 3QFY25. Adj. PAT stood at INR1.3b vs. a loss of INR304m in 3QFY24 (-14% vs. our estimate). Gross margin improved 1.8pp YoY (down 2.5pp QoQ) to ~23%.
- Segmental highlights: a) **UCP** Revenue was up 19% YoY at INR17.7b, while EBIT declined 15% YoY to INR1.0b. EBIT margin contracted 2.4pp YoY to 5.9%; b) **EMPS** Revenue rose 21% YoY to INR11.9b. It reported an EBIT of INR567m compared to the loss of INR1.2b in 3QFY25; c) **PES** Revenue declined 16% YoY to INR1.3b, and EBIT declined 26% YoY to INR368m. EBIT margin contracted 3.8pp YoY at ~28.4%.
- In 9MFY25, VOLT's revenue/EBITDA/Adj. PAT stood at INR106.5b/INR7.8b/INR6.9b (up 29%/176%/191% YoY). OPM improved 3.9pp YoY to 7.4%. In 4Q, we estimate revenue will decline 1% YoY, while EBITDA/PAT will rise 61%/122%, albeit on a low base due to higher losses in the EMPS segment in 4QFY24.

Highlights from the management commentary

- The revenue mix in the UCP segment was 61% from RAC, followed by 19% from commercial airconditioning, 15% from commercial refrigerator, and the remaining 5% from air cooler & water heater.
- VOLT did not implement any price hikes in 3Q, as it is a lean period for ACs, and the focus remained on increasing sales volume. If commodity prices and forex pressures persist, the company may explore value engineering to offset costs while considering the need for potential price adjustments.

Valuation and view

■ VOLT's operating performance was in line; however, margin contraction and a dip in market share in the UCP segment disappointed. We expect VOLT's revenue/EBITDA/adj. PAT to report a CAGR of 12%/20%/23% over FY25-27. We estimate OPM to be at 7.3%/7.9%/8.5% in FY25/FY26/FY27.

■ We estimate UCP's margin at 7.6%/8.0%/8.5% for FY25E/26E/27E vs. the previous estimate of 8.3%/8.7%/9.2%. We **reiterate our BUY rating** on the stock with a revised TP of INR1,640 (earlier INR2,190) based on SoTP with 50x Dec'26E EPS (earlier 55x) for the UCP segment, 25x Dec'26E EPS for the PES and EMPS segments, and INR22/share for Voltbek (earlier INR38/share).

Highlights from the management commentary Macro trends

- The global economy experienced stable but subdued growth, with a projected annual growth rate of 3.1%. The US saw upgrades in its economic forecasts, while other advanced economies, particularly in Europe, faced downgrades due to geopolitical tensions and financial market volatility.
- In India, the economy continued to grow, driven by strong performance in the services and agricultural sectors. However, inflationary pressures, particularly in food prices, posed challenges, leading to a cautious monetary policy stance by the RBI. Despite global uncertainties, India's economic fundamentals remain strong, positioning it as a key player in the global economic landscape.

Unitary Cooling Products

- The third quarter is traditionally a lean period for cooling products. Demand during this period is primarily driven by the festive season or a second summer in the country. An anticipated strong summer demand and support from In-shop demonstrators helped it to achieve better performance for all products with the RAC category experiencing good demand. Both window and split ACs experienced healthy growth and VOLT's market share in the RAC segment stood at 20.5% exit-Dec'24.
- The revenue mix in the UCP segment was 61% from RAC followed by 19% from commercial airconditioning, 15% from commercial refrigerator, and the remaining 5% from air cooler & water heater. The pressure on UCP margins is due to the company's focus on gaining market share, which involves significant spending on advertising, promotions, and in-store demonstrations. It aims to deliver a high single-digit margin in 4QFY25.
- The company did not implement any price hikes in 3Q, as it is a lean period for ACs, and the focus remains on increasing sales volume. If commodity prices and forex pressures persist, the company may explore value engineering to offset costs, while considering the need for potential price adjustments.
- The commercial refrigeration (CR) segment faced challenges. While all the CR product categories reported moderate growth, sales push to liquidate inventory and reduced capex by customers led to a dip in margins. Growth was driven by

30 January 2025

- higher sales in Visi coolers, Combo, and glass top freezers. Cold Room portfolio is gaining traction with a strong order pipeline. However, low production rampup in the new factory added costs. With fresh orders expected, the outlook for CR products remains positive in the coming months.
- The air cooler segment saw strong growth despite the off-season. VOLT's market share in air coolers reached 11.1% in exit-Sep'24, making it the No. 2 brand.
 Quantity tie-ups with distributor and sub-dealer schemes for the season contributed to strong performance in the both Air cooler and Water heaters segment.
- The commercial airconditioning segment continued steady performance, driven by strong sales of VRF and ducted ACs. Margin-accretive products, value engineering, and AMC jobs boosted profitability. A strong order pipeline for retrofit jobs and a positive conversion of product sales to AMC jobs are expected to sustain consistent growth in this business.
- Rising commodity prices and USD-INR depreciation affected profitability, but cost control measures helped maintain stable margins. Investments in BTL advertising yielded positive results, while consumer financing schemes drove strong sales growth. Value engineering initiatives further supported profitability.
- The newly established AC facility in Chennai continues to ramp up as planned and is gearing up for the season. It anticipates operational efficiency to boost business in the coming months.

Electro-Mechanical Projects and Services

- The project execution remained strong across verticals and geographies. Focus on completion certification and various project management initiatives boosting profitability. The total order book for the segment reached INR68.2b, ensuring a strong pipeline for future execution.
- Domestic projects expanded their order book, maintaining a positive outlook. New orders worth INR14.4b were secured in 9MFY25, bringing the total order book to INR48.6b.
- In the international projects sector, operations in the UAE and Saudi Arabia continued to perform well. It remains focused on collections. The international order book stood at INR19.6b, mainly from the UAE and Saudi Arabia. In 3Q, no new international orders were taken. There have been no cancellations of orders. The focus in international business is on consolidation, ensuring good KYC practices, and only executing profitable projects. This strategy continues to mitigate any potential risks from past issues.
- The company has adopted a two-fold strategy for its international business 1) focusing on collecting outstanding payments from previous customers, as some exposures were higher than expected; 2) the company is concentrating on expanding its business in key geographies, specifically the UAE and Saudi Arabia, where it is executing a mix of large and small projects (10-12 in total). It plans to selectively pursue more projects in these regions, provided they are funded by reliable clients.

MOTILAL OSWAL

PES Segment

- The mining and construction vertical saw strong top-line growth, driven by operations, maintenance jobs, and power screen machine sales. However, revenue mix and challenges in job renewals at healthy margins impacted profitability growth. Extended and new contracts in Mozambique continue to support stable performance and growth in the segment.
- In the textile industry, declining cotton and yarn exports, along with low capital expenditure, led to revenue decline in the vertical. Demand and margins for the agency business remained under pressure. However, after-sales and post-spinning segments showed positive performance, partially offsetting the impact.

Voltas Beko

- Voltbek Home Appliances continued its strong performance with consistent MoM growth. Despite the industry seeing minimal growth in refrigerators and single-digit growth in washing machines, Voltbek achieved a remarkable volume growth of 59% in 3Q and 56% over 9MFY25. Market share across categories improved, surpassing 10% during the quarter. As of Nov'24, the washing machine market share rose to 8.3% and refrigerators to 5.1%. The semi-automatic washing machine segment exceeded expectations, securing the No. 2 position with a 16.7% exit market share. Additionally, Voltbek's dishwasher category was recognized as a market leader in e-commerce.
- Voltbek aims to fully localize refrigerator manufacturing in India, reinforcing its Made-in-India brand identity. Premiumization across product categories and an extensive washing machine lineup will drive market share growth.
- Increased volumes, value engineering, and cost efficiencies have helped to improve margins and reduce losses.
- Market expansion efforts include distribution growth, adopting channel-specific strategies, and strengthening e-commerce and omnichannel presence.
 Engagements with Quick Commerce platforms would further support growth...
- The company had aimed to reach EBITDA breakeven by the end of the year. Though; there has been 3-4pp increase in gross margin and the company is gaining market share; spends towards brand building and distribution increase resulted in the company not meeting his guidance.

Capex guidance

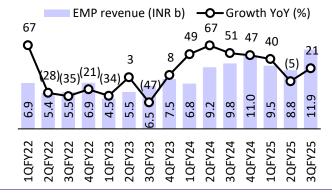

It has earmarked capex of INR4.0-4.5b for compressor manufacturing and ramping up production from 1m to 2m units over next 12 to 18 months. While investments in other machinery, such as injection molding, sheet metal work, copper tubes, and heat exchangers, will be completed in the next 10 to 12 months, Commercial finalization (capex of INR2.5b) has not happened as the company is looking for some technological collaboration.
