Technical Snapshot

SELL GOLD AUG @ 97400 SL 97800 TGT 96800-96500. MCX

Observations

Gold trading range for the day is 95770-99210.

Gold prices eased following a stronger-than-expected U.S. jobs report.

Pressure also seen after a phone call between Trump and Xi, agreeing to resume stalled trade negotiations.

The U.S. economy added 139,000 jobs in May, beating expectations of 130,000.

Gold discounts in India widened to their highest levels in more than a month, up to \$56.

Technical Snapshot

SELL SILVER JUL @ 106000 SL 107000 TGT 105000-104000. MCX

Observations

Silver trading range for the day is 104290-106720.

Silver prices surged, driven by strong industrial demand and ongoing global supply deficits.

The gold-silver ratio dropped to ~94, down from April's peak of 105, signaling silver's relative outperformance.

Expectations of a September Fed rate cut have strengthened amid weak U.S. data.

Silver is facing its fifth consecutive year of a structural market deficit.

Gold prices eased as a stronger-than-expected US jobs report eased fears of a sharp labor market downturn amid President Donald Trump's escalating tariff war. The US economy added 139,000 jobs in May—outpacing forecasts of 130,000—while April's figure was revised down to 147,000. The unemployment rate held steady at 4.2%, and wage growth came in at 3.9%, above the expected 3.7%, signaling underlying resilience in the labor market.

Indian dealers offer steeper discounts as price rally dulls demand - Gold discounts in India widened to their highest levels in more than a month, as a rally in domestic prices to near-record highs weighed on demand, while elevated rates also dampened buying across other major Asian hubs. The spike in prices forced Indian dealers to offer discounts of up to \$56 an ounce below official domestic prices, which include a 6% import duty and 3% sales tax, up from \$31 last week. Meanwhile, dealers in top gold consumer China charged premiums of \$10-\$14 an ounce over the global benchmark spot price. Last week, bullion changed hands at par to a \$15 premium. In Hong Kong, gold was sold at a premium of \$0.30 to \$1.30, while in Singapore gold traded between at-par prices and a \$2.50 premium. In Japan, bullion traded anywhere between a discount of \$0.5 and a \$0.5 premium over spot prices.

Swiss monthly gold imports from the U.S. hit highest since at least 2012 - Gold imports to Switzerland from the United States jumped to the highest monthly level since at least 2012 in April after the exclusion of precious metals from U.S. import tariffs, Swiss customs data showed. Switzerland, the world's biggest bullion refining and transit hub, and Britain, home to the world's largest over-the-counter gold trading hub, registered massive outflows to the U.S. over December-March as traders sought to hedge against the possibility of broad U.S. tariffs hitting bullion imports. The Swiss data showed that gold imports from the U.S. rose to 63.0 metric tons in April from 25.5 tons in March. It was the highest in monthly data going back to early 2012. Switzerland's total gold exports fell by 31% month on month in April with gold deliveries to the U.S. dropping to 12.7 tons from 103.3 tons in March. Exports to the UK rose, indicating that gold was also coming from the U.S. back to London vaults via Swiss refineries.

Share of gold in India's forex reserves doubles in four years, central bank report shows - The share of gold held by India's central bank in its foreign exchange reserves has doubled in the last four years as on March-end, a report by the Reserve Bank of India showed on Monday. In dollar value terms, the share of gold in the total foreign exchange reserves increased to about 11.70% by end-March, from 9.32% as at end-September 2024 and 5.87% as on end-March 2021, the central bank's half year forex reserves report said. As of end-March, the RBI held 879.59 metric tonnes of gold, compared to 854.73 metric tonnes at the end of September. The proportion of gold held domestically rose to 511.99 metric tonnes as of March 31, against 510.46 metric tonnes at September-end, the RBI said. "While 348.62 metric tonnes of gold were kept in safe custody with the Bank of England and the Bank for International Settlements (BIS), 18.98 metric tonnes were held in the form of gold deposits," the report showed.

Gold Demand Q1 2025: Investment Soars 170% Despite Weak Jewellery and Central Bank Buying - Global gold demand including over-the-counter (OTC) trading rose by 1% year-on-year to 1,206 metric tons in the first quarter of 2025 as investment jumped 170%, the World Gold Council said. Driving up investment demand were massive inflows into physically backed gold exchange-traded funds and 14% growth in demand for gold bars in the first quarter. That offset a 32% slump in demand for coins. However, bar and coin investment in China rose 12% to 124.2 tons, the highest level since the second quarter of 2013's record high, said the WGC. Amid high prices, global gold jewellery consumption, fell 21% to 380.3 tons, the lowest level since the 2020 pandemic. Central banks, another major source of gold demand, cut purchases by 21% to 243.7 tons in the first quarter, the WGC calculated, based on reported purchases and an estimate of unreported buying.
