Increased investments dents margin; maintain NEUTRAL

Result Synopsis

Crompton has reported inline revenue with ECD growing at 6.1%, while lighting and Butterfly products registering decline of 13% and 14% respectively. ECD growth was on back of strong growth in Appliances which grew by 19% yoy, while its core category of Fans grew by 5%. Lighting segment was impacted by low consumer demand. Gross margins at 30.8% have been lower as increased cost on shifting to BEE ratings in Fans have not been passed on, while operating margins were lower as company continues to invest in its long-term strategic initiatives like R&D innovation center, increased A&P spends and investing in alternate channels. On Butterfly front company has managed to improve its gross margins, while higher brand investments in Butterfly have impacted its operating margins to deliver shareholders return. Its strategy includes 1) Protecting and growing the core business; 2) Growing strongly in kitchen space; 3) transform the lighting business and 4) Foray into new segments. We remain Neutral on the stock as implementation of Strategy 2.0 will require higher brand investments which will result in lower margins in near to medium term.

We now feel recent initiatives taken by CROMPTON will require sustained efforts and investments. Considering increased investments, we have trimmed our margin estimates for FY24 and FY25. We now bake in FY22-24E Revenue/EBITDA/PAT CAGR of 12%/15%/21% and arrive at our PT of Rs 327 valuing the company at 30x FY25EPS and maintain Neutral rating.
