GOLD CHART (Hourly)

Gold market is staging strong recovery as crude prices has decreased following pause in fighting between US and Iran. Now that $4000 support is intact, gold needs to breach $4200 for $4380 and above levels to target. In MCX, buy on dips should be the strategy till 140000 is not breached. On the higher side, 146000 seems to be the target
