AGRI PICKS

A Daily Report on Agriculture Commodities 26 March 2024

MARKET NEWS/UPDATES

- The Solvent Extractors' Association of India has urged the government to direct agencies to set up procurement centres at major mandis to procure mustard seed at the minimum support price. Such a move will ensure market stability and the welfare of farmers, the association's president, Ajay Jhunjhunwala, wrote in the letter. Currently, market prices of mustard are below the minimum support price of 5,650 rupees per 100 kg, and this necessitates immediate government intervention, the association said. On Thursday, prices in Jaipur were 5,475-5,500 rupees per 100 kg, according to traders. Minimum support price remains a concern, as the oilseed harvesting season is underway, SEA said. "Despite reaching a peak of 100 lakh (10 mln) hectares in acreage during the current season, mustard cultivation faces stagnation due to declining prices," it said. India has maintained a policy of free export of oilseeds, oilmeals, and edible oil alongside unrestricted import capabilities that affect the domestic market negatively. Excess imports have led to surplus inventory, posing a challenge to both the government and the industry. "Import dependency for edible oils continues to escalate annually, with last year witnessing imports of 165 lakh tonnes (16.5 mln tn) valued at Rs. 1.4 lakh crores (1.4 trln rupees)," he SEA said.
- Farmers in the country have sown summer crops across 4.1 mln ha as of today, down nearly 3% from a year ago, data from the agriculture ministry showed. The acreage under crops at this time last year was 4.2 mln ha. Acreage under pulses was up 28% on year at 642,000 ha with sowing of urad rising 27% from last year to 192,000 mln tn. The acreage under moongalso rose 28% to 433,000 ha from last year. Rice acreage rose 10% on year to 2.8 mln ha. Acreage of oilseeds was at 671,000 ha, up 10% from the previous year. The government has not yet updated the acreage for coarse cereals such as maize, jowar, and ragi, in this week's crop report for summer.
- The National Commodity and Derivatives Exchange of India has decided to advance the expiry date of some farm futures contracts as voting for the general election is scheduled at the basis centres of the contracts on the earlier expiry date, it said in a release. Physical markets in these centres will remain closed on the said date due to the general election, the exchange said. Futures contracts of bajra, barley and groundnut, which were to expire on Apr 19, will now expire on Apr 18, the exchange said, as voting in Jaipur, Sriganganagar and Bikaner, the respective basis centres, is scheduled on Apr 19. "Accordingly, the staggered delivery period for the said contracts shall commence from April 10, 2024," the exchange said. Elections to constitute the 18th Lok Sabha will begin on Apr 19 and will be held over seven phases till Jun 1. Votes will be counted on Jun 4
- India's exports of fruits, vegetables, and spices rose in value terms in February on a year-on-year basis, while those of oilmeals declined during the same period, according to data released by the commerce ministry. India's exports of fruits and vegetables were up 13% on year in February at \$407 mln. Exports of spices rose 15% on year to \$431 mln in the same period. Rice exports were a tad up by 2% on year to \$1.05 bln, and exports of other cereals fell 82% on year to \$21 mln. Gems and jewellery exports fell 11% on year to \$3.2 bln in February. Exports of meat, dairy, and poultry products rose 38% on year to \$422 mln. Exports of oilmeals fell 25% on year to \$171 mln and oilseed exports rose 38% on year to \$146 mln. Coffee exports rose 46% on year to \$146 mln and tea exports gained 38% to \$80 mln, according to the data.
- The area under rabi crops in Andhra Pradesh was at over 1.68 mln ha as of today, down 9.9% from a year ago, according to state government data. So far this season, 73% of the targeted area of 2.3 mln ha has been used to sow crops, the data showed. The acreage of Bengal gram in the state was down 9% on year at 301,000 ha, the data showed. The area under black gram, also known as urad, was down 6% on year at 266,000 ha, compared to 282,000 ha a year ago, the data showed. The area under pulses was down 7% on year at 669,000 ha. Bengal gram, black gram, maize, and peanuts are the major rabi crops grown in the state. Farmers in Andhra Pradesh have sown paddy over 564,000 ha, down from 652,000 ha a year ago. The targeted area for the crop in the current season is 820,000 ha. Jowar's acreage was up at 96,000 ha, compared to 58,000 ha a year ago, the data showed. Maize was sown over 152,000 ha, lower than 236,000 ha a year ago. The area under food grains was down at 1.49 mln ha from 1.67 mln ha a year ago. The area under coarse grains was at 260,000 ha, down from 303,000 ha a year ago. Oilseed acreage fell to 104,000 ha from 120,000 ha a year ago, according to the report. The target for oilseeds is 142,000 ha for the current season. Groundnut was sown over 68,000 ha, lower than 93,000 ha a year ago. As of Wednesday, the water level in major reservoirs in the state was 205.16 bln cu ft, down from 376.90 bln cu ft a year ago, according to government data.
- The Cotton Association of India has estimated the country's cotton output in 2023-24 (Oct-Sep) at 30.9 mln bales (1 bale = 170 kg), down 5.2% from last year's output, according to a press release. The association updates its estimates almost every month, based on information received from members of associations in 11 cotton-growing states and from other trade sources. Production of cotton in the north zone, which comprises Punjab, Haryana, and Rajasthan, is estimated at 4.6 mln bales, up 300,000 bales from last year. As of Feb 29, 3.9 mln bales of cotton had been produced in this zone. The estimate for the central zone, which comprises Gujarat, Maharashtra, and Madhya Pradesh, is at 18.5 mln bales, down from 19.5 mln bales last year. As of Feb 29, 12.5 mln bales of cotton had been produced in this zone. The estimate for the south zone is also seen lower at 7.3 mln bales, from 7.5 mln bales last year. As of Feb 29, 5.8 mln bales of cotton were produced in this zone. Other states account for the rest of the output. The opening stock for the season starting October was estimated at 2.9 mln bales, the association said. The total supply of cotton for the 2023-24 season is estimated at 36 mln bales, down from 35.5 mln bales a year ago. The association has estimated imports in 2023-24 at 2.04 mln bales, higher than the 1.25 mln bales imported in 2022-23. The association has estimated domestic consumption in 2023-24 at 31.7 mln bales, up from 31.1 mln bales in the previous year. It estimated exports at 2.2 mln bales, up from 1.6 mln bales during the previous cotton season. Until Feb 29, the consumption is estimated at 13.8 mln bales.

Trading signals is prepared based on statistical analysis and is purely on technical indicators like exponential moving averages (EMAs), Relative strength Index (RSI) and stochastic, putting altogether provides an idea about intraday, short, medium and long term trend of the commodities. It also signals the risk of an investment in both agricultural and global commodities as well. Based on all listed indicators above, investors were able to fix a daily, near-term and long term trends. However, must be cautious especially for real-time intraday traders/jobbers.

Trading Strategy based on EMA

Trading strategies mentioned in the report is mainly based on 3, 5, 13, 22, 45 & 60 days exponential Moving Averages. 3 and 5 day EMA has taken for developing Intraday trading strategy, 13 days and 22 days EMA for Short term and Medium term, while 45,60 days EMA for Long term. Here, we use EMAs for POSITIVE and NEGATIVE signals. POSITIVE signal is formed when a short-term moving average (eg: 30 day) crosses from below a longer-term average (eg: 60 day), which is considered bullish. Likewise, NEGATIVE signal is formed when a short-term moving average (eg: 30 day) crosses from above a longer-term moving average (eg: 60 day), which is considered bearish.

RISK DISCLOSURE

Geojit Financial Services Limited and/or its Affiliates and its officers, directors and employees including the analyst/ authors shall not be in any way be responsible for any loss or damage that may arise to any person from any inadvert-ent error in the information contained in this report. Investors may lose his/her entire investment under certain market conditions so before acting on any advice or recommendation in these material, investors should consider whether it is suitable for their particular circumstances and, if necessary, seek professional advice. This report does not take into account the specific investment objectives, financial situation/circumstances and the particular needs of any specific person who may receive this document. The user assumes the entire risk of any use made of this information. Each recipient of this report should make such investigation as it deems necessary to arrive at an independent evaluation of an investment in the Commodity/(ies) referred to in this report (including the merits and risks involved). The price, volume and income of the investments referred to in this report may fluctuate and investors may realize losses that may exceed their original capital.

The investments or services contained or referred to in this report may not be suitable for all equally and it is recommended that an independent investment advisor be consulted. In addition, nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to individual circumstances or otherwise constitutes a personal recommendation of GFSL.

REGULATORY DISCLOSURES:

Geojit Financial Services Limited's Associates consists of companies such as Geojit Technologies Private Limited (GTPL - Software Solutions provider), Geojit Credits Private Limited (GCPL- NBFC Services provider). In the context of the SEBI Regulations on Research Analysts (2014), Geojit Financial Services Limited affirms that we are a SEBI registered Research Entity and we issue research reports /research analysis etc that are prepared by our Research Analysts. We also affirm and undertake that no disciplinary action has been taken against us or our Analysts in connection with our business activities.

In compliance with the above mentioned SEBI Regulations, the following additional disclosures are also provided which may be considered by the reader before making an investment decision:

1. Disclosures regarding Ownership:

GFSL confirms that:

It/its associates have no financial interest or any other material conflict in relation to the subject Commodity futures covered herein at the time of publication of this report.

Further, the Research Analyst confirms that:

He, his associates and his relatives have no financial interest in the subject Commodity futures covered herein, and they have no other material conflict in the subject Commodity at the time of publication of this report.

2. Disclosures regarding Compensation:

During the past 12 months, GFSL or its Associates have not received any compensation or other benefits from any entity/ third party in connection with the Commodity futures mentioned in this report.

3. Disclosure regarding the Research Analyst's connection with the Commodity futures:

It is affirmed that I, Anu V Pai, employed as Research Analyst by GFSL and engaged in the preparation of this report have no substantial ownership or financial interest over any Commodity futures mentioned in the report.

4. Disclosure regarding Market Making activity:

Neither GFSL nor its Research Analysts have engaged in market making activities for the subject Commodity futures. Copyright in this report vests exclusively with GFSL
