Gold prices surged to a new all-time high driven by expectations of easier US monetary policy and intensifying geopolitical risks. Investors are increasingly confident that the Federal Reserve will deliver two quarter-point rate cuts next year as inflation moderates and labor market conditions soften. Focus has now shifted to the second estimate of US third-quarter GDP, which may further shape policy expectations. Safe-haven demand has also strengthened amid escalating tensions between the US and Venezuela following multiple oil tanker seizures. Supported by strong central bank purchases and steady ETF inflows, gold has rallied nearly 70% this year, its strongest performance since 1979.

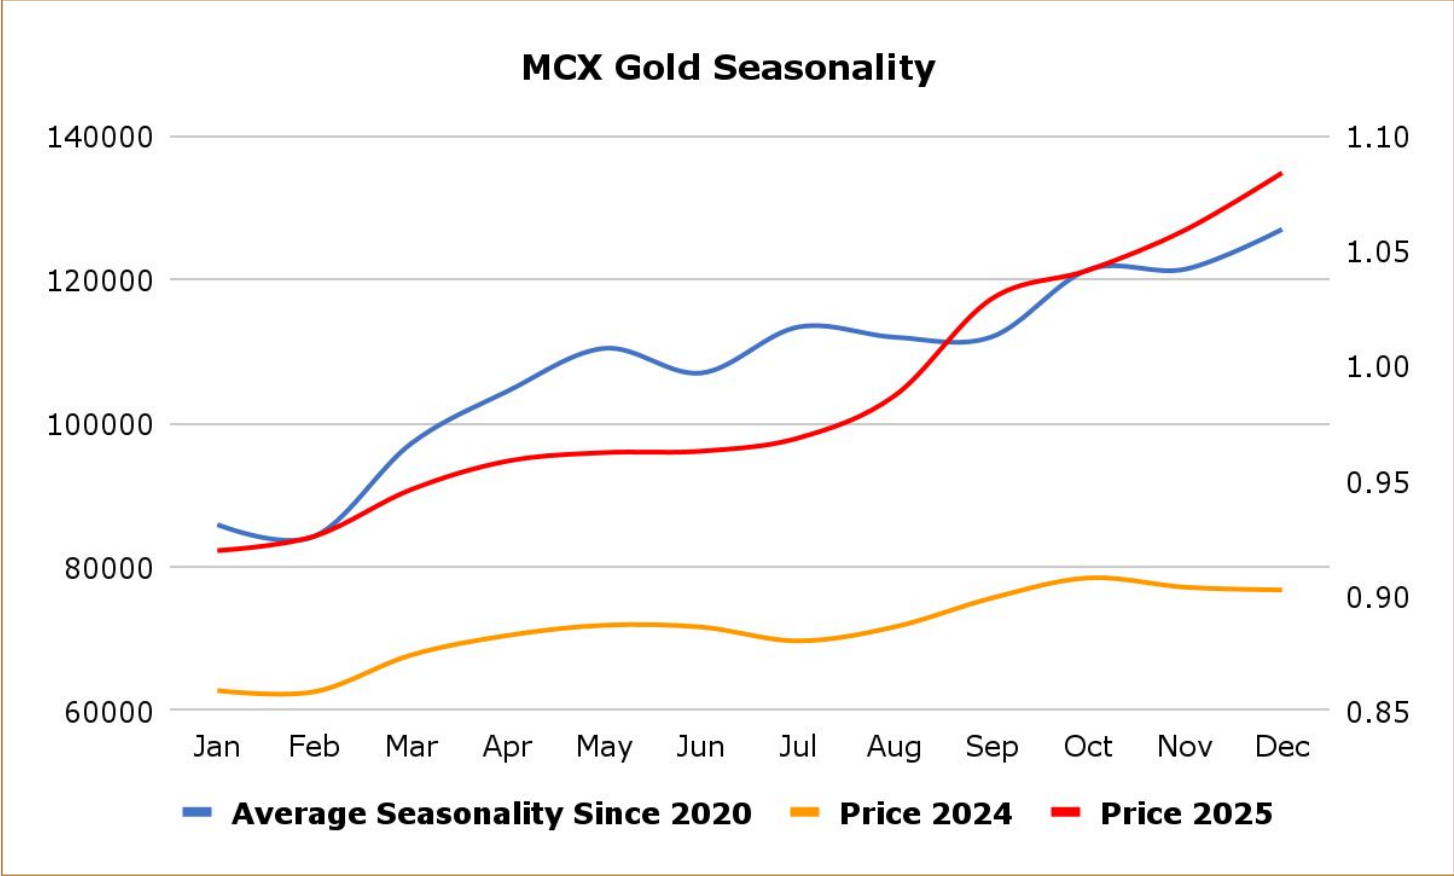

Gold rally hits demand as India's discounts widen, China's reach five-year high - Gold discounts in India widened to a more than one-month high as record bullion prices dampened retail demand even in peak wedding season, while markdowns in China reached their highest since late August 2020. Indian dealers were offering discounts of up to \$37 per ounce to official domestic prices – up from last week's discounts of \$34. In top consumer China, bullion traded at discounts of up to \$64 to global benchmark spot price, their highest in over five years, according to data. Chinese discounts for physical gold had reached a record of \$87.50 in August 2020 as retail appetite plummeted during the COVID-19 pandemic. In Singapore, gold was sold anywhere from a discount of \$0.5 to a \$2.2 premium, while in Hong Kong it traded from par to a \$1.8 premium to spot prices. In Japan, bullion traded at discounts of up to \$6.0 to a \$0.5 premium over spot prices as many retail shops were out of gold bar stocks, though there could still be good buying demand if dips arise.

Swiss gold exports drop in November as shipments to India plunge - Gold exports from Switzerland fell 15% month on month in November as shipments to India dropped to their lowest since February, Swiss customs data showed. Demand in India has been affected by a price rally which sent bullion to a record high of \$4,381 per troy ounce in October. The Swiss data showed that gold exports to India fell to 2 metric tons in November from 26 tons in October, while supplies to China, another major bullion consumer, climbed to 12 tons from 2 tons. Gold exports from Switzerland, the world's biggest bullion refining and transit hub, to Britain, home to the world's largest over-the-counter gold trading hub, jumped to 45 tons last month, the highest since June, from 9 tons as bullion kept coming back from U.S. stocks.

India's Gems, Jewellery Exports In November Grew 20% To \$2.5 Billion - India's gems and jewellery exports grew 19.64% to \$2.5 billion in November compared to the same month last year, according to the Gem and Jewellery Export Promotion Council (GJEPC). Total exports stood at \$2.1 billion during the corresponding month of the previous year, according to GJEPC data. The overall exports of gems and jewellery were flat at \$18.86 billion during April-November period as compared to \$18.85 billion in the same period of last year. The overall gross export of cut and polished diamonds was at \$919.74 million in November as compared to \$666.34 million in the same period of the previous year. Provisional gross export of Polished Lab Grown Diamonds witnessed a 10.55% rise in November at \$76.09 million over \$68.83 million a year ago.

Global physically backed gold ETFs registered their sixth consecutive monthly inflow, adding US\$5.2bn in November. Although flows narrowed compared to previous months, they sit well above the 2024 monthly average of US\$292mn. Total assets under management (AUM) reached US\$530bn, up 5.4% in the month and marking another month-end peak, thanks to continued inflows and a stronger gold price. Holdings rose by 1% to 3,932t, also the highest month-end value ever. Notably, global gold ETF inflows remain on track for their strongest year ever. November's trend was mainly driven by Asia, where investors continued to buy gold ETFs at pace. North America's inflow streak extended to six months, adding US\$1bn in November. Flows were relatively subdued compared to the record buying of previous months, reflecting the offsetting forces that have shaped gold ETF investor sentiment.
