- Dr Reddy's Labs (DRRD) delivered lower-than-expected 4Q performance with a 4%/32%/43% miss on sales/EBITDA/PAT. These misses were after adding shelf-stock adjustments related to g-Revlimid. Reduced sales in North America (NA) considerably hurt the performance for the quarter.
- After three years of robust growth in NA sales over FY22-25, FY26 witnessed a 23% YoY decline in sales, led by increased competition in g-Revlimid. DRRD had 25 launches in FY26, offsetting the adverse impact to some extent.
- Pricing pressure in generics dragged the EU revenue, and lower volume off-take in CIS countries hit the overall performance for the quarter.
- Enhanced focus on innovative products and higher marketing efforts led to considerable industry outperformance in the domestic formulation (DF) segment in 4QFY26.
- The NRT portfolio grew at a better-than-expected rate of 16% YoY for 4Q.
- We cut our earnings estimate by 25%/8% for FY27/FY28, factoring in 1) reduced profitability post-competition in g-Revlimid, 2) delay in semaglutide launches in certain markets like Brazil/Canada, 3) pricing pressure in the generics portfolio, and 4) lower operating leverage. We value DRRD at 18x 12M forward earnings to arrive at our TP of INR1,195.
- DRRD's earnings decelerated in FY25 and FY26 after recording a robust show during FY20-25. We expect the earnings to further decline in FY27 due to a lower pace of niche launches. Certain niche products like b-abatacept are under regulatory process, which might revive FY28 earnings, subject to timely approval. **We reiterate our Neutral rating on the stock.**

### Lenalidomide normalization continues to put pressure on growth and profitability

- DRRD's 4QFY26 revenue declined 11.6% YoY to INR75.2b (vs. our estimate of INR83.3b), impacted by a Shelf Stock Adjustment (INR4.5b; SSA) related to Lenalidomide. Adjusted for this, revenue declined 6.3% YoY to INR80b.
- Adjusted for the SSA, gross margin contracted 760bp YoY to 48%, due to reduced Lenalidomide sales/price erosion in NA/EU Generics businesses.
- EBITDA margin contracted 930bp YoY to 14.8% (vs. our estimate of 20.9%).
- EBITDA declined 42.6% YoY to INR11.7b (vs. our estimate of INR17.4b). This was adjusted against a one-off expense (INR1.1b) related to VAT liability.
- Further, adjusting for a one-off gain of INR1.9b on the sale of non-core assets, PAT declined 57.6% YoY to INR6.5b (vs. our estimate of INR11.5b).
- For FY26, its revenue increased 5%, while EBITDA/PAT declined 12.7%/12%.

### Strong growth across India, the EU, and EM offset by a sharp dip in NA

- NA sales declined 51% YoY to INR17.6b (~USD187m; 23% of sales). Adjusted for the SSA, NA sales declined 38% YoY to INR22.1b (~USD235m).
- Europe (EU) sales grew 14% YoY to INR14.5b (19% of sales), led by contributions from the NRT portfolio, product launches, higher volumes, and favorable forex movements. NRT sales increased 16% YoY to INR7b.

- India sales grew 20% YoY to INR15.7b (21% of sales), driven by innovative product launches, price hikes, higher volumes, and contributions from recently acquired portfolios.
- Emerging market sales grew 29% YoY to INR18.1b (24% of sales).
- Pharmaceutical Services and Active Ingredients (PSAI) segment revenue declined 5% YoY to INR9.1b (12% of sales).

#### Highlights from the management commentary

- Compared to the earlier guidance of 12m units of Semaglutide sales, DRRD lowered the guidance to 10-11m units for FY27, considering some delay in approval. DRRD has assumed a price of USD30+ per unit, subject to competition.
- SGA spending would include higher marketing/promotional expenses for innovative products. Hence, SGA spending would be similar to that of FY27.
- With respect to the Intravenous (IV) version of b-Abatacept, DRRD awaits plant inspection at Bacchupally. DRRD continues to work on the subcutaneous version.
- DRRD expects GM to improve to 50-52% in FY27.

**Key highlights from the management commentary**

- B-denosumab is launched in the EU by DRRD. The Partner has to address inefficiency with respect to the USFDA approval.
- DRRD is expected to launch 27 products in NA in FY27. Ex-g-Revlimid/ex-Semaglutide, DRRD expects double-digit YoY revenue growth in NA for FY27.
- DRRD expects approval for Semaglutide in the Brazilian market, probably with a 3-4 month delay.
- DRRD expects EBITDA margin to be 20% for FY27 on an ex-Semaglutide basis.
- DRRD guided capex of INR20b for FY27, largely towards biosimilars and product-specific investments
- The ETR for FY27 would be 24-25%.

**Broad-based growth outside the US partially cushions the dip in NA**

**NA: g-Revlimid normalization weighs on growth; base business stable**

- NA revenue declined 22% YoY to INR113.7b in FY26, largely impacted by a sharp decline in g-revlimid sales along with a one-time shelf stock adjustment (SSA). Excluding SSA, NA sales still declined 19% YoY, reflecting normalization after exceptionally strong contributions in prior years.
- The company launched 25 products and filed 15 ANDAs during FY26, with a healthy pending pipeline of 77 filings, including 22 First-to-File opportunities, which should support steady launch momentum going forward.
- Progress in differentiated segments remains encouraging with advancement in semaglutide and biosimilar portfolios, including acceptance of the abatacept biosimilar BLA by the USFDA.
- However, with increasing competition in key products and the absence of large exclusivity-led opportunities, we expect the US business growth trajectory to weaken despite continued contribution from new launches and differentiated products.
- We expect NA sales to clock a 2% negative CAGR over FY26-28E to USD1.3b.

**DF: Strong chronic-led execution continues to outperform the industry**

- The DF business delivered strong growth with revenue increasing 16% YoY to INR62.2b in FY26, materially ahead of IPM growth.
- Growth was driven by strong execution in chronic therapies, new brand launches, innovation portfolio, price increases, higher volumes, and contributions from acquired brands such as Progynova and Stugeron.

- The company continued to outperform the Indian Pharmaceutical Market (IPM), reporting 12.1% MAT growth versus industry growth of 9.9%, while strengthening its positioning in key therapies.
- Strategic focus on differentiated launches was visible through the day-1 launch of generic semaglutide injection (Obeda) and approval for semaglutide tablets in India, which could strengthen the long-term diabetes/obesity franchise.
- With an improving portfolio mix, strong brand equity, and continued focus on specialty/chronic therapies, India is expected to remain one of the key steady growth drivers.
- We expect a sales CAGR of 14% to reach INR81b over FY26-28E.

#### **Emerging markets: Broad-based growth led by Russia**

- Emerging Markets revenue grew 23% YoY to INR67.6b in FY26, driven by strong momentum across Russia and Rest of World (RoW) markets.
- Russia sales increased 34% YoY, supported by new launches, price increases in select brands, and favorable currency movement, while RoW markets grew 19% YoY, aided by higher volumes from existing products.
- The company launched 129 products across emerging markets during FY26, highlighting continued focus on geographic expansion and portfolio diversification.
- DRRD continued to outperform the Russian market growth rate, supported by deeper penetration and differentiated launches such as Tegoprazan.
- While some CIS markets witnessed pricing and volume pressure, the broader EM business continues to benefit from diversification across geographies and products.
- We expect the segment to maintain healthy growth momentum over the medium term, impacted by periodic forex and geopolitical volatility.
- Overall, we expect a sales CAGR of 14% to reach INR87b over FY26-28E.

#### **PSAI segment: CDMO traction offsets softer API demand environment**

- PSAI revenue grew 3% YoY to INR34.7b in FY26, supported by improving traction in the CDMO business despite volatility in the core API segment.
- Management highlighted increasing collaboration opportunities under Aurigene Pharmaceutical Services, indicating a gradual scaling up of the CDMO platform.
- The company continued to strengthen its development pipeline with 128 DMF filings during FY26, including 16 US DMFs.
- While the traditional API business continues to face demand and pricing pressure, rising contribution from CDMO and differentiated offerings could support gradual improvement in business quality over the medium term.
- Overall, PSAI growth is likely to remain moderate, though an improving CDMO mix could support relatively better profitability and stability going forward.
- We expect the PSAI business to post a 9% sales CAGR to reach INR41b over FY26-28E.

**Reiterate Neutral**

- We cut our earnings estimate by 25%/8% for FY27/FY28, factoring in 1) reduced profitability post-competition in g-Revlimid, 2) delay in semaglutide launches in certain markets like Brazil/Canada, 3) pricing pressure in the generics portfolio, and 4) lower operating leverage. We value DRRD at 18x 12M forward earnings to arrive at our TP of INR1,195.
- DRRD's earnings decelerated in FY25 and FY26 after recording a robust show during FY20-25. We expect the earnings to further decline in FY27 due to a lower pace of niche launches. Certain niche products like b-abatacept are under regulatory process, which might revive FY28 earnings, subject to timely approval. **We reiterate our Neutral rating on the stock.**
