Banks unlikely to reduce deposit rates despite RBI easing

A sharp drop in deposit rates, competition from other investment avenues, and a high credit-deposit (CD) ratio is likely to limit scope for further reduction in deposit rates, said bank executives, as per ET. Bankers expect only a 10-to-15bp reduction in deposit

rates following the 25bp reduction in the repo rate by the central bank last week. Inability to pass on rate cuts fully will delay improvement in bank margins, according to bankers. The weighted average deposit rate on fresh term deposits has fallen 98bp to 5.57% since

the current rate-cutting cycle began in February. With the latest 25bp cut by the Reserve Bank of India (RBI), the benchmark repo rate is now down by 125bp. However, bankers say further deposit rate cuts will be limited.

SECTOR

IT to see only mid-single digit growth in 2026

Indian IT services are likely to clock mid-single digit revenue growth in 2026, broadly in line with 2025, as global macro conditions show no meaningful improvement and discretionary tech spending remains sluggish, according to Mengjia Lu, Associate Director at Fitch Ratings, as per ET. Lu says IT spending remains closely tied to GDP growth trends in the US, Eurozone, UK and Canada—key markets for Indian tech exporters—and these economies are expected to grow at a similar pace next

year. "The macro environment is pretty much the same as the current year," she noted, adding most IT companies themselves are not expecting a near-term revival in discretionary technology budgets. Fitch expects growth will remain uneven across verticals. Banking and financial services continue to show relatively stronger demand, while retail, consumer and manufacturing—especially auto in Europe—are dragging due to tariff-linked uncertainties and muted consumption trends.

EPC sector emerges as major job engine

India's Engineering, Procurement, and Construction (EPC) sector is expected to create more than 25mn jobs by 2030, supported by expanding infrastructure development, says a report, as per ET. According to HR solutions provider CIEL HR's 'EPC Sector Talent Study, 2025', the EPC sector is one of the country's most powerful job creators and witnessed a 51 per cent surge in hiring demand since 2020. Over 85mn people, across the organized and unorganized sectors, are employed in the country's EPC sector,

Copper industry seeks curb on cheap imports

Indian copper producers want the government to step in to protect the domestic industry from cheap imports, particularly from countries with free trade agreements with India, including ASEAN and Japan, as per ET. The Indian Primary Copper Producers Association (IPCPA) is seeking an additional 3% duty on copper cathodes, rods, wires and

tubes, along with quantitative curbs on such imports. While India became a net importer of copper after the closure of Vedanta's Tamil Nadu plant a few years ago, subsequent investments in capacity have made the sector self-sufficient.

'Luxe housing sees demand & supply surge beyond metros'

India's luxury housing market is entering a phase of rapid maturity and expansion, reshaping residential patterns across major cities and emerging hubs with premium

homes gaining unprecedented depth as both demand and supply expand beyond traditional metro regions, showed a Magicbricks' India report, as per ET. The broader luxury market is projected to grow to USD 103bn by 2030 at a CAGR of 35% from USD 17bn in 2024, led by categories such as jewellery, watches and automobiles, according to the study. This is now decisively shaping the housing market as well.

POLITICS & POLICY

Govt plans RRB listings in FY27

The government has directed state-run lenders to prepare for the stock market listing of their sponsored regional rural banks (RRBs) in the next fiscal year, as per ET. Officials aware of the development told ET that at least two RRBs, likely including Uttar Pradesh Gramin Bank, are being considered for market debut in the first half of FY27. "Banks have been further directed to firm up a five-year plan for their new merged entities. In the case of profitable entities, the sponsor banks will provide assistance towards meeting all statutory requirements," said one of the officials cited earlier.

Jan Dhan accounts hold INR 2.75tn in banks: Govt

Jan Dhan accounts across the country currently hold balances of about INR 2.75 lakh crore, translating to an average of Rs 4,815 per account, M Nagaraju, Secretary,

Department of Financial Services, said, as per ET. Delivering the 69th Foundation Day Lecture on India's Financial Inclusion Journey at the Administrative Staff College of India (ASCI) here, Nagaraju said INR 3.67tn has been transferred through Direct Benefit Transfer (DBT) in the current financial year. He said India's financial inclusion journey has been "nothing short of a miracle", noting the launch of the Pradhan Mantri Jan Dhan Yojana (PMJDY) in 2014 marked a watershed moment by bringing more than 570mn people into the formal banking system.

Nearly 2.4mn households adopt rooftop solar: Govt

India's solar momentum is shaping a major shift in the country's energy journey, marking one of its strongest moves toward clean power, as per ET. According to a government release, the PM Surya Ghar scheme, approved in February 2024, aims to bring rooftop solar to one crore

homes. As of December 2025, around 2.39mn households have already installed these systems, generating 7 GW of clean power. The National Solar Mission has also supported large solar parks, rooftop systems, and hybrid projects, taking India closer to its long-term energy goals.

India talking to 8 more nations for UPI: Govt

India is talking to about eight countries, including those in East Asia, to make UPI payments acceptable, Financial Services Secretary M Nagaraju said, as per Business Standard. Unified Payment Interface (UPI) is currently accepted in eight countries -- Bhutan, Singapore, Qatar, Mauritius, Nepal, the UAE, Sri Lanka and France. Acceptability of India's digital payment network overseas enables Indian tourists to make UPI payments for transactions abroad. "We are now talking to about 7-8 countries, including many in East Asia, to have UPI transactions," Nagaraju said at a conference on Harnessing

POLITICS & POLICY

AI and digital public infrastructure for Viksit Bharat. Nagaraju also said India is including a track on UPI in some of the trade negotiations with countries.

Govt clarifies on solar financing on oversupply concerns

The Ministry of New & Renewable Energy (MNRE) has dismissed reports suggesting that it has asked financial institutions to pause fresh lending to renewable energy projects, as per ET. The clarification comes amid concerns of oversupply in India's solar photovoltaic (PV) module industry and follows earlier communication urging lenders to take a cautious view on financing new, standalone module manufacturing capacity. India has reached 50% of

its installed power capacity from non-fossil fuel sources, five years ahead of its Paris Agreement target. As of 31 October 2025, non-fossil The clarification comes amid concerns of oversupply in India's solar photovoltaic (PV) module industry and follows earlier communication urging lenders to take a cautious view on financing new, standalone module manufacturing capacity. India has reached 50% of its installed power capacity from non-fossil fuel sources, five years ahead of its Paris Agreement target. As on 31 October 2025, non-fossil capacity stands at 259 GW, including 31.2 GW added so far in FY26.

Rajasthan first state to digitize 100 pc of voter rolls

Rajasthan has completed 100% digitization of its electoral roll under the Special Intensive Revision (SIR), becoming the first state in the country to do so, Chief Electoral Officer Navin Mahajan said, as per ET. He said that coordinated effort and meticulous execution by BLOs, assistant staff, supervisors, district election officers and other staff engaged in the exercise were behind this success. "Rajasthan now also leads the country in voter mapping, with more than 97% of the mapping work completed. As a result, only 3% of voters will need to furnish documents during the claims-objections phase," he said.

INTERNATIONAL

Adani, Hindalco seek Peru copper assets

Adani and Hindalco are exploring investments in Peru's copper sector, either through joint ventures or by taking stakes in existing mines, a senior Peruvian diplomat told Reuters, as per Business Line. Peru, the world's third-largest producer of copper used in sectors such as power lines, construction and manufacturing, is courting new investment as it negotiates a broader free trade agreement with India. "Birla (Hindalco) and Adani are trying to invest in Peru. We are willing to facilitate," Javier Paulinich, Peru's ambassador to India, told Reuters in New Delhi.

BEML to develop marine cranes with South Korea's HD Hyundai

BEML has partnered with HD Korea Shipbuilding & Offshore Engineering (KSOE) and HD Hyundai Samho Heavy Industries (HSHI) to jointly design, develop, manufacture, integrate, install, commission, and support conventional and autonomous maritime and port cranes to be produced in India, as per ET. A BEML statement said that these will be supported by comprehensive after-sales service, spares, and training capabilities. "The partnership aims to accelerate the modernisation of India's port operations and maritime infrastructure, reducing import dependence and enabling India to build advanced, high-capacity, smart and energy-efficient crane systems tailored for the next era of port

expansion, shipyard automation, and cargo-handling excellence," the company added.

IFC invests USD 50mn in Gujarat Fluorochemicals EV arm

Gujarat Fluorochemicals (GFL) has announced a partnership with the International Finance Corporation (IFC) is investing USD 50mn in its subsidiary GFCL EV Products (GFCL EV) through the subscription of compulsorily convertible instruments to build India's first integrated battery materials facility, as per Business Line. It will drive high-value manufacturing, create jobs, strengthen India's position in global supply chains, and advance national priorities of energy security, transport electrification, and local value creation. With diversified

INTERNATIONAL

battery materials offerings and strong credentials, GFCL EV aims to reinforce India's emergence as a competitive player in the global battery-materials value chain. Grounded in innovation and sustainability, the company will accelerate clean-technology adoption, lower emissions, and support India's ambition to become a global hub for advanced battery materials.

India's fertiliser units to form JV with UralChem

To ensure long term supply of fertilizers and curb volatility in prices, India and Russian companies has signed a memorandum of understanding (MoU) for forming a joint

venture for building a large urea manufacturing facility in Russia, as per Financial Express. Rashtriya Chemicals and Fertilisers, National Fertilisers and Indian Potash signed the MoU with UralChem, Russia's largest potash and ammonium-nitrate producer for setting a urea plant which is expected to ensure steady supply of soil nutrients to India, and cut costs of imports. The planned urea plant is expected to have an annual production capacity of 1.8 to 2.0mn tonne (MT) annually. The technical parameters and financial viability of the JV is currently being discussed.

India's steel exports to Europe set to drop

India's steel exports to Europe are expected to fall once the European Union's carbon tax takes effect next month, prompting mills to seek alternative buyers in Africa and the Middle East, industry executives and analysts said, as per ET. Imports of steel into the European Economic Area will face a carbon tax under the EU's Carbon Border Adjustment Mechanism (CBAM) starting on January 1. The decarbonization-oriented levy will also apply to cement, electricity, fertilizers and other products. Mills in India, the world's second-largest crude steel producer after China, ship roughly two-thirds of their exports to Europe.

ECONOMY

Macro and Market update

India's imports of Russian crude set to plunge to a near four-year low early next year

This is after months of US pressure. Shipments from Russia could drop to nearly 600,000 barrels per day in January the weakest since early 2022, according to people familiar with the purchases. December arrivals are expected to hold at 1.0–1.2mn barrels per day as refiners front-loaded bookings before sanctions took effect. However, with new workarounds emerging and Moscow intensifying its diplomatic outreach, the durability of this decline remains uncertain. India's engagement with Russia President Vladimir Putin's visit, during which both countries signed multiple pacts in transport and connectivity. Russia expressed interest in expanding its

presence in India's maritime initiatives and reaffirmed commitment to fully operationalise the Kudankulam Nuclear Power Plant (KKNPP). Both sides also stressed the need to identify a second site for a new Nuclear Power Plant in India.

US chief negotiator part of team visiting India on December 10

Assistant USTR and the Chief Negotiator of the proposed trade deal Brendan Lynch, along with other senior officials from USTR, will be a part of the delegation travelling to New Delhi on December 10 to take stock of the deal. Switzer, who was confirmed as the deputy USTR in September, will be making his first visit to New Delhi.

RBI's decision to cut the repo rate by 25bp to 5.25% a unanimous move came alongside a Neutral stance. The central bank trimmed its inflation projection by 6 bps to 2.0% and raised growth expectations by 50 bps to 7.3% for FY26E (Elara: 7.5%). Its announcement of INR 1 tn in open market operations and USD 5 bn in three-year USD/INR buy-sell swaps was broadly aligned with market expectations. View: The combination of benign inflation and the likelihood of a softer real GDP print by Q1FY27 suggests space for another 25bp cut in the February 2026 policy. Consumer sentiments strengthen in urban India during November

The Current Situation Index rising to 98.4 from 96.9 on better price and economic perceptions. Rural confidence,

ECONOMY

however, remained largely unchanged from earlier rounds, reflecting a more uneven recovery.

US consumer credit data signals softer household momentum

The actual print at USD 9.18bn falling is well below forecast of USD 11.80bn and the previous USD 11.01bn. In contrast, the Core PCE Price Index a key inflation gauge remained stable at 0.2%, matching expectations and indicating steady inflation dynamics.

G7 and EU discuss replacing the Russian oil price cap

They plan a full maritime services ban to further curb Moscow's energy revenue. The measure is likely to feature in the EU's next sanctions package, expected in early 2026, according to sources.

MF investment in equity doubles to INR 435bn

Riding on the steady rise in inflows, mutual funds have more than doubled their net equity investment to INR 435bn last month against INR 207bn logged in October, as per Business Line. In fact, MF were consistent buyers in the equity market throughout last month except for two days when they pulled out INR 25bn, according to data sourced from SEBI. The consistent buying by MF boosted market sentiment and pushed the bellwether Nifty and Sensex indices up last month. MF were net sellers in debt at INR 722bn vs INR 128bn.

Swiss firms prepare to relocate parts of production abroad

This is to mitigate the impact of US tariffs. A survey of over 400 companies showed nearly one-third plan to boost overseas investments, with 16% shifting operations outside the EU and US, 10% moving into the US, and 5% exploring options within the EU.

Vietnam's trade surplus with the U.S. surges to USD 121.6bn in first 11 months of year

This is supported by strong export growth despite U.S. tariffs imposed in August. Exports to the US rose 22.5% YoY in November, outpacing the 15.1% increase to other markets, though MoM exports declined for the fourth consecutive month.

FPI withdraw INR 118bn in first week of December

Foreign investors have pulled out INR 118bn (USD 1.3bn) from Indian equities in the first week of this month, primarily driven by the sharp depreciation of the rupee, as per Business Line. This sharp withdrawal follows a net outflow of INR 38bn in November, further pressuring markets. These outflows come after a brief pause in October, when FPI invested INR 146bn, breaking a three-month streak of massive withdrawals – INR 239bn in September, INR 350bn in August, and INR 177bn in July.

In Japan, Revisions released today show the economy shrank more sharply

This is between July and September than first estimated. Official data showed third-quarter GDP fell at an annualized rate of 2.3%, worse than economists' median forecast of a 2.0% drop and a preliminary reading of a 1.8% decline.

Asia markets

Asia markets opened mixed on 8 December as investors awaited trade data from China due later in the day. On 5 December in the US, the three major averages closed higher as the market sorted through a fresh slate of US economic releases. Brent is at USD 63.75/bbl, DXY at 98.94, US10Y at 4.14% and GIFTNIFTY at +0.02%.

SEBI aims to ease FPI registration process

Markets regulator SEBI has proposed a comprehensive overhaul of the Foreign Portfolio Investor (FPI) framework, aiming to streamline the registration process and introduce an abridged application option for related funds, as per Business Line. The proposal is aimed at enhancing ease of doing business and simplifying compliance requirements for global investors, the Securities and Exchange Board of India (SEBI) said in its consultation paper. As part of this effort, SEBI has suggested a complete update and simplification of the Master Circular for FPI & Designated Depository Participants (DDP).

ECONOMY

SEBI board to take up 11 proposals on Dec 17

The Securities and Exchange Board of India (SEBI) will consider 11 regulatory proposals at its board meeting on December 17, covering major overhauls of broker regulations, mutual fund expense structure, administration

of exchanges and the introduction of a closing-auction session, according to people familiar with the agenda, as per Business Line. Other items include rationalization of disclosure and lock-in norms under the IPO framework, easing compliance for debt-market issuers, relaxed KYC

requirements for NRIs, standardised processes for mutual-fund folio onboarding, permitting incentives to improve retail participation in public debt issues and enhanced transparency and reporting standards for alternative-investment funds.

CORPORATE

Reliance rating raised to 'A-' from 'BBB+' by S&P Global

Global rating agency S&P Global Ratings has revised its rating on Reliance (RIL), raising the long-term issuer credit rating to 'A-' from 'BBB+' amid expectations of improving cash flow stability driven by its expanding consumer-focused businesses, as per Business Line. The agency has also assigned a Stable Outlook. In addition, S&P raised the long-term issue ratings on the senior unsecured debt issued by the company to 'A-' from 'BBB+'. According to S&P Global Ratings, Reliance Industries will continue to increase cash flow from its less cyclical consumer-facing verticals, which will lead to stronger earnings quality.

TVS Motor unveils the new TVS Ronin Agonda

TVS Motor Company at the fifth edition of its flagship motorcycling festival – TVS MotoSoul - unveiled the new TVS Ronin Agonda along with two TVS Ronin Kensai and TVS Apache RR310 Speedline. The new TVS Ronin Agonda is priced at INR 130,990 (ex showroom, across India), as per Business Line. The company has also showcased the TVS Apache RTX Anniversary Edition, commemorating 20 years of TVS Apache's racing heritage. A limited edition helmet Elara Securities (India) Private Limited

series, 'Art of Protection', crafted exclusively for the Motosoul community has been introduced, says a release. TVS MotoSoul draws over 8,000 riders from around the world to celebrate the joy of riding. This vibrant gathering showcases new motorcycles, custom builds and immersive experiences that capture the essence of motorcycling culture.

Bajaj Finserv plans foray into pension, wealth management

Bajaj Finserv, which houses the group's insurance entities, would enter the fast-expanding pensions and wealth management businesses next year, Chairman Sanjiv Bajaj said. A public listing of the insurance arms is also likely over the next 4-5 years, he said, as per ET. India's pension market, which is projected to cross INR 1.2tn in size by 2030, has 10 players and recently saw two large banks apply for licenses to the sectoral regulator Pension Fund Regulatory and Development authority (PFRDA). Also, the wealth-management industry is burgeoning as India adds more dollar-millionaires than any other country, expanding the segment at a pace the financial conglomerate sees as too large to ignore, said an analyst who attended the investor meet.

Nalco plans to launch Pottangi bauxite mines by 2026

State-owned National Aluminium Company (Nalco) is aiming to start its Pottangi bauxite mines in Odisha by June next year as the company plans to ramp up its mining capacity supporting its goal of expanding its integrated aluminium business, as per Business Line. Dilip Buildcon had emerged as L-1 bidder for the development and operation of Pottangi bauxite mines. "...our target is June next year we will be starting the mines," NALCO CMD Brijendra Pratap Singh said. The company is set to enhance its alumina production capacity at its Damanjodi refinery in Koraput district, Odisha.

Tata Power expects Mundra ops to resume by Dec 31

Tata Power Company anticipates resuming operations of its supercritical thermal plant in Mundra by December 31, 2025, it said in a release, as per Business Line. The power producer said it continued to take the necessary measures to resume operations at the plant, which has been shut since July. In November, the paper reported the plant would resume operations by the year-end, with the company expected to sign a supplementary power purchase

CORPORATE

agreement with the Gujarat government, one of its customers.

CEAT gears up for global push

Tyre maker CEAT is developing tyres for various global markets as it aims to expand its exports to regions like Europe and US with plans to establish itself as a global brand, according to RPG Group Vice Chairman Anant Goenka, as per Business Line. The RPG Group firm garners around 20% of its revenue from exports and expects the contribution to grow over the next few years. "We are focusing a lot on international growth- in the US, growth in the EU. Our goal is to become a global brand. We often say that industry in India can do more to develop and invest more in brands, invest in global growth and so on. So that's one area of focus for us," Goenka said.

Tata Consumer eyes Danone India biz

Tata Consumer Products (TCPL) is in advanced discussions to acquire Danone SA's India nutraceuticals and specialized nutrition portfolio, according to people familiar with the matter, part of its push in the fast-growing wellness and nutrition market, as per ET. Negotiations taking place over the past few months gained momentum recently, one of the persons said. Both sides are said to be close to agreeing on valuation. An acquisition would give the maker of Tata Tea entry into the value-added nutrition segment, where it will compete with Nestlé and Abbott. TCPL has been building a broader wellness ecosystem, largely through acquisitions such as Soufull, Capital Foods and Organic India, as well as expanding into protein-rich foods, organic staples and functional beverages.

Our view: The portfolio consists largely of infant nutrition and protein powder (proteinx). However, category growth has been a concern for existing players. If this goes through, it would not be taken positively by investors.

Mahindra Logistics locks 328K sqft lease in Telangana

Mahindra Logistics is stepping up its nationwide expansion in 2025, with a strong push into emerging industrial corridors. Its latest move – a 328K sq ft warehousing lease in Siddipet, Telangana – highlights the company's strategy to scale beyond metro hubs and capture rising demand in Tier-II and Tier-III markets as supply chains deepen across the country, as per ET. The lease was closed with Sri Aditya Industrial Logistics Park in Telangana. Located at Baswapuram, Kothur (Mulugu Mandal), Siddipet district – spans 60 months, with MLL agreeing to pay INR 68.9mn per month in rent, mentioned in a lease document shared by CRE Matrix, a data analytic firm.

JSW Cement to invest INR 110bn to double capacity

JSW Cement, a JSW Group company, will invest INR 110bn over the next three years to double the production capacity to 41mn tonne from the current level of 20 mt, as per Business Line. "At the time of our IPO, our capacity was 20mn tonnes. We added one million tonnes in Odisha since then. Our major expansion in Rajasthan is underway and will be ready by the end of January 2026. By this fiscal year-

end, we will be a 25-mn-tonne company. We plan to reach 41 mn tonne by 2028, then 60 mt thereafter," JSW Cement MD Parth Jindal said. "It is a mix of both existing and inorganic growth. We will be adding one more location in Central India – Madhya Pradesh and Uttar Pradesh – with an additional 6 mt. The balance of 10 mt will be within existing locations: Dolvi in Maharashtra, Vijayanagar in Karnataka, and Talwandi Sabo in Punjab," Jindal said.

Triveni Engg, TruAlt at forefront to set up SAF plants

Without a policy on sustainable aviation fuel (SAF), which could ensure a guaranteed buy back of the biofuel when produced, the plan to emerge as a global producer of SAF has not progressed even as some sugar companies such as Triveni Engineering & Industries, TruAlt Bioenergy, and Godavari Biorefineries are seriously exploring to set up facilities in India, particularly after it kicked off in the US recently, as per Business Line. Triveni's CEO Sameer Sinha confirmed the move and is hopeful of a SAF policy roll out before end of current fiscal. Sources in TruAlt Bioenergy, a Nirani Sugars group company, though confirmed that the company is exploring options in this new sector, but declined to share further details. "We have no such plans as of now. However we are not closed to the idea and we keep eyes on the development in this area," said a spokesperson of Godavari Biorefineries.

ED files chargesheet against Reliance Power, arms

The Enforcement Directorate has filed a chargesheet against businessman Anil Ambani's group company

CORPORATE

Reliance Power and 10 others in a money laundering case linked to issuance of an alleged fake bank guarantee of INR 680mn for securing a tender, as per Business Line. The other accused named in the prosecution complaint include former Reliance Power CFO Ashok Kumar Pal, Reliance NUBESS and Rosa Power Supply (subsidiaries of Reliance Power), an Odisha-based "shell" company Biswal Tradelink, MD Patha Sarathi Biswal, Biothane Chemicals, and trade financing consultant Amar Nath Dutta. Some other accused include Ravinder Pal Singh Chadha, Manoj Bhaiyasaheb Pongde and Punit Narendra Garg, as per the agency.

IndiGo offers automatic refunds, waives fees

IndiGo has rolled out a broad set of passenger relief measures following recent operational disruptions, committing to automatic refunds and fee waivers for

affected travellers over a 10-day period, as per ET. In a statement posted on X, the airline said that all cancelled bookings would be refunded automatically, with the amount credited back to the original mode of payment. IndiGo also confirmed that passengers travelling between December 5 and December 15 would not be charged any cancellation or rescheduling fees, regardless of the reason for the change.

Biologics to raise INR 45bn via QIP

Biopharma major Biocon has consolidated its wholly-owned subsidiary, Biocon Biologics (BBL), into Biocon, with the integration expected to be completed by March 31, 2026, as per Business Line. Biocon Biologics was formed in 2017 as a separate subsidiary to house all biosimilar assets, with the intent of unlocking value at a later stage. In 2022, Biocon Biologics acquired the global biosimilars business of

Viatis for USD 3.3bn, a transaction funded through equity and USD 1.2bn of debt.

Zepto converts to public company ahead of IPO

Quick-commerce firm Zepto has converted into a public limited company, a key procedural step ahead of its planned stock-market debut in 2026, regulatory filings show, as per Business Line. The move comes months after the start-up appointed Goldman Sachs, Morgan Stanley, JM Financial and others as bankers for its initial public offering. Zepto is expected to raise USD 500mn (INR 45bn) through the IPO, as reported earlier.

RBI: Room for another 25bps cut still open

5 December 2025

Today, the RBI's Monetary Policy Committee (MPC) lowered the policy repo rate by 25bps to 5.25% in a unanimous decision, while maintaining a Neutral stance, in line with our expectations. The tone of the policy was dovish with Governor Malhotra reiterating benign inflationary environment (referenced six times in the statement). Inflation projection was reduced by 60bps to 2.0% for FY26E (Elara: 1.9%) and growth projections were revised higher by 50bps to 7.3% (Elara: 7.5%) for FY26E versus the previous meet, reflecting robust H1FY26 growth print. The continued benign inflation outlook, and prospects of moderating real GDP print by Q1FY27 (as deflator expands and given fading boost from GST cuts) suggest that room for another 25bps cut still exists in Feb-2026 policy.

Room for another rate cut still open: Today's policy tone was skewed towards dovishness, led by continued comfort on inflation. Based on the press conference transcription and the MPC member statements, analysis per our natural language processing (NLP) models indicates that the focus on inflation increased in Dec-25 meet with *inflation's* share at ~60% versus 40% in Jun-25 meet (share in combined "inflation" and "growth" word count) with highest co-occurrences with the words "low", "benign", and "decline/drop". We are of the view that the 'wait and watch' hesitation seen in October 2025 driven by tariff headwinds has effectively cleared, as the collapse in inflation provided space for policy easing.

Our forecast path for inflation aligns with the RBI viz., 3.8-4% in H1CY26E. Our checks across *mandis* in India suggest continued softness in food prices despite crop damages. Our analysis shows inflation persistence – the number of sub-segments where inflation is greater than the series mean is at 15% (3mma basis), the lowest since CY19, indicating only handful of items contributing to overall inflation. Also, nearly 78% of the components are below 4% YoY inflation versus 63% same time last year.

Growth projection upgraded: The RBI MPC revised FY26 GDP growth upward by 50bps to 7.3% (FY26E Elara estimate: +7.5%), primarily reflecting stronger-than-expected expansion of 8.0% in H1FY26. However, the RBI MPC expects moderation in H2FY26, primarily led by weaknesses in export-oriented sectors and normalization of the base effect. The RBI remained positive on growth drivers, led by uptick in private consumption demand aided by GST rationalization, healthy agricultural activity bolstering rural demand, and policy support continuing to cushion domestic activity. In its press conference, the RBI underscored that 7% growth remains its baseline aspiration.

Inflation projection downgraded: MPC acknowledged that the recent improvement in food supply conditions supported by higher *Kharif* output, healthy *rabi* sowing and comfortable reservoir levels should help anchor headline inflation, going forward. The RBI MPC lowered inflation for FY26 to an average of 2.0% from 2.6% (Elara estimate: +1.9%) with Q3 at 0.6%; Q4 at 2.9% and H1FY27 at 3.9-4%. Furthermore, the RBI acknowledged that the underlying inflation remains subdued, with precious-metal price effects accounting for roughly 50bps.

Liquidity infusion to strengthen policy transmission: The RBI's announcement of INR 1tn open market operations and USD 5bn three-year USD/INR buy-sell swaps was broadly in line with our expectations, as potential challenges to durable system liquidity have incrementally intensified. As of mid-Nov-25, net durable liquidity stood at 1.4% of net domestic and time liabilities (NDTL), which may fall further below 1% in Q4FY26 due to seasonal factors. In the short term, USD/INR buy sell operations are likely to inject durable rupee liquidity and rebuild FX reserves synthetically, allowing the RBI to tolerate a weaker rupee while preventing disorderly overshoots. On the external front, the INR remains undervalued on a real effective exchange rate basis and continues to face persistent depreciation pressures amid global risk aversion.

RBI lowers repo rate by 25bps

Automobiles

India | Sector Update

Global Autos – Structural headwinds persist

7 December 2025

We have analyzed Q3CY25 results and guidance of key global auto PV and CV original equipment manufacturers (OEM), such as Tesla, Ford, General Motors (GM), Mercedes, Stellantis, Toyota, Suzuki, Hyundai, Volkswagen, BMW, Audi, Porsche, Volvo, Paccar, Daimler trucks to gain insight on the demand, profitability, and electrification trends. The key takeaways are: 1) China's OEM continue to gain share in the EU, led by growth in PHEV, 2) Europe's OEM have downgraded guidance in October & Q3CY25, mainly for profitability with significant downgrade in JLR & Porsche, 3) global production growth for CY25 while still muted sees some upgrades in last couple of months, vs estimates given at the start of the year (which is one reason for the recent rally in global auto stocks), 4) OEMs continue to look for alternate source of supply chains, especially post the Nexperia chip crisis, although no major impact is likely, 5) margin pressures to persist (even ex of tariffs) for most OEM in CY25, and 6) medium- and heavy-duty truck markets to remain muted with -9% to -19% volume growth for North America and -1% to -14% for the EU, as per Daimler Trucks. Notably, for CY26, Volvo group expects heavy duty truck sales in EU to increase by ~2% YoY (positive for TMCV) while North America to decline by ~6%.

Cautious commentary on demand; tariff headwinds remain; worsening supply chain: While OEM continue to see headwinds from tariffs persist even in Q4CY25 and CY26 (Ford estimates similar net tariff impact in CY26 as well), which dragged profitability in the low-mid single digits for most global OEM. The supply chain issue remains challenging, especially with the Nexperia chip crisis. However, due to low-value commoditized nature of chips, most OEM expect no major impact. Although the production outlook for CY25 has improved vs Q2, global PV production is set to decline ~1% in CY26, as per S&P mobility November forecast. Provisional November data so far released show that US sales are down by ~6% YoY, while EU top 5 up by 3% YoY in Oct+Nov. US sales were impacted by decline in BEV sales (down 40% YoY in Oct+Nov) post federal credit expiry in Sep-end.

China's brands continue to gain share in China and the EU (ex-Russia): In CY25 YTD, China's brands share reached ~69% in China, which was a mere 36% in CY20. China's brands also continue to gain share in Europe (EU+the UK) reaching ~5.6% vs a mere 3.0% in CY24 YTD. The market share gain by China's OEM in the EU is sharper in PHEV than BEV. This was driven by China brands focus on PHEV exports to the EU post tariffs on China's BEV imports.

Read through for India-listed companies under our coverage: Slowing global PV growth as well as shrinking profit pool of global OEM in China, market share pressures of legacy OEM in the EU and slowing US growth are cause for concern for SAMIL (with limited margin expansion potential; we reiterate Sell). Some US OEM have started to refocus on ICE and hybrid models, which means the ICE and hybrid product segment (starter motor) for Sona BLW could see growth in the medium-term vs a structural decline expected earlier. However, growth pressures for Tesla remains an overhang for Sona BLW. The EV demand recovery in the US also remains key monitorable post the slump in October and November after the federal tax credit expiry. For JLR, China is a structural concern (as is the case for all legacy OEM), market share loss in other geographies and recent production losses pose as additional headwinds along with weak global demand outlook (retain Sell on TMPV). Muted global CV demand will remain cause for concern for Bharat Forge, especially as OEM (Volvo) have downgraded *NA Class 8* market growth for CY25; however Volvo's EU heavy duty truck growth expectation of +2% in CY26E, means EU trucks bottoming out.

PV sales and production growth in CY25 YTD

Growth (%)	Sales	Production*
EU Top 5	3.4	(2)
North America	2.3	(1)

Exhibit 2: Tariff commentary by key global OEM

Company	Commentary during 3QCY25 results
JLR	The impact in Q2FY26 was GBP 74mn which factors in most part of a reduced 10% duty from UK and 15% from the EU. It expects Q3 to be a bit better than Q2, but far better than Q1 in terms of tariff impact
Mercedes	US tariffs continue to weigh on volume and mix, but the Q3 impact on car division revenue and EBIT was slightly lower than in Q2 as pricing actions, content localization, and product prioritization started to offset part of the headwinds
BMW	US auto tariffs still reduced automotive EBIT margin in 9MCY25 by "around 1.5ppt", similar to H1CY25, but the Group expects a smaller incremental hit in Q4, as US sourcing and production adjustments ramp up
Audi	Audi specifically cuts 2025 operating margin outlook to 4-6%, due to ongoing tariff pressures (EUR 850mn in first nine months, full year at ~EUR 1.3bn expected)
Porsche AG	Net US tariff impact exceeding EUR 500mn for 9MCY25. It expects total tariff burden of ~EUR 700mn, incorporating a reduced 15% rate from August 1 and countermeasures like US price hikes in the range of 2.3-3.6%
VW	Up to EUR 5bn, of which at least EUR 4bn direct tariff payments and the remainder (~EUR 1bn) from lost margin, due to countermeasures (e.g., price protection and volume effects). ~EUR 2.4bn in 9MCY25
Ford	USD 0.7bn net tariff headwind in 3QCY25 and expects a 2025 net tariff hit of roughly USD 1.0bn after considering a new USD 1.0bn receivables from expanded US MSRP credits, vs a much higher gross burden
GM	Q3CY25 tariff cost was USD 1.1bn and trimmed its full-year gross tariff impact estimates to USD 3.5-4.5bn from USD 4.0-5.0bn, with mitigation actions set to offset roughly 35% of the exposure
Stellantis	CY25 net tariff cost is still expected at around EUR 1.5bn
Toyota	Maintains estimate that US tariffs could cost about JPY 1.4tn, with roughly JPY 470bn already incurred in Q1FY26; Q3CY25 update emphasized accelerated North American localization and price-mix actions to cushion the H2FY26 impact

Exhibit 3: Global growth for medium and heavy duty trucks to remain muted in CY25

Class 8 trucks growth guidance CY25 CV	Europe	North America	China	India
Volvo	-7.3%	-14% (earlier -10.8%)	8%	2.5%
Daimler truck	-1 to -14%	-9% to -19%		

Note: Red colour indicated guidance downgrade; Source: Company, Elara Securities Research

Exhibit 4: Recent commentary by OEM based on Nexperia chip crisis

OEM	Recent Comment
JLR	Closely monitoring supply risks; potential production impacts if chip shipments do not resume; seeking alternative suppliers
Mercedes	Warned of complex, volatile situation; secured short-term supplies; emphasizes long-term risks and need for diversified sources
BMW	Actively evaluating supply risks; supplier output impacted, slowing production; exploring alternative sourcing options
Audi	No direct impact yet but assessing risks; part of the Volkswagen Group's overall chip monitoring and mitigation strategies
Volkswagen	Stable chip supply currently; closely monitoring potential disruptions; part of industry-wide evaluations of Nexperia crisis
Porsche	Following group-wide efforts; supply chain risks monitored but short-term impact contained through inventory and alternative sources
Stellantis	Established a "war room" to manage chip shortages; daily assessment ongoing; mitigation strategies in development
Ford	No direct comment; monitoring situation closely; working with suppliers to mitigate potential disruptions
GM	No immediate impact yet; working to source alternative chips; optimistic about resolution but remaining cautious
Toyota	CEO stated no immediate shortage; monitoring situation closely with contingency plans ready
Hyundai	Monitoring supply chain risks; assessing impact; proactively seeking alternative chip sources to mitigate disruptions

Exhibit 16: JLR losing market share in key regions

Source: MarkLines, Elara Securities Research

Tesla

- ▶ Tesla's earnings missed estimates, owing to increased cost. On the earnings call, Elon Musk primarily focused on giving updates about full autonomy and Optimus robots progress, while new model launch pipeline project questions were not undertaken
- ▶ It expects to have no safety drivers in large parts of Austin by end of this year in unsupervised FSD. It expects to operate Robotaxi in 8-10 metros by the end of the year as well as Nevada, Florida and Arizona
- ▶ Single-biggest production ramp-up in the upcoming year would be for *Cyber Cab*, which begins production in Q2CY26. That is a vehicle that is optimized for full autonomy
- ▶ Total tariff impact for both business in Q3 (auto + energy storage) was more than USD 400mn split equally between them (~1.4% of sales)
- ▶ Unveiling *Optimus V3* by Q1CY26 (February-March). *Optimus* will be an incredible surgeon. Hopes to start production by the end of next year and targets 1mn units annualized production initially. *Optimus 4* then could scale to 10mn units and *Optimus 5* to 50-100mn units
- ▶ Manufacturing technology scaling, real world AI, and truly dextrous hand are three things that *Tesla Optimus Robot* has which others lack
- ▶ *Optimus Robots* and AI 5 chip design team are two of the most important things

Financial highlights

- ▶ Volume: Production stood at 447,450 units (-4.8% YoY; +9.1% QoQ) and deliveries were at 497,099 units (+7.4% YoY; +29.4% QoQ).
- ▶ Revenue: Total revenue were up 11.6% YoY and 25% QoQ in Q3 to USD 28bn, driven by an increase in vehicular deliveries, growth in energy generation & storage and growth in services and other, partly offset by lower regulatory credit revenue and lower one-time FSD revenue recognition. Auto revenue at USD 21.1bn was up 5.9% YoY and 27.3% QoQ, energy generation and storage revenue at USD 3.4bn, up 44% YoY, while services revenue was at USD 3.5bn, up 25% YoY
- ▶ Blended average selling price ([ASP]; ex-regulatory credits) improved 0.4% YoY, but down 1% QoQ to USD 41,819 per vehicle due to weaker mix. Blended ASP (including regulatory credits) stood at USD 42,657, down 1.4% YoY and 1.7% QoQ
- ▶ COGS/vehicle: It came in at ~USD 35,385/vehicle, up 2.4% YoY, due to lower fixed cost absorption of some models, an increase in tariffs and weaker sales mix, partly offset by lower raw material cost
- ▶ Operating profit: Operating income (EBIT) was down 40% YoY, but up 76% QoQ to USD 1.6bn in Q3, with operating margin at 5.8%, down 501bp YoY and 168bp QoQ. Auto gross margin (ex of

regulatory credit) at 15.4% was down 167bp YoY and up 42bp QoQ while including regulatory credit they was down 307bp YoY and down 15bp QoQ to 17.0%

- ▶ **Cashflow:** Quarter-end cash, cash equivalents, and investments in Q3 was USD 41.6bn. A sequential increase of USD 4.9bn was a result increase in free cashflow

Production ramp-up and other updates

- ▶ **The US:** In October, Tesla launched the *Model 3* and *Model Y Standard*, each with 300 miles of range and starting at USD 36,990 and USD 39,990, respectively, making products more accessible to customers in the wake of expiration of the EV tax credit in the US. Despite affordable pricing, these models including active safety features, a 15.4" centre touchscreen and heated first-row seats and steering wheel. Tesla also launched the *Model Y Performance* (0-60 in 3.3 seconds) and began offering leasing for certified pre-owned *Model 3* and *Model Y*
- ▶ **China and APAC:** Tesla launched the *Model YL* in China, a longer wheelbase version of the *Model Y* with 6 seats and 3 rows, expanding its product portfolio in this critical market. The company achieved record deliveries in South Korea, Taiwan, Japan & Singapore and began deliveries of the *Model Y* in India. South Korea is currently its third-largest market behind only the US and China. It also launched *FSD (Supervised)* in Australia & New Zealand and continues to prepare for a broader launch in China, pending regulatory approval
- ▶ **The EU:** The *Model Y* is the best-selling vehicle in Norway, Switzerland, and Iceland YTD, in Finland in Q3 and in the Netherlands & Denmark in September. At Gigafactory Berlin, Tesla produced the 100,000th refreshed *Model Y* and started production of the *Model Y Performance*. Tesla continues to pursue the launch of *FSD (Supervised)* in the EU, pending regulatory approval

Volkswagen

Outlook

- ▶ **Demand:** The company maintained sales target for CY25 at around the prior year's level. Registrations in Germany, Western Europe and the US is likely to be flat YoY in CY25, with strong growth in the South American market (Brazil). Asia-Pacific volume is set to be up slightly. Specifically, in China, intense price competition – especially from local manufacturers – is set to pressure foreign manufacturers, particularly in the premium and luxury segments, leading to weaker unit sales development
- ▶ **Guidance:** VW retained previous target of CY25 Group EBIT margin expectations of 2-3%, which it lowered during the pre-quarter close call on October 13 (earlier expectations was 4-5%). Recall, in the past quarter, the company had lowered target to 4-5% from 5.5-6.5%. Its margin guidance also assumes stable supply of semiconductors. VW highlighted recently about production stoppages of key models, due to the Nexperia chip crisis
- ▶ **Assumption for guidance:** 1) The global automotive industry demand is set to be mixed but predominantly positive overall, with some regions seeing flat or slightly increased market volume, 2) it expects competition in the international automotive markets to intensify, posing challenges alongside geopolitical tensions, trade restrictions, and volatile commodity & currency markets, 3) Specifically, in China, intense price competition – especially from local manufacturers – is set to put pressure on foreign manufacturers, particularly in the premium and luxury segments, leading to weaker unit sales development. Its margin guidance also expects a stable supply of semiconductor chips, due to the Nexperia chip crisis

Financial highlights

- ▶ **Brand core group (VW passenger vehicle, SKODA, SEAT, VW CV mass market brands):** Vehicle sales was up 4% YoY, revenue was up 5% YoY, EBIT was up 7% YoY with margin at 4.4%, flat YoY
- ▶ **Brand group progressive (Audi) premium:** Vehicle sales was up 6% YoY, revenue was up 5% YoY, EBIT was down 26% YoY with margin at 3.2%, down 130bp YoY
- ▶ **Brand group sport luxury (Porsche) luxury:** Vehicle sales was down 11% YoY, revenue was down 8% YoY, with an EBIT loss of EUR 200mn

- ▶ **The Group:** Vehicle sales was up 2% YoY, revenue was up 1% YoY, EBIT was down 58% YoY with margin at 2.3% vs 5.4% YoY

Mercedes Benz

- ▶ **Mercedes Benz Q3CY25 earnings takeaways:** The company retained sales target at <-7.5% and EBIT margin guidance in the range of 4-6%. Recall, in Q2, MB lowered margin target from 6-8% to 4-6%. In Q1 too, Mercedes lowered target, including the tariff impact but confirmed previous guidance ex of tariffs
- ▶ **Assumption for outlook:** "Customer demand is set to remain weak in the global automotive markets. Accordingly, based on the current assessment, the global car market for 2025 as a whole is likely to remain at the previous year's level. In the sales region of EU, the market is set to be on the same level as last year. The US market is set to remain at the prior year's level as well. In China, the market is set to be slightly above the previous year's level. In China's premium and luxury segment, the ongoing intense price competition, especially by local manufacturers, is set to lead to significantly weaker development of unit sales for many foreign manufacturers"

Outlook

- ▶ **Demand:** The company retained sales target for CY25 at significantly lower than in CY24 (more than down 7.5%). Demand in the global automotive markets is set to remain weak, with the US and the EU remaining flat. Despite the China market showing growth, the luxury segment is set to remain under stress and highly competitive, due to the ongoing price wars.
- ▶ **Margin:** MB maintained target of CY25 adjusted car EBIT margin expectations of 4-6% vs 8.1% in CY24 for cars. Recall, in the past quarter, the company has retained target, excluding the tariff impact, but lowered considering the tariff impact
- ▶ **Financials:** Group revenue was down 8% YoY for 9MCY25, with cars revenue down 8% YoY, and vans down 14% YoY. Adjusted EBIT for the Group was down 35%, with cars adj EBIT was down 34% YoY and vans EBIT down 41% YoY in 9MCY25. The company launched CLA, its first software-defined vehicle, available with LFP battery

Exhibit 17: PHEV growth for Mercedes outperforms

	9MCY24	9MCY25	YoY (%)
Total unit sales	1,463,263	1,341,427	-8.3
All-electric vehicles (BEV)	135,908	118,355	-12.9
Plug-in hybrid vehicles	131,464	158,738	+20.7
Share of electrified vehicles (%)	18.3	20.7	

Source: Company, Elara Securities research

BMW

Outlook

- ▶ The company retained sales target for CY25 at around prior year's level but has currently reduced BEV contribution from a "slight increase" to "at prior year's level". The positive market trend in the US auto industry is set to continue throughout the year despite ongoing uncertainty surrounding tariffs. In the EU, growth remains heavily driven by increased sales of electrified vehicles. However, revenue per vehicle in the automotive segment is set to decline slightly for the full year compared to the prior year, primarily due to lower price levels in China
- ▶ China's stricter controls on export licenses for rare earths could result in supply shortages for specific components not yet accounted for in current projections. Similar restrictions have been applied to the semiconductor sector. The BMW Group is keeping a close watch on these developments and remains in constant contact with its suppliers to identify potential risks early and take suitable precautionary measures. The CY25 financial year outlook is based on assumptions that supply chains will remain intact and experience no disruptions

- ▶ As on September, the target for sales in China's market had not been achieved. The BMW Group has therefore reduced sales expectations for China in the fourth quarter
- ▶ The share of BEV relative to total deliveries is set to be at the previous year's level due to lower-than-anticipated BEV sales in China and the US
- ▶ **Margin:** BMW retained its previous target of CY25 automotive EBIT margin expectations of 5-7% (more specific to a narrow range of 5-6%), which it lowered on October 7

Key highlights of BMW call:

- ▶ The company anticipates a tariff-related headwind of about 1.5% on the automotive EBIT margin for CY25
- ▶ In Q3, tariffs accounted for 1.75% of negative impact on the automotive EBIT margin

Commentary on Nexperia chip crisis

- ▶ Nexperia is not a direct business partner of BMW. The company clarified this to distinguish the supply chain impact related to semiconductor issues
- ▶ While semiconductor supply constraints and export restrictions are cause for concern, BMW's supplier relationships and risk monitoring are managed proactively to avoid disruptions, but Nexperia itself is not directly involved in BMW's supply chain
- ▶ BMW continues to engage closely with its semiconductor suppliers to offset risks and ensure supply chain stability despite the complex geopolitical and trade environment

Exhibit 18: BMW sales grows 2.4%, driven by the US and the EU, partly offset by China in 9MCY25

	9MCY25	9MCY24	YoY (%)

Total	1,795,734	1,754,157	2.4

Source: Company, Elara Securities Research

Stellantis

- ▶ **Financial results:** Total shipments were up 13% YoY in Q3CY25, but down by 1% YoY in 9MCY25, with revenue up 13% YoY in Q3 and down 6% in 9MCY25. North America shipments were up 35% YoY in Q3CY25, with revenue up 29% YoY, primarily driven by increased volume, specifically in *Jeep*, *Wrangler* and *Ram* light-duty trucks, partly offset by unfavorable FX translation headwinds. EU shipments were up 8% YoY, with revenue up 4% YoY, due to higher shipment volume and improved mix, partly offset by higher incentives and unfavorable FX translation headwinds
- ▶ **Outlook:** The company expects H2CY25 sales to be better than in H1, with low single-digit adjusted EBIT margin. For the full year, Stellantis expects net tariff impact to be ~EUR 1.0bn vs prior estimates of EUR 1.5bn and no further impact from supply chain disruptions.

Toyota Motor

- ▶ **FY26 outlook:** The company expects volume growth of 4.7% YoY in FY26 (unchanged), with Japan set to grow by 4% YoY, North America by 9.5%, the EU by 4.9% and Asia by 1.2%. Electrified vehicles (BEV, HEV, PHEV & FCEV) share is set to increase to 49.3% from 49.3% vs 46.2% YoY. Toyota expects FY26 revenue to grow by 2% YoY vs earlier 1% YoY while operating profit is set to decline by 29% YoY (earlier 33% YoY), due to the negative forex impact, and estimated tariff impact of YEN 145bn (3.0% of FY25 EBIT)
- ▶ **Operating results:** Revenue for H1FY26 was up by 6% YoY while operating income was down by 19% YoY. Margin was down ~250bp in H1FY26 YoY, driven by the negative forex effect and tariff impact of YEN 900bn

Exhibit 20: Toyota Motor sales North America outperforms the EU, Japan, and Asia

Vehicle sales ('000)	FY25	FY24	YoY (%)

Suzuki Motors

- ▶ **FY25 (April 25 to March 2026) outlook:** Management retained its previous target and expects revenue sales to improve by ~4.7% backed by overall automobile volume growth of 2.6%. The company expects FY25 operating margin at ~8.2% vs 11% YoY, and operating profit to decline by 22% YoY, due to adverse forex rates, increase in fixed cost and rising business risks. Management is actively looking for alternate sources for chip supply but does not quantify the likely impact from the chip crisis
- ▶ **Q2FY25 (June 2025 to September 2025) performance:** Automobile volume declined by 2.8% YoY, with Japan up 3.5% YoY, the EU down 21.8% YoY, India 5.6% and Asia (ex-India & Japan) was up by 10.8% YoY. Revenue was up by 0.3% YoY while operating profit was down 18% YoY, with margin at 9.7% YoY vs 11.7% YoY

Ford Motor Company

- ▶ **Guidance CY25:** Ford expects CY25 EBIT to be in the range of USD 6.0-6.5bn (previous USD 7.0-8.5bn). The company expects net tariff impact to be ~USD 1bn. The outlook assumes US industry sales to be ~16.8mn units and pricing to be up 0.5% YoY. The guidance expects adjusted EBIT headwinds of USD 1.5-2.0bn and FCF headwinds of USD 2-3bn
- ▶ **CY26 outlook:** Ford expects to recover at least USD 1bn related to Novelis. The tariff impact in CY26 is set to be like 2025 (net full-year effect). Regulatory compliance pressures should ease as global emissions rules evolve, removing the 2026 compliance headwind. This should allow Ford to optimize its ICE-hybrid-EV mix and reduce dependence on regulatory credits
- ▶ **Financials:** Q3 revenue was ~USD 50.5bn (up >9% YoY, outpacing wholesale), adjusted EBIT was at USD 2.6bn, flat YoY despite USD 700mn net tariff headwind, YTD FCF at USD 5.7bn, cash at ~USD 33bn, liquidity at ~USD 54bn, Q4 dividend at USD 0.15/share; Q3 warranty cost was down USD 450mn YoY on improved launch quality
- ▶ **Tariffs:** USD700 mn net tariff headwind in Q3CY25 in adjusted EBIT, contributing to flat YoY profitability despite revenue growth, with impact primarily from auto parts, steel, and aluminum tariffs, partly offset by US content credits. YTD tariff cost reached USD 1.7bn before the recent policy changes, but Q4 will include a USD 1bn positive receivables from expanded MSRP tariff offsets, resulting in CY25 net headwind of USD 1bn

- ▶ **Nexperia chip crisis:** CEO Jim Farley noted the company views it as an industry-wide challenge with mature semiconductor components, such as diodes and transistors, and they are maximizing purchases of available supply, drawing on experience from the prior chip crisis, while run-out dates align closely with potential resolution timelines. Farley emphasized working with US officials (including recent DC meetings) and China's counterparts for a breakthrough to prevent Q4 production losses across the sector but declined to share further specifics
- ▶ **EV segment losses:** The *Model E* division, responsible for EV, reported a loss of USD 1.4bn in Q3CY25, up from loss of USD 1.3bn in Q2CY25. EV revenue was at USD 1.8bn vs USD 2.4bn QoQ

Exhibit 21: Ford Model E -- EV profitability remains a drag

	Q4CY23	Q1CY24	Q2CY24	Q3CY24	Q4CY24	Q1CY25	Q2CY25	Q3CY25

General Motors

- ▶ **CY25 guidance:** The company raised CY25 adjusted EBIT target to USD 12-13bn (previously USD 10.0-12.5bn), adjusted diluted EPS at USD 9.75-10.50, and adjusted auto free cashflow to USD 10-11bn. The tariff cost outlook was revised to USD 3.5-4.5bn, improving from earlier estimates of up to USD 5.0bn. The guidance assumes ongoing benefits from tariff offsets and US manufacturing incentives supporting margin and cashflow
- ▶ **Q3 performance:** GM reported revenue of USD 48.6bn, adjusted EBIT of USD 3.4bn down 18% YoY dragged by USD 1.1bn tariffs and EV changes, adjusted auto free cashflow of USD 4.2bn, and net income of ~USD 1.3bn, down 57% YoY. The US market share rose to 8.3% with vehicular sales was up 8% to 710,347 units. EV deliveries hit a record 67,000 units with a 16.5% US EV market share. Adjusted EBIT margin in North America was 6.2%
- ▶ **Tariff:** Tariffs were the single-largest external headwind, with USD 1.1bn gross impact in Q3, but GM offset a bit more than 30% through pricing, footprint actions, and cost initiatives; ex-tariffs, North America EBIT-adjusted margin would have been around 9.0% vs the reported 6.2%
- ▶ **Nexperia chip crisis:** Management described the Nexperia situation as an industry-wide semiconductor issue involving basic diodes and transistors, noting it has the potential to disrupt auto production but GM has teams working "around the clock" with suppliers to minimize any impact. They also indicated any expected production risk from the Nexperia disruption is already reflected in their tariff and earnings guidance, and the current 2025 outlook assumes only "minimal production disruption" from this chip issue.

Exhibit 22: Global deliveries rises 5.9% YoY for GM

('000)	Q3CY24	Q2CY25	Q3CY25	YoY (%)	QoQ (%)
North America	790	878	837	5.9	(4.7)
of which the US	660	747	710	7.6	(5.0)

Hyundai Motor Company

- ▶ **Performance by geography:** Global unit sales grew by 2.6% YoY in Q3CY25, with the US up 2.4% YoY, the EU up 8% YoY, South Korea up 6.3% YoY, India down 6.8% YoY and China up 49% YoY
- ▶ **Ecofriendly vehicles (BEV, PHEV, HEV and FCEV) sales continues to grow:** Total sales was up 25% YoY, with ecofriendly vehicle penetration reaching ~24% in Q3CY25 vs 20% YoY
- ▶ **Q3 performance:** Automotive revenue was up 8% YoY, driven by higher volume, better mix and forex benefits. Operating margin, however, deteriorated to 3% vs 7% YoY

Exhibit 23: xEV share improves YoY in Q2CY25, led by hybrids

Automotive financials	Q3CY24	Q2CY25	Q3CY25	YoY (%)	QoQ (%)

Operating Profit (bn KRW)	2289	2253	1174	(48.7)	(47.9)
Margin (%)	7	6	3		
xEV share (%)	20	25	24		

Source: Company, Elara Securities Research

Porsche

- ▶ **Outlook:** The Group maintained CY25 target (which was lowered in September). Management reiterated expectations for a Group operating margin of 0–2% for the year, positioning CY25 as the trough before a gradual recovery beginning in CY26. No changes were made to medium-term ambitions, with double-digit ROS still framed as a post-2026 target as restructuring benefits and tariff mitigation measures take hold
- ▶ **Financial performance:** For 9MCY25, revenue declined ~6% YoY to EUR 26.9bn, while Group operating profit fell to ~EUR 40mn (0.2% margin), heavily affected by EUR 2.7bn in extraordinary charges related to product strategy realignment, battery program adjustments, organizational restructuring, and the ongoing impact of US import tariffs. In Q3CY25, Porsche reported an operating loss of ~EUR 967mn, materially below both prior-year levels and market expectations. PAT for 9M fell to ~EUR 114mn, vs EUR 2.8bn in the same period last year
- ▶ **Tariff:** Management says cumulative US tariff costs reached “a bit more than” EUR 0.5bn by end-Q3 (vs ~EUR 0.4bn at mid-year), and targets full-year burden of ~EUR 0.7bn, which is already factored into the CY25 outlook

Audi

- ▶ **Outlook:** Audi expects revenue in the range of EUR 65-70bn (unchanged), an operating margin of 4-6% (previously 5-7%), and net cashflow of EUR 2.5-3.5bn (unchanged) for CY25
- ▶ **Overall volume:** In 9MCY25, the *Audi* brand (inclusive of *Audi*, *Bentley*, *Lamborghini* and *Ducati*), deliveries to customers were down 4.8% YoY. The decline was attributable to highly competitive macro environment & model changes and uncertainty related to US tariffs.
- ▶ **Region-wise performance:** In the EU, the *Brand* Group deliveries were down 2.6% YoY in 9MCY25. In Germany, deliveries rose by 0.7%. In the US, deliveries decreased by 8% while China was down by 9% YoY
- ▶ **Financials:** Revenue of EUR 48.3bn was up 4.6% YoY in 9MCY25 while operating profit was down 25% YoY. Operating margin came in at 3.2% vs 4.5% YoY
- ▶ **EV volume:** 9MCY25 BEV sales was up 41% YoY while PHEV volume was down 15% YoY. The BEV share reached 13.7% in 9MCY25 vs 9.3% YoY

Auto Ancillaries

India | Sector Update

7 December 2025

Suspension, Lightning & multiproduct outperform

We have analysed Q2 performance of 57 listed auto ancillaries where revenue grew 9.1% YoY, lagging listed original equipment manufacturers (OEM) revenue growth of 16% YoY. Two-wheeler (2W) and three-wheeler (3W) production grew 11% and 18%, respectively, led by positive sentiments on GST 2.0 reforms, while PV reported 4% growth in Q2. CV posted production growth of 11% in Q2.

Demand trends for 2W production remain stable; we expect 9% growth in FY26E while PV growth is likely to grow at 6% growth. MHCV is likely to grow 4% and tractors at 12%. Global demand commentary on PV has been muted, due to tariff headwinds and subdued demand while the North America Class 8 truck retail growth outlook is set to contract by 14% YoY in CY25E, due to weak freight market and high interest rates.

Q2 revenue growth at 9% YoY for ancillaries; suspension braking, lighting and multiproduct outperform: In Q2, the suspension braking segment posted the highest revenue growth of 13% YoY, followed by lighting and multiproduct components at 12% YoY. The Top 5 firms based on YoY revenue growth are Craftsman Auto, up 65%, Pricol, up 51%, Lumax Auto, up 37%, India Nippon electricals, up 30%, and Sandhar Technology, up 29%. The Top 5 firms based on YoY EBITDA growth include Suprajit Engineering, up 58%, Craftsman Automation, up 57%, Pricol, up 53%, Lumax Auto, up 51%, and Lumax Industries, up 45%.

YoY EBITDA margin contraction for most firms; forgings and batteries the worst hit: Thirty-two out of 57 firms posted an EBITDA margin contraction YoY. While battery companies took a hit, due to input cost pressures in the form of higher lead prices, and forging companies were hit on muted exports for CV. The Top 5 firms in terms of EBITDA margin compression YoY include Ramkrishna Forgings, Precision Camshaft, MM Forgings, Balkrishna Industries, and PPAP Automotive. Among the least hit include bearings and tyre manufacturers for which higher revenue growth along with softer RM cost bolstered margin YoY.

Uno Minda, Gabriel India, Minda Corp, Sona BLW are our top picks: Given the GST cut related benefit and robust festive season, we remain positive on 2W and PV related ancillaries. Nifty auto valuation premium to Nifty 50 is at close to median levels, with improving outlook for volume growth, thereby providing scope of further outperformance. We believe there are four key reasons for any auto ancillary to outperform OEMs; a) product expansion, b) segment expansion, c) geographic expansion, d) inorganic expansion. In this framework our top picks in the ancillaries remain Uno Minda, Gabriel India, Minda Corp and Sona BLW.

Suspension, lighting and multiproduct segment revenue outperforms in Q2FY26

Q2FY26 performance review

Healthy double-digit revenue growth across OEM; ancillaries report 9% YoY revenue growth

We have analysed Q2 performance of 57 listed auto ancillaries where revenue grew 9% YoY, lagging healthy double-digit revenue growth of 16% YoY reported by OEM (mainly owing to global exposure of ancillaries, where growth has been muted). Revenue growth across OEM was driven by volume growth (~14% YoY volume growth in Q2, led by GST 2.0 rationalization reforms along with early arrival of festival season) and mix benefits. Among auto ancillaries, suspension braking companies posted healthy revenue growth of 13% YoY, followed by lighting and multi products, which grew 12% YoY. In terms of absolute EBITDA, while OEM posted 17% YoY EBITDA growth, aided by softer RM cost, ancillaries reported high single-digit EBITDA growth of 8.1% in Q2FY26.

Q2 revenue growth at 9% YoY for ancillaries; suspension and braking products outperform

In Q2, the suspension and braking segment posted the highest revenue growth of 13% YoY, followed by lighting and multiproduct segment which grew at 12% YoY. Revenue growth for suspension braking firms was led by 1) healthy OEM volume in PV & 2W, and 2) rising penetration of safety critical systems, such as Anti-Lock Braking System (ABS) and disc brakes along with OEM premiumization and model upgrades, translating into higher content per vehicle for ancillaries. As for lighting companies, the structural shift in the industry from halogen to Light Emitting Diode (LED) lighting is driving higher content per vehicle, which, in turn, is driving top-line expansion for lighting firms, such as FIEM and Lumax Industries. For instance, LED systems currently contribute 65% of revenue for Lumax Industries, up from 55% in Q2FY25. Bearings firms led the pack in terms of EBITDA growth at 18% YoY, followed by suspension & braking segment at 15% YoY.

Exports weakness drags Q2 performance for forging companies

Forging companies, such as Bharat Forge and Ramkrishna Forgings, reported a subdued quarter, as revenues dipped ~14% YoY while EBITDA was under pressure. The downturn was driven by exports headwinds, particularly North American Class 8 Truck market, which saw inventory destocking, thereby dragging exports performance. For instance, Bharat Forge saw CV exports to the US contract 48% QoQ and 67% YoY with expectations of an uptick in demand from Q4. Ramkrishna Forge and MM Forgings faced a similar softness in the overseas markets for medium and heavy-duty components, driven by destocking by global OEM, weak freight activity in the US & the EU, and deferment of fresh orders, leading to lower utilization and adverse absorption of fixed cost. Commentaries from global OEM, such as Daimler and Volvo, indicate weak demand trends with Daimler's downward revision of sales target from 175k units to 155k, pointing toward continued market uncertainty and a cautious near-term outlook.

Tyre firms benefit from OEM demand upcycle and softer RM cost

Backed by OEM demand upcycle on GST 2.0 reforms and stable replacement, tyre makers saw revenue growth of 6-12% in Q2FY26. Among the pack, CEAT outperformed with revenue growth of 12% (Apollo Tyres standalone revenue growth of 6% YoY), driven by healthy volume growth of ~8% YoY (Apollo Tyres volume growth of 4% YoY) along with net realization improving by 4% YoY. Tyre companies are also benefitting from moderation in key input cost, with major tyre firms witnessing a drop in the RM cost basket by 150-350bp, favourably aiding in margin of tyre companies. Tyre companies expect a stable RM basket, which should continue to aid in the margin profile.

Exports weak for auto ancillaries due to trade uncertainty

Auto OEM exports, especially for PV and 2W, is serving as a strategic hedge against domestic market softness. While MSIL exports rose 42% YoY, Eicher Motors overseas volume surged 55% YoY on the back of stable demand in LATM while Bajaj Auto saw exports volume rising by 24% YoY on sequential recovery in demand in the African Union nations. However, some components and ancillary exporters (Bharat Forge, Balkrishna Industries, SAMIL and Suprajit Engineering) remain vulnerable, due to global trade uncertainty, including US tariffs and sluggish exports demand.

Rare earths magnet issue normalizes

While rare earths magnet issue largely disrupted production of traction motors in Q1, ancillaries have undertaken a series of counter measures to mitigate it. For instance, Sona BLW has addressed the issue by manufacturing ferrite-assisted motors for e2W, e3W and light commercial vehicle. However, for Uno Minda, availability of heavy rare earths poses a limited risk as motors are primarily used in its sensor business.

Tariffs impact moderates but margin pressure persists

Global OEM commentary indicates while tariff headwinds remain material, their incremental impact is being partially absorbed through pricing and localization. Mercedes retained its 4–6% EBIT margin target despite elevated imports duty, implying stronger cost agility. Volkswagen set a 60–200bp tariff-related cost impact target in CY25, offset by regional mix gains in South America. Ford trimmed EBIT target by USD 1–2 bn, citing USD 1 bn direct tariffs impact and weaker China pricing. Toyota, too, expects a YEN 145bn tariffs-related drag (~3% of FY25 EBIT), with margin normalization delayed into FY26. Overall, the near-term narrative across OEM points to steady volume but compressed profitability, with tariffs mitigation strategies – local sourcing, price passthrough, and select product remix – emerging as key operational levers.

Auto ancillaries – P/BV-ROE matrix

The nine-year median ROE of auto ancillaries is ~14.6% while P/BV on FY25 financials is 4.3x. Ancillaries that have a nine-year median ROE of 14.6% or higher and P/BV of 4.3x or lower are Automotive Axles, Amara Raja, and GNA Axles. Among the Top 3 companies with the highest ROE are Swaraj Engines, Motherson Wiring and Endurance Technology. Companies with the lowest P/BV include GNA Axles, Exide and Amara Raja.

Exhibit 8: Companies with P/BV lower and near sector average and ROE higher than sector average

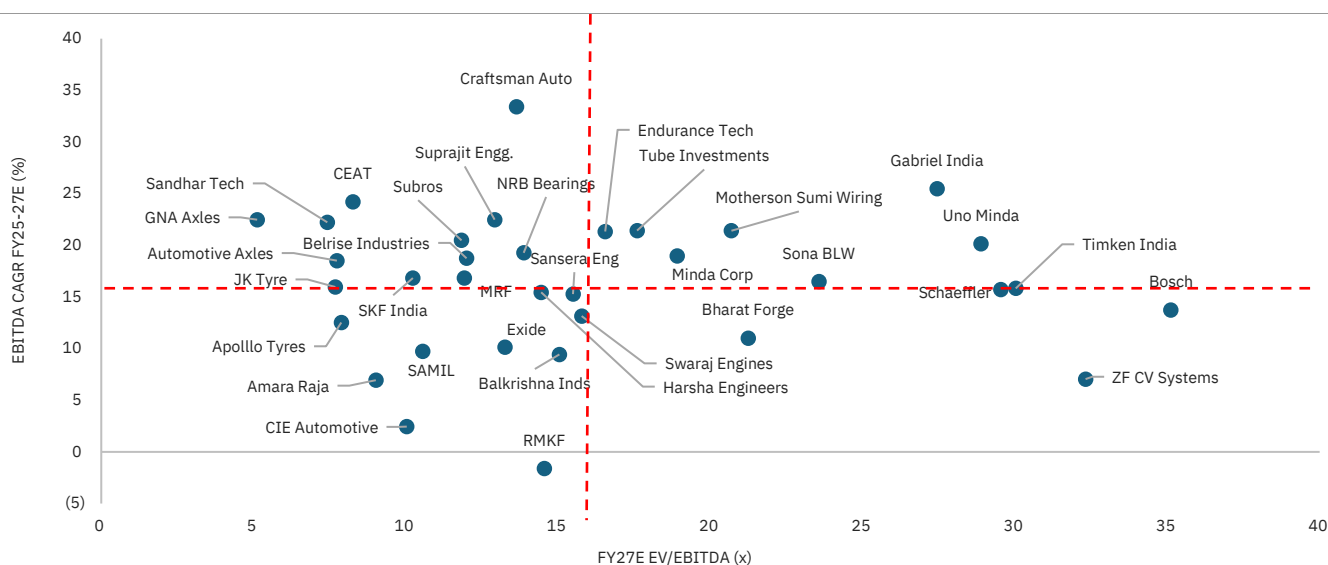

Company	9-year median ROE (%)	P/BV (FY25)	Market Cap (INR bn)
Amara Raja	15.4	2.3	173
GNA Axles	14.6	1.5	13.5

Exhibit 17: Strong demand commentary on GST 2.0 and festival season boom

OEM	Demand commentary in Q2FY26
Bajaj Auto	Retail momentum remains broad-based across urban and rural markets, with premium 125cc+ motorcycles and three-wheelers leading growth. Management noted festival season volume touched record highs, aided by improved financing availability and brand-led traction in the <i>Pulsar</i> and the <i>Chetak</i> . The company expects this positive momentum to sustain into H2 FY26, with industry growth pegged at 6–8% YoY and <u>Bajaj Auto targets to outperform in premium and exports-driven segments</u>
TVS Motors	The festival season has outperformed vs the industry. Domestic ICE 2W segment grew 32% YoY vs industry's 24% during Navratri-Diwali. <u>Management has set an 8% H2 domestic growth target and expects continued exports resilience</u> . The outlook is positive amid strong EV pipeline and PLI benefits
Hero MotoCorp	Festival-led revival; optimistic on H2. It posted ~17% festival period growth (Aug–Nov) vs the industry's 14%. Management expects 8–10% industry growth in H2 (FY26 ~5–6%). Exports was up 54% YoY in H1, and the inventory has normalized to four weeks. Strong consumer sentiments post-GST cut to sustain H2 volume
Eicher Motors	Strong retail surge on festivals; cautious ahead. Royal Enfield retails were up ~50% YoY during festivals, benefitting from GST 2.0 affordability and refreshed 350 cc lineup
Maruti Suzuki India	Strong festival boost; small-car revival. Retail sales grew ~90% YoY during Navratri–Diwali, led by GST cut-driven affordability. Small cars were up ~30% YoY, and SUV ~4–5%. <u>Management expects industry growth ~6% YoY in H2 and small car segment ~10%</u> . It targets continued festival traction into Q3 and healthy exports momentum
M&M	Robust demand across UV & farm; upgraded growth guidance. Post-GST 2.0, <u>UV growth retained at mid-to-high teens (15-20%)</u> ; <u>tractor growth target raised by low double digits (10-12%)</u> , supported by festival season sales and strong farm macros. LCV targets growth in the low double digits. Management was confident on broad-based momentum through FY26
Tata Motors CV	Gradual upturn: H2 recovery likely. MHCV industry was up ~2% YoY in H1FY26; <u>Management expects high single-digit growth in H2, implying ~4–5% for FY26</u> , aided by GST 2.0 and higher infra & mining demand. Emphasis on non-cyclical revenue (spares, exports and defence) to cushion cycles. Retained margin discipline
Tata Motors PV	<u>India PV growth was aided by GST reforms; JLR weak. India PV expects double-digits H2 growth, taking FY26 to ~5% YoY (vs 1–2% earlier)</u> , supported by GST 2.0 uplift and festival sentiments. JLR has cut FY26 EBIT guidance to 0–2%, due to a cyberattack and soft China demand. The outlook is muted in the near term; festival momentum was India-driven
Ashok Leyland	Festival lift across MHCV & LCV; optimistic tone. Management highlighted GST 2.0 rate cuts and festival season bolstered truck and bus demand, with October industry growth of 7% (MHCV) and 15% (LCV 2–4 T). <u>It expects positive momentum into H2</u> ; exports was up 38% H1 YoY; strong defence and aftermarket traction supports outlook

Source: Company, Elara Securities Research

Exhibit 18: Muted quarter; US tariffs and China weakness weigh on demand outlook

YEN	Key highlights	Key listed India auto ancillaries
Tesla	Tesla's earnings missed estimates owing to increased cost. On the earnings call, Elon Musk focused on giving updates about full autonomy and <i>Optimus</i> robots progress, while new model launch pipeline project questions were not taken. <u>Total tariffs impact for both businesses in Q3 (auto energy storage) was more than USD 400mn split equally between them (~1.4% of sales)</u>	Sona BLW
Mercedes	The company retained sales (<7.5%) and EBIT margin target in the range of 4-6%. <u>Recall, in Q2, MB lowered margin guidance from 6-8% to 4-6%</u> . In Q1, Mercedes lowered guidance, including the tariff impact but confirmed previous target ex of tariffs	SAMIL
BMW	<u>The company retained sales target for CY25 to be around prior year's level but reduced BEV contribution from "a slight increase" to "at prior year's levels"</u> . The positive market trend in the US auto industry is set to continue throughout the year despite the ongoing uncertainty surrounding tariffs. In the EU, growth remains heavily driven by increased sales of electrified vehicles. However, revenue per vehicle in the automotive segment is projected to decline slightly for the full year compared to the prior year, due to lower price levels in China	SAMIL, Endurance Tech
Porsche	Group sales was EUR 37-38bn, return on sales slightly positive to 2% (adjusted for extras & tariffs), auto EBITDA margin 10.5-12.5%, net cashflow margin at 3-5%, BEV share at 3-5% assumes 15% <u>US tariffs from August (mitigated via pricing & equity)</u> , <u>China luxury tax, delayed BEV ramp-up—initial benefits from CY26 via new launches and the portfolio</u>	SAMIL
Volkswagen	The company retained sales target for CY25 at the prior year level. Registrations in Germany, Western Europe and the US are likely to be flat YoY in CY25, with strong growth in South America (Brazil). Asia-Pacific volume is expected to be up slightly. Specifically, in China, intense price competition—especially from local manufacturers—is set to pressure foreign manufacturers, particularly in the premium and luxury segments, leading to weaker unit sales development of 1.3bn Euro impact in1HCY25. It has lowered target after factoring in tariffs-related cost. <u>It expects full-year tariffs impact to be 60-200bp</u>	SAMIL, Endurance Tech
Ford	Ford expects CY25 EBIT to be in the range of USD 6.0-6.5bn (from USD 7.0-8.5bn). <u>The company expects net tariffs impact to be ~USD 1bn</u> .The outlook assumes US industry sales to be ~16.8mn units and pricing to be up 0.5% YoY. <u>It expects adjusted EBIT headwinds of USD 1.5-2.0bn and FCF headwinds of USD 2-3bn</u>	SAMIL, Sundaram Fasteners
Stellantis	<u>The company expects H2CY25 sales to be better than H1, with low single-digit adjusted EBIT margin. For the full year, Stellantis expects net tariffs impact to be ~EUR 1.0bn (vs prior estimates of EUR 1.5bn)</u> and expects no further impact from supply chain disruptions	SAMIL, Endurance Tech
Toyota	The company expects volume growth of 4.7% YoY in FY26 (unchanged), with Japan set to grow by 4% YoY, North America by 9.5%, the EU by 4.9% and Asia by 1.2%. Electrified vehicles (BEV, HEV, PHEV & FCEV) share is likely to increase to 49.3% (earlier 49.3%) vs 46.2% YoY. Toyota expects FY26 revenue to grow by 2% YoY (vs earlier 1% YoY), while <u>operating profit is set to decline by 29% YoY (earlier 33% YoY)</u> , due to negative forex impact, and estimated tariffs impact of YEN 145bn (3.0% of FY25 EBIT)	NA

Disclaimer for non U.S. Investors

The information contained in this note is of a general nature and is not intended to address the circumstances of any particular individual or entity. Although we endeavor to provide accurate and timely information, there can be no guarantee that such information is accurate as of the date it is received or that it will continue to be accurate in the future. No one should act on such information without appropriate professional advice after a thorough examination of the particular situation.

Disclosures for U.S. Investors

Rule 15a6 Disclosure: This research report ("**Report**") was prepared, approved, published, and distributed by Elara Securities (India) Private Limited a company located outside of the United States (the "**Foreign Counterparty**"). Avior Capital Markets US LLC ("**Avior US**"), a US registered broker-dealer, distributes this Report in the US on behalf of the Foreign Counterparty. Only major U.S. institutional investors (as defined in Rule 15a-6 under the US Securities Exchange Act of 1934 (the "**Exchange Act**") may receive this Report under the exemption in Rule 15a-6. A US institutional investor must effect any transaction in the securities described in this Report through Avior US.

Neither the Report nor any analyst who prepared or approved the Report is subject to US legal requirements or the Financial Industry Regulatory Authority, Inc. ("**FINRA**") or other US regulatory requirements concerning research reports or research analysts. The Foreign Counterparty is not a registered broker-dealer under the Exchange Act nor is it a member of the Financial Industry Regulatory Authority, Inc., or any other US self-regulatory organisation.

Disclosures on Subject Companies: Analysts of the Foreign Counterparty produced this material solely for informational purposes and the use of the intended recipient. No person may reproduce, this Report under any circumstances. No person may copy or make this Report available to any other person other than the intended recipient.

Avior US distributes this Report in the United States of America. The Foreign Counterparty distributes this Report elsewhere in the world. This document is not an offer, or invitation by or on behalf of Avior US, the Foreign Counterparty, their affiliates, or any other person, to buy or sell any security.

Avior US and the Foreign Counterparty and their affiliates obtained the information contained herein from published information and other sources, which Avior US and the Foreign Counterparty and their affiliates reasonably consider to be reliable.

Avior US and the Foreign Counterparty accept no liability or responsibility whatsoever for the accuracy or completeness of any such information. All estimates, expressions of opinion and other subjective judgments contained herein are valid as of the date of this document. Avior US assumes responsibility for the Report content with regards to research distributed in the US.

Neither Avior US nor the Foreign Counterparty has managed or co-managed a public offering of securities for the subject company in the past 12 months, have not received compensation for investment banking services from the subject company in the past 12 months and do not expect to receive and does not intend to seek compensation for investment banking services from the subject company in the next three months. Avior US and the Foreign Counterparty have not owned any class of equity securities of the subject company. There are no other actual, material conflicts of interest of Avior US and the Foreign Counterparty at the time of the publication of this Report. As of the publication of this Report, Avior US nor the Foreign Counterparty makes a market in the subject securities.

Avior US and its affiliates, to the fullest extent permissible by law, accept no liability of any nature whatsoever for any claims, damages or losses arising from, or in connection with, the contents of this Report or the use, reliance, publication, distribution, dissemination, disclosure, alteration or reproduction of this Report, or any views or recommendations recorded therein.

Participants in foreign exchange transactions may incur risks arising from several factors, including the following: (i) exchange rates can be volatile and are subject to large fluctuations; (ii) the value of currencies may be affected by numerous market factors, including world and national economic, political and regulatory events, events in equity and debt markets and changes in interest rates; and (iii) currencies may be subject to devaluation or government imposed exchange controls which could affect the value of the currency. Investors in securities such as ADRs, whose values are affected by the currency of an underlying security, effectively assume currency risk.

Subject to the applicable laws, all transactions should be executed through Avior US. Aside from within this Report, important conflict disclosures can also be found at <https://aviorcapital.us/us-regulatory-disclosures/> and Investors are strongly encouraged to review this information before investing.

Additional Disclaimer for UK Investors

Note that Elara Securities (India) Private Limited ("**Foreign Counterparty**") has concluded a MiFID II research intermediary agreement with Avior Capital Markets International Limited ("Avior UK"), regulated by the Financial Conduct Authority (FRN: 191074), pursuant to which Avior UK distributes the Foreign Counterparty's research in the UK, in return for which the Foreign Counterparty pays Avior UK a percentage of the income received in relation to such research. This research report including any recommendations recorded therein ("**Report**") have been prepared by the Foreign Counterparty, and not by Avior UK.

The Report: (a) has been objectively prepared from public sources which are believed to be reliable and therefore constitutes independent investment research and is presented as such; and (b) may only be distributed to, and relied on by, qualifying investors, who are permitted to receive same in the UK.

Securities, money market instruments, strategies, financial or investment instruments mentioned in this Report may not be suitable for all investors. The information and opinions provided in this Report do not constitute a personal recommendation/investment advice and take no account of the investor's individual circumstances. Investors should consider this Report as only a single factor in making any investment decisions and, if appropriate, should seek advice from an investment advisor. This Report is not an offer, or invitation by or on behalf of Avior UK, the Foreign Counterparty, their affiliates, or any other person, to buy or sell any security.

Save as disclosed otherwise, the Foreign Counterparty's relationship with Avior UK is not reasonably expected to impair the objective presentation of the recommendations in the Report, including any interests or conflicts of interest concerning any financial instruments or the issuers to which the recommendations, directly or indirectly, relate. The Report is deemed to be first disseminated at the date and time recorded on the relevant distribution platform, data network or email (as applicable), and which information is available on request. A list of the Foreign Counterparty's research reports disseminated in the UK over the past 12 months is also available on request.

Avior UK does not assume any responsibility or liability of any nature whatsoever arising from or in connection with the content, use, reliance or dissemination of the Report or any recommendation in respect thereof and disclaims any such liability.
