Today's top research idea

Tata Steel: Strong domestic outlook; Europe's breakeven to drive consolidated earnings; Upgrade to Buy

- ❖ TATA is one of the largest players in India's steel sector and is set to benefit from improving steel price realizations, operating efficiencies, and the strong domestic demand outlook. The implementation of the safeguard duty is expected to help domestic operations achieve better realization.
- ❖ While near-term challenges persist due to global uncertainty around tariff escalations, the long-term outlook for TATA remains strong. The Indian business is expected to continue its strong performance, and an improvement in the European business performance is likely to support overall earnings.
- ❖ TATA is expected to generate a strong OCF of INR957b, which will help fund the ongoing/planned expansion of INR160b annually without leveraging the balance sheet. Net debt stood at INR848b as of 1QFY26, which includes cash of INR141b. This translates into net debt/EBITDA of 3.21x as of Jun'25.
- ❖ At CMP, TATA is trading at 6.8x EV/EBITDA and 1.9x FY27E P/B. **We upgrade the stock from Neutral to BUY with an SOTP-based TP of INR210 per share on Sep'27 estimate.**

Stock Performance (1-year)

CMP: INR177 TP:INR210 (+19%) Upgrade to Buy

Strong domestic outlook; Europe's breakeven to drive consolidated earnings

Capacity expansion to drive earnings amid demand upswing

- Tata Steel (TATA) is aggressively expanding its capacity in India to capitalize on rising domestic demand, targeting an increase from 26.5mtpa in FY25 to 40mtpa by FY30.
- The company has commissioned a 5mtpa integrated capacity at Kalinganagar, increasing the plant's total capacity to 8mtpa (INR270b investment), with phase-III expansion targeting 13mtpa. Other key projects include scaling NINL from 1mtpa to 4.5mtpa, a 0.75mtpa electric arc furnace (EAF) at Ludhiana by FY27, and expanding Meramandali from 5.6mtpa to 8.2mtpa.
- In Europe, TATA is transitioning to green steelmaking, converting Port Talbot (UK) to a 3mtpa EAF and exploring a gas-based DRI + EAF route at IJmuiden (Netherlands), subject to policy clarity.

India's steel demand and safeguard duty to support domestic prices

- India's steel demand is projected to grow ~8-10% over FY26-27, backed by a robust demand environment, policy support, and ongoing recovery in industry fundamentals.
- To protect against rising imports, the Indian government has proposed a 12% safeguard duty on flat steel products, which could support domestic prices.
- Currently, market sentiment for 2HFY26 points to a gradual price recovery, muted costs (especially coking coal prices), and demand tailwinds.

Breakeven for European operations – TSUK breakeven on track; TSN cost restructuring to drive profitability

- TATA's European operations are moving toward breakeven amid restructuring and cost optimization. EBITDA losses have narrowed from USD76/t in 2QFY25 to USD8/t EBITDA gain in 1QFY26, aided by lower energy costs and improved efficiency.
- With the UK BF shutdown and the Netherlands ramp-up, Europe's EBITDA is expected to improve further. We expect it to rise from USD8/t in 1QFY26 to USD70/t by FY28, which should also support consolidated EBITDA/t increasing to INR13,000/t by FY28E (vs. INR8,376/t in FY25).

Valuation and view: Upgrade to BUY

- TATA is one of the largest players in India's steel sector and is set to benefit from improving steel price realizations, operating efficiencies, and the strong domestic demand outlook. The implementation of the safeguard duty is expected to help domestic operations achieve better realization.

- While near-term challenges persist due to global uncertainty around tariff escalations, the long-term outlook for TATA remains strong. The Indian business is expected to continue its strong performance, and an improvement in the European business performance is likely to support overall earnings.
- TATA is expected to generate a strong OCF of INR957b, which will help fund the ongoing/planned expansion of INR160b annually without leveraging the balance sheet. Net debt stood at INR848b as of 1QFY26, which includes cash of INR141b. This translates into net debt/EBITDA of 3.21x as of Jun'25.
- **At CMP, TATA is trading at 6.8x EV/EBITDA and 1.9x FY27E P/B. We upgrade the stock from Neutral to BUY with an SOTP-based TP of INR210 per share on Sep'27 estimate.**

Potential upside from relief on AGR dues for Vi, Bharti Airtel, and Bharti Hexacom

	Vi	Bharti	Hexacom
AGR dues (June'25, INR b)	775	394	16
Share count - b	108	5.8	0.5
AGR dues/Share (INR)	7.1	67.9	31.1
Relief in case of 50% waiver (INR/sh)	3.6	33.9	15.6
CMP (INR/Sh)	10	2,083	1,866
Relief/Sh, %	35.6	1.6	0.8

SC allows Gol to re-examine the AGR issue; upgrade Vi to Neutral

- Supreme Court (SC) has permitted the Union government (Gol) to re-examine the AGR verdict, taking into account the fact that Gol now holds 49% equity stake in Vodafone Idea (Vi) and aiming to prevent any disruption in services for ~200m Vi customers.
- The SC observed that any decision regarding AGR relief lie within the policy domain of the Union, thereby clearing the way for the Gol to extend such relief.
- We believe this verdict is a positive step and expect the Gol to revisit the AGR issue and announce relief measures soon.
- The verdict is a material positive for Vi, as it could lead to a significant reduction in its AGR dues (**~INR3.6/share boost in case of ~50% waiver**). However, we believe a part of this potential relief is already factored into Vi's CMP (stock up ~35% since Vi's latest petition in Sep'25).
- The potential AGR relief underscores the Gol's commitment to maintaining a 3+1 market construct in the Indian telecom sector and could also facilitate Vi's long-pending debt raise. This, in turn, would support the continuation of Vi's INR500-550b capex plans and consequently uplift sentiment for Indus Towers.
- We believe any relief would likely be sector-wide rather than limited to Vi. However, we await further clarity, as the SC observed that Gol's 49% stake in Vi as a key factor in permitting a re-examination of the AGR dues, which could exclude telcos such as Bharti and Hexacom from similar relief.
- If the Gol were to provide relief to Bharti and Hexacom, the cash flow boost could be significant. However, the benefit would account for only ~2-3% of their market caps (in case of a complete waiver).
- Moreover, any relief for Vi would delay (if not completely eliminate) the prospects of a duopoly in the Indian telecom sector, and make incremental market share gains from Vi more challenging for Bharti and RJio in the near to medium term.
- **We raise our TP for Vi to INR10/share (vs. INR6.5 earlier) as we bake in partial AGR relief and upgrade the stock to Neutral (from Sell earlier).**
- On our estimates, Vi would still face a cash shortfall of ~INR270b over FY26-28E, despite assuming a debt raise of ~INR250b.
- Vi's LT revival still hinges on additional relief measures, such as tariff hikes and reduction in competitive intensity (especially on customer acquisition costs), none of which are within the company's control. This prevents us from turning more constructive at this stage.

SC clears the way for Gol to re-examine AGR dues and grant relief

- SC has permitted the Gol to re-examine the AGR verdict, taking into account the fact that Gol now holds 49% equity stake in Vi and aiming to prevent any disruption to services for ~200m Vi customers.
- As per media articles, the Gol has been looking to provide relief to Vi on AGR dues (repayments starting Mar'26) but was awaiting SC's approval before making any announcement.

- The SC's observation that decisions on AGR relief fall within the policy domain of the Union has now cleared the way for the GoI to extend such relief.
- We believe this verdict is a positive step and expect the GoI to revisit the AGR matter and announce relief measures soon.

SC verdict a material positive for Vi and sentimentally positive for Indus

- SC's verdict is clearly a positive for Vi, which will now engage with DoT for relief on its ~INR775b AGR dues (with ~INR164b annual repayments currently, starting from Mar'26).
- Overall, AGR dues account for **~INR7/share** for Vi (see Exhibit 1). Based on the company's past submissions, we believe there could be a demand for: i) ~INR60b reduction in the base amount, ii) complete waiver of penalties and interest on penalties, and iii) a partial waiver of the interest component.
- On our estimates, the potential relief could amount to ~INR380b (or ~50% of Vi's current AGR outstanding), translating to **~INR3.6/share**.
- We note that since Vi's recent petition to the SC, the stock has risen by ~INR2.6/share (or 35%) and already bakes in relief on AGR dues to some extent.
- However, a tangible relief on AGR dues should also provide confidence to lenders on the GoI's commitment to a 3+1 market structure in the Indian telecom industry, thereby enabling Vi's long-pending debt raise.
- A reduction in AGR dues, along with debt raise, would ensure the continuation of Vi's ~INR500-550b capex plan, which will also be beneficial for Indus Towers (more sentimentally than in terms of earnings upgrades).

No clarity yet on applicability of any potential relief measures for Bharti

- We believe any relief by the GoI will have to be sector-wide rather than limited to Vi.
- However, the SC's observation on GoI's 49% stake in Vi as a key factor in permitting a re-examination of dues could rule out relief for other telcos (such as Bharti, which was not a petitioner alongside Vi this time).
- Further, we note that Bharti had written to the GoI seeking an equity conversion of its AGR dues, in line with the Sep'21 relief measures, which we believe was a measure to ensure equal treatment (vis-à-vis Vi) in the event of any relief.
- We await further clarity on the applicability of the SC's verdict and, consequently, the potential for relief to other telcos.
- If the verdict were to extend to Bharti and Hexacom, we note that while the overall AGR dues are material from a cashflow perspective (~INR400b for Bharti and ~INR16b for Hexacom), they form only ~2-3% of the market cap.
- Moreover, a significant relief for Vi, followed by a debt raise, could improve its competitiveness at least in the near to medium term, potentially impacting the pace of market share gains.

Valuation and view

- The SC's verdict is a material positive for Vi as it could lead to a significant reduction in its AGR dues (**~INR3.6/share boost in case of ~50% waiver**), though we believe a part of the relief is already factored into Vi's CMP (stock up ~35% since Vi's latest petition in Sep'25).

- Apart from a potential reduction in the AGR liability, Gol's commitment to the 3+1 market structure could enable the successful completion of Vi's long-pending debt raise and, thereby, ensure improved competitiveness.
- We believe the verdict is sentimentally positive for Indus Towers as it improves visibility on the continuation of Vi's capex plans, though it is unlikely to drive any material earnings upgrades.
- **We raise our TP for Vi to INR10/share (vs. INR6.5 earlier) as we bake in a partial AGR relief and upgrade the stock to Neutral (from Sell earlier).**
- Vi's LT revival still requires additional relief measures, such as tariff hikes and a reduction in the competitive intensity (especially on customer acquisition costs), none of which are within the company's control. This prevents us from turning more constructive at this stage.
- We continue to prefer Bharti (BUY, TP INR2,285) and RJio (RIL, BUY, TP INR1,700) in the telecom space and remain Neutral on Indus (TP INR390) and Hexacom (TP INR1,900).

CMP: INR4,001 TP: INR4,850 (+21%) Buy

Margins under pressure amid pricing volatility; volumes hold steady

Operating performance in line

- Supreme Industries (SI) reported muted operating performance (EBITDA down 7% YoY), led by volatile PVC prices, a lower VAP mix, and weak demand (due to extended monsoon). Despite this, pipes volume grew ~17% YoY in 2Q, with piping volume growth guidance maintained at ~15-17% for FY26.
- Management has also maintained its overall volume growth for FY26 at 12-14% YoY, driven by a positive demand outlook from the housing/plumbing and agriculture segments, expected stabilization of prices (with the implementation of ADD), and the addition of Wavin capacity (~71,000MTPA).
- We largely maintain our FY26/FY27/FY28 earnings estimate and **reiterate BUY**, valuing the stock at 45x FY27E EPS to arrive at our TP of INR4,850.

Steady volume growth in piping segment with an improving outlook

- Consolidated revenue grew 5% YoY to INR23.9b (est. in line), led by growth in volume (up 12% YoY) to 119.8k MT, which was offset by a decline in realization (down 5% YoY to INR134/kg).
- Consolidated EBITDA declined 7% YoY to INR2.9b (est. in line), with an EBITDA margin of 12.4% (est. 12.9%), which contracted 160bp YoY. EBITDA/kg for the quarter was INR19.3/kg (-17% YoY). Adj. PAT declined 20% YoY to INR1.6b (est. INR1.9b).
- Plastic piping products reported a volume of ~120k MT (+17% YoY) (including ~3,000MT of Wavin volume integrated from 1st Aug'25). Revenue stood at INR16b (+11% YoY) and EBIT at INR1.3b (-16% YoY), resulting in an EBIT margin of 7.9% (-250bp YoY). Realization came in at INR134/kg (-5% YoY), while EBIT per kg stood at INR10.6/kg (-28% YoY).
- For industrial products, revenue stood at INR2.8b (-14% YoY), EBIT at INR118m (-58% YoY), and EBIT margin at 4.2% (-440bp YoY). For packaging products, revenue was INR4b (-1.6% YoY), EBIT INR476m (+15% YoY), and EBIT margin 12.1% (+70bp YoY). For consumer products, revenue came in at INR1b (flat YoY), EBIT at INR141m (-15% YoY), and EBIT margin at 0.5% (+30bp YoY).
- For 1HFY26, revenue grew 2% YoY to INR50b, while EBITDA/Adj PAT declined 13%/24% YoY to INR6.2b/INR3.6b. For 1HFY26, the company faced an inventory loss of INR500-600m
- For 1HFY26, total volume grew 8% YoY to 335.2k MT.
- For 1HFY26, gross debt/CFO stood at INR2.4b/INR2.3b as of Sept'25, compared to NIL/INR10b in Mar'25.

Highlights from the management commentary

- **Guidance:** Management has guided a recovery in demand from 3QFY26 onwards, expecting no inventory loss in 2HFY26. The company guided INR110-115b revenue with an EBITDA margin of ~14.5-15% for FY26.

Others	14.4	14.6	14.6

Note: FII includes depository receipts

- **Capex:** In 1HFY26, the company incurred a capex outflow of INR8.7b, which included the Wavin acquisition (INR3.1b) and investments in window profiles (INR2b) and silent pipes (INR800m). The company expects a total cash outflow of INR13b for FY26. By the end of FY26, piping capacity is projected to exceed 1m MT, while overall capacity is expected to surpass 1.2m MT.
- **Export:** Earlier, the company exported solely through the Dubai market. However, it has now established offices in India. Going forward, the company expects exports to grow QoQ across multiple countries. Currently, **exports account for less than 3% of total sales.**

Valuation and view

- Macro headwinds have weighed on the industry, including SI, over the past few quarters; however, with PVC prices stabilizing at current levels and demand likely to improve (from housing and agri), we anticipate the growth momentum to pick up in 2HFY26.
- With guidance of a 12-14% volume growth and a healthy EBITDA margin of 14.5-15% in FY26, supported by capacity additions, improved utilization, a higher VAP mix, and no inventory losses, we expect SI to clock 12%/20%/20% CAGR in revenue/EBITDA/PAT over FY25-28. We value the stock at 45x FY27 EPS to arrive at a TP of INR4,850. **Reiterate BUY.**

Margins improve QoQ despite railway division integration

Steady performance amid challenging macro

- SONACOMS' consol. revenue/EBITDA/adj. PAT rose ~24%/13%/11% YoY to INR11.4b/INR2.9b/INR1.7b. 2Q results are not comparable to our estimates as it was the first quarter after the railway division integration, while our estimates factored in the core business. EBITDA margins fell 230bp YoY to 25.3% due to an adverse mix, lower operating leverage and the integration of the railway business
- We earlier valued the railway division separately. However, given that the company would not be disclosing segmental financials, we have now integrated the railway division's financials into our estimates. As a result, we have upgraded the earnings estimates by 27%/20% for FY26/FY27. However, this would also warrant a de-rating for the consolidated entity, in our view. Hence, we lower our target multiple for the consolidated entity to 34x from 36x earlier for the core. As a result, our TP now stands at INR448 per share (valued at 34x Sep'27E EPS). Maintain Neutral.

Full integration of railway division seen in 2Q

- The company's 2Q financials are not directly comparable with our estimates, as we had estimated financials for the core business, excluding the railway division. However, the company has now fully integrated the railway business acquired from Escorts Kubota and has not divulged details separately. Hence, a like-for-like comparison with our estimates and with last year's financials is not possible.
- Consol. revenue/EBITDA/adj. PAT rose ~24%/13%/11% YoY to INR11.4b/INR2.9b/INR1.7b. Revenue growth was largely driven by the integration of the railway division.
- BEV revenue was down 17% YoY, with BEV contribution falling to 30% in 1HFY26 from 36% YoY.
- EBITDA margins fell 230bp YoY to 25.3% due to an adverse mix, lower operating leverage and the integration of the railway business.
- Overall, 2Q PAT grew 13% YoY to INR1.7b.
- For 1HFY26, revenue/adj. PAT grew 9.7%/2.1% YoY, while EBITDA fell ~3%. We expect revenue/EBITDA/PAT to grow ~35%/30%/23% YoY in 2HFY26.
- The company generated a cash flow from operations (CFO) of INR3.4b in 1H and incurred a capex of INR2b. FCF stood at INR1.4b. Cash balance stood at INR10b as of Sep'25.

Highlights from the management commentary

- The company won new orders worth INR10b in 2Q, and the net order book stood at INR236b (6.6x FY25 revenue). EV mix in this order book was 70%.
- New order wins in 2Q included: 1) first order for its driveline plant in Mexico to supply differential assemblies to an existing customer, a North American OEM of recreational off-highway vehicles worth INR2.6b, with SOP from 2QFY28, and 2) two more programs to supply its integrated motor controller modules for the active suspension systems, one from existing Asian EV maker (INR6.4b) and other from European luxury PV OEM (INR1.8b).
- The company has signed an MoU with Neura Robotics (Germany) to jointly develop advanced technologies, components, and subassemblies for robots and humanoids targeted at India and other agreed markets. The addressable market for these products could be bigger than the automotive industry size in the next 15 years.
- Three direct driveline competitors in the EU have filed for insolvency in the past six months. Sona BLW is emerging as a key beneficiary of the same, as it is seeing a meaningful rise in customer RFQs for new business.

Valuation and view

- We earlier valued the railway division separately. However, given that the company would not be disclosing segmental financials, we have now integrated the railway division's financials into our estimates. As a result, we have upgraded the earnings estimates by 27%/20% for FY26/FY27. However, this would also warrant a de-rating for the consolidated entity, in our view. Hence, we lower our target multiple for the consolidated entity to 34x from 36x earlier for the core. As a result, our TP now stands at INR448 per share (valued at 34x Sep'27E EPS). Maintain Neutral.

Buy
In-line quarter; New CEO appointment expected soon
Reported NIM dips ~7bp QoQ; asset quality stable

- PNB Housing (PNBHF) delivered a broadly in-line performance in 2QFY26, marked by 1) healthy retail loan growth of ~17% YoY, 2) NIM compression of 7bp QoQ to 3.67%, following a ~10bp PLR cut taken by the company and lower investment yields in the quarter, 3) minor improvement in overall asset quality, even as the 30+ and 90+ dpd in the affordable segment inched up due to portfolio seasoning, and 4) sustained recoveries from its retail and corporate written-off pool, resulting in continued provision write-backs.
- PNBHF's 2QFY26 PAT grew 24% YoY to ~INR5.8b (~7% beat). PAT in 1HFY26 grew 24% YoY, and we expect its PAT to grow 14% YoY in 2H. The beat on PAT was primarily due to ECL release from the foreclosure of a standard corporate account. Adjusted for this, earnings would have been in line.
- PNBHF's NII rose ~13% YoY to ~INR7.5b (in line). Other income grew 14% YoY to INR1.1b. Opex rose ~7% YoY/1% QoQ to ~INR2.2b (in line). PPOP grew ~16% YoY to INR6.5b (in line).
- Credit costs, net of recoveries, resulted in a write-back of ~ INR1.1b (vs. estimated write-backs of INR545m), which led to net credit costs of -57bp (PQ: -30bp and PY: -27bp). There was an ECL release of ~INR700m from the foreclosure of a corporate account.
- **The company shared that the Board-led CEO selection process is underway, with formal disclosure expected soon. In the interim, the current senior leadership team has ensured seamless business continuity and steady performance. Management reiterated that the company's core mortgage strategy remains firmly in place, with no significant strategic changes expected under the new CEO.**
- PNBHF is steadily shifting towards higher-yielding products by moderating growth in the prime segment and intensifying focus on affordable and emerging segments. However, the management remains cognizant of a potential uptick in delinquencies as the company deepens its presence in the informal and self-employed customer segment.
- Total GNPA/NNPA stood at ~1.04%/0.7% (% of loan assets) and was largely stable QoQ. Retail GNPA was also broadly stable QoQ at 1.05%, while Corporate GNPA remained NIL.
- We continue to believe in the company's ability to drive profitability improvement, supported by: 1) a healthy retail loan CAGR of 18%; 2) NIM expansion from FY27 onwards; and 3) benign credit costs on the back of sustained recoveries from the written-off pool. We expect PNBHF to resume corporate disbursements in 2H, which will also provide some support to yields and NIM. We model PNBHF to deliver a CAGR of 18%/16% in loans/PAT over FY25-28E and RoA/RoE of ~2.5%/13.5% in FY28. **We reiterate our BUY rating with a TP of INR1,080 (based on 1.2x Sep'27E BVPS).**

Highlights from the management commentary

- The company continues to strengthen its physical footprint and plans to add 30-40 new branches annually, primarily across high-potential Tier 2 and 3 locations. It targets scaling up to 240 branches in the affordable segment by end-FY26.
- PNBHF has revamped its corporate credit policies to emphasize calibrated, low-risk lending and expects selective disbursements in 3Q/4QFY26, with ticket sizes in the INR1.5-2b range.
- With the rollout of PMAY 2.0 underway, the company anticipates increased participation from informal customers (can go up to 35-40%) and self-employed borrowers (can go up to 45-50%) in its affordable housing segment.

Valuation and view

- PNBHF delivered an in-line performance in 2QFY26, although earnings were a beat primarily due to the ECL release of ~INR700m from the foreclosure of a standard corporate account. Disbursements were marginally soft, impacted by slower growth in the prime segment, while NIM moderated during the quarter owing to lower investment yields. Asset quality was stable, and sustained recoveries from the written-off pool resulted in write-backs for the sixth consecutive quarter.
- PNBHF is focused on maintaining profitability through disciplined margin management, driven by a strategic shift toward higher-yielding affordable and emerging housing segments, coupled with a cautious resumption of corporate disbursements. Its commitment to controlled growth and prudent asset quality management positions it favorably for sustained execution.
- The stock trades at 1.1x FY27E P/BV. We believe that the franchise has its inherent strengths, but the Board will need to instill greater investor confidence by appointing a suitable successor who closely aligns with the articulated strategy of the company. **Reiterate BUY with a TP of INR1,080 (based on 1.2x Sep'27E BVPS).**
- **Key risks:** 1) the inability to drive NIM expansion in FY27 amid aggressive competition in mortgages, 2) subsequent seasoning in the affordable/emerging loan book leading to asset quality deterioration and elevated credit costs, and 3) delay or challenges in appointing a suitable successor for the CEO position.

Inflows remain weak in 1HFY26

Zen Technologies (ZEN) posted weak numbers in 2QFY26, with a miss on revenue but a beat on PAT due to higher-than-expected other income. Inflows in 1HFY26 remained weak; however, management expects inflows to revive in 2H due to the finalization of the pending simulator order and improved tendering activity for anti-drone systems under the emergency procurement programs. In addition to its core business, the order book has been strong for ZEN's subsidiaries, and a combined revenue contribution of ~INR2.5b is expected for FY26 with a fairly strong profit profile. ZEN is already building up capabilities to expand into marine simulators and eventually into air simulation, too. To bake in its 1HFY26 performance, we cut our estimates for ZEN by 25%/11%/ 12% for FY26/FY27/FY28. We also trim our TP to INR1,400 (from INR1,550), based on 30x Sep'27E EPS. The stock is currently trading at a P/E of 62.1x/33.1x/25.1x on FY26/ FY27/ FY28E EPS. Our estimates bake in a revenue/PAT CAGR of 18%/22% over FY25-28 with a strong EBITDA margin of 37% by FY28. We reiterate our Neutral rating on the stock. We would look for order inflow announcements for further sustainability of revenue going forward.

Beat on PAT due to higher other income and lower tax rate

ZEN's revenue decreased 48% YoY to INR1.2b, missing our estimate by 10%. Gross margin was 140bp below our expectation at 55.1% vs. our estimate of 57.5%. Absolute EBITDA declined 47% YoY to INR418m, indicating a miss on our estimates by 13%. EBITDA margin at 33.5% expanded 60bp YoY, though it was below our estimates. However, the company's PAT dipped 29% YoY, beating our estimates by 16%. PAT stood at INR462m vs. our estimate of INR398m, fueled by higher-than-expected other income and a lower tax rate. ZEN's PAT margin expanded 1,000bp YoY to 37.0% vs. our estimate of 28.9%. For 1HFY26, its revenue/EBITDA/PAT declined 52%/56%/40% YoY, while EBITDA margin contracted 290bp YoY to 33.9%. As of 1HFY26, ZEN's OCF/FCF turned positive to INR1.3b/1.2b, compared to net cash outflows in the previous year. The company is now debt-free.

Recovery in inflows expected in 2HFY26

The company exited 1HFY26 with a consolidated order book of ~INR6.8b, comprising INR3.8b of equipment orders and the balance from AMC. Of this, standalone accounts for INR4.8b, while subsidiaries UTS/ARI/Vector contribute INR980m/INR920m/INR10m. Order inflows remained muted due to delays in simulator tenders and a shift in focus on emergency procurements. However, orders are expected to pick up in 2HFY26 as the pending simulator orders worth INR6.5b and anti-drone tenders move forward. The company maintains its cumulative revenue guidance of INR60b for FY26-FY28, though achieving this will require a sharp pick-up in inflows through FY27-28. ZEN's robust net cash position, operational preparedness, and alignment with the government's IDDM framework position it well to capitalize on emerging opportunities over the medium to long term. However, the current softness in ordering momentum suggests a slower pace of execution in the near term. We thus expect a moderate standalone revenue CAGR of 18% to factor in ZEN's 1H performance.

Export opportunities to offer diversification

Export engagement continues to strengthen, supported by increasing inquiries from Africa, the Middle East, CIS, and Southeast Asia. ARI's Singapore base is helping open new channels, particularly for simulation and anti-drone solutions. While exports could become a meaningful contributor over the medium term, conversion timelines in defense exports are typically long, and competition from established global OEMs remains a factor. ZEN's focus on developing end-to-end solutions with full IP ownership aligns well with the government's broader push to promote defense exports. We believe export traction could help diversify the order book and reduce dependence on domestic procurement cycles, though meaningful revenue contribution is likely to be gradual.

Building a connected portfolio through its subsidiaries

Subsidiaries now form a meaningful part of ZEN's ecosystem, contributing about INR1.9b to the consolidated order book. UTS and ARI enhance simulation and export capabilities, while Vector, AI Turing, and Bhairav Robotics add depth in remote weapon and autonomous systems. These acquisitions complement ZEN's integrated defense systems strategy and help the company offer complete, end-to-end solutions under one umbrella. Management highlighted that subsidiaries such as AI Turing and Vector have already participated in recent trials, demonstrating integrated hard-kill capabilities. While most subsidiaries are still scaling up and their revenue contribution remains modest, their technological complementarity enhances ZEN's qualification strength for larger, more complex tenders. Management expects ~INR2.5b of combined revenue contribution from its subsidiaries in FY26, with strong prospects for the following years.

Financial outlook

We trim our estimates by 25%/11%/12% for FY26/27/28 to factor in the slowdown in execution due to delayed ordering activity. We expect a CAGR of 18%/22%/22% in revenue/EBITDA/PAT during FY25-28. This will be supported by 1) finalization of orders across simulators and anti-drones; 2) EBITDA margin of 35%-37% for FY26-28; and 3) control over working capital due to improved collections.

Valuation and view

The stock currently trades at 62.1x/33.1x/25.1x P/E on FY26/27/28E earnings. While we remain positive about the company and its ability to capitalize on the upcoming demand for simulators and anti-drones, we cut our estimates to factor in a slowdown in inflows during 1H. **We thus reduce our TP to INR1,400** (from INR1,550 earlier), **based on 30x Sep'27E earnings. Reiterate Neutral.**

Key risks and concerns

Any slowdown in procurement from the defense industry, especially for simulators, can expose the company to the risk of reduced order inflows and hinder its growth. ZEN is also exposed to foreign currency risks for its export revenue.

Higher-than-expected GRM boosts 2Q performance

- EBITDA came in 51% above our estimate at INR145.8b (up 248% YoY).
- IOCL's reported GRM came in 66% above our estimate at USD10.7/bbl; refining inventory gains stood at USD1.8/bbl during the quarter.
- The marketing margin stood at INR6.2/lit, 19% above estimates.
- LPG under-recovery of INR21.3b was booked in 2Q (INR37.1b in 1Q)
- Marketing and refining throughput came in line with our estimate.
- The petchem segment posted an EBIT of INR1.7b (vs. INR10m loss in 1Q).
- IOCL's reported PAT came in 146% above our estimate at INR76.1b.
- Other income came in above our estimate, while interest stood below.
- **In 1HFY26**, the company generated a CFO of INR312.7b (INR25.2b in 1HFY25). IOCL incurred standalone capex of INR147.2b. **As of 30th Sep'25**, IOCL's standalone CWIP stood at INR768.6b (INR734.5b of 31st Mar'25). Net debt stood at INR1.28t (vs INR1.34t as on 31 Mar'25).
- **As of 30th Sep'25**, IOCL had a cumulative negative net buffer of INR257.7b due to the under-recovery on LPG cylinders (INR236.4b in Jun'25).
- The MoP&NG, through letters dated 3rd/24th Oct'25, approved a compensation of INR144.9b to the company for under-recoveries on the sale of domestic LPG up to 31st Mar'25, and those expected up to 31st Mar'26. **The amount will be released in 12 equal monthly installments, with accruals recognized monthly starting Nov'25.**

Broadly in line; elevated capex and higher receivables led to sharp moderation in FCF generation

- Indus' 2QFY26 results were broadly in line with our estimates with recurring EBITDA (excl. provision reversals) rising 3% QoQ to INR43.8b.
- Reported EBITDA was boosted by ~INR1.95b in prior period provision reversals (entire past dues now recovered).
- Operationally, tower additions picked up QoQ after a subdued 1Q, while tenancy additions moderated likely due to tapering off of Vi's rollouts during 2Q.
- Indus' capex jumped ~31% QoQ, which led to moderation in FCF generation to modest ~INR3b in 2Q (vs. INR15.7b in 1Q).

Adjusted for one-offs, recurring EBITDA slightly higher due to lower employee expenses

- Consolidated reported revenue was up ~2% QoQ to INR81.9b (+10% YoY) and was in line with our estimates.
 - Service revenue at INR52.5b (+3% QoQ, +11% YoY) was also in line with our estimate as slightly higher ARPT was largely offset by lower tenancy additions.
 - Energy reimbursements at INR29.5b (flat QoQ, +7% YoY) was also in line with our estimates.
- Consolidated reported EBITDA was up 5% QoQ to INR45.7b (-6% YoY, 6% ahead) mainly due to prior-period provision reversals.
 - Adjusted service EBITDA at INR45.2b (+3% QoQ, +15% YoY) was ~2% above our estimate.
 - However, energy under-recovery widened to INR1.4b (vs. our estimate and 1Q under-recovery of INR1.25b).
 - Indus **reversed bad debt provision of INR1.95b** in 2QFY26 (vs. bad debt provision reversals of INR0.9b QoQ and INR10.8b YoY). We didn't build in any bad debt provision reversal for 2QFY26.
- **Adjusted for bad-debt provision reversals, recurring EBITDA at INR43.8b (+3% QoQ, +16% YoY) was ~1.5% ahead of our estimate**, due to lower employee expenses (-4% YoY, 8% below).
- Reported PAT at INR18.4b (+6% QoQ, -17% YoY) was ~9% ahead of our estimates, primarily due to prior period provision reversals.
- Adjusted PAT at INR16.9b (+1% QoQ, +19% YoY) was broadly in line with our estimates.

Tower additions pick-up QoQ, but tenancy additions dip; ARPT up 1% QoQ

- Net macro tower adds improved to 4,301 QoQ (higher vs. our estimate of 3,500 and 2,755 net adds in 1Q); EoP macro tower count stood at ~256.1k.
- Indus added modest 28 net leaner towers QoQ (vs. 57 QoQ in 1Q), to take overall leaner tower count to ~13.96k.
- For sixth successive quarter, **net macro tenancy additions were higher than tower adds**, at 4,505 (though lower vs. our estimate of 7,000; and further moderation from 6,064 QoQ in 1Q), taking total tenants to ~415.7k. The moderation was likely on account of tapering off of Vi's rollouts.

- End-period tenancy ratio moderated QoQ to 1.62X (vs. 1.63X QoQ), as incremental tenancy ratio was subdued at 1.05X.
- Reported sharing revenue per macro tenant (ARPT) inched up ~1% QoQ to INR41.7k (+1 YoY) and was **1% above** our estimate (INR41.4k).

Other highlights: Elevated capex and higher receivables led to moderation in FCF generation; Receivables increase QoQ

- Indus' receivables increased by ~INR5b QoQ to INR48.5b. Indus also reversed ~INR1.95 bad debt provisions, implying a net shortfall of ~INR3b during 2QFY26.
- Over the past few quarter, Indus has recovered entire ~INR57.7b towards past dues from Vi, (vs. outstanding of INR3b/INR53.9b at Jun'25/Mar'25/Mar'24).
- Capex jumped ~31% QoQ to INR25.6b, with pick-up in tower additions, elevated capex both for new tower additions, battery replacement and also high maintenance capex.
- Reported adjusted fund from operations (EBITDA net of lease payment and maintenance capex) at INR30.4b improved 7% QoQ, though lower YoY primarily due to lower prior period provision reversals.
- Net debt including lease liabilities declined ~1.5% QoQ to INR165b (vs. ~INR167b QoQ); while excluding lease liabilities, the company's net cash increased to ~INR29.6b net cash (vs. ~INR24.6b net cash QoQ).
- Indus' reported 2Q FCF moderated sharply to ~INR3b (vs. INR15.7b in 1Q), primarily due to higher capex and increase in receivables. For 1HFY26, Indus' FCF stood at INR18.6b (vs. INR98.5b in FY25, due to collection of Vi's past dues).

Operating performance in line

- SRF reported total revenue of INR36.4b (est. INR38.8b) in 2QFY26, up ~6% YoY. Revenue from Chemical business grew 23%YoY to ~INR16.7b, while revenue from Technical Textile/Packaging Film businesses declined 11%/1% to INR4.7b/INR14b.
- EBITDA margins expanded by 570bp YoY to 22.1% (est. 21.2%), while gross margin expanded 500bp YoY to 51.4%. As a percentage of sales, employee costs stood at 7.6% (vs. 7.4% YoY), power costs at 9.4% (vs. 10.1% YoY) and other expenses at 12.3% (vs. 12.6% YoY). EBITDA stood at INR8b (in line), up 44% YoY.
- EBIT margin in Chemical/Packaging Film expanded by 1000bp/260bp YoY to 28.9%/8.4%, while Technical Textile EBIT margin contracted by 440bp YoY to 8.9%.
- Adj. PAT grew 87% YoY to INR4.2b (est. in line). Adjusted for forex loss of INR306m in 2QFY26.
- In 1HFY26, revenue/EBITDA/adj. PAT grew 8%/38%/71% YoY to INR74.6B/INR16.3b/INR8.4b.
- At the close of business on 12th Dec'25, SRF President and CFO, Mr. Rahul Jain, will step down from his role to pursue other professional opportunities.
- In line with SRF's strategic collaboration with The Chemours Company for the manufacturing and supply of fluoropolymers and fluoroelastomers, the Board has revised the previously sanctioned capex from INR5.95b to INR7.45b. The project is expected to be completed in a sequential manner, with the final phase scheduled for completion by Dec'26.

In-line performance

- KFin Technologies (KFin) reported a 10% YoY growth in operating revenue to INR3.1b in 2QFY26 (in-line), driven by 10%/16%/33% YoY growth in domestic MF solutions/issuer solutions/international solutions segments.
- Total MF AAUM serviced during the quarter grew 17% YoY to INR25t. Equity AAUM at 58% of total MF AAUM, grew 14% YoY to INR14.6t reflecting a market share of 33% (33.4% in 2QFY25).
- In the issuer services business, the main board IPO market share (concerning issue size) rose YoY to 43.8% in 2QFY26 (34.4% in 2QFY25). In the international investor solutions business, the number of clients reached 93, taking the total AUM serviced to INR934b. In the alternates and wealth business, the market share stood at 39% with an AUM of INR1.8t. NPS market share continues to rise and was at 10.3% in 2QFY26 (8.9% in 2QFY25), with an AUM of INR602b.
- Total operating expenses grew 13% YoY to INR1.7b (in-line) with employee expenses growing 12% YoY to INR1.1b (in-line) and other expenses growing 14% YoY to INR595m (in-line). Cost-to-income ratio was at 56.1% (54.9% in 2QFY25).
- EBITDA grew 7% YoY to INR1.4b with EBITDA margins at 43.9% (45.1% in 2QFY25).
- KFin reported a net profit of INR933m, up 4% YoY (in-line) in 2QFY26 with PAT margins at 30.2% vs 31.8% in 2QFY25. For 1HFY26, it reported PAT of INR1.7b, +8% YoY

Valuation and view

- Structural tailwinds in the MF industry will drive absolute growth in MF revenue. With its unique 'platform-as-a-service' business model that provides comprehensive end-to-end solutions enabled by proprietary technology solutions, KFIN is well-positioned to benefit from strong growth across large markets in India and across the world.
- **We have a Neutral rating on the stock with a TP of INR1,130 (based on 45x Mar'27E EPS).** We will update our estimates after the conference call scheduled for 28th Oct'25.

Disappointing performance continues; muted demand and GST transition drag down performance

- Revenue **declined 4% YoY** to INR8.0b (~7% miss), due to the deferment of trade and consumer purchases following the GST rate rationalization announcement and a temporary disruption in a key warehouse during July.
- Bata added 30 new franchise stores in the quarter, maintaining its focus on asset-light expansion.
- Management indicated that 2Q ended on a positive note with signs of recovery in festive season.
- Gross margin contracted **122bp YoY to 55.4% (160bp miss)**, owing to **higher markdowns** for pre-festive inventory clearance.
- Consequently, **gross profit declined 6% YoY (10% miss)**.
- Employee costs fell by 2% YoY, while other expenses inched up 1% YoY.
- **EBITDA declined 17% YoY (31% miss), led by** weaker sales, gross margin contraction and higher marketing spends. EBITDA margin contracted **280bp to 18.1% (610bp miss)**.
- Profitability was further adversely impacted by a **VRS charge of INR83m**.
- Pre-IND AS EBITDA for 1HFY26 stood at INR1.3b (down 28% YoY) with margins contracting to 7.5% (vs. 10.2% YoY), despite a change in accounting for one of the brands, which would have resulted in optically higher margins.
- Reported PAT declined sharply by 73% YoY to INR139m due to weaker EBITDA, higher D&A (+16% YoY) and high finance costs (+6% YoY).

Working capital and cash flow analysis

- Inventory days improved to 83 in 1HFY26 (vs. 89 in 1HFY25), supported by better inventory clearance. **Core working capital** remained broadly steady at ~60 days.
- OCF (post leases) fell to INR525m (vs. INR2.1b YoY) due to subdued profitability and adverse WC changes. FCF was modest at INR273m (vs. INR1.8b/INR3.1b in 1HFY25/FY25).

Management commentary

- Demand was temporarily impacted by the GST 2.0 transition, but consumer momentum has improved meaningfully after September, aided by festive buying.
- Premium brands such as Hush Puppies and Power continue to outperform, supported by strong traction in fashionable comfort segments like Ballerinas and Easy Slides.
- The company remains focused on strengthening supply chain efficiency and inventory agility, with the Zero Base Merchandising initiative (rolled out in 200 stores) delivering encouraging early outcomes.
- Expansion through the franchise route gained pace, with continued emphasis on semi-urban and Tier 2/3 markets to drive footprint growth in an asset-light manner.

Dismal result yet again

Earnings snapshot: 2QFY26

- Revenue grew ~11% YoY to INR16.8b in 2QFY26 (in line with our estimate).
- EBITDA margin came in at 5% in 2QFY26 (up 60bp YoY and 30bp QoQ), against our estimate of 5.1%.
- EBITDA grew ~28% YoY to INR851m (in line with our estimate).
- The company's adjusted net loss stood at INR104m in 2QFY26 vs INR107m in 2QFY25 (our estimate of INR75m profit).

Segmental performance

- The supply chain segment recorded revenue of INR15.9b (+10.7% YoY) and EBIT loss of ~INR69.3m. The Enterprise Mobility Services (EMS) segment reported revenue of INR938m (+17.7% YoY) and EBIT of INR15.6m.
- During the quarter, MLL successfully completed a rights issue of 27,049,301 fully paid equity shares with a face value of INR10 each, issued for cash at INR277 per share (including a premium of INR267 per rights equity share). The issue aggregated to INR7.5b and was undertaken to repay debt and meet general corporate purposes. The equity shares were allotted on 18th Aug'25.

MOFSL, the Research Entity (RE) as defined in the Regulations, is engaged in the business of providing Stock broking services, Depository participant services & distribution of various financial products. MOFSL is a listed public company, the details in respect of which are available on www.motilaloswal.com. MOFSL is registered with the Securities & Exchange Board of India (SEBI) and is a registered Trading Member with National Stock Exchange of India Ltd. (NSE) and Bombay Stock Exchange Limited (BSE), Multi Commodity Exchange of India Limited (MCX) and National Commodity & Derivatives Exchange Limited (NCDEX) for its stock broking activities & is Depository participant with Central Depository Services Limited (CDSL) National Securities Depository Limited (NSDL), NERL, COMRIS and CCRL and is member of Association of Mutual Funds of India (AMFI) for distribution of financial products and Insurance Regulatory & Development Authority of India (IRDA) as Corporate Agent for insurance products and is a member of Association of Portfolio Managers in India (APMI) for distribution of PMS products. Details of associate entities of Motilal Oswal Financial Services Ltd. are available on the website at <http://online.reports.motilaloswal.com/Dormant/documents/Associate%20Details.pdf>

Details of pending Enquiry Proceedings of Motilal Oswal Financial Services Limited are available on the website at <https://galaxy.motilaloswal.com/ResearchAnalyst/PublishView/Litigation.aspx>. As per Regulatory requirements, Research Audit Report is uploaded on www.motilaloswal.com > MOFSL-Important Links > MOFSL Research Analyst Compliance Audit Report.

MOFSL, its associates, Research Analyst or their relatives may have any financial interest in the subject company. MOFSL and/or its associates and/or Research Analyst or their relatives may have actual beneficial ownership of 1% or more securities in the subject company at the end of the month immediately preceding the date of publication of the Research Report or date of the public appearance. MOFSL and its associate company(ies), their directors and Research Analyst and their relatives may have any other potential conflict of interests at the time of publication of the research report or at the time of public appearance, however the same shall have no bearing whatsoever on the specific recommendations made by the analyst(s), as the recommendations made by the analyst(s) are completely independent of the views of the associates of MOFSL even though there might exist an inherent conflict of interest in some of the stocks mentioned in the research report..

In the past 12 months, MOFSL or any of its associates may have:

- received any compensation/other benefits from the subject company of this report
- managed or co-managed public offering of securities from subject company of this research report,
- received compensation for investment banking or merchant banking or brokerage services from subject company of this research report,
- received compensation for products or services other than investment banking or merchant banking or brokerage services from the subject company of this research report.

- MOFSL and its associates have not received any compensation or other benefits from the subject company or third party in connection with the research report.
- Subject Company may have been a client of MOFSL or its associates during twelve months preceding the date of distribution of the research report.
- Research Analyst may have served as director/officer/employee in the subject company.
- MOFSL and research analyst may engage in market making activity for the subject company.

MOFSL and its associate company(ies), and Research Analyst and their relatives from time to time may have:

- a long or short position in, act as principal in, and buy or sell the securities or derivatives thereof of companies mentioned herein.
- be engaged in any other transaction involving such securities and earn brokerage or other compensation or act as a market maker in the financial instruments of the company(ies) discussed herein or act as an advisor or lender/borrower to such company(ies) or may have any other potential conflict of interests with respect to any recommendation and other related information and opinions.; however the same shall have no bearing whatsoever on the specific recommendations made by the analyst(s), as the recommendations made by the analyst(s) are completely independent of the views of the associates of MOFSL even though there might exist an inherent conflict of interest in some of the stocks mentioned in the research report.

Above disclosures include beneficial holdings lying in demat account of MOFSL which are opened for proprietary investments only. While calculating beneficial holdings, It does not consider demat accounts which are opened in name of MOFSL for other purposes (i.e holding client securities, collaterals, error trades etc.). MOFSL also earns DP income from clients which are not considered in above disclosures.

To enhance transparency, MOFSL has incorporated a Disclosure of Interest Statement in this document. This should, however, not be treated as endorsement of the views expressed in the report. MOFSL and / or its affiliates do and seek to do business including investment banking with companies covered in its research reports. As a result, the recipients of this report should be aware that MOFSL may have a potential conflict of interest that may affect the objectivity of this report.

Terms & Conditions:

This report has been prepared by MOFSL and is meant for sole use by the recipient and not for circulation. The report and information contained herein is strictly confidential and may not be altered in any way, transmitted to, copied or distributed, in part or in whole, to any other person or to the media or reproduced in any form, without prior written consent of MOFSL. The report is based on the facts, figures and information that are considered true, correct, reliable and accurate. The intent of this report is not recommendatory in nature. The information is obtained from publicly available media or other sources believed to be reliable. Such information has not been independently verified and no guaranty, representation of warranty, express or implied, is made as to its accuracy, completeness or correctness. All such information and opinions are subject to change without notice. The report is prepared solely for informational purpose and does not constitute an offer document or solicitation of offer to buy or sell or subscribe for securities or other financial instruments for the clients. Though disseminated to all the customers simultaneously, not all customers may receive this report at the same time. MOFSL will not treat recipients as customers by virtue of their receiving this report.

Analyst Certification

The views expressed in this research report accurately reflect the personal views of the analyst(s) about the subject securities or issues, and no part of the compensation of the research analyst(s) was, is, or will be directly or indirectly related to the specific recommendations and views expressed by research analyst(s) in this report.

Disclosure of Interest Statement

Analyst ownership of the stock No

A graph of daily closing prices of securities is available at www.nseindia.com, www.bseindia.com. Research Analyst views on Subject Company may vary based on Fundamental research and Technical Research. Proprietary trading desk of MOFSL or its associates maintains arm's length distance with Research Team as all the activities are segregated from MOFSL research activity and therefore it can have an independent view with regards to subject company for which Research Team have expressed their views.

Regional Disclosures (outside India)

This report is not directed or intended for distribution to or use by any person or entity resident in a state, country or any jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject MOFSL & its group companies to registration or licensing requirements within such jurisdictions.

For Hong Kong:

This report is distributed in Hong Kong by Motilal Oswal capital Markets (Hong Kong) Private Limited, a licensed corporation (CE AYY-301) licensed and regulated by the Hong Kong Securities and Futures Commission (SFC) pursuant to the Securities and Futures Ordinance (Chapter 571 of the Laws of Hong Kong) "SFO". As per SEBI (Research Analyst Regulations) 2014 Motilal Oswal Financial Services Limited (SEBI Reg No. INH000000412) has an agreement with Motilal Oswal capital Markets (Hong Kong) Private Limited for distribution of research report in Hong Kong. This report is intended for distribution only to "Professional Investors" as defined in Part I of Schedule 1 to SFO. Any investment or investment activity to which this document relates is only available to professional investor and will be engaged only with professional investors." Nothing here is an offer or solicitation of these securities, products and services in any jurisdiction where their offer or sale is not qualified or exempt from registration. The Indian Analyst(s) who compile this report is/are not located in Hong Kong & are not conducting Research Analysis in Hong Kong.

For U.S.

MOTILAL Oswal Financial Services Limited (MOFSL) is not a registered broker - dealer under the U.S. Securities Exchange Act of 1934, as amended (the "1934 act") and under applicable state laws in the United States. In addition MOFSL is not a registered investment adviser under the U.S. Investment Advisers Act of 1940, as amended (the "Advisers Act" and together with the 1934 Act, the "Acts"), and under applicable state laws in the United States. Accordingly, in the absence of specific exemption under the Acts, any brokerage and investment services provided by MOFSL, including the products and services described herein are not available to or intended for U.S. persons. This report is intended for distribution only to "Major Institutional Investors" as defined by Rule 15a-6(b)(4) of the Exchange Act and interpretations thereof by SEC (henceforth referred to as "major institutional investors"). This document must not be acted on or relied on by persons who are not major institutional investors. Any investment or investment activity to which this document relates is only available to major institutional investors and will be engaged in only with major institutional investors. In reliance on the exemption from registration provided by Rule 15a-6 of the U.S. Securities Exchange Act of 1934, as amended (the "Exchange Act") and interpretations thereof by the U.S. Securities and Exchange Commission ("SEC") in order to conduct business with Institutional Investors based in the U.S., MOFSL has entered into a chaperoning agreement with a U.S. registered broker-dealer, Motilal Oswal Securities International Private Limited. ("MOSIPL"). Any business interaction pursuant to this report will have to be executed within the provisions of this chaperoning agreement.

The Research Analysts contributing to the report may not be registered /qualified as research analyst with FINRA. Such research analyst may not be associated persons of the U.S. registered broker-dealer, MOSIPL, and therefore, may not be subject to NASD rule 2711 and NYSE Rule 472 restrictions on communication with a subject company, public appearances and trading securities held by a research analyst account.

For Singapore

In Singapore, this report is being distributed by Motilal Oswal Capital Markets (Singapore) Pte. Ltd. ("MOCMSPL") (UEN 201129401Z), which is a holder of a capital markets services license and an exempt financial adviser in Singapore. This report is distributed solely to persons who (a) qualify as "institutional investors" as defined in section 4A(1)(c) of the Securities and Futures Act of Singapore ("SFA") or (b) are considered "accredited investors" as defined in section 2(1) of the Financial Advisers Regulations of Singapore read with section 4A(1)(a) of the SFA. Accordingly, if a recipient is neither an "institutional investor" nor an "accredited investor", they must immediately discontinue any use of this Report and inform MOCMSPL.

In respect of any matter arising from or in connection with the research you could contact the following representatives of MOCMSPL. In case of grievances for any of the services rendered by MOCMSPL write to grievances@motilaloswal.com.

Disclaimer:

This report is intended for distribution to Retail Investors.

The report and information contained herein is strictly confidential and meant solely for the selected recipient and may not be altered in any way, transmitted to, copied or distributed, in part or in whole, to any other person or to the media or reproduced in any form, without prior written consent. This report and information herein is solely for informational purpose and may not be used or considered as an offer document or solicitation of offer to buy or sell or subscribe for securities or other financial instruments. Nothing in this report constitutes investment, legal, accounting and tax advice or a representation that any investment or strategy is suitable or appropriate to your specific circumstances. The securities discussed and opinions expressed in this report may not be suitable for all investors, who must make their own investment decisions, based on their own investment objectives, financial positions and needs of specific recipient. This may not be taken in substitution for the exercise of independent judgment by any recipient. Each recipient of this document should make such investigations as it deems necessary to arrive at an independent evaluation of an investment in the securities of companies referred to in this document (including the merits and risks involved), and should consult its own advisors to determine the merits and risks of such an investment. The investment discussed or views expressed may not be suitable for all investors. Certain transactions - including those involving futures, options, another derivative products as well as non-investment grade securities - involve substantial risk and are not suitable for all investors. No representation or warranty, express or implied, is made as to the accuracy, completeness or fairness of the information and opinions contained in this document. The Disclosures of Interest Statement incorporated in this document is provided solely to enhance the transparency and should not be treated as endorsement of the views expressed in the report. This information is subject to change without any prior notice. The Company reserves the right to make modifications and alterations to this statement as may be required from time to time without any prior approval. MOFSL, its associates, their directors and the employees may from time to time, effect or have effected an own account transaction in, or deal as principal or agent in or for the securities mentioned in this document. They may perform or seek to perform investment banking or other services for, or solicit investment banking or other business from, any company referred to in this report. Each of these entities functions as a separate, distinct and independent of each other. The recipient should take this into account before interpreting the document. This report has been prepared on the basis of information that is already available in publicly accessible media or developed through analysis of MOFSL. The views expressed are those of the analyst, and the Company may or may not subscribe to all the views expressed therein. This document is being supplied to you solely for your information and may not be reproduced, redistributed or passed on, directly or indirectly, to any other person or published, copied, in whole or in part, for any purpose. This report is not directed or intended for distribution to, or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject MOFSL to any registration or licensing requirement within such jurisdiction. The securities described herein may or may not be eligible for sale in all jurisdictions or to certain category of investors. Persons in whose possession this document may come are required to inform themselves of and to observe such restriction. Neither the Firm, not its directors, employees, agents or representatives shall be liable for any damages whether direct or indirect, incidental, special or consequential including lost revenue or lost profits that may arise from or in connection with the use of the information. The person accessing this information specifically agrees to exempt MOFSL or any of its affiliates or employees from, any and all responsibility/liability arising from such misuse and agrees not to hold MOFSL or any of its affiliates or employees responsible for any such misuse and further agrees to hold MOFSL or any of its affiliates or employees free and harmless from all losses, costs, damages, expenses that may be suffered by the person accessing this information due to any errors and delays.
