Technical Snapshot

SELL GOLD JUN @ 160000 SL 161000 TGT 158500-157500. MCX

Observations

Gold trading range for the day is 158585-159745.

Gold rises as weaker dollar, US-Iran deal hopes improve inflation outlook

Hopes for a reopening of the Strait of Hormuz pushed crude down more than 5%, easing concerns over energy-driven inflation.

Weak US consumer confidence and expectations of potential Federal Reserve rate hikes continued to weigh on non-yielding assets.

Central bank demand for gold has been stronger than previously estimated and is likely to pick up again into 2026, Goldman Sachs said.

Gold prices climbed supported by a weaker US dollar and optimism over a potential breakthrough in US-Iran negotiations that could improve the inflation outlook. Hopes for a reopening of the Strait of Hormuz pushed Brent crude down more than 5%, easing concerns over energy-driven inflation. Gains in gold were limited, however, as weak US consumer confidence and expectations of potential Federal Reserve rate hikes continued to weigh on non-yielding assets. Federal Reserve Governor Christopher Waller, said the Fed should axe the "easing bias" from its policy statement and effectively open the door to a possible rate hike.

ASIA GOLD – Price volatility keeps India demand subdued, China premiums ease - Gold kept trading at a steep discount in India , as price volatility dampened demand, while premiums eased in China. Dealers in India quoted discounts of up to \$78 an ounce over official domestic prices, down from the prior week's record discounts of up to \$207 an ounce. The South Asian country earlier this month raised import tariffs on gold and silver to 15% from 6% as part of efforts to reduce overseas purchases of the metals and ease pressure on foreign exchange reserves from higher oil prices. Jewellers are reluctant to build stocks as the wedding season draws to a close and uncertainty persists over retail demand. In top consumer China, bullion traded at premiums of \$10 to \$20 an ounce over the global benchmark price, compared with the previous week's premiums of \$15 to \$20. In Hong Kong, gold traded at par to premiums of \$2, while in Japan, gold was sold at a discount of \$0.25. In Singapore, gold was sold at premiums of \$1 to \$3.

India raises gold and silver tariffs to 15% to curb imports, support rupee - India has raised import tariffs on gold and silver to 15% from 6%, government orders said, as part of efforts to curb overseas purchases of the metals and ease pressure on the country's foreign exchange reserves. The higher duties could dampen demand in the world's second-largest consumer of precious metals, although they may help narrow India's trade deficit and support the rupee, one of Asia's worst-performing currencies. However, industry officials warned higher import taxes could revive smuggling, which had eased after India cut tariffs in mid-2024. The government has imposed a 10% basic customs duty and a 5% Agriculture Infrastructure and Development Cess (AIDC) on gold and silver imports, taking the effective import tax to 15% from 6%. Inflows into India's gold exchange-traded funds (ETFs) surged 186% year-on-year in the March quarter to a record 20 metric tons, the World Gold Council said last month.

China gold production slips in first quarter, consumption rises - China's gold production fell in the first quarter of 2026 versus the same period a year earlier, the China Gold Association said, as safety inspections led some smelters to suspend production for maintenance. Total gold production from domestic and imported raw materials was 136.230 metric tons in the first quarter, down 3.3% from the corresponding period a year ago. Domestic production in the quarter was 81.065 tons, down 7.1% from the previous year. Gold consumption in the quarter reached 303.292 tons, up 4.4% from a year earlier, led by a big jump in gold bars and coins, up 46.4% to 202.062 tons. Gold jewelry consumption fell 37.1% to 84.62 tons.

India gems and jewellery exports fall to five – year low on US tariffs: India's gems and jewellery exports in the 2025/26 fiscal year dipped 3.3% from a year earlier to their lowest level in five years, as shipments to top buyer the U.S. nearly halved, a leading trade body said, reflecting the impact of tariffs and duties. Gem and jewellery exports in the year to the end of March fell to \$27.72 billion, the lowest since 2020/21, when pandemic-led lockdowns disrupted trade, and down from \$28.7 billion in the previous year, the Gem and Jewellery Export Promotion Council (GJEPC) said in a statement. Shipments to the U.S. fell 45% from a year earlier to \$5.09 billion, as exports were disrupted for several months after Washington imposed reciprocal tariffs and later added a further 25% duty on Indian goods, GJEPC data showed.
