### Technology - 3QFY26 Preview: Indian IT - Looking beyond 3Q noise

- After some respite in 2QFY26 on beaten-down expectations, we expect seasonal furloughs to weigh on growth in 3QFY26. We think markets are likely to look through this seasonality and instead focus on signals around the demand environment from client budgeting for CY26. Amid macro-tariff uncertainty and a new tech cycle, we believe clients remain cautious on committing incremental spending to large programs. As a result, we expect demand to stay steady, at best marginally incremental, until Jan'26 as planning cycles reset and budgets firm up.
- 3Q results are likely to mirror this set-up, with QoQ cc growth expected in the range of 0.3% to 2.3% for large-caps. Mid-caps are expected to outperform once again with a growth range of -2.5% to 3.5%.
- We expect AI services demand could begin to improve from mid-2026 as hardware-led AI capex intensity moderates and spending gradually shifts toward software, platforms, and services. The Mar-Apr'26 budget reset period may serve as an initial indicator, with some AI programs potentially transitioning from preparation to early deployment.

### Indian IT: Looking beyond 3Q noise

#### Seasonal softness persists as focus shifts to CY26 demand signals

- After some respite in 2QFY26 on beaten-down expectations, we expect seasonal furloughs to weigh on growth in 3QFY26. We think markets are likely to look through this seasonality and instead focus on signals around the demand environment from client budgeting for CY26. Amid macro-tariff uncertainty and a new tech cycle, we believe clients remain cautious on committing incremental spending to large programs. As a result, we expect demand to stay steady, at best marginally incremental, until Jan'26 as planning cycles reset and budgets firm up.
- 3Q results are likely to mirror this set-up, with QoQ cc growth expected in the range of 0.3% to 2.3% for large-caps. Mid-caps are expected to outperform once again with a growth range of -2.5% to 3.5%. For 3Q, we expect aggregate revenue for our coverage universe to grow by 7.7% YoY, while EBIT and PAT are likely to grow by 7.2% and 7.6% YoY (all in INR terms), respectively.
- As seen in Exhibit 1, enterprises should gradually move from AI pilots toward scaled deployments as the year progresses, supporting deal pipeline stability, improving TCV, and higher activity in application modernization, data engineering, and AI integration-led work.
- Early signs of AI strategy formation are emerging, with IT companies investing in AI-led capabilities through acquisitions and partnerships: TCS (ListEngage, Coastal Cloud, DC investments), Wipro (Harman DTS), Coforge (Encora), and HEXT (CyberSolve). This shows companies are positioning themselves for early AI-led services demand.
- At the ecosystem level, leading LLMs such as OpenAI and Claude are opening structured channel partnerships with SIs, suggesting the AI services layer is beginning to formalize. We expect momentum here to build over the next six months, with AI services demand inflecting into CY26.
- Vertical performance in 3Q: BFSI remains relatively resilient despite furloughs; Hi-Tech is broadly flat as large deals are still in transition; Travel & Transportation benefits from ongoing deal ramp-ups. Manufacturing is mixed—auto under pressure, but core industrials remain steady. ER&D is stable in 3Q, with recovery skewed toward 4Q.
- Furloughs and wage hikes to put pressure on margins in 3Q: We expect margin declines for TCS (two-month wage hike impact plus furloughs) and Wipro (wage hikes). Among mid-caps, Coforge margins could decline ~70bp QoQ to ~13.3%, as wage hikes are partly offset by lower ESOP and D&A. HEXT and PSYS are also likely to see margin pressure of ~60bp and ~130bp, respectively, due to wage hikes and seasonality.
- As we mentioned in our upgrade note dated 24<sup>th</sup> Nov'25 ([Time to buy the next cycle](#)), we expect AI services demand could begin to improve from mid-2026 as hardware-led AI capex intensity moderates and spending gradually shifts toward software, platforms, and services. The Mar-Apr'26 budget reset period may serve as an initial indicator, with some AI programs potentially transitioning from preparation to early deployment.

### Growth expectations across our coverage

- We expect revenue growth of 0.5% QoQ CC for TCS and 0.3% for INFO, driven by seasonal furloughs, with 2H weaker than 1H as growth was front-ended, in line with prior years. HCLT is anticipated to clock healthy growth of 2.3% in 3QFY26, driven by seasonality in its software business. WIPRO is likely to report 1.5% QoQ CC, organically at the mid-point of guidance, supported by inorganic contributions of HARMAN. TECHM is expected to post 0.5% QoQ growth, while LTIM is likely to report 2.2% CC growth, aided by continued large-deal ramp-up.
- Among mid-tier firms, we expect PSYS to be at the forefront with ~3.5% cc QoQ revenue growth, driven by steady growth momentum across verticals, partially offset by furloughs. COFORGE/MPHL are also likely to deliver 3.0%/1.3% cc QoQ growth. HEXT is likely to decline 2.5% CC due to lower license revenues in addition to regular furloughs (~2.5-3% impact), fewer working days and temporary government shutdown disruptions.
- Among ER&D names, we expect a gradual recovery in this quarter. KPIT is expected to report 2.8% QoQ CC growth due to full consolidation of Caresoft (1-month impact) and N-dream in 3Q. Management has guided for flat-to-modest growth in 3QFY26 (organic), while TTL/TELX /LTTS are likely to report 1.0%/1.8%/1.3% CC growth.
- We expect Cyient DET to report 1.0% CC growth, as some stabilization is expected. We are factoring in a cross-currency headwind of ~20bp for most companies.

### Wage hikes and furloughs to restrict margin uplift in 3Q

- We expect TCS EBIT margins to decline by 30bp QoQ, driven by a two-month impact of wage hikes and the continuation of redundancy costs. HCLT's margins are expected to improve by 70bp, led by a seasonally stronger quarter and cost optimization, despite the impact of wage hikes. Infosys is expected to report flat sequential margins, as tailwinds from lower third-party costs are likely to be offset by higher sales investments.
- TECHM is expected to see another quarter of margin expansion, with margins improving by ~60bp, driven by fixed-price project optimizations leading to gross margin gains. **LTIM will hold margins at current levels as seasonal furloughs, lower utilization and deal ramp-up weigh on 3Q.**
- Among mid-caps, Coforge margins may decline 70bp QoQ to 13.3% as wage hikes in 3Q are only partially offset by lower ESOP and D&A expenses. HEXT/PSYS, too, shall see margin decline of 60/130bp due to wage hikes and seasonal furloughs.
- Mphasis and Zensar should see margin improvement in 3Q.
- **For ER&D companies, margins are estimated to decline due to the impact from furloughs, except for TELX, which should see sequential gains after a depressed 1H.**

### INFO and COFORGE remain our top picks

- We believe CY26 should represent the bottoming of the growth cycle, setting the stage for a more meaningful acceleration in 2HFY27 and FY28 as AI services move into scaled deployment. We prefer INFO and TECHM among large caps, while COFORGE and HEXT remain our top picks among mid-caps.
- We like INFO as it is well placed to benefit from enterprise-wide AI spending, given its discretionary-heavy mix and improving revenue quality, with pass-through revenue likely to stay low. At current valuations, upside risks

meaningfully outweigh downside risks. For TECHM, we see signs of transformation under the new leadership and improving execution in BFSI. We believe TECHM's transformation remains relatively decoupled from discretionary spending.

- In mid-caps, Coforge and Hexaware remain our top picks. We believe Coforge's strong executable order book and resilient client spending across verticals bode well for its organic business. Encora's acquisition expands Coforge's presence in the Hi-Tech and Healthcare verticals. We continue to view Coforge as a structurally strong mid-tier player well-placed to benefit from vendor consolidation/cost-takeout deals and digital transformation. Hexaware, meanwhile, is gaining share through consolidation deals in Financial vertical. As pressures in large accounts appear to be tapering, an improving margin trajectory bodes well for the company.

**Unprecedent tax hike; valuation multiples to reset**

- The government in its recent notification has increased taxes on cigarettes, effective from 1st Feb'26. New rates will increase the taxes on cigarettes by ~50% (assuming NCCD continues). ITC will need a price hike of atleast 25% at a portfolio level just to maintain the current net realization per cigarette stick. Moreover, earlier in GST 2.0, the government had revised GST rate on cigarette from 28% to 40% which will also implement from 1<sup>st</sup> Feb'26.
- Such a sharp tax increase is unprecedented and has surprised us given the backdrop of stable taxes over the last few years. Tax stability had impacted the illicit cigarette market, as its volume share contracted by ~150bp (Exhibit 3) over the last 4-5 years. ITC enjoyed this period, as its cigarette volume saw ~5% CAGR in the last five years, and the stock has run up over 50%.
- The tobacco lobby is opposing this tax increase, and we will see if there are any revisions in rates. However, if there is no change in taxes, we expect that it will significantly impact the legal cigarette market, and the price arbitrage between legal and illegal brands will be huge. It can shift volume from legal to illicit brands and could lead to downtrading within the legal brands.
- ITC has been very active on new product launches in cigarettes as taxes were stable; therefore, the product mix has been positive. Given the sharp price hike requirement, the mix will be weaker.
- Taxes were high during the 2012-2020 phase (Exhibit 4 - 7 times tax increase in 9 years), so the stock was range-bound during that period. However, ITC managed well and delivered positive EBIT growth. Since the tax increase is sharper this time, it will be a huge task for the company to protect its profitability. Its price hike strategy will be critical (full pass-on immediately or steady increase) to gauge the volume/EBIT sensitivity. We model 6% EBIT contraction in FY27 and will monitor the price hike process. Hence, our EPS cut is ~12% for FY27 and FY28.
- The stock has corrected ~10% on 1st Jan'26. Earnings pressure on cigarettes would take away the near-term catalysts (soft tobacco prices, recovery in FMCG and Paper) and comfort on valuation.
- We value cigarette business at 14x Dec'27E EV/EBITDA (similar multiple in earlier in high-tax cycle – Exhibit 5) vs. our earlier valuation multiple of 17x. We downgrade our rating from BUY to Neutral with a revised SoTP-based TP of INR400.

### India Valuations Handbook — Nifty bids adieu to CY25 with 10.5% returns; DII inflows and FII outflows at record high

- **Nifty hits record high, bids adieu to CY25 with 10.5% returns:** CY25 concluded with yet another year of positive returns for the Indian markets, marking the tenth consecutive year of positive returns. The Nifty touched a fresh high of 26,326 before ending CY25 at 26,130, up 10.5% YoY. The Nifty ended its three-month winning streak in Dec'25. The Nifty touched a fresh high of 26,326 before closing down 0.3% MoM at 26,130 in Dec'25. Notably, the index was volatile and swung around 633 points before closing 73 points lower. During the last 12 months, smallcaps declined 6%, underperforming largecaps and midcaps, which rose 11% and 6%, respectively. In the last five years, midcaps (CAGR: 23.7%) have significantly outperformed largecaps (CAGR: 13.3%) by 103%, while smallcaps (CAGR: 20.1%) have markedly outperformed largecaps by 63%.
- **DII inflows and FII outflows at a record high in CY25:** DII flows into equities were the highest ever at USD90.1b in CY25 vs. inflows of USD62.9b in CY24. With just one year of outflows since CY15, DIIs have invested USD255.8b cumulatively over the last 10 years (CY16-CY25). Conversely, FIIs witnessed the highest ever equity outflows of USD18.8b in CY25 vs. outflows of USD0.8b in CY24. During the last 10 years, FIIs have invested USD32.3b cumulatively in the Indian market, with four years of outflows.
- **Breath favorable in CY25:** Among the sectors, the top gainers were PSU Banks (+30%), Metals (+29%), Financials (+27%), Automobiles (+23%), and Private Banks (+16%). The breadth was favorable in CY25, with 33 Nifty stocks closing higher. Shriram Finance (+72%), Maruti Suzuki (+54%), Eicher Motors (+52%), Hindalco (+47%), and SBI Life Insurance (+46%) have been the top performers, while Trent (-40%), TCS (-22%), Tata Motors PV (-18%), HCL Tech (-15%), and Power Grid (-14%) have been the key laggards.
- **India underperforms key global markets in Dec'25:** Among the key global markets, Korea (+7%), Taiwan (+5%), Germany (+3%), MSCI EM (+3%), the UK (+2%), China (+2%), Indonesia (+2%), Brazil (+1%), and Japan (+0.2%) ended higher in local currency terms on a MoM basis in Dec'25. However, India (-0.3%) and the US (-0.1%) ended lower MoM. During the last 12 months in USD terms, the MSCI India Index (+3%) underperformed the MSCI EM Index (+31%). In the last 10 years, the MSCI India Index notably outperformed the MSCI EM Index by 53%. In P/E terms, the MSCI India Index is trading at a 47% premium to the MSCI EM Index, below its historical average premium of 78%.
- **Valuations – two-thirds of the sectors trade at a premium to their historical averages:** The Nifty now trades at a 12-month forward P/E of 21.2x, near its LPA of 20.8x (2% premium). Conversely, the P/B ratio at 3.2x represents an 11% premium to its historical average of 2.9x. The market capitalization-to-GDP ratio now stands at 133% of FY26E GDP (9% YoY), at its year-end high and well above its long-term average of 87%. Consumer, Technology, Real Estate, and Logistics now trade near their long-period average (LPA) valuations, while Capital Goods, PSU Banks, NBFCs, Oil & Gas, Metals, and Utilities trade at a premium to their LPA. Private Banks and Retail trade at a discount to their LPA.
- **The year ahead:** We have a positive outlook on Indian equities and believe that Indian markets are well poised to retrace the underperformance of CY25, supported by better earnings prospects, supportive domestic macros, and an improved geopolitical situation. Valuations are reasonable, with Nifty trading at 21.2x, near its LPA of 20.8x, and any evidence of earnings growth pickup should help valuations expand. The prevalent concerns of lower nominal GDP materially affecting corporate profit growth appear overblown to us, as corporate earnings are influenced by multiple factors beyond broad economic growth, which possesses limited explanatory power for corporate earnings growth. In our [model portfolio](#) we raise Indian IT services to mildly overweight by trimming our position in consumer discretionary and healthcare names. Our preferred sectors are Diversified Financials, IT Services, Automobiles, Telecom, and Capital Goods, whereas our key underweights are Energy, Metals, and Utilities.
- **Top ideas:** Largecaps – Bharti Airtel, ICICI Bank, SBI, L&T, M&M, Infosys, Titan Company, Bharat Electronics, Interglobe Aviation, Tata Steel, TVS Motor, Tech Mahindra, Max Healthcare, and Indian Hotels. **Midcaps and Smallcaps** – Swiggy, Dixon Technologies, Suzlon Energy, Jindal Stainless, Coforge, Angel One, Radico Khaitan, Delhivery, V-Mart Retail, and VIP Industries.

## 2025 ends on a strong note

Auto wholesales remained strong in Dec'25 and surpassed our expectations for quite a few OEMs. We attribute this strong demand momentum in wholesales to: 1) positive consumer sentiment led by GST rate cuts, 2) strong marriage season in Nov'25 after an equally strong festive season, 3) relatively low base given weak demand macro last year. These factors resulted in robust wholesale growth for most OEMs across segments. PV wholesales for the four listed players grew 18.5% YoY, led by MM (+23%, in line) and MSIL (+22%, in line). On the other hand, TATA PV (+14.1%) and HMIL (+6.6%) underperformed peers. In 2Ws, BJAUT has yet to report its numbers, while the other three OEMs posted robust 43% YoY growth in wholesales. Similarly, the top three CV players registered healthy 26% YoY growth, with broadly similar growth by each of them. Tractor OEMs maintained strong performance as well, with the two listed entities posting ~39% YoY growth each in Dec. While wholesales were strong, retails were equally healthy across most segments. Thus, OEMs are likely to have ended 2025 with lean inventory, which we believe should help them sustain the volume momentum in 4QFY26 as well, in our view. We will review our growth expectations soon. Within OEMs, MSIL, MM, and TVS are our top picks.

- **PVs (mixed):** After a strong festive and wedding season in Nov, PV demand continued to be healthy even in Dec. Players continued to push demand with healthy discounts to sustain the growth momentum. MSIL's Dec sales rose 22.2% YoY to ~218k units (in line), driven largely by strong demand in the mini segment, UVs and compact cars. However, after a record-high show in Nov, exports were weak and declined 31.2% YoY in Dec. MM posted strong UV sales of 50.9k units, marking a 23% YoY increase, in line with our estimates. TATA PV volume, although up 14% YoY to 50.5k units, underperformed peers and came in below our estimates. Hyundai also delivered a disappointing performance, with sales growing by just 6.6% YoY to 58.7k units. Domestic sales were below expectations, flat YoY at 42.4k units. Exports were in line with estimates, up ~27% YoY to 16.3k units. Overall, PV wholesale volumes grew 18.5% YoY for the four listed players in Dec and 7.2% YoY on a YTD basis.
- **2Ws (above):** BJAUT has yet to report Dec sales. Like PVs, 2W demand was strong in Dec. TVSL delivered strong ~50% YoY growth in Dec to 481k units (ahead of estimates). Strong growth was visible across all segments: motorcycle up ~50% YoY, scooter up ~48% YoY and 3Ws doubled YoY to 20,318 units. Even HMCL posted a robust ~41% growth YoY to 456k units (beating our estimate of 397k units). HMCL wholesales were surprising as its retails declined 11% YoY, as per Vahan. Exports saw 21% growth YoY, supported by new market entries and portfolio expansion. Additionally, scooter sales nearly doubled YoY in Dec, led primarily by the new Destini and Xoom launches in the ICE segment and positive sentiment toward the VIDA VX2. Further, RE posted 30.3% YoY growth to 104k units (slightly above estimates). Domestic sales grew 37% YoY, while exports declined 10% YoY to 10.3k units. Excl. BJAUT, three 2W players posted a robust 43% YoY growth in wholesales in Dec.
- **CVs (above):** Demand trends seem positive for all segments within CVs, with current demand momentum likely to remain intact in the coming months given the positive sentiment and favorable lead indicators. The three listed players posted a strong ~26% YoY growth in CV sales in Dec'25 over last year's low base.

Additionally, all of them posted robust MoM growth as well, indicating steady demand momentum. VECV sales were in line, while AL and TATA CV were above estimates. TATA CV posted 25.5% YoY growth in CV sales to 42.5k units. HCV sales rose 30.4% YoY and LCVs were up by 20.8% YoY. VECV sales grew 24.7% YoY to 10.3k units for Dec. Ashok Leyland outperformed the industry, growing 27% YoY to 21.5k units. On a YTD basis, the top three CV players posted 10.2% YoY growth.

- **Tractors (above):** This segment has been seeing strong momentum since the beginning of FY26 and this momentum is expected to remain intact in the coming months. Higher reservoir levels, healthy crop patterns, and improved MSPs, among others, have boosted rural sentiment, leading to strong retail demand. The two listed tractor players posted ~39% YoY growth in tractor volumes in Dec'25. MM posted a strong ~39% YoY growth in tractor volumes to 31.9k units, outperforming our estimates. Escorts also posted a strong ~39% YoY growth in tractors, coming in ahead of our expectations. Combined tractor sales for both companies are up 19% YoY on a YTD basis.
- **Valuation and view:** Following the GST rationalization, demand has picked up across segments and seems to have remained intact even after the festive season. A notable trend is that entry-level vehicles, both 2Ws and PVs, are seeing a marked pickup in demand. Further, wholesales were strong in Dec, and retails were equally healthy across most segments. Thus, OEMs are likely to have ended 2025 with lean inventory. This would help them sustain the volume momentum in 4QFY26 as well. With a recovery in demand, we expect discounts (in PV segment) to gradually reduce. MSIL is our top pick among auto OEMs, as its new launches and the current export momentum are likely to drive healthy earnings growth. We also like MM, given the uptrend in tractors and healthy growth in UVs. In 2Ws, we are positive on TVSL.
