

We maintain BUY on CG Power and Industrial Solutions (CG Power) while raising our target price by ~13% to Rs875 from Rs775, valuing the company at 55x FY28E earnings. Q4FY26 performance was better than our expectations, with revenue/EBITDA/PAT growth at 25/29/25% YoY to Rs34.4/4.7/3.6bn, respectively. The strong performance was primarily driven by the Power Systems segment (+50% YoY), reflecting robust underlying execution. However, Industrial Systems performance was muted, with challenges in the Railway business. EBITDA margin improved by ~40bps YoY to 13.6%, mainly led by higher profitability in Power Systems. With rising input cost, the company has taken 17% price hike in the Motor business over the last four quarters. 4Q order inflow grew 39% YoY to Rs53.4bn, resulting in order backlog of Rs171bn, up 61% YoY. Besides the domestic market, we see exports as among the large growth opportunities, supported by a global energy transition drive and data-center capex.

Q4FY26 results – Power Systems continues to drive growth

CG Power's Q4FY26 results were ahead of our estimates. Revenue grew 25% YoY at Rs34.4bn, mainly led by Power Systems (up 50% YoY) at Rs14.9bn. The robust growth is on the back of a strong opening order backlog and sustained execution. Industrial Systems revenue was flat at Rs17.9bn, impacted by weakness in the railways business. EBITDA margin expanded by 41bps YoY to 13.6% (Emkay estimate: 12.7%), mainly led by Power Systems, wherein EBIT margin improved by 287bps YoY to 23.8%. Industrial Systems profitability was muted, with EBIT margin declining by 200bps YoY to 9%.

Robust order backlog; exports to be key growth area

Consolidated order inflow increased 39% YoY to Rs53.4bn. This was mainly led by Power Systems, wherein order inflow jumped 72% YoY at Rs30.3bn, benefiting from the global energy transition drive. Industrial Systems order inflow declined 22% YoY at Rs14.8bn. Overall, the order book grew 61% YoY to Rs171bn (book-to-bill improved to 1.4x from 1.1x in FY25). The company recently secured a Rs9bn power transformer export order from Tallgrass Integrated Logistics Solutions LLC (USA), for a large-scale data-center project in the US, reinforcing its export push and strengthening its presence in high-growth international markets.

View and valuations

We remain long-term positive on CG Power, given its strong product portfolio and impeccable execution track record. The company continues to report healthy return ratios, with RoE of 20%/23% in FY27/28E. It is one of the large early entrants in the high-growth semiconductor business, with capex of Rs76bn. We marginally tweak our estimates and maintain BUY on the stock while raising our TP by ~13% to Rs875, valuing the core business at 55x FY28E and OSAT at Rs55/share.

Concall KTAs

Q4FY26 performance

- Power Systems reported PBIT margin at 23.8% for Q4FY26 (vs +21% in Q4FY25), reflecting (+287bps) margin expansion due to efficient order execution and strong operating discipline, and indicating that commodity price pressures were effectively managed.
- Industrial Systems Q4FY26 PBIT was 9.6%, down from 11.2% in Q4FY25, attributed to mix changes, competitive railway pricing, and higher MSR for motors due to commodity price impact.
- The standalone order backlog for FY26 stood at Rs157bn (+59% YoY), providing strong revenue visibility for FY27, while the consolidated backlog stood at Rs171bn (+61% YoY). Additionally, GG Tronics has an order backlog of around Rs10bn, with execution expected to commence in ~1-1.5 months following the completion of passenger trials.

Pricing pressure

- The motors business saw growth driven by both price and volume increase, with the management emphasizing pricing discipline to prevent leakage from additional discounts.
- Over the last 3-4 quarters, the motors business implemented a total price increase of 17.5% and maintained its market share, with competitors generally following their pricing actions.
- For large businesses like transformers, commodity price increases are generally passed on to customers through price variation clauses.
- The management maintains a sharp eye on commodity inflation for motors and drives, making case-by-case decisions on price adjustments, while for large businesses like transformers, price variation clauses typically pass on commodity cost changes to customers.

Capex plans

- CG Power is undertaking significant capital expenditure for capacity expansion in its transformer and switchgear businesses.
- Transformer capacity has increased from 17,000MVA to 65,000MVA, with brownfield extensions completed in Gwalior (6,000MVA to 10,000MVA) and Bhopal (increased to 40,000MVA from 25,000MVA).
- A greenfield transformer plant is also under construction, and is expected to be commissioned between July and August, initially adding 25,000-30,000MVA and reaching 45,000MVA by the end of FY27, thus bringing the total capacity to 110,000MVA.
- A greenfield expansion for the switchgear business was approved with an investment of Rs7.5bn, driven by expected demand for medium and extra high voltage circuit breakers, instrument transformers, and gas-insulated switchgears for the domestic and export markets.

Miscellaneous

- Consolidated margin gains were partially offset by continued investment in the talent pool for the semiconductor business.
- Investments are being made in startups such as Edge Cortix, to build semiconductor design capabilities, with more such investments anticipated given the rapid changes in AI technology.
- The delivery timeline for transformers to the US market is constrained by component availability, specifically bushings from Germany, which have a 9 to 12-month lead time, limiting deliveries to 12 months or more.
- The Board of Directors approved an interim dividend of Rs1.3/equity share, representing 65% of the face value for FY25-26.
