Technical Snapshot

SELL SILVER JUL @ 101600 SL 102400 TGT 100500-99800. MCX

Observations

Silver trading range for the day is 100310-102200.

Silver crossed ₹1 lakh amid U.S.-China trade tensions and global growth fears.

Weaker dollar and OECD's economic slowdown warning fueled safe-haven demand for silver.

The CME FedWatch Tool continues to show a 55.6% probability of the US central bank announcing a rate cut in September.

Fed officials maintained a cautious tone, citing trade risks and economic uncertainties.

Gold gains as a series of weak US economic reports renewed concerns over the outlook. ADP figures showed private sector job creation slowed sharply to just 37,000 in May—well below expectations—marking the weakest pace since March 2023. Central banks added a net 12 tonnes of Gold to global Gold reserves in April, 12% lower than the previous month and below the 12-month average of 28 tonnes.

India gold demand lags as prices rise, wedding buying cools - Physical gold demand in India was subdued, as an uptick in domestic prices and a winding up of wedding season kept buyers at bay, while premiums slipped in top consumer China. Indian dealers were offering a discount of up to \$31 an ounce over official domestic prices, down from last week's discount of up to \$49. In China, bullion changed hands at par to a \$15 premium an ounce over the global benchmark spot price, compared with premiums of \$16-\$30 last week. China's total gold imports via Hong Kong nearly tripled month on month in April, hitting their highest level in more than a year, Hong Kong Census and Statistics Department data showed. In Hong Kong, gold was sold at a premium of \$0.30 to \$1.30, while in Singapore gold traded between at-par prices and a \$2.50 premium. In Japan, bullion was sold at par to a premium of \$0.50.

Swiss monthly gold imports from the U.S. hit highest since at least 2012 - Gold imports to Switzerland from the United States jumped to the highest monthly level since at least 2012 in April after the exclusion of precious metals from U.S. import tariffs, Swiss customs data showed. Switzerland, the world's biggest bullion refining and transit hub, and Britain, home to the world's largest over-the-counter gold trading hub, registered massive outflows to the U.S. over December-March as traders sought to hedge against the possibility of broad U.S. tariffs hitting bullion imports. The Swiss data showed that gold imports from the U.S. rose to 63.0 metric tons in April from 25.5 tons in March. It was the highest in monthly data going back to early 2012. Switzerland's total gold exports fell by 31% month on month in April with gold deliveries to the U.S. dropping to 12.7 tons from 103.3 tons in March. Exports to the UK rose, indicating that gold was also coming from the U.S. back to London vaults via Swiss refineries.

Share of gold in India's forex reserves doubles in four years, central bank report shows - The share of gold held by India's central bank in its foreign exchange reserves has doubled in the last four years as on March-end, a report by the Reserve Bank of India showed on Monday. In dollar value terms, the share of gold in the total foreign exchange reserves increased to about 11.70% by end-March, from 9.32% as at end-September 2024 and 5.87% as on end-March 2021, the central bank's half year forex reserves report said. As of end-March, the RBI held 879.59 metric tonnes of gold, compared to 854.73 metric tonnes at the end of September. The proportion of gold held domestically rose to 511.99 metric tonnes as of March 31, against 510.46 metric tonnes at September-end, the RBI said. "While 348.62 metric tonnes of gold were kept in safe custody with the Bank of England and the Bank for International Settlements (BIS), 18.98 metric tonnes were held in the form of gold deposits," the report showed.

Gold Demand Q1 2025: Investment Soars 170% Despite Weak Jewellery and Central Bank Buying - Global gold demand including over-the-counter (OTC) trading rose by 1% year-on-year to 1,206 metric tons in the first quarter of 2025 as investment jumped 170%, the World Gold Council said. Driving up investment demand were massive inflows into physically backed gold exchange-traded funds and 14% growth in demand for gold bars in the first quarter. That offset a 32% slump in demand for coins. However, bar and coin investment in China rose 12% to 124.2 tons, the highest level since the second quarter of 2013's record high, said the WGC. Amid high prices, global gold jewellery consumption, fell 21% to 380.3 tons, the lowest level since the 2020 pandemic. Central banks, another major source of gold demand, cut purchases by 21% to 243.7 tons in the first quarter, the WGC calculated, based on reported purchases and an estimate of unreported buying.
