## Technical Snapshot

**Be Cautious. Important resistance at 111200 while Support at 109000.**

## Observations

Gold trading range for the day is 108375-111235.

Gold gains as dollar index slipped, its weakest level since late July.

Gold also continued to draw safe-haven support from geopolitical uncertainties.

Markets have fully priced in a 25 bps cut to the fed funds rate, while leaving a small chance of a larger 50 bps move.

UBS raised its gold price forecast by \$300 to \$3,800 per ounce by the end of 2025 and by \$200 to \$3,900 by mid-2026

## Technical Snapshot

**Be Cautious. Important resistance at 127800 while Support at 130800.**

## Observations

Silver trading range for the day is 126225-131225.

Silver rose as investors braced for an expected US Fed interest rate cut this week.

Recent US economic data has cemented expectations for Fed easing with clear signs of a cooling labor market.

Jobless claims have climbed to multi-year highs, and prior payrolls were revised sharply lower.

Nonfarm Payrolls report showed that the US economy added just 22K jobs in August, far below the 75K forecast.

Gold gains as dollar index slipped to 97.3, its weakest level since late July, as traders awaited the Federal Reserve's policy decision. Markets have fully priced in a 25 bps cut to the fed funds rate on Wednesday, while leaving a small chance of a larger 50 bps move, after recent data pointed to a sharp cooling in the labor market. Investors will also focus on the Fed's updated macroeconomic projections—particularly the interest rate path—with expectations that easing will continue through year-end. The vote split will be closely watched, as the FOMC has not been divided three ways since 2019.

Record prices cool gold demand in key hubs, China discounts hit over 9 – month high - Physical gold demand across major Asian markets was muted as record-high prices deterred retail purchases, with discounts in China reaching more than nine-month highs. In China, dealers offered discounts of \$17-\$24 per ounce over global benchmark spot prices, compared to \$12-\$16 last week. Meanwhile, China's central bank extended its gold purchases into a 10th consecutive month in August, official data showed. In India, dealers quoted discounts of \$6 and premiums of \$2 per ounce over official domestic prices, compared to last week's discounts of up to \$12. In Hong Kong, gold was sold at par to a \$1.60 premium, while in Singapore, premiums ranged from par to \$2.20.

China's central bank buys gold in August for 10th month in a row - China's central bank added gold to its reserves in August, extending purchases of bullion into a 10th straight month, official data showed. China's gold reserves stood at 74.02 million fine troy ounces at the end of August, up from 73.96 million at the end of July. They were valued at \$253.84 billion, up from \$243.99 billion at the end of the previous month, according to data released by the central bank. Demand for physical gold in the world's largest producer, which is also a top consumer of the metal, was weak, due to high prices, with dealers offering discounts over the global benchmark to attract buyers.

The US has slapped tariffs on imports of one-kilo gold bars, in a move that threatens to upend the global bullion market and deal a fresh blow to Switzerland, the world's largest refining hub. The Customs Border Protection agency said one-kilo and 100-ounce gold bars should be classified under a customs code subject to levies, according to a so-called ruling letter dated July 31, which was seen by the Financial Times. Ruling letters are used by the US to clarify its trade policy. One-kilo bars are the most common form traded on Comex, the world's largest gold futures market, and comprise the bulk of Switzerland's bullion exports to the US. Switzerland exported \$61.5bn of gold to the US over the 12 months ending in June. That same volume would now be subject to an additional \$24bn in tariffs under Switzerland's 39 per cent tariff rate, which went into effect on Thursday.

India's gold demand to hit 5 – year low as record prices dent jewellery sales, WGC says - India's gold consumption in 2025 is set to fall to a five-year low, as record-high prices are denting jewellery purchases, overshadowing a slight boost in investment demand, the World Gold Council said. Gold demand in the world's second-biggest consumer of the precious metal could stand between 600 metric tons and 700 metric tons in 2025, the lowest since 2020, and down from last year's 802.8 tons, Sachin Jain, CEO of WGC's Indian operations, told. Demand could reach 700 tons if prices stabilise, but a 10%–15% price rise driven by geopolitical factors may pull it down to the lower end of the range, he said. India's gold consumption in the April-to-June quarter fell 10% from a year ago to 134.9 tons, as jewellery demand fell 17% while investment demand rose 7% in the quarter, the WGC said. Demand in the September quarter is expected to be lower than last year's 248.3 tons, when New Delhi's move to reduce import duties boosted purchases, Jain said. "Gold ETFs in India are at a very important cusp for growth, and as India becomes more digitised, they are gaining popularity and prominence," he said.
