RoA journey (%)

PSU Banks: Resetting to a new normal in profitability

PSBs to sustain 1% RoA; valuations remain inexpensive

- During Jan'23-Feb'24, we published three sector notes on PSU banks (PSBs), arguing that the recovery in RoA to 1% is not a one-off event but more like a homecoming for PSBs. Now, in recent years, PSBs have sustained healthy RoA, and we believe that with margins recovering in 2HFY26 and asset quality remaining stable, they are well poised to deliver steady returns in the coming years.
- In this note, we further explore if PSBs have transformed fundamentally and deserve to be viewed differently given their sustained profitability and growth trajectory.
- PSB sector profitability has reached a record high at INR1.5t and RoA has surpassed 1%. We estimate a 14% CAGR in aggregate earnings of our PSB coverage over FY26-28F.
- While NIM pressure may weigh on the near-term outlook, rising fee income, a gradual moderation in cost ratios, and healthy coverage levels (PCR ~79%) will help to keep RoA stable at 1.0-1.1%.
- Stronger deposit franchises, conservative CD ratios, and steady traction in Retail, Agri and MSME (RAM) segments have enabled PSBs to regain credit momentum, with PSBs outpacing private banks in FY25 loan growth for the first time in the past 15 years (12% vs. 10%).
- PSBs' market cap has jumped nearly 5x since FY20, yet they continue to trade at reasonable valuations even as sector RoE remains stable at 18-19% and RoA at ~1%.
- With their strong balance sheets, healthy asset quality, and improving efficiency, we see scope for a gradual but meaningful re-rating for PSBs. Our preferred ideas are SBIN and PNB. Among mid-size names, we prefer INBK given its superior return ratios.

PSBs well poised to sustain RoA at ~1%

Once considered aspirational, PSBs have achieved a structural turnaround, with sector RoA reaching ~1.1% in FY25, supported by improved underwriting, cost control, and robust recoveries. Aggregate PSB profits have surged to INR1.5t in FY25, with their share in banking profits rebounding to 48%. While private banks continue to lead in RoA (1.7-1.8%), top PSBs now deliver comparable or superior RoE (~18), aided by higher leverage. Despite near-term headwinds from margin pressure, modest growth, and ECL implementation down the road, we expect PSBs to sustain RoA at ~1% and deliver ~14% earnings CAGR over FY26-28E.

Financials: PSBs — Sustained profitability to drive stock performance

Healthy liquidity, funding profile to support stable credit growth

PSBs have historically maintained a robust deposit franchise and a comfortable liquidity position, as reflected in their healthy LCR and controlled CD ratio. Despite a gradual erosion in market share, PSBs still command over 62% of system deposits, anchored by their extensive branch presence and strong depositor trust. This has enabled most PSBs to maintain controlled CD ratios, while healthy LCR (130-145% range) further reinforces balance sheet position. This allows PSBs to fund loan growth without aggressively chasing high-cost deposits, giving them a funding advantage across liquidity and rate cycles and ensuring stable 11-12% YoY credit growth.

Nitin Aggarwal - Research Analyst (Nitin.Aggarwal@MotilalOswal.com)

PSBs: Well poised for rerating 2.0; 1% RoA – from aspirational to sustainable; valuations remain attractive

FINANCIALS: Public Sector Banks: The Homecoming of RoA!

PSBs' credit market share to decline at milder pace vs. 200bp annual fall

PSBs have reversed a decade-long trend of market share erosion, regaining ~40bp in FY25 to ~58%. This was supported by healthy credit growth, backed by robust asset quality, strong capital buffers, and ample liquidity that allowed them to sustain steady credit flow, while private peers faced CD ratio constraints. In FY25, PSBs outpaced private banks in loan growth for the first time in 15 years (12% vs. 10%), driven by momentum in retail and MSME segments and relative insulation from stress in unsecured loans. With low-cost deposits, digital investments, and a recovery in consumption demand, we believe PSBs are well placed to deliver 10-12% loan CAGR in FY26E, and unlike the sharp 200bp annual decline over FY11-21, their market share is now expected to decline only marginally over FY26-28E.

Navigating NIM pressures with strategic rebalancing; pace of fall to ease

We expect PSBs to face further margin pressure in 2QFY26 due to the repricing of repo-linked loans. However, proactive liability management through the repricing of bulk deposits and certificate of deposits (CDs) at lower rates and replacing high-cost CDs with granular retail deposits will mitigate margin impact. We believe NIMs are likely to broadly stabilize by 3QFY26 and recover thereafter, supporting healthy NII growth over FY27-28E. Alongside, PSBs are cautiously rebalancing their asset mix toward higher-yielding RAM loans. With a low Credit deposit ratio, rising fee income, and prudent use of loan syndication and sell-downs, PSBs are well-positioned to absorb short-term NIM compression while sustaining healthy credit growth and profitability.

Bond gains provide crucial earnings support; mix in other income rises to 22-40%

Amid the sharp decline in NII, treasury gains have become a key offsetting lever for PSBs, driven by the rally in G-sec bonds following a sharp drop in yields. In 1QFY26, treasury gains accounted for 22-40% of total other income for PSBs, the highest in the past four years, with SBIN, Bank of Baroda (BOB), and CBK reporting the largest contributions of 31-40%. However, treasury gains are expected to moderate in the coming quarters as bond yields remain range-bound, while healthy systemic liquidity and the upcoming CRR cut reduce the need for repeated OMOs.

Cost ratios to improve gradually, thereby supporting RoA

PSBs have traditionally operated with high cost-to-income ratios of 48-55% due to elevated employee expenses (55-66% of total costs), making them less efficient than private peers (~35-45%). However, operating leverage is now improving as revenue growth strengthens, fee income scales up, and headcount remains largely stable. Digital adoption, branch rationalization, workforce optimization, and the government's PLI scheme are supporting efficiency gains, helping revenue outpace the cost increase. As a result, C/I ratios are expected to gradually decline, narrowing the efficiency gap and supporting stable RoA.

Robust asset quality with best-in-class PCR ratios

PSBs have undergone a remarkable balance sheet transformation, moving from double-digit NPAs to best-in-class asset quality. PCR has risen sharply from 45% in FY18 to \sim 79% in FY25, while GNPA ratio has declined from 14.6% to 2.8%, bringing

net NPA ratio down to 0.5%, comparable with private banks. Slippages have dropped from ~7.9% in FY18 to ~0.7% in FY25 and are expected to stay below 1% through FY27-28E, highlighting the resilience of PSBs' asset quality vs. private peers (~1.8-1.9% slippages). Credit costs have improved significantly but are expected to rise gradually due to slower recoveries and ECL transition, though the healthy PCR provides a cushion. Contained SMA books, disciplined underwriting and strong governance provide visibility on stable asset quality, while stronger capital positons and cleaner balance sheets make PSBs far more resilient, mitigating the depth of cyclicality in earnings and asset quality compared with past downturns.

Capital adequacy has improved sharply; internal accruals to fund growth

Over the past five years, PSBs have strengthened their CET-1 ratios from 9.4%-11.8% in FY20 to 11.0%-15.3% by 1QFY26, supported by strong internal accruals and capital raises from the market. This capital cushion, combined with robust profitability, improved asset quality, and disciplined underwriting, has enabled steady credit growth while containing risks. Several PSBs like SBIN, Punjab National Bank (PNB), CBK, and Union Bank (UNBK) have successfully tapped equity markets, driving CRAR to a healthy range of 15-18% across our coverage banks. Most PSBs now have a public float of over 25%, though select banks will still need to reduce government holdings to meet minimum promoter shareholding norms.

Valuation and view: RoA outlook steady; should PSBs be looked at from a different lens?

PSBs have seen a strong re-rating over the past five years, shedding their legacy image of lenders with poorer underwriting capabilities to competitive players delivering consistent value to stakeholders. Their aggregate market capitalization has surged by nearly 5x since FY20. Despite healthy RoE of ~18% and sustainable RoA of 1%+, most coverage PSBs trade at reasonable valuations of 0.8-1x forward P/B and 5-7x FY27E EPS. While near-term earnings may face margin pressures, structural improvements in asset quality, capital strength, digital adoption, and operating efficiency offer visibility on sustaining this RoA. PSBs are well positioned to benefit from any capex recovery, though near-term growth will continue to be funded by RAM assets. Stronger capital positions, cleaner balance sheets, and prudent provisioning make PSBs more resilient and limit cyclicality in earnings and asset quality relative to past cycles. **Top picks: SBIN and PNB. INBK stands out among mid-sized banks. We remain Neutral on BOB and UNBK.**

PSBs well poised to sustain steady operating performance

Estimate RoA to stabilize at ~1.1% over FY26-28E

Until a few years ago, a 1% RoA for PSBs was considered an aspirational milestone. However, with their consistent growth backed by improved underwriting and cost control, PSBs have delivered a remarkable turnaround over the last few years, with sector RoA reaching ~1.1% in FY25. In FY25, our PSB universe posted a record net profit of INR1.5t vs. an aggregate loss of INR295b in FY18. Their share in total banking profits has rebounded to 48% from negligible levels during the peak of the NPA crisis.

- While private banks still lead in RoA (1.7-1.8% vs. ~1.0-1.1% for PSBs) due to better fee income, margins, and efficiency, top PSBs have matched them or are better in RoE (~18-19%), aided by improved recoveries and higher leverage.
- In the near term, earnings moderation may continue due to margin pressure, modest business growth, and normalization of credit costs, along with potential implementation of ECL guidelines. We, nevertheless, estimate PSBs to deliver ~1-1.1% RoA in the coming years.
- Healthier balance sheets, stronger capital positions, and a stable profitability outlook continue to form the key investment arguments for the sector. We estimate an earnings CAGR of 14% for the top six PSBs under our coverage over FY26-28E.

Source: MOFSL, RBI

PSBs' PAT contribution in total banking sector PAT has increased to FY15 levels at ~49%.

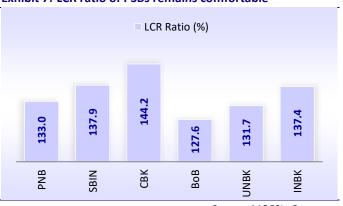

Healthy liquidity, funding profile to help sustain credit growth

PSBs' credit market share to decline at a milder pace

- PSBs have historically maintained a robust deposit franchise and comfortable liquidity positions as reflected in their healthy LCR and controlled CD ratio. Despite a gradual erosion in market share, PSBs still command over 62% of system deposits, anchored by their extensive physical presence and strong depositor trust.
- This has enabled most PSBs to maintain CD ratios in the 70-78% range, well below the private banks' levels. Their LCRs, often in the 130-145% range, further reinforce a comfortable balance sheet position.
- These buffers allow PSBs to fund loan growth without aggressively chasing high-cost deposits, giving them a funding advantage across liquidity and rate cycles and supporting stable loan growth going forward.
- After years of losing ground, PSBs have stabilized their credit market share at ~58% (gaining ~40bp credit market share in FY25, for the first time in past one decade), supported by stronger asset quality, robust capital buffers, and ample liquidity. This enables them to maintain steady credit flow compared to private peers, some of whom were constrained by high CD ratios.
- Thus, in FY25, PSBs outpaced private banks in loan growth for the first time in 15 years, delivering 12% YoY growth vs. 10% for private banks.
- PSBs are gaining traction in retail and MSME segments and are relatively insulated from rising delinquencies in unsecured loans and MFIs. This, coupled with a pickup in consumption activity aided by reduced GST & direct tax rates, low-cost deposits, and ongoing digital and operational investments, positions them well to sustain healthy credit growth in the coming years.
- We believe that while systemic loan growth may remain modest in FY26, PSBs overall are well poised to deliver a CAGR of 10-12% in loans over the year.
- We, thus, estimate PSBs' credit market share to decline at a slower pace over FY26-28E unlike an average annual decline of 200bp witnessed over FY11-21.

PSBs have seen a steady decline in CASA ratios as depositors shifted toward term deposits amid high TD rates

While the rates have started to ease, maintaining CASA will not be easy as the bulk of flows are still happening on TD side

Navigating NIM pressure with strategic rebalancing

Bond gains provide earnings support; mix in other income rises to 22-40%

- We expect pressure on margins for PSBs in 1HFY26 due to the repricing of repolinked loans. However, PSBs are proactively managing liability costs by repricing bulk deposits and CDs at lower rates. Several PSBs are also unwinding the mix of high-cost CDs and replacing them with granular retail deposits, which is helping them limit margin pressure. We thus estimate NIMs for PSBs to broadly stabilize in 3Q and start recovering thereafter, translating into healthy earnings growth over FY27-28E.
- At the same time, PSBs are cautiously rebalancing their asset mix toward higher-yielding Retail and MSME loans. With a low CD ratio, rising fee income, and a prudent use of loan syndication and sell-downs, PSBs remain well-placed to absorb short-term NIM compression while sustaining healthy credit growth and protecting profitability. Accordingly, they are likely to sustain RoA at ~1%.
- Amid the revenue crunch (NII declining sharply), treasury gains have emerged as a key offsetting lever for PSBs, driven by the rally in G-sec bonds following a sharp reduction in G-sec yields.
- During 1QFY26, the mix of treasury gains in total other income has increased to 22-40% for PSBs, the highest in the past four years, with SBIN, BOB, and CBK reporting the highest treasury gains, contributing 31-40% to total other income.
- However, we expect treasury gains to moderate in the coming quarters as bond yields move in a narrow range, while healthy systemic liquidity and upcoming CRR cut implementation will obviate the need for repeated OMOs.

Can cost ratios improve gradually?

Operating leverage and controlled expansion rate to improve cost ratios

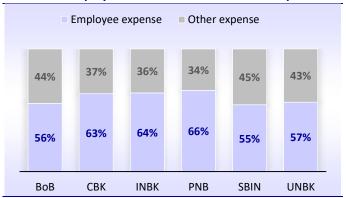

- PSBs have historically operated with high cost-to-income (C/I) ratios in the range of 47-50%+, largely due to high employee expenses, which form 55-66% of total costs. This has kept them structurally less efficient than private peers, whose C/I ratio is ~35-45%.
- However, operating leverage is now beginning to kick in as revenue growth strengthens and fee-based income scales up. With headcount largely stable, digital adoption accelerating, and branch networks being rationalized postmerger, incremental income is expected to outpace cost growth.
- At the same time, PSBs continue to manage employee-related costs effectively despite rising retirement expenses, which have been pressured by aggressive wage negotiations under the IBA framework. Workforce rationalization through branch consolidation, higher retirements, and the use of technology has kept overall headcount stagnant or even reduced in some banks.
- Additionally, the government's performance-linked incentive (PLI) scheme, introduced in 2021, has further encouraged efficiency and productivity improvements, with new hiring being directed toward digital, retail, and SME-focused roles.
- As a result, C/I ratios are likely to gradually decline, even if they remain higher than private peers. Narrowing this efficiency gap through productivity gains and tech-driven improvements will be key to sustaining RoA and reinforcing the operational turnaround.

Robust asset quality; PCR stands ahead of private peers

Aggregate slippages for PSBs are lower than those of private banks

- PSBs have seen a remarkable balance sheet transformation, led by the clean-up exercise initiated by the RBI in 2015 via the Asset Quality Review (AQR), recovering from a mountain of bad loans to achieving the best-in-class asset quality. One of the most compelling indicators of this turnaround is the steady improvement in PCR, which has risen sharply from 45% in FY18 to ~79% in FY25, surpassing most private banks.
- A high PCR, coupled with a sharp decline in GNPA from a peak of 14.6% in FY18 to 2.8% in FY25, reflects a disciplined approach to risk management and improved underwriting standards. As a result, net NPA have also declined sharply to 0.5% in FY25, putting PSBs at par with private banks, an extraordinary convergence considering the double-digit net NPAs that most PSBs struggled with just a few years ago.
- Slippage ratio for PSBs, which had peaked at ~7.9% in FY18, has improved significantly to ~0.7% by FY25 and is expected to remain below 1% over FY27-28E. In contrast, private banks' slippages have moderated more gradually and are high at ~1.8-1.9%, highlighting PSBs' stronger asset quality turnaround and resilience in maintaining robust asset quality.
- The credit cost range for PSBs has thus improved to 40-50 bps during FY25 vs. an average credit cost of 3% witnessed during FY17-19. However, this is expected to rise at a calibrated pace as the pace of legacy recovery slows. ECL transition will further drive some uptick in provisioning, though the impact will be largely manageable given healthy PCR across banks.
- The benign SMA book and contained slippages signal limited incremental stress, thus providing visibility on stable asset quality. With improved underwriting, higher accountability, and strong and transparent governance, we believe that PSBs are well positioned to navigate through a downturn now, should one come in the future.
- Stronger capital positions, cleaner balance sheets and prudent provisioning make PSBs far more resilient, and we thus believe that cyclicality in earnings and asset quality will not be as severe now compared to previous downtrends.

Exhibit 36: GNPA ratio contracted to 2.8% in FY25; expected to decline to 2.3% by FY27

Exhibit 46: Agri NPA too has eased in FY25

Source: MOFSL, Company

Recoveries from TWO pool to remain healthy until FY27E

Benign SMA book augurs well for asset quality

- The asset quality of PSBs has improved steadily, supported by healthy underwriting and continued recovery from the TWO pool. Recoveries from several large legacy NPAs such as Bhushan Steel, Essar, and IL&FS-linked exposures have already been realized, reducing the stock of high-value stressed assets, though the AUCA/TWO pool still stands elevated at 2.6-5% of assets, providing a strong recovery buffer going forward.
- Recoveries from the written-off pool, which provide significant support to profitability, are expected to moderate but remain healthy until FY27E (until FY28E for PNB).
- Healthy upgrades, contained SMA book, and improved underwriting should drive further improvement in asset quality ratios and keep credit costs benign for PSBs.

Exhibit 47: SMA mix across banks as of 1QFY26

| SMA (bp of loans) | SMA 0 | SMA 1 | SMA 2 |
|-------------------|-------|-------|-------|
| ВОВ | NA | 40 | bp |

Capitalization levels healthy; becoming self-sustaining growth engines

PSBs set to lower Government holding with public float likely to cross 25% by 2026

- Over the past five years, PSBs have significantly strengthened their CET-1 ratios, rising from 9.4%-11.8% in FY20 to 11%-15.3% by 1QFY26, driven by strong internal accruals and capital raises from the market.
- This capital cushion, complemented by robust profitability, improved asset quality, and disciplined underwriting, has enabled steady credit growth for PSBs while containing risks.
- While earlier capital infusions under the 4R (Recognition, Resolution, Recapitalization, and Reforms) helped repair their balance sheets, the focus has now shifted to becoming self-sustained institutions with all-round progress.
- Leading PSBs like SBIN, PNB, CBK and UNBK have successfully tapped equity markets via QIPs to raise capital and bolster CET-1 ratio to ensure long-term sustainable growth. This has enabled steady improvement in CAR across PSBs, which is now healthy at 15-18% for our six coverage PSBs.
- All our coverage PSBs now have a public float of >25%, while select PSBs still need to dilute government holding by Aug'26 to comply with minimum promoter shareholding norms.

Exhibit 52: Capital positions of PSBs have improved significantly; many PSBs have successfully raised capital from markets

Valuation & view: Resetting to new profitability normal

PSU Bank Index has delivered 22%/6% returns in past 6mths/12mths

PSBs have undergone a powerful re-rating over the past five years, shedding their legacy image of lenders saddled with bad loans and operational inefficiency to emerge as competitive financial players that are creating consistent value for their stakeholders, aided by improved financial performance and profitability profiles. The aggregate market capitalization of PSBs has surged nearly 5x since FY20. We note that the PSU Bank Index has outperformed the Nifty Bank and Nifty-50 over the past 12 months (1%/8%) and six months (9%/11%).

- Despite healthy performance, PSBs continue to trade at reasonable valuations, as most of our coverage PSBs trade at 0.8-1x forward P/B and 5-7x on FY27E EPS.
 This is despite PSBs delivering steady profitability with RoE of 18-19% and sustainable RoA of 1%+.
- Near-term earnings growth may remain soft due to margin pressure and modest business growth; however, the structural improvements in asset quality, capital strength, digital adoption, and operating efficiency have fundamentally reshaped the sector.
- Legacy concerns around governance, transparency and state ownership are increasingly losing relevance as PSBs demonstrate improved execution, stronger balance sheets, and more sustainable earnings performance, reflecting in rising investor confidence.
- Several PSBs have raised capital from the market and are thus well poised to benefit from any revival in corporate demand, further aided by lower GST and direct tax rates. RAM segments remain the key growth driver, and we expect PSBs to maintain steady growth, backed by healthy margins as the asset mix continues to improve, while funding costs recede.
- We believe PSBs are well placed for steady performance as valuations appear reasonable despite healthy earnings and growth outlook and improving operational efficiency at these banks.
- Stronger capital positions, cleaner balance sheets and prudent provisioning level make PSBs far more resilient. We believe that cyclicality in earnings and asset quality will not be as severe now compared to previous downtrends, and this needs to be reflected in valuation multiples.
 - Our preferred ideas are SBIN and PNB Among mid-size names, we prefer INBK given its superior return ratios. We have downgraded BOB and UNBK to Neutral in prior quarters.

The following Disclosures are being made in compliance with the SEBI Research Analyst Regulations 2014 (herein after referred to as the Regulations).

Motilal Oswal Financial Services Ltd. (MOFSL) is a SEBI Registered Research Analyst having registration no. INH000000412 and BSE enlistment no. 5028. MOFSL, the Research Entity (RE) as defined in the Regulations, is engaged in the business of providing Stock broking services, Depository participant services & distribution of various financial products. MOFSL is a listed public company, the details in respect of which are available on www.motilaloswal.com. MOFSL is registered with the Securities & Exchange Board of India (SEBI) and is a registered Trading Member with National Stock Exchange of India Ltd. (NSE) and Bombay Stock Exchange Limited (BSE), Multi Commodity Exchange of India Limited (MCX) and National Commodity & Derivatives Exchange Limited (NCDEX) for its stock broking activities & is Depository participant with Central Depository Services Limited (CDSL) National Securities Depository Limited (NSDL), NERL, COMRIS and CCRL and is member of Association of Mutual Funds of India (AMFI) for distribution of financial products and Insurance Regulatory & Development Authority of India (IRDA) as Corporate Agent for insurance products and is a member of Association of Portfolio Managers in India (APMI) for distribution of PMS products. Details of associate entities of Motilal Oswal Financial Services Ltd. are available on the website at http://onlinereports.motilaloswal.com/Dormant/documents/Associate%20Details.pdf

MOFSL and its associate company(ies), their directors and Research Analyst and their relatives may; (a) from time to time, have a long or short position in, act as principal in, and buy or sell the securities or derivatives thereof of companies mentioned herein. (b) be engaged in any other transaction involving such securities and earn brokerage or other compensation or act as a market maker in the financial instruments of the company(ies) discussed herein or act as an advisor or lender/borrower to such company(ies) or may have any other potential conflict of interests with respect to any recommendation and other related information and opinions.; however the same shall have no bearing whatsoever on the specific recommendations made by the analyst(s), as the recommendations made by the analyst(s) are completely independent of the views of the associates of MOFSL even though there might exist an inherent conflict of interest in some of the stocks mentioned in the research report.

MOFSL and / or its affiliates do and seek to do business including investment banking with companies covered in its research reports. As a result, the recipients of this report should be aware that MOFSL may have a potential conflict of interest that may affect the objectivity of this report. Compensation of Research Analysts is not based on any specific merchant banking, investment banking or brokerage service transactions. Details of pending Enquiry Proceedings of Motilal Oswal Financial Services Limited are available on the website at $\underline{https://galaxy.motilaloswal.com/ResearchAnalyst/PublishViewLitigation.aspx}$

A graph of daily closing prices of securities is available at www.nseindia.com, www.bseindia.com_Research Analyst views on Subject Company may vary based on Fundamental research and Technical Research. Proprietary trading desk of MOFSL or its associates maintains arm's length distance with Research Team as all the activities are segregated from MOFSL research activity and therefore it can have an independent view with regards to Subject Company for which Research Team have expressed their views.

Regional Disclosures (outside India)

This report is not directed or intended for distribution to or use by any person or entity resident in a state, country or any jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject MOFSL & its group companies to registration or licensing requirements within such jurisdictions.

For Hong Kong: This report is distributed in Hong Kong by Motilal Oswal capital Markets (Hong Kong) Private Limited, a licensed corporation (CE AYY-301) licensed and regulated by the Hong Kong Securities and Futures Commission (SFC) pursuant to the Securities and Futures Ordinance (Chapter 571 of the Laws of Hong Kong) "SFO". As per SEBI (Research Analyst Regulations) 2014 Motifal Oswal Securities (SEBI Reg. No. INH00000412) has an agreement with Motilal Oswal capital Markets (Hong Kong) Private Limited for distribution of research report in Hong Kong. This report is intended for distribution only to "Professional Investors" as defined in Part I of Schedule 1 to SFO. Any investment or investment activity to which this document relates is only available to professional investor and will be engaged only with professional investors." Nothing here is an offer or solicitation of these securities, products and services in any jurisdiction where their offer or sale is not qualified or exempt from registration. The Indian Analyst(s) who compile this report is/are not located in Hong Kong & are not conducting Research Analysis in Hong Kong.

For Ú.S. Motilal Oswal Financial Services Limited (MOFSL) is not a registered broker - dealer under the U.S. Securities Exchange Act of 1934, as amended (the "1934 act") and under applicable state laws in the United States. In addition MOFSL is not a registered investment adviser under the U.S. Investment Advisers Act of 1940, as amended (the "Advisers Act" and together with the 1934 Act, the "Acts), and under applicable state laws in the United States. Accordingly, in the absence of specific exemption under the Acts, any brokerage and investment services provided by MOFSL, including the products and services described herein are not available to or intended for U.S. persons. This report is intended for distribution only to "Major Institutional Investors" as defined by Rule 15a-6(b)(4) of the Exchange Act and interpretations thereof by SEC (henceforth referred to as "major institutional investors"). This document must not be acted on or relied on by persons who are not major institutional investors. Any investment or investment activity to which this document relates is only available to major institutional investors and will be engaged in only with major institutional investors. In reliance on the exemption from registration provided by Rule 15a-6 of the U.S. Securities Exchange Act of 1934, as amended (the "Exchange Act") and interpretations thereof by the U.S. Securities and Exchange Commission ("SEC") in order to conduct business with Institutional Investors based in the U.S., MOFSL has entered into a chaperoning agreement with a U.S. registered broker-dealer, Motilal Oswal Securities International Private Limited. ("MOSIPL"). Any business interaction pursuant to this report will have to be executed within the provisions of this chaperoning agreement.

The Research Analysts contributing to the report may not be registered /qualified as research analyst with FINRA. Such research analyst may not be associated persons of the U.S. registered broker-dealer, MOSIPL, and therefore, may not be subject to NASD rule 2711 and NYSE Rule 472 restrictions on communication with a subject company, public appearances and trading securities held by a research

For Singapore

In Singapore, this report is being distributed by Motilal Oswal Capital Markets (Singapore) Pte. Ltd. ("MOCMSPL") (UEN 201129401Z), which is a holder of a capital markets services license and an exempt financial adviser in Singapore. This report is distributed solely to persons who (a) qualify as "institutional investors" as defined in section 4A(1)(c) of the Securities and Futures Act of Singapore ("SFA") or (b) are considered "accredited investors" as defined in section 2(1) of the Financial Advisers Regulations of Singapore read with section 4A(1)(a) of the SFA. Accordingly, if a recipient is neither an "institutional investor" nor an "accredited investor", they must immediately discontinue any use of this Report and inform MOCMSPL
