

Margin Recovery Still Distant

Est. Vs. Actual for Q2FY26: Revenue: Largely INLINE; EBITDA: MISS; PAT: MISS

Change in Estimates post Q2FY26

FY26E/FY27E: Revenue: 1%/1%; EBITDA: -37%/-21%; PAT: -121%/-21%

Recommendation Rationale

- Accelerating Growth in the Blends Segment: The Blends division reported a healthy
 performance across major markets, led by strong traction in the CFS Vitafor portfolio.
 Segment revenue increased 6% YoY to Rs 239 Cr (vs Rs 226 Cr in Q2FY25). Management
 remains optimistic about the division's growth prospects, projecting a ~20% CAGR over the
 next 2–3 years, supported by network expansion, deeper geographic reach, improved order
 visibility, and potential inorganic opportunities.
- Healthy Volume Growth in Vanillin; Realisations Under Pressure: Vanillin revenues grew 41% QoQ, driven by a strong 35% increase in volumes, while realisations remained under pressure. The segment reported revenue of Rs 79 Cr in Q2FY26, supported by steady customer demand despite inventory overhang and tariff-related challenges. Management expects Vanillin volumes to sustain their upward momentum, with margin recovery anticipated as pricing and tariff pressures normalise.
- Outlook for H2FY26 Margin Recovery and Strategic Expansion: The company remains
 focused on margin recovery through a higher contribution from value-added blends and
 aroma ingredients. Growth in H2FY26 is expected to be driven by continued momentum in
 the Blends segment, deeper penetration across key international markets, and gradual
 realisation recovery in Vanillin once tariff conditions stabilise.

Sector Outlook: Cautiously Optimistic

Company Outlook & Guidance: Management reiterated confidence in achieving 20% annual growth in the Blends business, projecting FY26 revenue in the range of Rs 2,000–2,100 Cr. For FY27, Vanillin sales volumes are expected to reach ~4,000 tonnes, while Blends revenue is anticipated to sustain ~20% growth. The Aroma business is likely to progressively ramp up capacity utilisation to full levels over the next two years. EBITDA margins are guided to expand meaningfully in the coming quarters, supported by operating leverage and improved efficiencies.

Current Valuation: 20x Sept'27E (Earlier: 20x FY27E)

Current TP: Rs 195/share (Earlier TP: 215/share)

Recommendation: We maintain our HOLD rating on the stock.

Financial Performance: CFS reported revenue of Rs 460 Cr in Q2FY26, up 9% YoY and QoQ, broadly in line with our estimate of Rs 448 Cr. EBITDA stood at Rs 33 Cr, down 23% YoY but up 76% QoQ, below our estimate of Rs 42 Cr due to higher-than-expected employee and other expenses. EBITDA margin contracted 296 bps YoY but improved 277 bps QoQ to 7.3%. The company reported a net loss of Rs 14 Cr after accounting for discontinued operations.

Outlook: Post the closure of its European and Chinese facilities, the company has refocused on driving cost efficiency and sustainable growth across core businesses. Margin improvement is anticipated as discontinued losses subside and key segments ramp up. Capacity utilisation in Vanillin continues to improve with rising volumes; however, elevated tariffs in the US are keeping realisations subdued, potentially restricting near-term profitability expansion.

Valuation & Recommendation: We have rolled forward our estimates to FY28E and value the stock at 20x Sept'27E, factoring in improved profitability from a higher contribution of high-margin Blends, healthy Vanillin volume growth, and operating leverage benefits. Our revised target price stands at Rs 195/share (earlier Rs 215/share), implying a 4% upside from the CMP. Accordingly, we maintain our HOLD rating on the stock, reflecting a balanced risk-reward profile amid ongoing operational transition and medium-term margin recovery potential.

Key Concall Highlights

- Performance Overview: Camlin Fine Sciences (CFS) reported revenue of Rs 460 Cr in Q2FY26, up 9% YoY and QoQ. Growth in the Specialty Ingredients (Straights) segment was partially offset by muted demand amid increased domestic competition. Gross margins were impacted by softer realizations, though EBITDA margin improved to 7.3% (vs. 4.5% in Q1FY26) on higher Blends volumes. Sequential rise in employee costs reflected continued investments in expanding the Blends marketing network, which is expected to support growth in the coming quarters. Losses from continuing operations narrowed sharply to Rs 0.1 Cr (vs. Rs 4 Cr in Q1FY26), highlighting operational improvement. Net debt remained stable at Rs 520 Cr, with the Blends division sustaining its position as the key growth driver.
- Closure of Europe and China Units: The company has discontinued operations at its European Diphenol and Chinese facilities.
 Losses from these entities have reduced to Rs 5–6 Cr per quarter, with total FY26 loss from Europe estimated at Rs 25 Cr, tapering to ~Rs 2 Cr per quarter in FY27 for maintenance. Losses from the China facility are expected to be fully absorbed by the end of FY26.
- Blends Segment: The Blends division delivered a 6% YoY revenue increase to Rs 239 Cr, driven by strong traction in the CFS Vitafor portfolio, which contributed Rs 40 Cr during the quarter. Management reiterated a ~20% CAGR growth outlook over the next 2–3 years, supported by an expanding market presence, deeper geographic reach, and inorganic growth opportunities. The upcoming acquisition of Vinpai, a French specialty ingredients company, is expected to strengthen the segment's portfolio and international footprint.
- Acquisition Update Vinpai (France): CFS is in the final stages of acquiring a majority stake in Vinpai, with the deal expected to close by end-November. Vinpai currently operates at a monthly revenue run-rate exceeding €1 Mn and is projected to contribute positively to consolidated financials from H2FY26 onward.
- Aroma & Vanillin Business: Capacity utilisation in the Aroma/Vanillin segment stood at 50–55%. Production cost currently averages US\$9–9.5/kg, expected to decline to ~US\$8/kg at full capacity, supporting margin expansion. The segment reported revenue of Rs 79 Cr, up 41% QoQ, driven by a 35% sequential volume increase despite lingering channel inventory and tariff-related pressures in the U.S. and Europe. Realizations remained under pressure, though normalization is anticipated by Q4FY26 in the U.S. and Q1FY27 in Europe. Blended realizations averaged US\$12/kg during Q2, with H1FY26 sales volumes of ~1,300 tonnes. The company targets FY26 sales volumes of 2,500–3,000 tonnes (1,800–2,000 tonnes from the U.S. and Europe) and expects FY27 volumes to reach ~4,000 tonnes. Retail Vanillin prices in the U.S. remain around US\$19/kg (pre-tariff).
- Vitafor: The CFS Vitafor portfolio continued to demonstrate strong momentum, with revenue rising to Rs 40 Cr in Q2FY26 (vs. Rs 28 Cr in Q1FY26), reflecting healthy demand trends and ongoing success in market expansion initiatives.

Key Risks to Our Estimates and TP

- Slowdown in demand for key products and delays in approvals from customers may lead to slower ramp-up.
- Adverse outcomes of global trade negotiations may adversely impact the demand/prices of key products.
- · Faster-than-expected ramp-up of facilities or surge in prices of key products may pose upside risks to our estimates.
