Technical Snapshot

BUY NATURALGAS JUL @ 167 SL 163 TGT 172-176. MCX

Observations

Naturalgas trading range for the day is 160.4-189.8.

Natural gas eased on forecasts for less hot weather over the next two weeks than previously expected.

Prices were also weighed down by the persistent oversupply of gas still in storage versus normal for this time of year.

Gas output in the Lower 48 U.S. states rose to an average of 102.1 bcf/d so far in July.

Meteorologists projected weather across the Lower 48 states would remain mostly near normal through July 24

News you can Use

Growth in British construction activity slowed in June as house-building declined, according to a survey that showed a slowdown in new orders as some firms took a wait-and-see approach to Britain's July 4 election. The S&P Global UK Construction Purchasing Managers' Index fell to 52.2 in June from 54.7 in May, below the median forecast of 53.6 in a Reuters poll of economists but still above the 50 threshold for growth. S&P Global said the slowdown in part reflected firms' uncertainty ahead of Britain's national election in which the opposition Labour Party is widely expected to win by a landslide, according to opinion polls. New orders continued to grow, but the increase was the slowest since February. Activity in commercial construction and civil engineering rose, but Thursday's survey showed a renewed fall in residential building work. Firms reported an increase in employment, with the rate of job creation the fastest since August last year. The Bank of England - which held interest rates at a 16-year high of 5.25% last month - is closely monitoring wage growth and services costs as it considers cutting interest rates this year. S&P said the cost of some raw materials ticked up last month, though pressure on supply chains eased.

German industrial orders fell unexpectedly in May, a fifth consecutive drop that adds to signs that manufacturing in Europe's largest economy will not recover in the coming months. Orders were down by 1.6% on the previous month on a seasonally and calendar-adjusted basis, the federal statistics office said. Excluding large-scale orders, new orders fell by 2.2% in May compared with the previous month. The three-month comparison showed orders from March to May were 6.2% lower than the previous three months, due in part to a large-scale order. PMI data for manufacturing in June showed a continued downturn in the sector, which accounts for about a fifth of the German economy, while Ifo's latest business climate index showed manufacturers were sceptical about the months ahead. The ongoing decline in orders, along with a deterioration in business expectations, points to a subdued industrial economy in the coming months, the German economy ministry said. "Incoming orders are only likely to stabilise as global trade continues to recover and demand for industrial products gradually picks up," the ministry said about the data.
