Gold rose as easing market stress reduced liquidation pressure on the metal and weighed on the dollar after U.S. President Donald Trump extended the ceasefire with Iran, giving a boost to riskier assets. Trump said he would indefinitely extend the ceasefire with Iran to allow for further peace talks, although it was not clear on Wednesday if Iran or Israel, the United States' ally in the two-month-old war, would agree. Federal Reserve chief nominee Kevin Warsh said he had made no promises to Trump about cutting interest rates, as he tried to assure U.S. senators considering his confirmation that he would act independently of the White House while pursuing broad reforms. Meanwhile, strong US economic data further reduced safe-haven demand: retail sales surged 1.7% in March, beating expectations of 1.4%, with broad-based gains across nearly all categories, likely buoyed by larger-than-usual tax refunds.

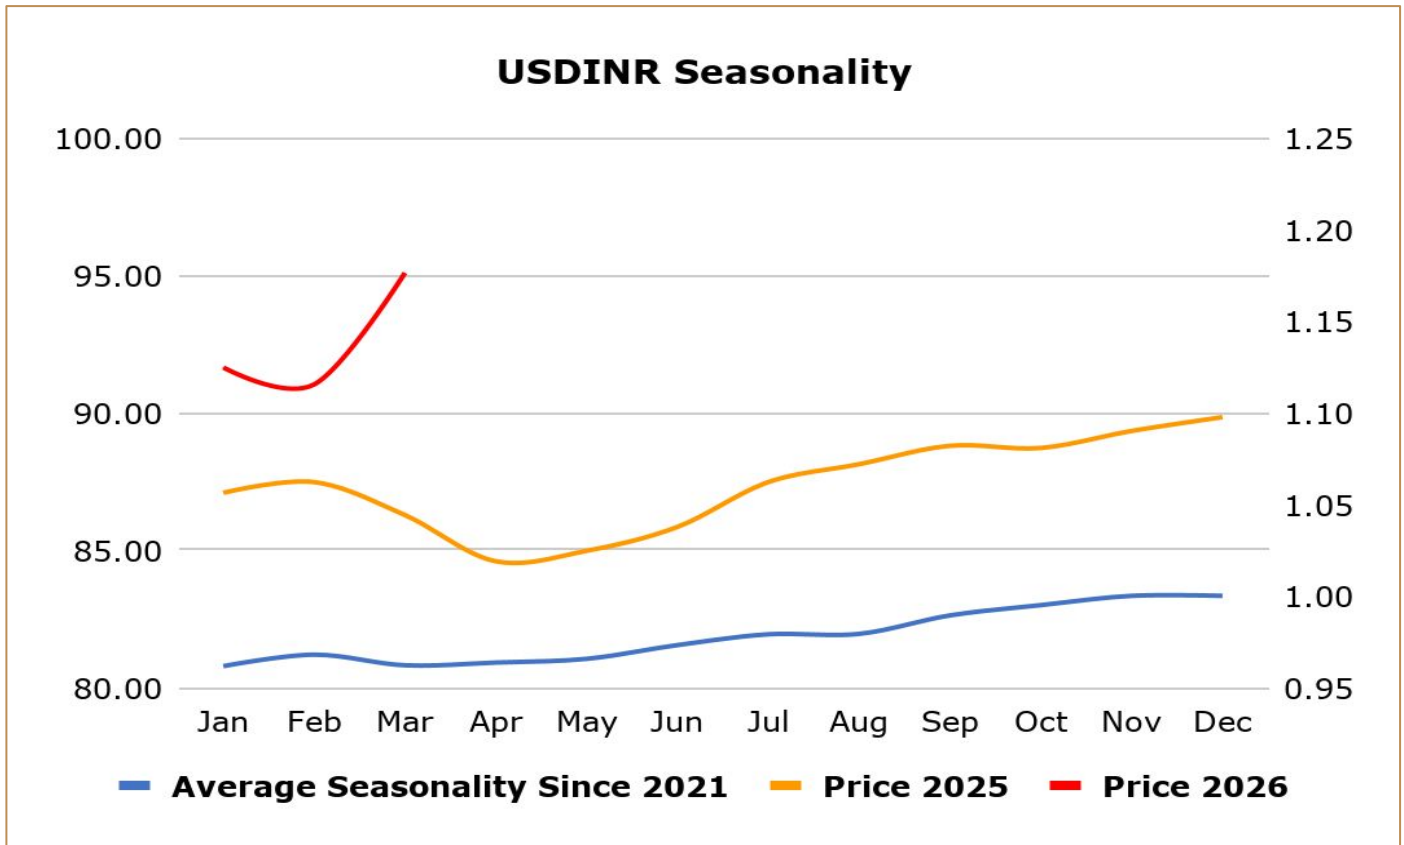

India gold demand lacklustre as elevated prices curb festive buying - Gold demand in India was modest, as high domestic prices weighed on retail purchases ahead of the key Akshaya Tritiya festival weekend, while premiums in China held steady. Dealers quoted discounts of up to \$4 an ounce and though some quoted premiums of \$14 an ounce over official domestic prices helped by festival-related demand, compared with last week's discounts of up to \$6 an ounce and premiums of \$9. Indian banks have halted gold and silver import orders from overseas suppliers, with tons of the metals stuck at customs as a formal government order has not been issued authorising bullion imports. In top consumer China, bullion traded at premiums of \$3 to \$6 an ounce over the global benchmark price this week, little changed from last week's premiums of \$3 to \$5. Chinese premiums have slipped to just \$3 amid weak demand. In Hong Kong, physical gold traded at par to premiums of \$2, while in Japan, gold was sold at par with spot prices. In Singapore, gold was sold at premiums of \$1 to \$3, the same as last week.

India gems and jewellery exports fall to five – year low on US tariffs: India's gems and jewellery exports in the 2025/26 fiscal year dipped 3.3% from a year earlier to their lowest level in five years, as shipments to top buyer the U.S. nearly halved, a leading trade body said, reflecting the impact of tariffs and duties. Gem and jewellery exports in the year to the end of March fell to \$27.72 billion, the lowest since 2020/21, when pandemic-led lockdowns disrupted trade, and down from \$28.7 billion in the previous year, the Gem and Jewellery Export Promotion Council (GJEPC) said in a statement. Shipments to the U.S. fell 45% from a year earlier to \$5.09 billion, as exports were disrupted for several months after Washington imposed reciprocal tariffs and later added a further 25% duty on Indian goods, GJEPC data showed. Cut and polished diamond exports, which usually account for nearly half of overall gem and jewellery shipments, fell 8.5% year-on-year to \$12.16 billion, the lowest in more than two decades, the GJEPC said.

Gold exports from Switzerland up 30% m/m in March as deliveries to UK jump - Gold exports from Switzerland rose 30% month-on-month in March, as shipments to Britain jumped to their highest since December and supplies to China, a major bullion consumer, increased by 18%, Swiss customs data showed. Deliveries from Switzerland, the world's biggest bullion refining and transit hub, to the UK rose to 57.6 metric tons last month from 19.8 tons in February, as gold kept coming back from the U.S. after last year's outflows. Supplies to India, another major bullion consumer, fell to 3.1 tons in March from 11.6 tons amid subdued local demand.

China's January net gold imports via Hong Kong rose almost 69% from December - China's net gold imports via Hong Kong in January rose by 68.7% from December, Hong Kong Census and Statistics Department data. The world's top gold consumer imported a net 20.585 metric tons in January, up from 12.205 tons in December, the data showed. The Hong Kong data may not provide a complete picture of Chinese purchases because gold is also imported via Shanghai and Beijing. China's total gold imports via Hong Kong reached 36.544 tons in January, up 30.4% from December's 28.014 tons. Physical gold in China traded at premiums of \$12-\$13 an ounce above the global benchmark spot price this week as bullion's safe-haven appeal shone through after markets returned from the Lunar New Year holiday. Meanwhile, China's central bank extended its gold buying spree for a 15th month in January, data from the People's Bank of China (PBOC) showed this month.
