Gold held steady as investors anticipated new signals from several Fed officials due to speak this week, seeking clearer insights into the potential timeline for rate cuts. Minneapolis Fed President Neel Kashkari said that due to stalled inflation, the US central bank may need to keep borrowing costs unchanged for an extended period, possibly throughout the year, particularly given the strength of the housing market. Markets now show a 65% chance of a rate cut in September, per CME's FedWatch Tool.

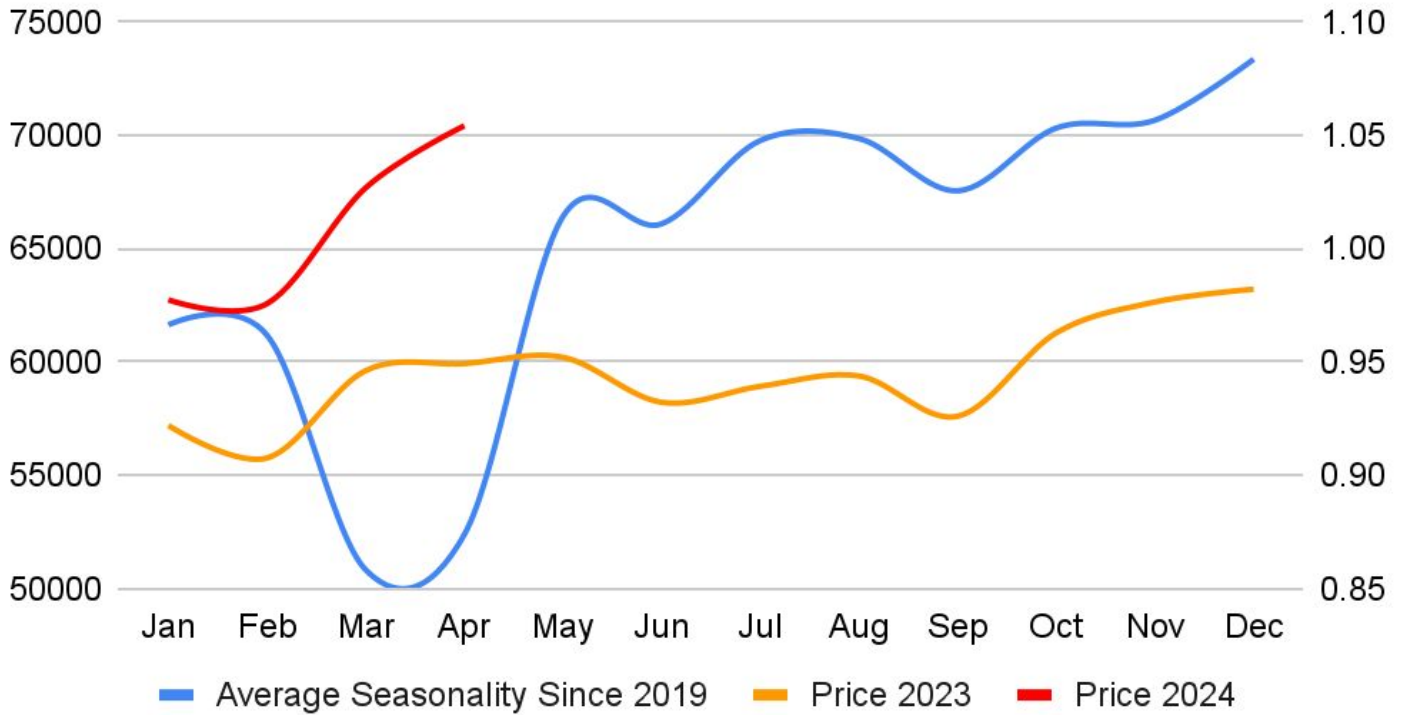

Asia Gold Demand subdued in top-consumers India, China despite price drop - Physical gold demand in India remained subdued despite a slight correction in prices as buyers awaited an even bigger drop, while Chinese premiums slipped for the second straight week due to sluggish holiday demand. Indian dealers charged a premium of up to \$1 an ounce over official domestic prices, versus last week's premium of \$5. In China, dealers charged premiums of \$18-\$20 per ounce over benchmark prices, down from the \$20-\$35 premiums seen last week. In Singapore, bullion was sold at anywhere between at par to \$2 premiums, while dealers charged at par to \$2.25 premiums in Hong Kong. In Japan, dealers sold gold at \$0.5-\$0.75 premiums, slightly lower than the last week's range.

China's March net gold imports via Hong Kong up 40% from Feb - China's net gold imports via Hong Kong jumped 40% in March from the previous month, Hong Kong Census and Statistics Department data showed. Net imports into the world's top gold consumer stood at 55.836 metric tons in March, compared with 39.826 tons in February, the data showed. China's central bank added 160,000 troy ounces of gold to its reserves in March, it said this month. China held 72.74 million ounces of gold at the end of March, from 72.58 million ounces in February. Total gold imports via Hong Kong were up about 40.2% at 63.499 tons.

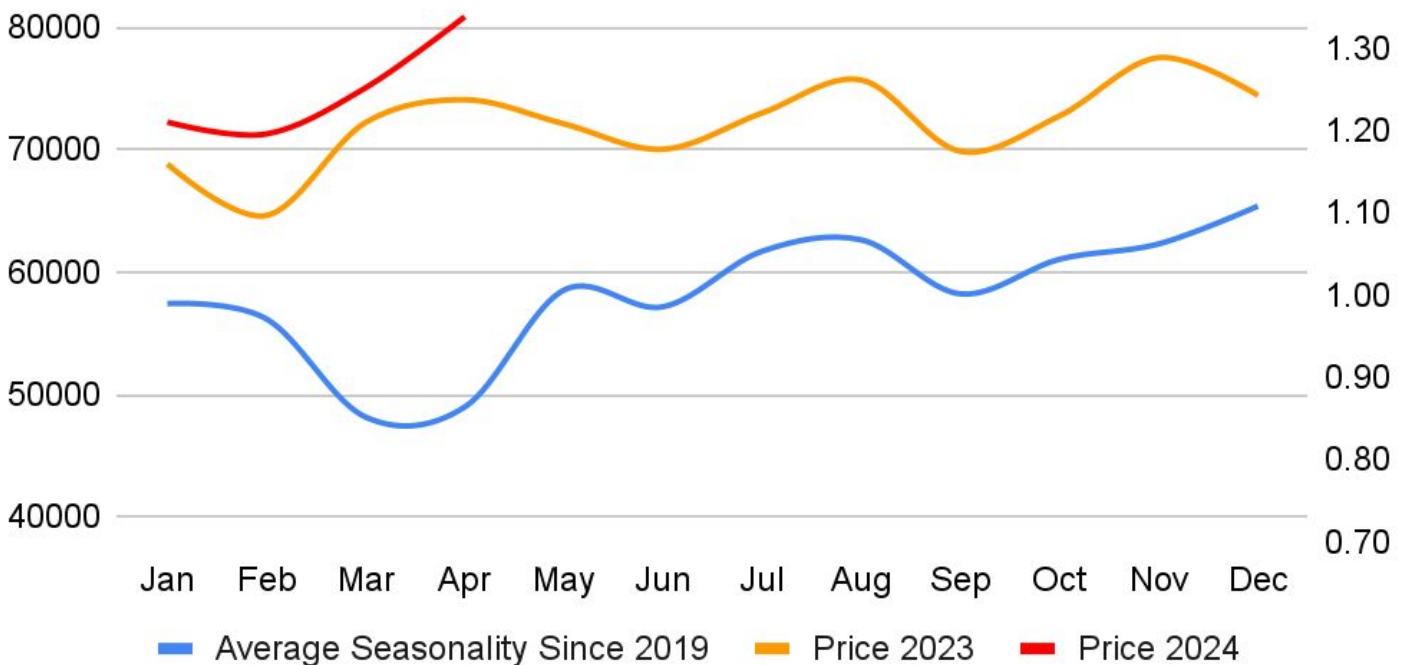

China PBOC Buys Gold for 17th Month as Prices Hit Record - China's central bank purchased gold for its reserves for a 17th consecutive month in March, extending a buying spree that has helped the precious metal surge to a record. The People's Bank of China's gold held rose 0.2% to 72.74 million troy ounces, the smallest increase in the run of monthly purchases since November 2022. Gold has been on a tear in the past two months, hitting records on expectations of lower US interest rates. China's official reserve assets rose to the highest since November 2015, and foreign exchange reserves rose to \$3.2457 trillion.

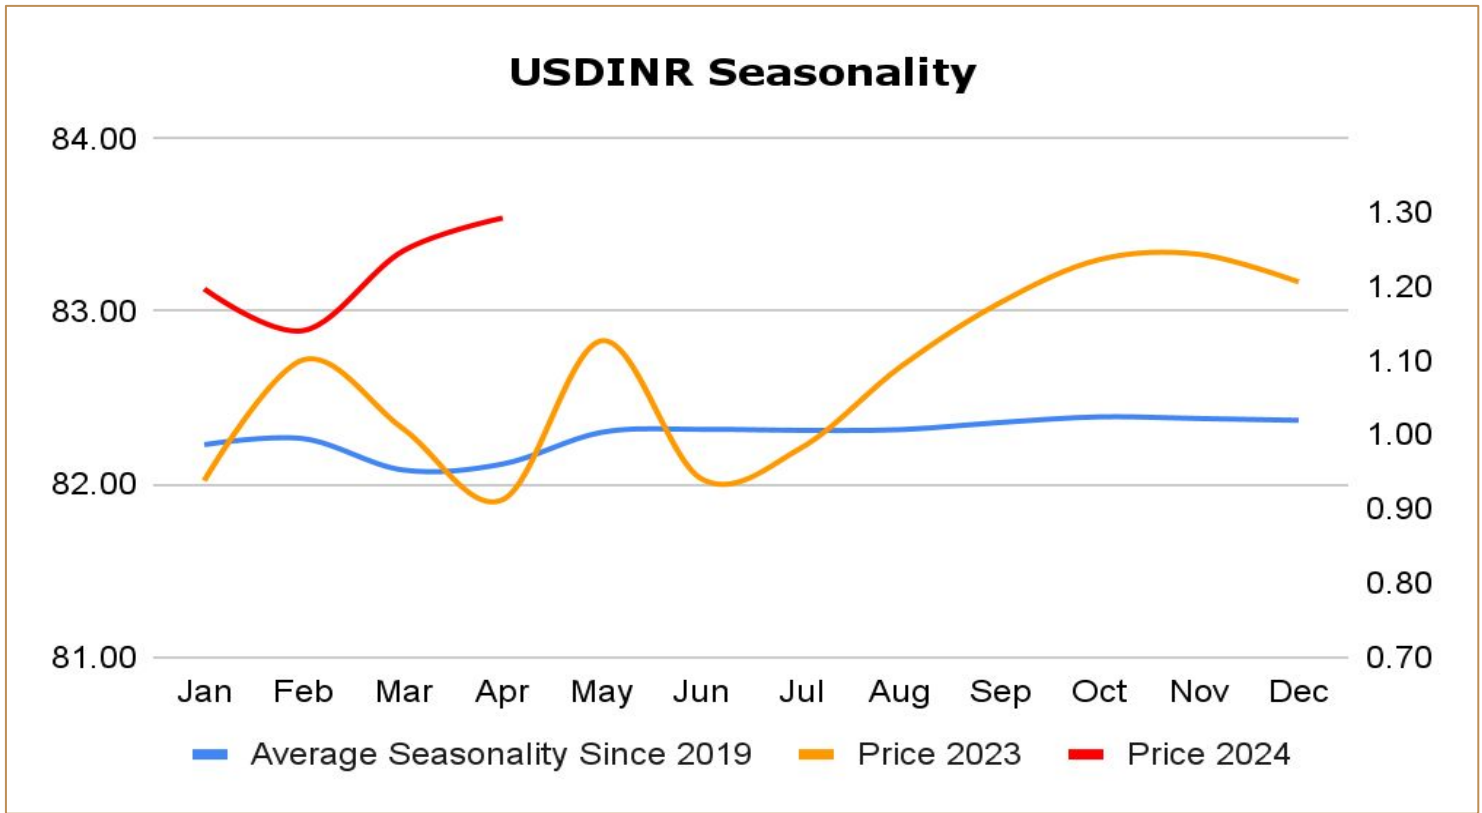

India's March gold imports set to drop 90% as prices surge - India's gold imports are set to plunge by more than 90% in March from the previous month to hit their lowest level since the COVID pandemic as banks cut imports after record-high prices hit demand. Lower imports by India, could limit a rally in global prices that hit a record high earlier this month on expectations that the Federal Reserve will cut interest rates this year. India's gold imports are likely to fall to 10 to 11 metric tons in March from 110 metric tons in February, said a government official. Gold imports in March 2024 are expected to be the lowest since the COVID pandemic, when air traffic restrictions limited imports and lockdowns led to the closure of jewellery shops.
