Technical Snapshot

SELL GOLD AUG @ 99700 SL 100100 TGT 99200-98800. MCX

Observations

Gold trading range for the day is 98410-101060.

Gold prices dipped as new US trade deals reduced safe-haven demand for the metal.

Trump's "massive" trade pact with Japan sets 15% tariffs, lower than earlier threatened 25% rate.

EU trade talks with the US remain deadlocked, with Brussels preparing retaliation for a possible no-deal outcome.

Focus shifts to next week's Fed meeting, with rates expected to stay unchanged for now.

Observations

Silver trading range for the day is 114385-117265.

Silver drops from record highs as US trade deals spur fresh market optimism

Trump's new US-Japan trade deal imposes a 15% tariff on Japanese exports, boosting market focus.

Indian retail silver investment rose 7% year-on-year in H1 2025, driven by strong price expectations.

Trump's renewed criticism of Fed Chair Powell increased uncertainty around future US monetary policy direction.

Gold dipped pressured by a wave of trade deals that dampened the metal's safe-haven appeal. President Trump announced a "massive" trade deal with Japan, saying the US will impose 15% reciprocal tariffs—lower than the previously threatened 25%—while Japan will open its market to more US goods. The agreement follows similar deals with the Philippines and Indonesia, lifting hopes for further agreements before the August 1 deadline.

Discounts widen in India as elevated prices dull activity - Gold demand in India remained subdued, as near record-high prices kept buyers at bay and prompted dealers to widen discounts to lure them, while elevated rates curtailed activity across other major Asian hubs as well. Indian dealers were offering a discount up to \$10 an ounce over official domestic prices up from the last week's discount of up to \$8. India's gold imports in June fell 40% from a year ago to 21 tons, their lowest level in more than two years, amid sluggish demand. In China, the world's top gold consumer, dealers quoted discounts of \$5 per ounce to \$10 premium on spot rates, down from the premiums of \$10-\$25 charged last week. In Hong Kong, gold was sold at \$1-\$2 premiums, while dealers in Singapore sold gold at par with the global benchmark to a premium of up to \$2.20. In Japan, bullion traded between a \$0.50 discount and a \$1 premium.

India's June gold imports fall to two – year low as record price dents demand - India's gold imports in June fell 40% from a year ago to their lowest level in more than two years, as a price rally to a record high sapped demand, a government and two industry officials told. Imports to India, fell to 21 tons, the lowest since April 2023, said a government official. In value terms, gold imports fell to \$1.84 billion in June from \$2.48 billion a year ago, the official said. In the past decade, on average, India imported 52.4 tons of gold in June. In the first half of 2025, India's gold imports fell 30% from a year ago to 204.1 tons, the lowest since the first half of 2020, when the COVID-19 outbreak led to lockdown, the trade ministry data showed. Silver imports in June nearly doubled from a year ago to 197 tons, but were significantly lower than the 544 tons imported in May, the government official said.

Swiss June gold exports jump 44% month on month as bullion returns to UK - Gold exports from Switzerland jumped 44% month on month in June to the highest level since March as bullion flew back to the vaults in the United Kingdom from the United States via Swiss refineries, Swiss customs data showed. According to the Swiss data, gold exports to the UK jumped to 83.8 metric tons in June, the highest level since August 2019, from 16.0 metric tons in May. Gold worth billions of dollars was delivered to the United States in December-March from Britain, Switzerland and elsewhere as market players sought to cover their Comex positions against the possibility of Washington imposing tariffs on imports of the metal. This risk was removed in April as Washington excluded bullion from President Donald Trump's reciprocal tariffs, prompting the airplanes carrying gold to fly back. The amount of gold held in London vaults rose by 177.8 tons, or by 2.1%, month on month, to 8,776 tonnes in June, according to the London Bullion Market Association. This was the highest level since August 2023.

Gold ETFs drew largest inflow in five years during first half of 2025, WGC says - Physically backed gold exchange-traded funds recorded their largest semi-annual inflow since the first half of 2020 from January to June, data from the World Gold Council showed. The active first half of the year follows a modest net inflow to gold ETFs in 2024 after three years of outflows caused by high interest rates. Gold ETFs recorded an inflow of \$38 billion in the first half of 2025 with their collective holdings rising by 397.1 metric tons of gold, said the WGC, an industry body whose members are global gold miners. This raised the total holdings to 3,615.9 tons by the end of June, the largest since August 2022. Their record was 3,915 tons in October 2020. "Despite slowing momentum in May and June, Asian investors bought a record amount of gold ETFs during the first half of the year, contributing an impressive 28% to net global flows with only 9% of the world's total assets under management," the WGC added.
