FOLLOW US

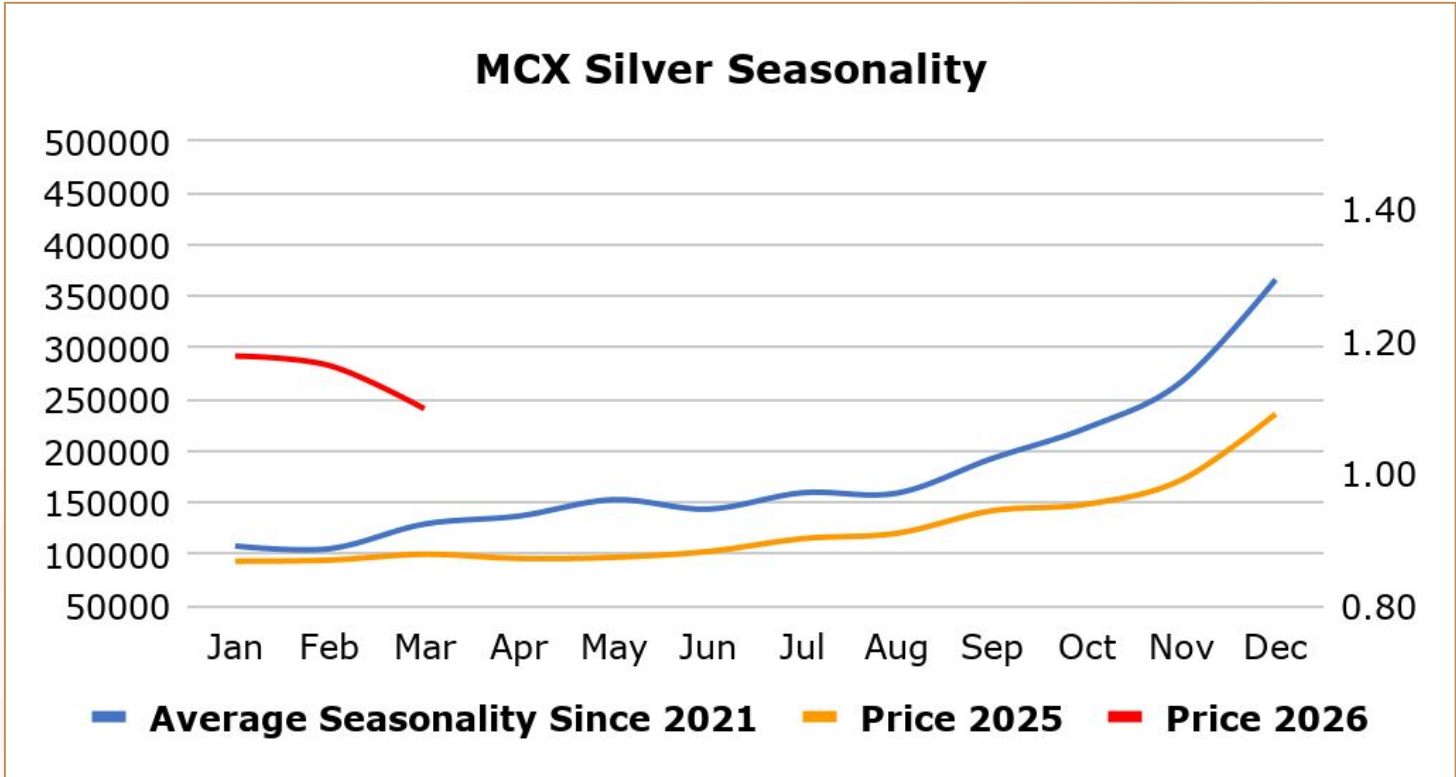

Gold plunged as surging oil prices and stalled US-Iran negotiations intensified inflation concerns ahead of key central bank decisions. A US official revealed that President Donald Trump rejected Iran's latest proposal to resolve the two-month conflict, dimming hopes for a swift resolution to the energy supply disruptions that have fueled inflationary pressures, and, in turn, the likelihood of higher interest rates. While gold is traditionally viewed as an inflation hedge, rising rates diminish its appeal as a non-yielding asset. The US Federal Reserve is expected to hold interest rates at what may be Jerome Powell's final meeting as chair, with investors watching closely for clues on future policy shifts.

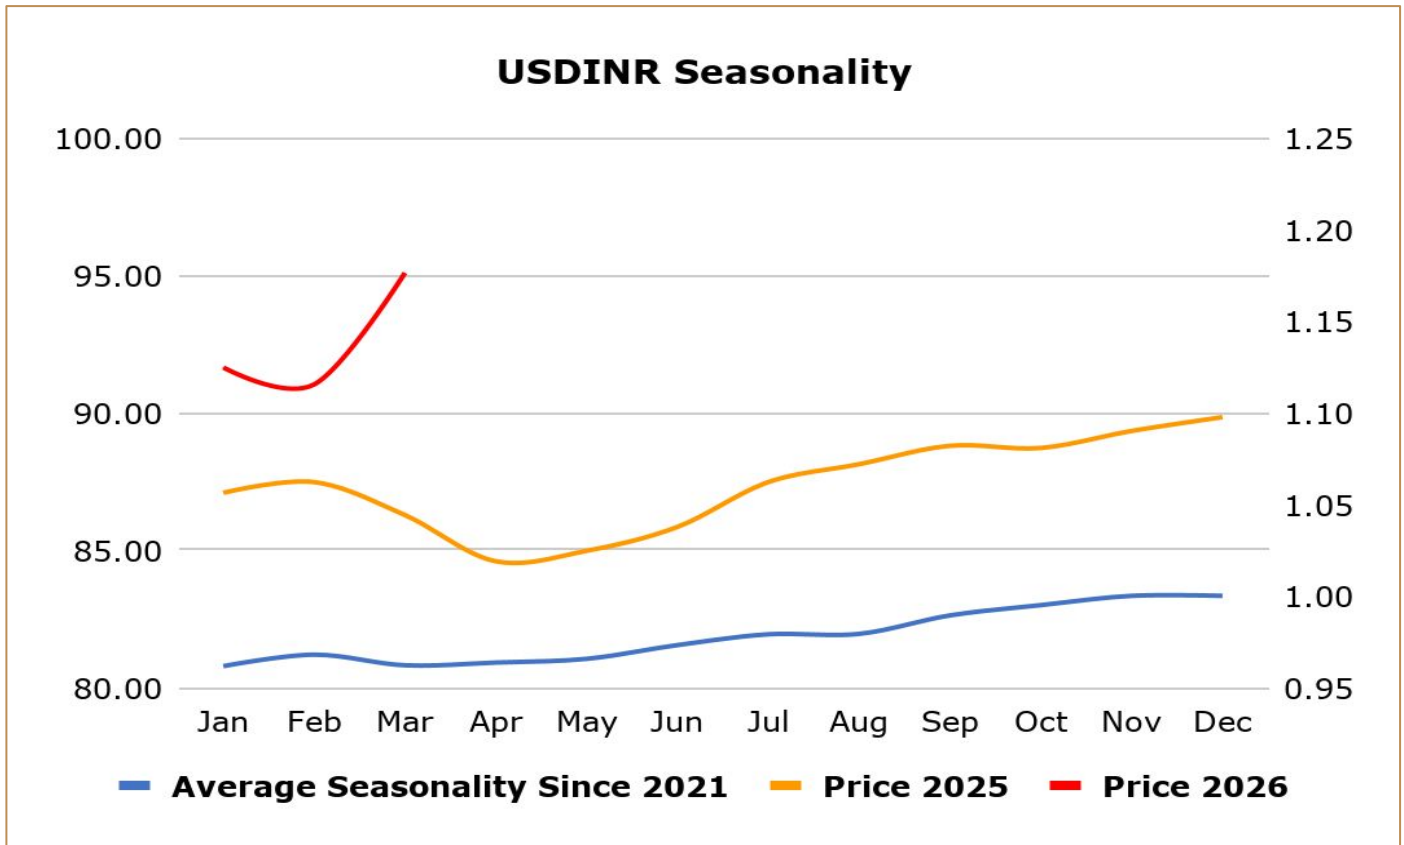

India gold premiums hit over 10 – week high on tight supply; China demand rises - Gold premiums in India climbed to their highest in over two-and-a-half months, as supplies tightened, while buying interest picked up in China. Indian banks were forced to halt gold and silver imports earlier this month after the government delayed an authorisation order, leaving tons of bullion stranded at customs. Dealers quoted premiums of up to \$15 an ounce over official domestic prices, the highest since February 7. Last week, dealers quoted discounts of up to \$4 an ounce and premiums of \$14 an ounce. Indians celebrated Akshaya Tritiya on April 19, when gold purchases are considered auspicious, though demand was weaker than usual. In top consumer China, bullion traded at premiums of \$9 to \$12 an ounce over the global benchmark price, up from last week's premiums of \$3 to \$6. In Hong Kong, physical gold traded at par to premiums of \$1.80, while in Japan, gold was sold at par with spot prices. In Singapore, gold was sold at discounts of \$0.50 to premiums of \$1.80, compared to premiums of \$1 to \$3 last week.

India gems and jewellery exports fall to five – year low on US tariffs: India's gems and jewellery exports in the 2025/26 fiscal year dipped 3.3% from a year earlier to their lowest level in five years, as shipments to top buyer the U.S. nearly halved, a leading trade body said, reflecting the impact of tariffs and duties. Gem and jewellery exports in the year to the end of March fell to \$27.72 billion, the lowest since 2020/21, when pandemic-led lockdowns disrupted trade, and down from \$28.7 billion in the previous year, the Gem and Jewellery Export Promotion Council (GJEPC) said in a statement. Shipments to the U.S. fell 45% from a year earlier to \$5.09 billion, as exports were disrupted for several months after Washington imposed reciprocal tariffs and later added a further 25% duty on Indian goods, GJEPC data showed. Cut and polished diamond exports, which usually account for nearly half of overall gem and jewellery shipments, fell 8.5% year-on-year to \$12.16 billion, the lowest in more than two decades, the GJEPC said.

Gold exports from Switzerland up 30% m/m in March as deliveries to UK jump - Gold exports from Switzerland rose 30% month-on-month in March, as shipments to Britain jumped to their highest since December and supplies to China, a major bullion consumer, increased by 18%, Swiss customs data showed. Deliveries from Switzerland, the world's biggest bullion refining and transit hub, to the UK rose to 57.6 metric tons last month from 19.8 tons in February, as gold kept coming back from the U.S. after last year's outflows. Supplies to India, another major bullion consumer, fell to 3.1 tons in March from 11.6 tons amid subdued local demand.

China's January net gold imports via Hong Kong rose almost 69% from December - China's net gold imports via Hong Kong in January rose by 68.7% from December, Hong Kong Census and Statistics Department data. The world's top gold consumer imported a net 20.585 metric tons in January, up from 12.205 tons in December, the data showed. The Hong Kong data may not provide a complete picture of Chinese purchases because gold is also imported via Shanghai and Beijing. China's total gold imports via Hong Kong reached 36.544 tons in January, up 30.4% from December's 28.014 tons. Physical gold in China traded at premiums of \$12-\$13 an ounce above the global benchmark spot price this week as bullion's safe-haven appeal shone through after markets returned from the Lunar New Year holiday. Meanwhile, China's central bank extended its gold buying spree for a 15th month in January, data from the People's Bank of China (PBOC) showed this month.
