- Middle East tensions intensified after Iran's Islamic Revolutionary Guard Corps reportedly threatened to shut down "all other export corridors that benefit the U.S. and its allies." The warning came after Iran closed the Strait of Hormuz and the U.S. reinstated a naval blockade on Iranian ports.

- Precious metals pared previous session's gains as higher oil prices stoked inflation worries and increased uncertainty over the U.S. interest-rate trajectory, reducing the appeal of non-yielding assets such as bullion.

- Crude oil prices jumped as hostilities in the Middle East worsened, after the U.S. reimposed naval blockade on Iranian ports and Iran threatened to shut down other export routes that support the U.S. and its allies.

- The International Energy Agency reported that global oil supply increased by 4.1 million barrels per day in June, though it remained 9.4 million bpd below pre-war levels. The agency forecasts supply growth of 7.5 million bpd next year following an expected contraction of 3.7 million bpd this year, provided shipping through the Strait of Hormuz improves.

- Total aluminum inventories in LME fell below 300000 tonnes for the first time since 2022.

- China's aluminium exports rose 12.5% to 711000 tonnes in June, reaching a record high. In H1-2026, China's cumulative aluminium exports totaled 3.4 million tonnes, up 16.3% year-on-year.

- The global refined copper market showed a 145000 metric tonnes deficit in April, compared with a 23000 metric tonnes surplus in March, the International Copper Study Group (ICSG) said.

- World refined copper output in April was 2.42 million metric tonnes, while consumption was 2.57 million metric tonnes.

- The U.S. Inflation eased to 3.5% yoy in June, while core inflation also moderated, indicating a further slowdown in underlying price pressures.

- Ghana's Gold Board bought up to 54 metric tonnes of gold from artisanal and small-scale mining (ASM) in the first half of 2026 and output from the sector is on track to match or surpass last year's record.
