Fundamental Actionable Idea

SBI Life Insurance

CMP: ₹ 1,932; TP: ₹ 2,400; 24% Upside; Buy, MTF Stock

- SBI Life Insurance (SBILIFE) has been a consistent compounder with FY20-25 APE CAGR at 15% vs. 6% for the industry (15% YoY in YTD FY26 vs 13% for the industry), supported by an extensive SBI branch network and one of the largest agent bases in the private life insurance industry. We expect the growth trajectory to remain stable at ~15% for FY26-28 as well.
- The gradual shift toward higher-margin products, robust operational efficiency, and rising rider attachments is expected to help in maintaining VNB margin in the range of 26-28%, despite temporary headwinds from the loss of input tax credit. We expect the VNB margin to improve by 50bp YoY each in FY27/28, reaching 28.5% in FY28.
- While the potential implementation of commission caps may disrupt bancassurance economics, posing near-term risks to new business growth and distribution expansion, we expect low impact for SBILIFE, given its commission ratio (~4.8% in 9MFY26) is significantly better than the industry average. The combination of sustained APE growth, stable VNB margins, and disciplined cost management positions SBILIFE to achieve ~18% operating RoEV going forward.

IPCA Labs

CMP: ₹ 1,565; TP: ₹ 1,820; 26% Upside; Buy, MTF Stock

- IPCA is taking multiple initiatives for its domestic formulation (DF) segment, such as cardiology portfolio restructuring, Zerodol franchise strengthening, RA focus within pain management, and entry into high-end cosmo-dermatology, to boost its growth prospects.
- Export outlook would be supported by its strengthening market share in branded markets and a gradual ramp-up in generics exports, led by US relaunches, EU tenders and traction in established markets.
- Unichem integration is underway. Near-term performance remains impacted by competition and pricing pressure, with a gradual recovery expected through API integration and pipeline build-up.
- We expect IPCA to deliver a 13% revenue CAGR over FY26-28, led by robust performance in DF and healthy pick-up in exports. We expect a CAGR of 17%/16% in EBITDA/PAT over FY26-28, led by better operating leverage.
