

Swiggy's Q4FY26 results demonstrated improved execution in the food delivery business, with 22% YoY GOV growth and 30bps adj EBITDA margin expansion. However, QCom growth was weaker than expected (-0.7%/4% QoQ GOV/NOV growth), though contribution margin expanded by 70bps QoQ to -1.8% of GOV. The management has maintained its Q1FY27 contribution margin breakeven target. While Swiggy's QCom business is challenged by increased competitive intensity and weak profitability, its food delivery business continues to see strong traction and margin improvement. We maintain BUY and DCF-based TP of Rs350.

Strong performance in the food delivery business

Food delivery reported strong performance, with 22.6% YoY GOV growth – ahead of the company's 18-20% guidance. Growth was volume-led, with 21% YoY MTU growth, which strengthens conviction on demand durability. Adj EBITDA grew 39.8% YoY to Rs3.0bn, with margin expanding by 30bps QoQ to 3.3% of GOV. Margin expanded despite continued investments in affordability (99-Store, Toing) and speed (Bolt, One BLCK) propositions, validating the shift from discount-led to utility-led growth. Swiggy has further narrowed the profitability gap with Eternal's food delivery business. The near-duopoly market structure should allow Swiggy to compound GOV with expanding margins. We build in ~38% adj EBITDA CAGR over FY26-28E, on the back of ~20% GOV CAGR and 90bps adj EBITDA margin expansion, with the management's medium-term 5% adj EBITDA margin guidance unchanged.

QCom: Currently optimizing for profitability

QCom growth disappointed, as Swiggy reduced discounts and rolled back the no-fee campaign to drive margin improvement. Only 7 dark stores were added (count: 1,143), with the management noting that the existing footprint can support 2x current volumes. The Q1FY27 contribution margin breakeven target is reaffirmed, and Swiggy is targeting Rs1trn NOV and 4-5% adj EBITDA margin in the medium term. We read this as Swiggy prioritizing profitability over growth. We believe growth is likely to re-accelerate once contribution margin breakeven is achieved. With QCom likely consolidating to 2-3 large players over the medium term, scale leadership, along with unit economics, is critical.

Outlook and valuations: QCom optionality riding on food delivery annuity

While Swiggy has catch-up to do with peers in QCom, its food delivery business is seeing strong improvement. We see Swiggy as a strong food delivery franchisee, with an optionality to scale in the QCom business. We maintain BUY and DCF-based TP of Rs350. We value its food delivery business at Rs595bn (Rs215 per share), which implies 31x EV/adjusted EBITDA on FY28E food delivery adjusted EBITDA. Our valuation for the QCom business is Rs175bn (Rs64 per share), which implies 0.52x EV/NOV on FY28E QCom NOV.

Investment thesis

- **Food delivery (high-value duopoly):** Currently, in its monetization phase, this core engine holds immense value, at 30x FY28E EV/adj EBITDA. Stable growth and an entrenched duopoly provide a clear runway for margin expansion, allowing it to close the profitability gap with Eternal.
- **QCom (high-upside optionality):** Despite execution risks, this segment offers massive value-unlock potential. Backed by robust scale and unit economics, superior to all peers except Blinkit, successful execution and margin turnaround will drive significant valuation upside.

Key risks

- Heightened competitive intensity leading to market-share erosion or elevated cash burn.
- Execution failure in approaching QCom profitability milestones.
- Regulatory and labor headwinds.

Key takeaways from the earnings call

QCom

- The management highlighted that its differentiated proposition is going to be assortment-led and not pricing-led. The focus is on the assortment proposition and customer stickiness. The management maintains that these are the only structural ways to retain users, rather than competing on value with players who may be perpetually value-focused.
- Some examples of differentiation in assortment mentioned were in Swiggy's private-label (Noice) products. Products like bread, eggs, high protein eggs, and cookware, with more upcoming categories on the platform, were cited as examples of the assortment-led differentiation approach.
- The management pointed out that its goal with private-label is to build on top of the already wide assortment. Assortment expansion with private label is not a margin play but a differentiation play that will accrete margins as the order frequency goes up (with improving product stickiness) for the private label product portfolio, which itself is

expanding with more categories coming soon. Private-label portfolio is contribution-positive already.

- MTU additions have been the lowest in the last 8 quarters, despite marketing spends remaining at elevated levels (total quarterly indirect expenses of ~Rs7.2bn). The management rationalized this by pointing out that it deliberately churned out the low order-frequency and low-AOV customers while maintaining the retention of high-quality customers through directed marketing spends. The platform has seen a 50% reduction in the share of lower-AOV orders in the order mix. The management also attributed this to higher customer acquisition costs (CAC) in the heightened competitive intensity market structure.
- Dark store network is densified in a serviced polygon when 80-85% utilization levels are hit on the existing network.
- The management aims for 35-50% CAGR in the medium term (3-5 years), which would lead to Rs1trn GOV. However, next up in the trajectory is achieving the contribution margin breakeven. This would provide strength to its financials and allow Swiggy to get back on the growth engine. The company believes geographical and category expansion is going to be key to achieve the Rs1trn GOV mark in the medium term.
- The management reiterated its intent to only go after long-term growth and not aim for short-term low-quality growth with pricing-led propositions. The growth it plans to chase after reaching CM breakeven will follow this strategy as well and, thus, will not be CM-dilutive over the long term.
- The company is able to cater to 80-90% of demand on its platform with its existing fulfilment network.
- Discounting on the platform, which was experimented with in Q3FY26, was lowered in Q4FY26, along with lower subsidies on delivery and other fees. This led to NOV/GOV ratio rising to 72% in Q4FY26 from 69% in Q3FY26. The improvement in consumer-side monetization was attributed to the take rate improvement of 50bps on GOV.
- The top city is operating at 3% CM and already at EBITDA breakeven.
- Capex in FY26 was heightened despite the muted dark store additions, on account of buildout of multiple warehouses in areas that could improve the dark store network's serviceability as well as reduce middle mileage. Capex will moderate from hereon, as the expansionary phase of warehousing investments for geographical footprint is largely complete, while working capital investments are going to be cyclical.

Food Delivery

- Bolt, 99-store, and EatRight come under the food delivery umbrella, while Toing comes under Platform Innovations.
- Despite food delivery being a 10-year-old phenomenon in India, 90% of Indians are not Swiggy users, due to the pricing barrier in the current food delivery market structure. Toing aims to solve the food delivery problem for that cohort, potentially adding a new set of users. It is seen as an experiment. The management commented that it was too early to comment on Toing cannibalizing the parent app's demand.
- The LPG crisis saw ~0.5% average hike by restaurants across offerings on the platform. Swiggy pivoted to finding electric solutions to solve the LPG impact on its last-mile rider network; no specific details were given.
