Gold rose driven by safe-haven demand amid fears of escalating conflict in the Middle East. U.S. private payrolls increased far less than expected in July, but that likely is not a true reflection of a labor market that continues to moderate gradually. The Bank of Japan raised its short-term rate to around 0.25% from its previous range of 0% to 0.1% in an effort to normalize monetary settings.

India flips to premium after import duty reduction spurs demand - Gold premiums in India jumped to their highest level in a decade, as the government's move to cut import duties brought down prices to their lowest level in nearly four months, igniting a surge in demand. In India, the world's second-largest gold consumer and a major importer, dealers charged a premium of up to \$20 an ounce over official domestic prices – their highest level since 2014 – inclusive of 6% import and 3% sales levies. Last week, they were offering a discount up of \$65, the highest in 28 months. In top consumer China, dealers were offering a \$10 discount to \$2 premium an ounce on international spot prices, still hovering around a more than two-year low. This is compared with discounts of up to \$6 offered last week. In Singapore, gold was sold at a discount of \$1 to a premium of \$2.20 per ounce, while in Hong Kong, it was between a discount of \$1 to a premium of \$1.20 per ounce. Dealers in Japan sold gold at \$3 discount to par, as overseas ETF inflows drove the price higher, Tokyo-based traders said.

India's duty cut to revive gold demand after weak June quarter, World Gold Council says - India's gold demand in the June quarter fell 5% from a year ago, but consumption in the second half of 2024 is set to improve due to a correction in local price following a steep reduction in import taxes, the World Gold Council (WGC) said. The recent 9 percentage point reduction in import duty on gold, implemented before the main festival season beginning in September, is expected to revive gold demand, further supported by good monsoon rains. India slashed import duties on gold to 6% from 15%, a move industry officials said could lift retail demand and help cut smuggling. India's gold consumption in the April-June quarter fell 5% to 149.7 metric tons, as a 17% fall in jewellery demand offset a 46% rise in the investment demand during the quarter, the WGC said.

Slump in jewellery consumption hits gold demand in Q2, says industry body - Global gold demand excluding over-the-counter (OTC) trading fell 6% year-on-year to 929 metric tons in the second quarter as jewellery consumption tumbled 19% amid high prices, the World Gold Council (WGC) said. The second quarter "saw price sensitivity bite into jewellery demand and it may be a while before consumers fully adjust to higher prices", said the WGC. Gold jewellery consumption in April-June saw its weakest second quarter since 2020, when demand was feeling the worst impact of the COVID-19 pandemic, the WGC said. However, total demand including the opaque OTC trading rose 4% to 1,258 tons, marking the strongest second quarter in the WGC's data series going back to 2000. Global central banks, which actively bought gold in 2022-2023, increased purchases for their reserves by 6% to 183 tons in the second quarter.

Swiss June gold exports fall to the lowest in more than two years - Swiss June gold exports fell to the lowest level since April 2022 owing to reduced shipments to China and India, customs data showed. Switzerland is the world's biggest bullion refining and transit hub while China and India are the largest consumer markets, where demand depends on the season and is often sensitive to high gold prices. With spot gold prices up almost 20% so far this year, Swiss gold exports to China, India and Turkey fell sharply month-on-month in June, while deliveries to Hong Kong rose, the data showed.
