## ➤ India's economy likely slowed in April-June ahead of US tariff blow ➤

India's GDP likely slowed to 6.7% in April–June from 7.4% in the prior quarter, weighed down by weak urban demand and sluggish private investment, though strong government spending and a good monsoon offered support. The U.S. has doubled tariffs on Indian exports to as high as 50%, raising risks for labour-intensive sectors like textiles, footwear and food items. Economists warn prolonged tariffs could shave up to 0.7 percentage points off growth, though the government plans tax cuts and sectoral support to cushion the impact. Nominal GDP growth and corporate revenues have also softened amid multi-year low inflation.

## ➤ Core inflation in Japan's capital slows but stays above BOJ target ➤

Tokyo's core inflation eased to 2.5% in August from 2.9% but stayed above the BOJ's 2% target, keeping rate-hike expectations alive. Factory output fell 1.6% in July and retail sales rose just 0.3%, highlighting growth strains as U.S. tariffs weigh on exports. Food and services inflation remained sticky, while a labour shortage pushed unemployment down to 2.3%, adding wage pressures. Economists increasingly expect the BOJ to raise rates again later this year despite fragile recovery risks.

## ➤ ECB policymakers split on risks to inflation, July accounts show ➤

ECB policymakers were split in July on whether inflation risks were tilted up or down, even as they held rates at 2% and signalled cuts may resume in autumn if growth weakens under U.S. tariffs. Some members argued downside risks justified an immediate cut, while others pointed to resilient growth, sticky services inflation, and potential tariff-driven supply shocks. U.S. tariffs of 15% came in line with ECB expectations, easing worst-case fears, while the euro's structural appreciation added to uncertainty. Overall, the ECB saw policy uncertainty persisting as a key risk to the outlook.

## ➤ Dollar weakens as September Fed cut bets grow ➤

The dollar weakened on Thursday as traders raised bets on a Fed rate cut next month after NY Fed chief John Williams signaled easing was possible, while Trump's attempts to oust Fed Governor Lisa Cook added pressure. The greenback trimmed losses after upbeat U.S. jobless claims and GDP data but still slipped, with the euro up 0.43% and sterling 0.13%. Markets now price in an 85% chance of a September cut, with PCE inflation and payrolls data set to be key. The dollar index fell 0.34% to 97.83, hitting lows against the yen and offshore yuan, as political and trade uncertainties linger.

## ➤ China extends anti-dumping duties on phenol imports from US, EU, South Korea, Japan and Thailand ➤

## **Robust Exports & Demand Opportunities In India Available To Be Capitalised Upon: TVS Motor Company**

- TVS Motors' chairman said U.S. tariffs will have limited direct impact on its business as the company is focused on two- and three-wheelers, where Indian players already hold strong global market share, especially in Africa and Latin America.
- He highlighted that TVS's growth plans remain intact, driven by robust domestic demand, rising middle-class consumption, and new product launches.
- Broader tariff-related uncertainty could affect business confidence, but TVS expects structural growth in India and emerging markets to offset risks.
- He noted India can emerge stronger through export diversification and trade deals with the EU, UK, Australia, UAE, and others, alongside continued domestic demand growth.

## **It's A Revenue-Per-Transaction Model With Margin Of 20% In This Order: BLS International**

- BLS International won a ₹2,000 crore UIDAI Aadhaar Seva Kendra contract over six years, involving setup of 300 exclusive centers and employing ~3,000 people, with ~20% margins on a per-transaction model.
- The deal comes with a minimum guaranteed revenue of ₹255 crore, but volumes from Aadhaar updates and new enrollments could drive higher revenues as transactions grow.
- The company's visa services business continues to expand globally, including U.S. visas through a partner, with margins upwards of 30–35%, keeping overall profitability strong despite Aadhaar's lower-margin profile.
- Consolidated margins are expected to dip slightly from the current 27–28%, but revenue visibility remains strong with both government contracts and international tenders supporting growth momentum.

## **We Get 6-7% Of Our Revenue From States Impacted By Heavy Rains: Gulf Oil Lubricants**

- Gulf Oil delivered nearly 14% revenue growth and 11% volume growth in Q1, about 3x the market pace, with strong performance across B2C, B2B, industrial, OEM and agri segments; the company aims to sustain 2–3x industry growth in FY26 despite some seasonality in Q2.
- Monsoon disruptions in northern states are not materially impacting volumes; the region contributes only ~6–7% of sales, with supply chain largely unaffected except for minor issues in Uttarakhand and the Northeast.
- Current capacity utilization is ~95% across plants; to support future growth, capacity is being expanded by 70% to 250 million liters over the next 18 months, starting with Chennai, supported by earlier land acquisition at Silvassa.
- The capex outlay is segment-agnostic and focused on expanding blending capacity, filling lines across pack sizes, and backend tankage; post expansion, Gulf Oil expects to maintain its strategy of outpacing industry growth while strengthening its ~6–7% overall market share.
