Technical Snapshot

BUY SILVER DEC @ 153600 SL 152600 TGT 155000-156000. MCX

Observations

Silver trading range for the day is 151510-157670.

Silver surged supported by expectations of a near-term Fed rate cut amid signs of US economic weakness.

US data last week pointed job losses in October, particularly in government and retail.

US Senate passed a bill to reopen the federal government after a 40-day shutdown, potentially reducing safe-haven demand.

Fed Governor Stephen Miran advocating a larger half-point reduction amid falling inflation and rising unemployment.

Gold pared gains on profit booking after prices gained amid worries about the potential economic fallout from the longest-ever US government shutdown, along with expectations for another rate cut by the US Federal Reserve in December. The supporting factors, to a larger extent, offset a positive development towards reopening the US government, which boosts investors' confidence and provides an additional boost to the global risk sentiment. The Senate reached a compromise and moved forward on a measure aimed at ending the longest US government shutdown in American history that began on October 1. Investors keenly await the expected flood of delayed data to shed more light on growth amid fears about an economic fallout from the US government closure.

India gold discounts widen as demand slackens post-festivals; China activity cools - Physical gold demand in India remained subdued as volatile prices deterred buyers from making purchases and prompted dealers to offer steep discounts to lure them, while demand cooled in China on changing tax regulations. Indian dealers were offering a discount of up to \$14 per ounce over official domestic prices, up from the last week's discount of up to \$12. In top consumer China, bullion traded anywhere from a discount of \$2 to a \$5 premium an ounce over the global benchmark spot price. Last week, bullion changed hands at par to a premium of \$4 an ounce. China ended a long-standing tax exemption policy for some gold retailers reducing it to 6% from November 1, according to new policies made public by the Ministry of Finance. The lower exemption will last until December 31, 2027. In Singapore, gold traded between a \$1.7 to \$3.5 premium. Gold in Hong Kong was sold at premiums ranging between \$1.50 and \$2.50. In Japan, gold was sold at par with spot prices on weak demand.

Gold exports from Switzerland to China soared in August - Gold exports from Switzerland to China jumped 254% in August compared with July to their highest level since May 2024 and supplies to India rose, partly offsetting a slump in deliveries to the United States, Swiss customs data showed. The Swiss data showed that gold exports to China rose in August to 35 metric tons from 9.9 tons in July, while supplies to India, another major bullion consumer along with China, climbed to 15.2 tons from 13.5 tons. China's wholesale gold demand fell last month as investors directed their attention to equities, but imports to the country are supported by expectations that the wholesale demand would rise towards the end of September, Ray Jia, head of China research at the World Gold Council, said in a note. Gold exports from Switzerland, the world's biggest bullion refining and transit hub, to the U.S. fell to 295 kg in August from 51.0 tons in July as some refineries paused shipments to the U.S. amid uncertainty about the country's import tariffs.

China's central bank buys gold in August for 10th month in a row - China's central bank added gold to its reserves in August, extending purchases of bullion into a 10th straight month, official data showed. China's gold reserves stood at 74.02 million fine troy ounces at the end of August, up from 73.96 million at the end of July. They were valued at \$253.84 billion, up from \$243.99 billion at the end of the previous month, according to data released by the central bank. Demand for physical gold in the world's largest producer, which is also a top consumer of the metal, was weak, due to high prices, with dealers offering discounts over the global benchmark to attract buyers.

The US has slapped tariffs on imports of one-kilo gold bars, in a move that threatens to upend the global bullion market and deal a fresh blow to Switzerland, the world's largest refining hub. The Customs Border Protection agency said one-kilo and 100-ounce gold bars should be classified under a customs code subject to levies, according to a so-called ruling letter dated July 31, which was seen by the Financial Times. Ruling letters are used by the US to clarify its trade policy. One-kilo bars are the most common form traded on Comex, the world's largest gold futures market, and comprise the bulk of Switzerland's bullion exports to the US. Switzerland exported \$61.5bn of gold to the US over the 12 months ending in June. That same volume would now be subject to an additional \$24bn in tariffs under Switzerland's 39 per cent tariff rate, which went into effect on Thursday.
