Gold fell as investors booked profits and turned slightly cautious, awaiting clearer signals ahead of next week's FOMC meeting. Markets are looking forward to more US economic data, including the delayed September PCE report due Friday. Meanwhile, the November ADP reading showed an unexpected loss of 32,000 private sector jobs, far below expectations for a 10,000 gain and marking the third decline in four months. This reflects the steepest hiring slowdown since 2023 and adds to concerns about a cooling labor market. The data aligned with dovish commentary from Fed officials, who emphasized the need to address slower job growth.

ASIA GOLD – High gold prices hit demand across major Asian hubs - Gold demand was subdued across major Asian markets, as high prices curbed retail buying even as India entered its wedding season, while in China, the removal of a tax exemption on gold purchases dented consumer appetite. Indian dealers were offering a discount of up to \$18 per ounce over official domestic prices narrower than last week's discount of up to \$21. In top consumer China, bullion traded anywhere from a premium of \$1.40 to discounts of up to \$16 an ounce compared with the global benchmark spot price. On November 1, Beijing cut a value-added tax exemption for certain gold purchased through the Shanghai Gold Exchange and the Shanghai Futures Exchange, a move expected to push up costs for gold used in jewellery and industry. In Singapore, gold was sold at par to a premium of \$2.50 this week. Gold in Hong Kong traded at par to a premium of \$1.80.

Gold exports from Switzerland to China soared in August - Gold exports from Switzerland to China jumped 254% in August compared with July to their highest level since May 2024 and supplies to India rose, partly offsetting a slump in deliveries to the United States, Swiss customs data showed. The Swiss data showed that gold exports to China rose in August to 35 metric tons from 9.9 tons in July, while supplies to India, another major bullion consumer along with China, climbed to 15.2 tons from 13.5 tons. China's wholesale gold demand fell last month as investors directed their attention to equities, but imports to the country are supported by expectations that the wholesale demand would rise towards the end of September, Ray Jia, head of China research at the World Gold Council, said in a note. Gold exports from Switzerland, the world's biggest bullion refining and transit hub, to the U.S. fell to 295 kg in August from 51.0 tons in July as some refineries paused shipments to the U.S. amid uncertainty about the country's import tariffs.

China's central bank buys gold in August for 10th month in a row - China's central bank added gold to its reserves in August, extending purchases of bullion into a 10th straight month, official data showed. China's gold reserves stood at 74.02 million fine troy ounces at the end of August, up from 73.96 million at the end of July. They were valued at \$253.84 billion, up from \$243.99 billion at the end of the previous month, according to data released by the central bank. Demand for physical gold in the world's largest producer, which is also a top consumer of the metal, was weak, due to high prices, with dealers offering discounts over the global benchmark to attract buyers.

The US has slapped tariffs on imports of one-kilo gold bars, in a move that threatens to upend the global bullion market and deal a fresh blow to Switzerland, the world's largest refining hub. The Customs Border Protection agency said one-kilo and 100-ounce gold bars should be classified under a customs code subject to levies, according to a so-called ruling letter dated July 31, which was seen by the Financial Times. Ruling letters are used by the US to clarify its trade policy. One-kilo bars are the most common form traded on Comex, the world's largest gold futures market, and comprise the bulk of Switzerland's bullion exports to the US. Switzerland exported \$61.5bn of gold to the US over the 12 months ending in June. That same volume would now be subject to an additional \$24bn in tariffs under Switzerland's 39 per cent tariff rate, which went into effect on Thursday.
