- The government has constituted the National Turmeric Board in Telangana to promote production of the spice, value addition, and research, according to a release from the commerce ministry. "The National Turmeric Board will provide leadership on turmeric-related matters, facilitate greater coordination with the Spices Board and other government agencies in the development and growth of the turmeric sector," said the release. The board will also promote quality and adherence to food safety standards. Turmeric farmers in Telangana have been agitating for the setting up of a turmeric board and a minimum support price of 15,000 rupees per 100 kg for the yellow spice. "Farmers are expecting to get better prices when selling through turmeric board....and there will be no need to transport turmeric to Sangli (in Maharashtra) to get good prices," said a Nizamabad-based horticulture department officer. "So far there is no announcement on minimum support price," said the official. Currently, the spot prices of turmeric in the key wholesale market of Nizamabad are 12,800-13,500 rupees per 100 kg. The Telangana assembly election for 2023 is expected to be held by December 2023. India is the largest producer, consumer, and exporter of turmeric in the world. Major producers of turmeric are Maharashtra, Telangana, Karnataka, and Tamil Nadu. During 2022-23, India exported 153,400 tn of turmeric worth \$207.45 mln. The commerce ministry expects turmeric exports to grow to \$1 bln by 2030, said the release. The board shall have a chairperson appointed by the central government. Members from the ministry of AYUSH, department of pharmaceuticals, department of agriculture and farmers welfare, and department of commerce and industry will also be a part of the board. The board will also have research institutions and representatives of turmeric farmers and exporters, according to the release.

Trading signals is prepared based on statistical analysis and is purely on technical indicators like exponential moving averages (EMAs), Relative strength Index (RSI) and stochastic, putting altogether provides an idea about intraday, short, medium and long term trend of the commodities. It also signals the risk of an investment in both agricultural and global commodities as well. Based on all listed indicators above, investors were able to fix a daily, near-term and long term trends. However, must be cautious especially for real-time intraday traders/jobbers.

Trading Strategy based on EMA

Trading strategies mentioned in the report is mainly based on 3, 5, 13, 22, 45 & 60 days exponential Moving Averages. 3 and 5 day EMA has taken for developing Intraday trading strategy, 13 days and 22 days EMA for Short term and Medium term, while 45,60 days EMA for Long term. Here, we use EMAs for POSITIVE and NEGATIVE signals. POSITIVE signal is formed when a short-term moving average (eg: 30 day) crosses from below a longer-term average (eg: 60 day), which is considered bullish. Likewise, NEGATIVE signal is formed when a short-term moving average (eg: 30 day) crosses from above a longer-term moving average (eg: 60 day), which is considered bearish.
