Stocks in the News

TITAN COMPANY (CMP: 4550, MARKET CAP: 403943 Cr., SECTOR: JEWELLERY & CONSUMER RETAIL)

[NSE filing](#)

Consumer businesses grew approximately 25% YoY in Q2 FY27, with domestic operations growing 22%. Jewellery grew 21%, watches 30%, and EyeCare 28%. International growth reached 97%, including Damas Jewellery, consolidated since January 2026. Titan added 78 net stores, taking its combined consumer retail network to 3,758 stores. cnbctv:b81526882094b:0

TRENT (CMP: 2906, MARKET CAP: 154957 Cr., SECTOR: FASHION & VALUE RETAIL)

[NSE filing](#)

Q2 FY27 standalone revenue increased 23% YoY to ₹5,788 crore, compared with ₹4,724 crore a year earlier. First-half revenue reached ₹11,454 crore, up 21% YoY. During Q2, Trent added 17 net Zudio stores and 10 Westside stores, bringing its total portfolio across retail formats to 1,342 stores. Zudio opened its 1,000th store during the quarter. upstox.com

ADANI POWER (CMP: 202, MARKET CAP: 390322 Cr., SECTOR: POWER GENERATION)

[NSE filing](#)

Signed a shareholders' agreement with Bhutan's Druk Green Power Corporation for the 770 MW Chamkharchhu-I hydroelectric project in Zhemgang district. Adani Power will hold 49%, with DGPC holding 51%. The project will operate under a build-own-operate-transfer structure with a 30-year concession from commercial operation. Construction is expected to begin in H1 calendar 2027, with commissioning targeted six years after groundbreaking. adani.com

GABRIEL INDIA (CMP: 1353, MARKET CAP: 23977 Cr., SECTOR: AUTO COMPONENTS)

[NSE filing](#)

Signed a JV agreement with Faurecia Automotive Seating India, part of FORVIA, to manufacture seat frames and complete passenger-vehicle seats. Gabriel will hold 50% minus one share, while Faurecia will hold 50% plus one share and control the venture. Gabriel's investment is approximately ₹50 crore, against total JV equity capital of ₹100 crore. Closing is expected by end-2026, subject to approvals; FORVIA targets approximately 10% of India's seating market within five years. globenewswire.com

Bharat Heavy Electricals Ltd – Technical Stock Call – 07/10/2026

Technical Stock Call	Action	CMP	Target	Support	SL
BHEL	BUY	452	550	(444-432)-(420-412)	402

Sector: Capital Goods – Heavy Electrical Equipment (INE257A01026)

About: Bharat Heavy Electricals Ltd. (BHEL) is a leading Indian engineering and manufacturing company focused on **power generation equipment, industrial systems and infrastructure solutions**. Its products and services serve the **power, transportation, defense, oil & gas, renewables and industrial sectors**.

View – Medium Term Bullish

The primary move in the stock commenced from 371.80 (JUL 26).

Stock started trading above the averages & gradually reached a high of 446.50 (JUL 26).

Double tops were formed, profit booking followed at higher levels & the stock extended its decline marking a low of 402.60 (SEP 26). However, as observed on the charts, the stock traded into a consolidation phase between 446.20 – 402.60 during the period JUL 26_SEP 26, trading around the averages seeking trend direction.

Recently, after forming higher bottoms, the stock has given a **Ascending Triangle Breakout** on the daily chart supported by volume reaching to a high of 453.80 (OCT 26), which is higher than the previous swing highs.

Stoch RSI, Williams %R & PVT indicators suggest Positive crossover. The 200 SMA is in rising mode.

Target of **550** is expected with lower support levels at **(444-432) –(420-412)** in case of intermediate fall.

A stop loss at **402** is to be followed for the trade.

All the calls/opinions are subject to Disclosures and Disclaimer <http://goo.gl/8bCMYQ>

Vidya Wires Ltd – Technical Stock Call – 07/10/2026

Technical Stock Call	Action	CMP	Target	Support	SL
VIDYAWIRES	BUY	95.83	121	(92-88-85)	82

Sector: Electrical Equipment (INE14UN01029)

About: Vidya Wires Ltd. is a Gujarat-based manufacturer of **copper and aluminium winding and conductivity products**, with more than four decades of operating history since 1981. Its products are used across **power transmission, electrical equipment, motors, renewables, EVs and railways**.

View – Short Term Bullish

The stock commenced its downtrend from 117.35 (MAY 26). After a sharp rally, the stock started trading below averages & forming lower tops gradually reached a low of 82 (SEP 26).

During the correction phase, the stock entered into a consolidation phase & after taking support at 85.20 (AUG 26), further the stock rallied upwards marking a new high.

Thereafter, the stock attracted buying interest at lower levels & commenced its up move & recently, after forming higher bottoms, the stock has given a **Descending Triangle – Bullish Breakout** on the weekly chart supported by volumes with a bullish candle reaching to a high of 95.83 (OCT 26), which is higher than the previous swing highs.

Upwards price breakout from a descending triangle is usually a bullish reversal, suggesting sellers are losing control against strong buyer's demand.

Indicators like Stoch RSI & Williams %R suggests positive crossover.

Target of **121** is expected with lower support levels at **(92-88-85)** in case of intermediate fall.

A stop loss at **82** is to be followed for the trade.

Stock specific news

Oil Risk Returns Above \$101

Brent crude rose to \$101.51/bbl early Wednesday as a Gulf of Mexico storm threatened US production and Houthi attacks targeted Saudi Arabia. The storm could affect facilities responsible for 15% of US crude and 5% of natural-gas output. Higher crude is negative for India's inflation, CAD and INR. Reuters Reuters

Asian Physical Oil Nears \$150

Chevron said the landed price of physical crude in Asia is approaching \$150/bbl, far above Brent futures, while refined-product prices are also rising sharply. Tight physical supply means India's effective import cost could remain elevated even if benchmark Brent temporarily moderates. Reuters Reuters

US Trade Deficit Widens Sharply

The US trade deficit widened 13.7% in August, with imports reaching a record level. Capital-goods imports rose 4.4%, reflecting continued AI and infrastructure investment. Strong imports indicate resilient demand but could keep US inflation and rate expectations volatile. Reuters Reuters

Treasury Auctions Show Stress

US Treasury markets are showing signs of investor caution through increasingly large auction "tails", even as yields temporarily eased. Persistent concern around US debt supply and long-duration yields remains a potential trigger for global FPI outflows and valuation compression. Reuters Reuters

Japan Yields Threaten Carry Trades

Rising Japanese yields are prompting investors to reassess holdings of US and European bonds, increasing the possibility of capital repatriation from overseas markets. Any unwinding of yen-funded carry positions could tighten liquidity for emerging markets, including India. Reuters Reuters

French Bond Stress Spreads

European bond markets remain unsettled as French fiscal concerns push sovereign spreads wider. Safe-haven demand and elevated European yields could support the dollar and increase global risk premia, creating an indirect headwind for Indian equities and bonds. Reuters Reuters

Auto Retail Hits Record High

India's September automobile retail sales jumped 31.82% YoY to 25.37 lakh units, the best-ever September. Five of six vehicle categories recorded their strongest September sales, while H1 FY27 retail sales rose 20.77%. The data reinforces strong festive consumption momentum. DD India DD India

PV Sales Surge 32%

Passenger-vehicle retail sales rose 32.1% YoY to 4.27 lakh units, with rural and urban markets both growing about 32%. EV penetration increased to 8.45%, but dealer inventory climbed to 43-45 days versus a recommended 21 days, creating a watchpoint for October sell-through. The Financial Express Financial Express

Commercial Vehicles Cross 1 Lakh

Commercial-vehicle retail sales increased 37.62% YoY to 1.04 lakh units, crossing the one-lakh monthly threshold for the first time. The sharp increase provides a positive read-through for freight activity, infrastructure execution and the broader capex cycle. Akashvani News Akashvani

BFSI Tech Spending Shifts

BFSI technology spending increased 8% YoY in H1 2026, but Indian IT-service revenue growth was only around 4%. Banks are directing more budgets toward AI, cloud, cybersecurity and internal capabilities, reducing the share available for traditional outsourced IT services. The Financial Express Financial Express

ATF Costs Trigger Government Review

The government is discussing rising aviation turbine fuel costs with airlines and OMCs as West Asia disruptions push ATF prices sharply higher. Authorities are assessing the impact on airline operating costs and fares, making aviation one of the most immediate crude-sensitive sectors. The Financial Express Financial Express

Airlines Pass Fuel Costs Through

IndiGo has increased fuel charges on domestic and international bookings as ATF prices have risen by more than 14% MoM. Domestic fuel charges now range from ₹375 to ₹1,300, while international charges range from ₹1,000 to ₹10,000, signalling greater industry-wide fuel-cost pass-through. ETTravelWorld.com ET TravelWorld

Health Insurance Co-Pay Proposed

Non-life insurers are considering a 10% co-payment on retail health-insurance claims from January 2027, capped at ₹5 lakh per claim. The proposal could lower insurer claims exposure but may affect policy affordability and demand if implemented. The Financial Express Financial Express

IRDAI Pushes Distribution Reset

Proposed IRDAI distribution reforms aim to reduce costs, improve consumer choice and alter traditional commission-driven insurance distribution. Lower distribution expenses could support affordability, but the changes may pressure intermediary economics and reshape insurance-sector business models. The Financial Express Financial Express

GST Export Rules May Ease

GST Council proposals could simplify export treatment for IT, consulting, engineering, research and financial services. Services exports reached \$421.3 billion in FY26, and changes around overseas branches, testing and certification could improve refund recovery and reduce tax friction for exporters. The Financial Express Financial Express

Pharma Refunds May Accelerate

The GST Council may give statutory backing to provisional release of 90% of eligible inverted-duty refund claims for pharma companies. Since many inputs attract 18% GST while medicines are taxed at 5%, faster refunds could release working capital trapped in tax credits. The Financial Express Financial Express

Telecom Towers May Get ITC

The GST Council may allow input-tax credit on telecom towers by treating them as functional business equipment rather than immovable property. The change could lower network deployment costs and potentially extend to fibre and ducts, benefiting telecom infrastructure economics. The Financial Express Financial Express

EV Fleet Tax Rules May Align

GST authorities are considering allowing EV fleet and rental operators to choose between 5% GST with restricted ITC or 18% with full ITC, similar to ICE vehicles. The proposal could remove a tax distortion between electric and conventional fleet operators. The Financial Express Financial Express

GST Checks Shift To Intelligence

Proposed GST reforms would require prior senior-officer approval before physical vehicle inspections and limit checks to the originating state. A move from routine interception toward data-led verification could reduce logistics delays and compliance costs for transport-intensive sectors. The Financial Express Financial Express

GST Moves Toward Annual Changes

The government is considering a more predictable GST framework where major rate revisions are increasingly concentrated around an annual cycle. Automated registration, returns and refunds could reduce compliance uncertainty and improve working-capital planning for businesses. The Financial Express Financial Express

Effective GST Rate Falls

India's effective GST rate on domestic taxable supply declined from 14.55% to 13.13% after the 2025 slab restructuring. At the same time, taxable supply expanded 25.8% YoY and B2C supply rose 26.7%, indicating that lower effective taxation has not caused a comparable revenue shock. The Financial Express Financial Express

Farm Input GST Relief Eyed

The GST Council may standardise bio-stimulants at 5% GST, covering products such as humic acid, fulvic acid, seaweed and amino-acid products. Lower and uniform taxation could reduce farm-input costs and improve affordability ahead of the rabi season. The Financial Express Financial Express

Hotels Seek Input Credit Relief

The GST Council may allow ITC on hotel rooms priced below ₹7,500 per night and related hospitality services. The change could reduce cascading taxes across the hotel distribution chain and support tourism-sector margins and pricing competitiveness. The Financial Express Financial Express

GST Prosecution Rules May Ease

Proposed reforms could raise the GST prosecution threshold from ₹1 crore to ₹5 crore, remove or soften certain offences and reduce arrest powers. The shift toward recovery and monetary penalties could lower compliance uncertainty and litigation risk for businesses. The Financial Express Financial Express

₹10,000 Cr SME Fund Approved

The Cabinet approved a ₹10,000 crore SME Growth Fund for direct equity investments in manufacturing, services, technology, innovation and strategic value chains. The scheme is designed to provide patient capital for expansion, acquisitions and global-market entry. Press Information Bureau PIB

New Logistics Authority Approved

The Cabinet approved an Integrated Transport & Logistics Authority to coordinate planning, appraisal and monitoring across roads, railways, ports, aviation and other transport infrastructure. The authority will evaluate projects above ₹500 crore and create an integrated national transport data framework. Press Information Bureau PIB

Tech Hiring Reaches 18-Month High

India's active technology openings reached 123,000 in October, up 17% YoY and 5% MoM, the highest level in 18 months. IT services accounted for around 66,000 roles, with demand concentrated in AI, analytics and experienced technology professionals. The Financial Express Financial Express

Festive Inventories Hit Record

Expectations of strong festive consumption have pushed finished-goods inventories to an 11.5-year high, with manufacturers stocking aggressively ahead of Dussehra and Diwali. The build-up is positive if demand materialises, but elevated inventory creates downside risk for companies if sell-through disappoints. The Financial Express Financial Express

FCNR Inflows Pressure Bank NIMs

FCNR(B) deposits now account for around 4.5% of system deposits, while system credit growth is running at 18–19% YoY. The foreign-currency inflows support liquidity and lending, but their relatively high funding cost could compress private-bank NIMs by an estimated 8–25 bps. The Financial Express Financial Express

Coal Supplies Rise 7.6%

Coal India increased H1 FY27 coal supplies 7.6% YoY to 384.2 MT, with power-sector deliveries rising 6.1% to 302.8 MT. Domestic coal-based power generation increased 9.9% to 640.05 BU, providing a positive supply-side signal for the power sector. The Financial Express Financial Express

Macro / Non-Stock News

Markets Extend Recovery Rally

Nifty 50 gained 0.98% to 22,776, while Sensex rose 0.95% to 73,068 on 6 October. 14 of 16 sectors advanced, led by financials, chemicals, oil & gas and FMCG. Midcaps and smallcaps gained 1.1% and 1.6%, respectively, signalling broad-based recovery.

FII Selling Continues

FIIs sold ₹2,961 crore on 6 October, taking October outflows to about ₹17,145 crore in three sessions. DIIs bought ₹5,089 crore, taking October purchases to ₹20,312 crore. Domestic institutions continue to absorb most of the foreign selling pressure.

22,700 Builds Support

Nifty's maximum Put OI is concentrated at 22,700, while maximum Call OI is at 23,000. PCR improved to 1.06 from 0.94, and India VIX fell 7.9% to 13.6. The immediate trading range is therefore 22,700–23,000.

RBI Hike Fully Priced

The RBI MPC decision is due at 10 AM today, with markets largely pricing a 25-bp hike to 5.50%. The key trigger is therefore the stance and inflation guidance rather than the hike itself. A hawkish stance could pressure banks, NBFCs and bonds.

Rupee Hits Two-Month Low

The rupee weakened to ₹96.42/\$, its weakest level in more than two months, despite suspected RBI intervention. The dollar index remained near 102, while FII outflows and elevated crude continue to pressure INR. A rate hike could provide some near-term currency support.

World Bank Raises Growth View

The World Bank raised India's FY27 GDP forecast to 7.1% from 6.6%, citing resilient domestic demand and exports. It nevertheless flagged high oil prices, capital-flow volatility and climate risks, with FY27 inflation projected at 4.8%.

India-US Talks Hit Plateau

India-US trade negotiations remain at a "plateau", while potential US tariffs linked to India's Russian-oil purchases remain a major risk. India exported \$42.79 billion of goods to the US during April–August, making the negotiations important for exporters, INR and market sentiment.

Oil Stabilises Near \$100

Brent remained around \$100.6/bbl, while WTI was near \$89.4 as higher Middle-East exports and planned emergency stockpile releases eased immediate supply concerns. However, geopolitical risks remain, keeping crude materially above levels comfortable for India's inflation and CAD.

US Stocks Hit Records

The S&P 500 and Nasdaq closed at record highs, supported by softer Treasury yields, lower crude and continued AI optimism. The positive global risk cue is particularly supportive for Indian IT and other technology-linked sectors.

Gold Rebounds On Yields

Spot gold rose 0.7% to \$4,168/oz as US yields and the dollar eased. Markets now assign only around 22% probability to an October Fed hike, although December expectations remain considerably higher. Softer near-term US rate expectations support global risk appetite and bullion.
