Robust transmission outlook; petchem diversification to fuel growth

- In the last five-and-a-half months, GAIL's share price has corrected ~30% with the stock now trading at 9.2x FY27E P/E. We maintain our positive outlook on GAIL, based on the following factors:
 - **Strong transmission and marketing outlook:** We estimate a 7% CAGR in transmission and marketing volumes over FY24-27. The International Energy Agency (IEA) estimates India's natural gas consumption to rise 60% by 2030 from 65bcm in 2023. Further, IEA estimates India's LNG consumption to grow at 11% p.a. over 2023-2030, driven by the city gas distribution (CGD), power and industrial sectors. GAIL will be the key beneficiary of rising gas penetration in India. Key catalysts for GAIL in FY26 include the start of 3,115km new pipelines and a potential tariff hike in 1QFY26 (5% PAT impact).
 - **Larger and more diversified petchem capacity to power earnings:** GAIL is set to expand its petrochemical capacity from 810ktpa currently to ~2.7mmtpa by FY27 as PDH-PP and Gail Mangalore Petrochemicals Ltd projects commence operations. Further, the petchem product mix is set to diversify, with the share of ethylene and derivatives decreasing from 100% to 30% of the portfolio as new projects come online. Feedstock sources too will be diversified, with PX and propane making up 70%. Overall, we believe a diversified product slate should help to reduce petchem earnings volatility and position the segment as a major profit driver for the company.
 - **Valuations are compelling; FY27 dividend yield at 4.3%:** GAIL share price has corrected 30% over the past five-and-a-half months and now trades at 8.1x SA 1yr fwd. P/E (excl. listed investments). We foresee limited downside from the current level amid robust transmission volume growth, a steady marketing outlook and a diversified petchem portfolio. FY27E dividend yield of 4.3% is ~56% above the 10Y median dividend yield and looks attractive. We cut our EBITDA/PAT estimates by 7% to 11% for FY26/FY27, as we 1) lower our petchem margins amid sequentially weak spreads and soft outlook, 2) build in 3-6-month delays in the commissioning of upcoming petchem facilities, 3) slightly moderate our FY26/FY27 transmission volume assumptions to 140/150mmscmd (vs. 144/154mmscmd earlier), 4) marginally lower our marketing segment EBITDA. We now value gas transmission, marketing and petchem segments at EV/EBITDA of 8x/5x/5.5x. Accordingly, we reiterate BUY on GAIL with our SoTP-based TP of INR195.

Transmission volumes to grow by 11/10mmscmd in FY26/FY27

- We are currently building in transmission volumes of 129/140/150mmscmd in FY25/FY26/FY27, in line with management guidance. Management expects ~2-4mmscmd p.a. growth from CGD sector, 1mmscmd from NRL startup, and the rest from refinery and pipeline expansions. Our bullish view is also supported by IEA's strong growth projection for gas demand in India, driven by Power, CGD, and industrial sectors. This is positive for transmission and marketing segments.
- As per IEA, India's natural gas consumption is projected to rise by nearly 60% by 2030 from 65bcm/year in 2023 to 103bcm/year.
 - The CGD sector is expected to be the primary driver, supported by the rapid expansion of compressed natural gas (CNG) infrastructure and the cost advantage of gas over liquid fuels for small industrial users.
 - Demand from heavy industrial and manufacturing sectors, including iron and steel production, will contribute an additional 15bcm per year by 2030.

Abhishek Nigam – Research Analyst (Abhishek.Nigam@MotilalOswal.com)

Rishabh Daga – Research Analyst (Rishabh.Daga@MotilalOswal.com)

Investors are advised to refer through important disclosures made at the last page of the Research Report.

Motilal Oswal research is available on www.motilaloswal.com/Institutional-Equities, Bloomberg, Thomson Reuters, Factset and S&P Capital.

- Gas consumption in oil refining is projected to rise by over 4bcm per year as more refineries connect to the grid. IOCL's Panipat refinery expansion (from 15mmtpa to 25mmtpa) and Gujarat refinery expansion are expected to be completed in FY26.
- As per IEA, with targeted strategies and policy interventions, gas consumption could exceed the current forecasts and reach ~120bcm per year by 2030.

CGD key driver of natural gas demand

- Between 2023 and 2030, IEA expects city gas demand in India to grow by almost 70%, translating into an annual increase of 9bcm and a CAGR of nearly 8%.
- The majority of this growth will be driven by CNG (5.8bcm/year contribution) and small industries (2.8bcm/year contribution), while residential and commercial users are projected to contribute ~0.5bcm/year.
- During 2023-2030, **CNG consumption is forecast to increase by over 75%, exceeding 13bcm/year by the end of the decade.** This surge is driven by the expansion of the CNG filling station network, the continued cost advantage of CNG at the pump, and growing concerns over urban air pollution, particularly in cities where the transport sector plays a major role.

Exhibit 4: Natural gas demand in the CGD sector in India during 2021-2030

Source: IEA, MOFSL

India's LNG imports projected to more than double from 2023 to 2030

- Between 2024 and 2030, while production will be supported by increasing onshore output from coal bed methane (CBM) and discovered small fields (DSF), overall growth will be limited by plateauing output from the KG-D6 fields and declining production from legacy assets such as ONGC's Mumbai offshore fields.
- As a result, production in 2030 is projected to reach just under 38bcm, reflecting an increase of only around 8% compared to 2023 levels.

Exhibit 5: Annual natural gas production in India during 2015-2030

Source: IEA, MOFSL

LNG consumption to grow at 11% p.a. over 2023-2030

- IEA expects LNG consumption to reach 64bcm per year by 2030, reflecting an average annual growth rate of 11% over the period, a rate that is double what was seen in the previous decade.
- After 2028, the gap between secured LNG contracts and projected demand is anticipated to widen considerably, which could leave India more vulnerable to fluctuations in the spot LNG market unless additional contracts are negotiated.

Shell anticipates softer spot LNG market in 2HCY25

- In its LNG outlook 2025 released recently, Shell highlighted that while global LNG demand and supply growth would align in 2025, the majority of supply expansion is anticipated in 2HCY25 and could potentially lead to a tighter spot LNG market in 1HCY25. Out of the expected capacity addition of 17-26mmtpa in 2025, Shell expects ~4-10mmtpa capacity to come up in 1HCY25. However, in 2HCY25, as new capacity becomes operational, LNG prices are expected to soften and should support LNG demand.
- In line with IEA, Shell also expects the long-term demand outlook for LNG to remain robust, notwithstanding the noise around de-carbonization and climate change. India and China are expected to be the primary drivers of global LNG demand growth, with Asia's regasification capacity projected to reach around 800mmtpa by 2030 (~620mmtpa in 2024).

■ Shell has also lowered its forecast for additional LNG supply entering the market between 2024 and 2028 by ~30mtpa over the past two years, underscoring persistent delays in supply growth and project timelines. We believe shifting project timelines remain a risk going forward for our/street's base case scenario of softer spot LNG prices in 2HCY25.

Transmission tariff hike, robust volume growth to drive earnings

- We believe the probability of gas price-related tariff hikes coming through remains high, as PNGRB had considered a gas price of USD12.46/mmbtu for GUJS recently. We anticipate that GAIL could benefit from a 10-12% tariff increase, potentially boosting the company's FY26E PAT by 5%.
- While gas transmission volumes grew only by 2mmscmd p.a. over FY15-FY24, they grew 9mmscmd during 9MFY25 and are expected to grow by ~10mmscmd p.a. over the next two years. For the same period, transmission business has generated average RoCE of 10% and is expected to generate 12% RoCE in FY25. Hence, with a robust volume growth outlook and strong RoCE generation, we value transmission business at 8x FY27E EV/EBITDA in our SoTP-based valuation.

Exhibit 15: NG transmission business RoCE

Healthy FCF spurt expected in FY26 and beyond as capex winds down

- GAIL is currently constructing 3,115km of gas transmission pipelines, including the Mumbai-Nagpur-Jharsuguda, KKBM and JHBD pipelines, and ramping up its petchem capacity by 1,860ktpa. The company expects to incur a cumulative capex of INR153b for transmission projects and INR173b for petchem projects. They are scheduled for completion next year.
- As earnings contribution from these projects begins, we are building in FY26E RoE of 14%, up from 9.5% in FY23.
- With the impending end of the capex cycle and no major projects ahead, the small-scale LNG and CBG projects or LNG pumps for transport could emerge as potential avenues for capex. However, these are unlikely to entail significant investments and we estimate FCF to rise meaningfully in the coming years.

Exhibit 17: Pipelines and petrochemical projects slated for commissioning in FY26

Project	Lengths of Pipelines (km)	Approved cost (INR m)
Mumbai-Nagpur-Jharsuguda P/L	1,755	78,440
Srikakulam-Angul P/L	744	26,580

Petchem in transition as capacity ramps up, feedstock/product diversify

- We believe GAIL’s petchem segment is set to undergo a transition as 1) overall petchem capacity is set to rise from 810ktpa to ~2.7mmtpa by FY27 end, 2) overall product slate is set to diversify as ethylene and derivatives will form 30% of product slate (from 100% now) when new projects begin operations, 3) GAIL will achieve feedstock diversification with PX and propane forming 70% of overall feedstock. We think these factors should help GAIL lower earnings volatility and establish the petchem segment as a key profit engine for the company in the coming years.
- GAIL currently has a gas-based petrochemical plant at Pata with a capacity of 810ktpa. The 500ktpa propane-based PDH-PP plant at Usar, 1250ktpa PX-based GAIL Mangalore petrochemical PTA plant and 60ktpa Polypropylene plant at Pata – all are expected to be commissioned in FY26/1HFY27. In the 3QFY25 conference call, management had guided that the current average realization of INR88k/mt at Pata is likely at the bottom already.
- For the PDH-PP plant at Usar, GAIL has already tied up a 15-year propane supply contract.

GAIL SA trading at 8.1x FY26E P/E despite strong earnings/FCF outlook

- GAIL’s standalone business (excl. listed investments) currently trades at 8.1x 1yr fwd P/E, marginally above its 5y LTA valuation. The valuations have corrected sharply from highs of 13.2x 1yr fwd P/E in Sep’24. As such, we see limited downside for the stock from the current levels given the following factors:
 - A strong earnings outlook for the standalone business and rising free cash flow.
 - We had highlighted recently ([Pockets of value re-emerging](#)) that valuations for the O&G sector are bottoming out. In our SoTP, listed investments account for INR24/sh and improving valuations for O&G stocks can be a source of price upside, we think.
- Now, a 12-month dividend yield, as per Bloomberg, stands at an attractive 4.2%. The current dividend yield is 53%/21% above the media/average 10Y dividend yield.

Valuation and View

- **We reiterate BUY on GAIL with our SoTP-based TP of INR195.** During FY24-27, we estimate a 10% CAGR in PAT driven by:
 - an increase in natural gas transmission volumes to 150mmscmd in FY27 from 120mmscmd in FY24;
 - substantial improvement in petchem segment’s performance over FY26-FY27 as the new petchem capacity will be operational and spreads are bottoming out;
 - healthy trading segment profitability with guided EBIT of at least INR45b/INR40b in FY25/FY26.
- We cut our FY26/FY27 EBITDA/PAT estimates by 7% to 11%, as we 1) lower our petchem margins amid sequentially weak spreads and soft outlook, 2) build in 3-6-month delays in commissioning of upcoming petchem facilities, 3) slightly moderate our FY26/FY27 transmission volume assumptions to 140/150mmscmd (vs. 144/154mmscmd earlier), 4) marginally lower our marketing segment EBITDA. We now value gas transmission, marketing and petchem segments at EV/EBITDA of 8x/5x/5.5x.
- We expect RoE to improve to ~14.2% in FY26E from 9.5% in FY23, with a healthy FCF generation of INR65.2b in FY26 (vs. -INR45.3b in FY23), which we believe can support its valuations.

Disclosures

The following Disclosures are being made in compliance with the SEBI Research Analyst Regulations 2014 (herein after referred to as the Regulations).

Motilal Oswal Financial Services Ltd. (MOFSL) is a SEBI Registered Research Analyst having registration no. INH000000412. MOFSL, the Research Entity (RE) as defined in the Regulations, is engaged in the business of providing Stock broking services, Depository participant services & distribution of various financial products. MOFSL is a listed public company, the details in respect of which are available on www.motilaloswal.com. MOFSL (erstwhile Motilal Oswal Securities Limited - MOSL) is registered with the Securities & Exchange Board of India (SEBI) and is a registered Trading Member with National Stock Exchange of India Ltd. (NSE) and Bombay Stock Exchange Limited (BSE), Multi Commodity Exchange of India Limited (MCX) and National Commodity & Derivatives Exchange Limited (NCDEX) for its stock broking activities & is Depository participant with Central Depository Services Limited (CDSL) National Securities Depository Limited (NSDL), NERL, COMRIS and CCRL and is member of Association of Mutual Funds of India (AMFI) for distribution of financial products and Insurance Regulatory & Development Authority of India (IRDA) as Corporate Agent for insurance products. Details of associate entities of Motilal Oswal Financial Services Limited are available on the website at <http://onlinereports.motilaloswal.com/Dormant/documents/List%20of%20Associate%20companies.pdf>

MOFSL and its associate company(ies), their directors and Research Analyst and their relatives may; (a) from time to time, have a long or short position in, act as principal in, and buy or sell the securities or derivatives thereof of companies mentioned herein. (b) be engaged in any other transaction involving such securities and earn brokerage or other compensation or act as a market maker in the financial instruments of the company(ies) discussed herein or act as an advisor or lender/borrower to such company(ies) or may have any other potential conflict of interests with respect to any recommendation and other related information and opinions.; however the same shall have no bearing whatsoever on the specific recommendations made by the analyst(s), as the recommendations made by the analyst(s) are completely independent of the views of the associates of MOFSL even though there might exist an inherent conflict of interest in some of the stocks mentioned in the research report.

MOFSL and / or its affiliates do and seek to do business including investment banking with companies covered in its research reports. As a result, the recipients of this report should be aware that MOFSL may have a potential conflict of interest that may affect the objectivity of this report. Compensation of Research Analysts is not based on any specific merchant banking, investment banking or brokerage service transactions. Details of pending Enquiry Proceedings of Motilal Oswal Financial Services Limited are available on the website at <https://galaxy.motilaloswal.com/ResearchAnalyst/PublishViewLitigation.aspx>

A graph of daily closing prices of securities is available at www.nseindia.com, www.bseindia.com. Research Analyst views on Subject Company may vary based on Fundamental research and Technical Research. Proprietary trading desk of MOFSL or its associates maintains arm's length distance with Research Team as all the activities are segregated from MOFSL research activity and therefore it can have an independent view with regards to Subject Company for which Research Team have expressed their views.

Regional Disclosures (outside India)

This report is not directed or intended for distribution to or use by any person or entity resident in a state, country or any jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject MOFSL & its group companies to registration or licensing requirements within such jurisdictions.

For Hong Kong:

This report is distributed in Hong Kong by Motilal Oswal capital Markets (Hong Kong) Private Limited, a licensed corporation (CE AYY-301) licensed and regulated by the Hong Kong Securities and Futures Commission (SFC) pursuant to the Securities and Futures Ordinance (Chapter 571 of the Laws of Hong Kong) "SFO". As per SEBI (Research Analyst Regulations) 2014 Motilal Oswal Securities (SEBI Reg. No. INH000000412) has an agreement with Motilal Oswal capital Markets (Hong Kong) Private Limited for distribution of research report in Hong Kong. This report is intended for distribution only to "Professional Investors" as defined in Part I of Schedule 1 to SFO. Any investment or investment activity to which this document relates is only available to professional investor and will be engaged only with professional investors." Nothing here is an offer or solicitation of these securities, products and services in any jurisdiction where their offer or sale is not qualified or exempt from registration. The Indian Analyst(s) who compile this report is/are not located in Hong Kong & are not conducting Research Analysis in Hong Kong.

For U.S.

Motilal Oswal Financial Services Limited (MOFSL) is not a registered broker - dealer under the U.S. Securities Exchange Act of 1934, as amended (the "1934 act") and under applicable state laws in the United States. In addition MOFSL is not a registered investment adviser under the U.S. Investment Advisers Act of 1940, as amended (the "Advisers Act" and together with the 1934 Act, the "Acts"), and under applicable state laws in the United States. Accordingly, in the absence of specific exemption under the Acts, any brokerage and investment services provided by MOFSL, including the products and services described herein are not available to or intended for U.S. persons. This report is intended for distribution only to "Major Institutional Investors" as defined by Rule 15a-6(b)(4) of the Exchange Act and interpretations thereof by SEC (henceforth referred to as "major institutional investors"). This document must not be acted on or relied on by persons who are not major institutional investors. Any investment or investment activity to which this document relates is only available to major institutional investors and will be engaged in only with major institutional investors. In reliance on the exemption from registration provided by Rule 15a-6 of the U.S. Securities Exchange Act of 1934, as amended (the "Exchange Act") and interpretations thereof by the U.S. Securities and Exchange Commission ("SEC") in order to conduct business with Institutional Investors based in the U.S., MOFSL has entered into a chaperoning agreement with a U.S. registered broker-dealer, Motilal Oswal Securities International Private Limited. ("MOSIPL"). Any business interaction pursuant to this report will have to be executed within the provisions of this chaperoning agreement.

The Research Analysts contributing to the report may not be registered /qualified as research analyst with FINRA. Such research analyst may not be associated persons of the U.S. registered broker-dealer, MOSIPL, and therefore, may not be subject to NASD rule 2711 and NYSE Rule 472 restrictions on communication with a subject company, public appearances and trading securities held by a research analyst account.

For Singapore

In Singapore, this report is being distributed by Motilal Oswal Capital Markets (Singapore) Pte. Ltd. ("MOCMSPL") (UEN 201129401Z), which is a holder of a capital markets services license and an exempt financial adviser in Singapore. This report is distributed solely to persons who (a) qualify as "institutional investors" as defined in section 4A(1)(c) of the Securities and Futures Act of Singapore ("SFA") or (b) are considered "accredited investors" as defined in section 2(1) of the Financial Advisers Regulations of Singapore read with section 4A(1)(a) of the SFA. Accordingly, if a recipient is neither an "institutional investor" nor an "accredited investor", they must immediately discontinue any use of this Report and inform MOCMSPL.

In respect of any matter arising from or in connection with the research you could contact the following representatives of MOCMSPL. In case of grievances for any of the services rendered by MOCMSPL write to grievances@motilaloswal.com.

Terms & Conditions:

This report has been prepared by MOFSL and is meant for sole use by the recipient and not for circulation. The report and information contained herein is strictly confidential and may not be altered in any way, transmitted to, copied or distributed, in part or in whole, to any other person or to the media or reproduced in any form, without prior written consent of MOFSL. The report is based on the facts, figures and information that are considered true, correct, reliable and accurate. The intent of this report is not recommendatory in nature. The information is obtained from publicly available media or other sources believed to be reliable. Such information has not been independently verified and no guaranty, representation of warranty, express or implied, is made as to its accuracy, completeness or correctness. All such information and opinions are subject to change without notice. The report is prepared solely for informational purpose and does not constitute an offer document or solicitation of offer to buy or sell or subscribe for securities or other financial instruments for the clients. Though disseminated to all the customers simultaneously, not all customers may receive this report at the same time. MOFSL will not treat recipients as customers by virtue of their receiving this report.

Disclaimer:

The report and information contained herein is strictly confidential and meant solely for the selected recipient and may not be altered in any way, transmitted to, copied or distributed, in part or in whole, to any other person or to the media or reproduced in any form, without prior written consent. This report and information herein is solely for informational purpose and may not be used or considered as an offer document or solicitation of offer to buy or sell or subscribe for securities or other financial instruments. Nothing in this report constitutes investment, legal, accounting and tax advice or a representation that any investment or strategy is suitable or appropriate to your specific circumstances. The securities discussed and opinions expressed in this report may not be suitable for all investors, who must make their own investment decisions, based on their own investment objectives, financial positions and needs of specific recipient. This may not be taken in substitution for the exercise of independent judgment by any recipient. Each recipient of this document should make such investigations as it deems necessary to arrive at an independent evaluation of an investment in the securities of companies referred to in this document (including the merits and risks involved), and should consult its own advisors to determine the merits and risks of such an investment. The investment discussed or views expressed may not be suitable for all investors. Certain transactions -including those involving futures, options, another derivative products as well as non-investment grade securities - involve substantial risk and are not suitable for all investors. No representation or warranty, express or implied, is made as to the accuracy, completeness or fairness of the information and opinions contained in this document. The Disclosures of Interest Statement incorporated in this document is provided solely to enhance the transparency and should not be treated as endorsement of the views expressed in the report. This information is subject to change without any prior notice. The Company reserves the right to make modifications and alternations to this statement as may be required from time to time without any prior approval. MOFSL, its associates, their directors and the employees may from time to time, effect or have effected an own account transaction in, or deal as principal or agent in or for the securities mentioned in this document. They may perform or seek to perform investment banking or other services for, or solicit investment banking or other business from, any company referred to in this report. Each of these entities functions as a separate, distinct and independent of each other. The recipient should take this into account before interpreting the document. This report has been prepared on the basis of information that is already available in publicly accessible media or developed through analysis of MOFSL. The views expressed are those of the analyst, and the Company may or may not subscribe to all the views expressed therein. This document is being supplied to you solely for your information and may not be reproduced, redistributed or passed on, directly or indirectly, to any other person or published, copied, in whole or in part, for any purpose. This report is not directed or intended for distribution to, or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject MOFSL to any registration or licensing requirement within such jurisdiction. The securities described herein may or may not be eligible for sale in all jurisdictions or to certain category of investors. Persons in whose possession this document may come are required to inform themselves of and to observe such restriction. Neither the Firm, not its directors, employees, agents or representatives shall be liable for any damages whether direct or indirect, incidental, special or consequential including lost revenue or lost profits that may arise from or in connection with the use of the information. The person accessing this information specifically agrees to exempt MOFSL or any of its affiliates or employees from, any and all responsibility/liability arising from such misuse and agrees not to hold MOFSL or any of its affiliates or employees responsible for any such misuse and further agrees to hold MOFSL or any of its affiliates or employees free and harmless from all losses, costs, damages, expenses that may be suffered by the person accessing this information due to any errors and delays.
