Gold steadied after data suggesting lacklustre U.S. economic activity kept alive hopes for at least one interest rate cut this year. U.S. retail sales barely rose in May and figures for the prior month were revised considerably lower, data showed, suggesting economic activity remained lacklustre in the second quarter. That slightly boosted the odds of a Federal Reserve rate cut in September to 67% from 61% a day earlier, the CME FedWatch tool showed.

India demand tepid, China premiums dip on elevated prices - Gold demand in India remained tepid despite a recent correction in prices, as buyers postponed purchases in the absence of any major festivals, while premiums in top consumer China slid on weak consumer sentiment and elevated spot prices. Indian dealers offered a discount of up to \$10 an ounce over official domestic prices, versus last week's discount of \$14. The wedding season is nearly over so jewellers are not in a hurry to replenish inventories. In China, dealers charged premiums of \$18-\$26 per ounce over international spot prices this week compared with \$27-\$32 last week. Top consumer China's central bank held off gold purchases for its reserves last month after 18 months of consecutive buying, official data showed last week. Gold was sold at par to \$2.10 premiums in Singapore and at par to \$2 premiums in Hong Kong. In Japan, bullion was sold at \$0.25-\$0.50 premiums, unchanged from last week.

China's April net gold imports via Hong Kong fall 38% m/m - China's net gold imports via Hong Kong slumped 38% in April from the previous month, Hong Kong Census and Statistics Department data showed. The drop comes as elevated prices and economic challenges prompted a reduction in import quotas by the central bank, which is focused on stabilizing the yuan. Net imports into the world's top gold consumer stood at 34.575 metric tons in April, compared with 55.836 metric tons in March, data showed. Total gold imports via Hong Kong were down about 32% at 43.261 metric tons.

India's gold imports seen falling as record price prompts jewellery swaps - India's gold imports in 2024 could fall by nearly a fifth from the previous year, as record high prices spur retail consumers to exchange old jewellery for new items. Lower imports by India, the world's second biggest consumer of the precious metal, could cap a rally that carried global prices to a record. In the March quarter, scrap supplies jumped 10% from a year ago to 38.3 tons, data from the World Gold Council showed. India imported 744 metric tons of gold in 2023. Jewellery demand accounts for three-quarters of the total demand, while investment demand makes up the rest.

China PBOC Buys Gold for 17th Month as Prices Hit Record - China's central bank purchased gold for its reserves for a 17th consecutive month in March, extending a buying spree that has helped the precious metal surge to a record. The People's Bank of China's gold held rose 0.2% to 72.74 million troy ounces, the smallest increase in the run of monthly purchases since November 2022. Gold has been on a tear in the past two months, hitting records on expectations of lower US interest rates. China's official reserve assets rose to the highest since November 2015, and foreign exchange reserves rose to \$3.2457 trillion.
