Gold prices traded lower with a firmer dollar and a recovery in U.S. Treasury yields denting demand for bullion. The dollar extended its rebound for a third day and Treasury yields remained elevated as investors reacted to cautious comments from Fed officials on the future rate path. Fed Governor Christopher Waller said in a speech that Q3 U.S. GDP growth was a "blowout" performance that warrants a very close eye when thinking about policy going forward.

Asia Gold: Elevated local prices dent retail demand in India - Physical gold dealers in India offered discounts for a fourth consecutive week as consumers shied away from making purchases due to higher domestic prices, while top consumer China also saw muted demand. In India, dealers offered a discount of up to \$9 an ounce over official domestic prices, up from last week's discount of \$5. In China, premiums over global spot prices were quoted at \$25-\$40 per ounce, little changed from last week. High prices could dampen demand in India during peak festival season and lead to the lowest purchase volumes in three years, the World Gold Council (WGC) said.

China's Jan Sept gold consumption climbs over 7% on rising investment interest - China's gold consumption in the first three quarters of 2023 climbed 7.32% from a year earlier on increasing demand amid economic recovery, the China Gold Association said. Consumption of the precious metal in the world's largest consumer totaled 835.07 metric tons in the January-September period, with over 66%, or 552.04 tons, in gold jewellery, a rise of 5.72% year-on-year. The rising pace of consumption of gold jewellery slowed down in the third quarter as buyers preferred to take a watchful stance amid lingering high gold prices, according to the association. The People's Bank of China continued to buy gold in September for the eleventh month in a row, increasing its reserves to 2191.55 tons by the end of the third quarter.

China's gold imports via Hong Kong rebounded in August from the previous month, data showed on Tuesday, with the issuance of fresh quotas to local banks likely to boost shipments into the world's top gold consumer. Net imports stood at 39.023 metric tons in August, up 51.4% from the previous month, Hong Kong Census and Statistics Department data showed. That was still below the 68.227 tons reported a year earlier. Total gold imports via Hong Kong were up 49.6% on a monthly basis at 45.237 tons, but lower than 71.855 tons in August 2022. Official data showed that the People's Bank of China extended its streak of central bank gold purchases to a tenth straight month at end-August.
