Neutral

Exuding confidence to drive growth; credit costs peak

Management transition and the current CEO's future role to remain in focus

- Bajaj Finance (BAF)'s reported PAT grew 18% YoY to ~INR43.1b (~5% beat) in 3QFY25. NII grew 23% YoY to INR93.8b (in line). Other operating income at INR22.9b rose 39% YoY (6% beat), driven by improvement in fee income and income from the sale of services.
 - BAF's 3QFY25 NIM was steady QoQ at ~9.7%. The company sees a limited (~4-5bp) room for improvement in its CoF, irrespective of potential rate cuts in the current year. BAF aims to maintain stable margins as it enters the next fiscal year. However, any NIM compression can be mitigated by orchestrating its levers on fee income. We estimate NIM to remain largely range-bound at ~9.8-9.85% over FY26/FY27.
 - BAF continued to take proactive risk actions by cutting segments and pruning exposures. Management shared that GS3 at ~1.1% as of Dec'24 remains well below the long-term guidance of GS3 of ~1.2-1.4%. Additionally, the company highlighted a notable improvement in collection efficiency in Dec'24 and Jan'25. BAF guided for credit costs of ~2.0%-2.05% in 4QFY25.
 - Management exuded confidence that, given that its credit costs have peaked, it would look to accelerate AUM growth in the (Rural) B2C segment in the foreseeable future. In addition, BAF's partnership with Bharti Airtel has the potential to become huge over the medium term, given there are ~200m non-overlapping Airtel customers that can be targeted by BAF. BAF had announced a comprehensive 15-month transition plan for the senior leadership, and it expects the Board to take a view on the management transition by 4QFY25. The MD, Mr. Rajeev Jain's, current tenure ends in Mar'25. He shared that he intends to remain with BAF and will be actively
 - involved in developing the strategic vision for the company and driving its subsidiaries, subject to the direction of the Board and the NRC.
- For FY26, management guided an AUM growth of ~25%, credit costs of <2%, and PAT growth of ~22-23%, contingent on a stable external environment. We broadly maintain our FY26/FY27 PAT estimates as credit costs have now peaked and will remain below the guided outer range. We estimate a CAGR of ~27%/23% in AUM/PAT over FY24-FY27 and expect BAF to deliver an RoA/ RoE of ~4.1%/21% in FY27.
- Valuations at 3.4x P/BV and 18x FY27E P/E are not inexpensive, and the focus now will shift to the management transition and the role that Mr. Rajeev Jain will play in the company from Apr'25 onwards. We expect asset quality to stabilize from 4QFY25 onwards, allowing BAF to navigate this mini-credit cycle effectively. However, we do not see any significant upside catalysts in the near term given that the management transition will be very keenly watched until more clarity emerges. Reiterate Neutral with a TP of INR8,300 (premised on 4x Sep'26E P/BV).

AUM up ~28% YoY; healthy new customer acquisitions

- BAF's total customer franchise increased to 97.1m, up 21% YoY and ~5.5% QoQ. New customer acquisitions stood at ~5.03m (vs. ~3.85m YoY and ~3.98m QoQ). The company is well on course to cross ~100m customer franchises by Mar'25. New loans booked rose ~22% YoY to ~12.1m (vs. ~9.9m in 3QFY24).
- Total AUM grew 28% YoY and ~6% QoQ to INR3.98t. The sequential AUM growth was driven by Urban B2C (+8%), Rural B2C (+7%), Rural B2B Sales Finance (+9%), SME (+6%), and Commercial (incl. LAS) (+9%). However, the Auto finance business was flat QoQ, given that the company has stopped doing Bajaj 2W/3W financing.

Minor deterioration in asset quality; GNPA rises ~5bp QoQ

- BAF's GS3/NS3 witnessed minor deterioration in asset quality with GNPA/NNPA rising ~5bp/2bp to ~1.1%/0.5%, respectively, and the Stage 3 PCR remaining stable QoQ at ~57%.
- Net credit costs in 3QFY25 stood at ~2.12% (PQ: ~2.1% and PY: ~1.7%). During the quarter, stage 2 assets increased by ~INR1b, while stage 3 assets rose by ~INR6b. The net increase in Stage 2 & 3 assets was ~INR6.1b. However, management shared that the net growth in Stages 2 &3 has now stabilized. We model net credit costs of 1.9%/1.8% in FY26/FY27E.

Highlights from the management commentary

- The company's leverage analysis based on Jun'24 bureau data suggests that customers having three or more live unsecured loans are showing a higher propensity to default and lower collection efficiencies. BAF has reduced the share of such customers significantly in new disbursements in line with pre-Covid levels.
- Delinquencies are relatively higher, and BAF continues to remain cautious in the used cars segment. Within used cars, elevated losses are in refinance and that's where BAF has taken sharp cuts in new volumes. Like all consumption loans, the refinance of used car loans is under pressure. The bounce rate in the used car portfolio was 10-11%, and the same in the new car portfolio was ~3.0-3.5%.

Valuation and view

- BAF reported a robust performance during the quarter driven by healthy AUM growth, while higher non-interest income and well-contained credit costs led to an earnings beat. BAF's key product segments (until now) have been the secular growth segments. However, its foray into multiple new areas, such as cars, tractors, CVs, and MFI, could (in the future) make its growth and credit costs vulnerable to cyclicality, despite having a well-diversified product mix.
- Despite a healthy PAT CAGR of ~23% over FY24-FY27E and RoA/RoE of 4.1%/21% in FY27E, we see limited upside catalysts. Consequently, we reiterate our Neutral rating with a TP of INR8,300 (premised on 4x Sep'26E BVPS).

Highlights from the management commentary

Business Update

- Loan losses have stabilized and the credit costs were stable QoQ. Loan loss to average AUF was 2.16% in 3Q (vs. 2.13% in 2QFY25).
- Added 5m new customers in 3QFY25. Customer franchise stood at 97.12m and is well on course to surpass 100m customer franchise by Mar'25.
- AUM stood at INR3.98t and was up 28% YoY
- Opex to NTI stood at 33.1% (vs. 33.9% YoY). The company continues to optimize its operating expenses and rapidly implement AI capabilities to improve productivity.
- The company added 2,824 employees in 3QFY25. Annualized attrition as of 31st Dec'24 was 16.2%. Employee headcount addition will continue to be lower as it moves into FY26.
- Liquidity buffer stood at INR136.6b as of Dec'24. In 3Q, the cost of funds was 7.96%, a decrease of 1 bps over 2QFY25.
- 3QFY25 RoA/RoE of 4.5%/19%

Management Succession

- Had announced a comprehensive 15-month transition plan for the senior management and it expects the board to take a view on the management transition by 4QFY25.
- Subject to the approval of the Board and NRC, Rajeev Jain intends to remain with BAF and will be actively involved in strategy and driving its subsidiaries.

Guidance

- BAF guided for credit costs of 2.0-2.05% in 4QFY25.
- 2W/3W composition is going down as a result of the company not doing 2W/3W financing and it will stabilize next year at ~3.5%-4% by Mar'26.
- Rural B2C business is back in growth mode and this business should grow between ~20-23%
- At a design level, the credit costs in FY26 should be <2%
- Remains focused on delivering its medium-term guidance
- On a consolidated basis, it will target to deliver AUM growth of 25%, credit costs of <2%, and PAT growth of 22-23%, provided the external environment does not deteriorate significantly. It will orchestrate the levers on fee income to deliver the guided outcomes.</p>
- Foresees stable mix, and stable pricing at this point but it will depend on the external environment. If the NIM were to compress, it would make up for it from fee income.

Asset Quality

- GNPA/NNPA stood at 1.12%/0.48% respectively. Marginal increase in GNPA/NNPA - Remains reasonably well under the long-term GNPA guidance of 1.2%-1.4%.
- In 3Q, the net increase in Stage 2 & 3 assets was INR6.1b. Net growth in Stages 2 & 3 has stabilized. Stage 2 assets increased by INR1b and stage 3 assets

increased by INR6b. The company continues to take proactive risk actions by cutting segments and pruning exposures.

- December'24 and January'25 have been much better in terms of collection efficiency. This gives the company a greater degree of confidence that if the 4Q comes out better. Early MoB delinquencies are looking better.
- Urban B2B continues to remain very strong.
- 2W/3W: Default rate and the efficiency are both impacted, even as this book is de-growing
- Urban B2C: Default rates are lower and collection efficiencies are still lower. It may take the longest to get back to normalcy. Customers with three personal loans (3PL) had gone up to ~14% and have now declined to ~8%.
- Rural B2B: It will get closer to Urban B2B. Earlier the smaller markets gave deeper penetration and the advantage in the rural markets does not exist anymore.
- SME Lending: From Apr to Oct Efficiencies had dropped significantly Nov/Dec has gone up back to the ever-good that it has seen in the last two years
- Car Loans: Used Cars have seen pressure and it has cut volumes by 30-35% and New Car continues to remain very strong.
- Within MSME, the slowest growing is professional loans and LAP.
- Used Cars: Delinquencies are relatively higher and BAF continues to remain cautious. New Cars are accelerating. Within Used Cars, elevated losses are in refinance and that's where it has taken sharp cuts. It has made some cuts in sales finance as well. Like all consumption loans, the refinance of used car loans is under pressure. The used car portfolio was ~INR55b and the new car portfolio was ~INR55b. The bounce rate in the used car portfolio was 10-11% and the same in the new car portfolio was ~3.0-3.5%

NIM

- It does not see a play of more than 4-5bp on its CoF, with or without rate cuts in the current year.
- Pass-through expected from banks is not high; NCD money has already come at ~20bp lower costs in the last 2 quarters.
- Triangulation of growth, margin, and risk. Risk remains the fundamental priority and it will prioritize risk, margins, and growth in that order.
- BAF will not significantly compromise on NIM as it goes into the next year.

Consumer B2C segment

- The Company's leverage analysis basis June 2024 bureau data suggests that customers having 3 or more live unsecured loans are showing a higher propensity to default and lower collection efficiencies.
- The Company has reduced the share of such customers significantly in new disbursements in line with pre-COVID levels. As it exits 4Q, it will be at pre-COVID levels.

Partnership with Bharti Airtel

- Two products have gone live and there will be nine products by Mar'25
- Five-year vision for this partnership.

 BAF will target around 200m Airtel customers which do not overlap with BFL. Initially start with MSME, Gold Loans, 2W, Insta EMI Cards, and LAP.

Discontinuation of co-branded credit card business

- The company earned distribution fees and a revenue share under the co-brand arrangement.
- The discontinuation will not impact the Company's future revenue share from this arrangement.

Gold Loans

- Gold loans originated digitally and were dispensed by the physical gold loan branches.
- It will cross 1000 gold loan branches by the end of Mar'25.
- It is playing in Tier 3 and 4 cities and not in Tier 1 cities Choosing wisely in where it wants to compete.

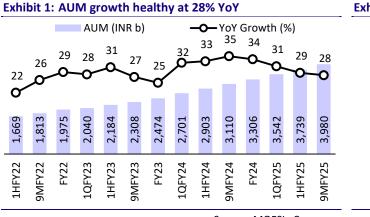

Aspires to continue as a non-bank

- BAF would like to remain a non-bank; the RBI does not have a roadmap for NBFCs to convert into a Bank. Expect business as usual as an NBFC in the shortto-medium term.
- Ambition will be to have a 200m customer franchise and a 4-5% retail credit market share.

Others

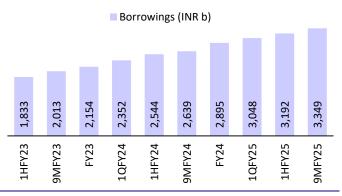

- 48% of the collections are still physical (through collection agencies). 57-58K employees in BFL out of which ~20K employees in debt management who manage agencies that collect from customers.
- Pricing pressure across the board has further intensified in personal loans as the credit growth in PL has slowed down.
- Geographic presence has peaked and it added 14 new locations. It is adding more branches but not more locations.
- Fee income should remain stable.
- Operating leverage has resulted in stronger PAT growth relative to the AUM growth. This is a mini credit cycle at work. Given that it's a mini credit cycle and given that it deals with all classes of customers, BFL has done a decent job.
- NII growth is at 25-27%, credit costs are out of symphony and BAF is committed to fixing it. Portfolio has to churn through and the company will have a lot more confidence once it delivers on the guided credit costs in 4QFY25.
