Technical Snapshot

SELL SILVER MAY @ 83800 SL 84500 TGT 83000-82500. MCX

Observations

Silver trading range for the day is 82285-84405.

Silver gains as geopolitical tensions escalated in the aftermath of Israel's retaliatory strikes against Iran.

Hawkish Fed statements and strong US economic data heightened expectations of prolonged restrictive policy by the regulator.

Still, industrial demand for the metal remained strong amid growing applications in electronics and solar power.

The market deficit was reflected in above ground inventories, with volumes held in LBMA and exchanges dropping sharply in recent years.

Gold gains fueled by a confluence of geopolitical tensions and economic uncertainties. Meanwhile, hot economic data from the US, including retail sales and Philadelphia Manufacturing PMI, and hawkish remarks from several Federal Reserve officials exerted downward pressure on bullion since interest rates might have to stay restrictive longer. Atlanta Fed Bank President Bostic and NY Fed President John Williams emphasized that the US regulator was in no hurry to cut rates due to stubbornly high inflation.

Safe haven buying props up China demand; activity still muted in India - Physical gold demand in top consumer China firmed as a depreciating yuan and growing tension in the Middle East spurred safe-haven buying, while elevated prices kept activity muted in India. China demand is still strong despite higher prices and we expect this trend to continue as traders are worried about continued currency devaluation and heightened geopolitical concerns. Dealers in China charged premiums of \$30-\$50 per ounce over benchmark prices, unchanged from last week range. Indian dealers offered discounts of up to \$15 an ounce over official domestic prices, versus last week's \$17 discount. In Singapore, bullion was sold at between par to \$2.50 premiums, while dealers charged premiums of \$0.5 to \$2 in Hong Kong. In Japan, dealers sold gold at \$0.5-\$1 premiums.

China PBOC Buys Gold for 17th Month as Prices Hit Record - China's central bank purchased gold for its reserves for a 17th consecutive month in March, extending a buying spree that has helped the precious metal surge to a record. The People's Bank of China's gold held rose 0.2% to 72.74 million troy ounces, the smallest increase in the run of monthly purchases since November 2022. Gold has been on a tear in the past two months, hitting records on expectations of lower US interest rates. China's official reserve assets rose to the highest since November 2015, and foreign exchange reserves rose to \$3.2457 trillion.

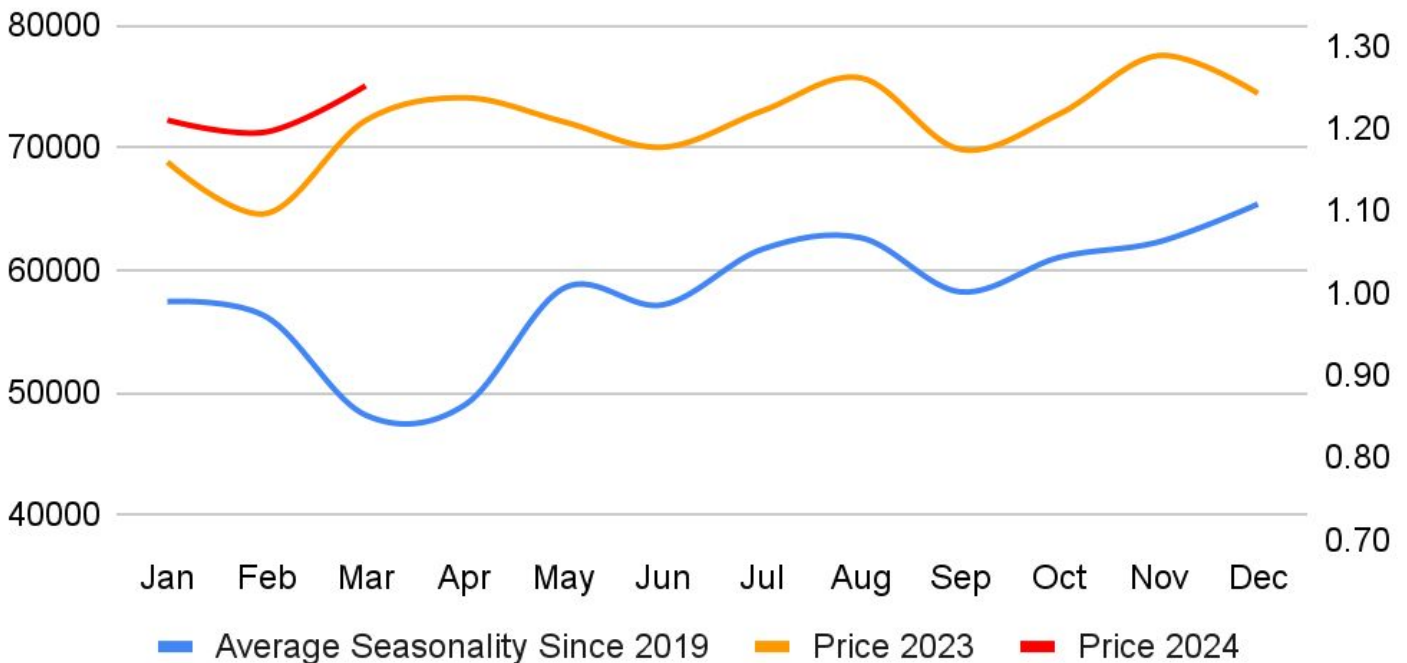

India's March gold imports set to drop 90% as prices surge - India's gold imports are set to plunge by more than 90% in March from the previous month to hit their lowest level since the COVID pandemic as banks cut imports after record-high prices hit demand. Lower imports by India, could limit a rally in global prices that hit a record high earlier this month on expectations that the Federal Reserve will cut interest rates this year. India's gold imports are likely to fall to 10 to 11 metric tons in March from 110 metric tons in February, said a government official. Gold imports in March 2024 are expected to be the lowest since the COVID pandemic, when air traffic restrictions limited imports and lockdowns led to the closure of jewellery shops.

Swiss March gold exports down on lower shipments to India - Swiss gold exports in March fell from February as higher supplies to China and Hong Kong were offset by lower deliveries to India and Turkey, customs data showed. Swiss gold exports to India fell month on month and year on year. The supplies in February were at a four-month high as local jewellers stocked up for the wedding season. Due to a rally in spot gold prices in March-April, Indian customers are struggling to adjust to the sudden price jump, and local dealers have been offering physical gold price discounts for six consecutive weeks. In China, where the central bank controls the inflow of gold via import quotas issued to banks, physical gold premiums have been rising so far in April as a weaker yuan supports local demand.
