Gold gains as markets turned their focus to upcoming U.S.-China talks and the Federal Reserve's policy decision. This comes during a pivotal week for President Trump's trade agenda, with a separate deadline looming this Friday for other countries to clinch a deal, following an agreement announced with the EU on Sunday that includes a 15% tariff on most European goods. Meanwhile, the US Federal Reserve is scheduled to meet this week and is widely expected to keep interest rates unchanged, although markets continue to price in a potential rate cut in September.

High prices stifle gold demand in top Asian hubs; India widens discount - Physical gold demand in key Asian hubs was subdued, as rising prices dampened sentiment, prompting dealers in top consumer China and India to offer steep discounts to attract buyers. Indian dealers offered discounts of up to \$15 an ounce over official domestic prices, which include a 6% import and 3% sales tax, up from a discount of up to \$10 last week. Jewellers were reluctant to purchase gold at current prices or even place orders for jewellery production, as retail demand has remained negligible for more than a month. In China, dealers offered gold between a discount of \$5 and a premium of \$4 per ounce above international rates. In Hong Kong, gold was sold at par to a premium of \$1.50, while in Singapore gold traded between at-par prices and a \$2.50 premium. In Japan, bullion was sold at a discount of \$0.50 to a \$0.70 premium over spot prices.

India's June gold imports fall to two – year low as record price dents demand - India's gold imports in June fell 40% from a year ago to their lowest level in more than two years, as a price rally to a record high sapped demand, a government and two industry officials told. Imports to India, fell to 21 tons, the lowest since April 2023, said a government official. In value terms, gold imports fell to \$1.84 billion in June from \$2.48 billion a year ago, the official said. In the past decade, on average, India imported 52.4 tons of gold in June. In the first half of 2025, India's gold imports fell 30% from a year ago to 204.1 tons, the lowest since the first half of 2020, when the COVID-19 outbreak led to lockdown, the trade ministry data showed. Silver imports in June nearly doubled from a year ago to 197 tons, but were significantly lower than the 544 tons imported in May, the government official said.

Swiss June gold exports jump 44% month on month as bullion returns to UK - Gold exports from Switzerland jumped 44% month on month in June to the highest level since March as bullion flew back to the vaults in the United Kingdom from the United States via Swiss refineries, Swiss customs data showed. According to the Swiss data, gold exports to the UK jumped to 83.8 metric tons in June, the highest level since August 2019, from 16.0 metric tons in May. Gold worth billions of dollars was delivered to the United States in December-March from Britain, Switzerland and elsewhere as market players sought to cover their Comex positions against the possibility of Washington imposing tariffs on imports of the metal. This risk was removed in April as Washington excluded bullion from President Donald Trump's reciprocal tariffs, prompting the airplanes carrying gold to fly back. The amount of gold held in London vaults rose by 177.8 tons, or by 2.1%, month on month, to 8,776 tonnes in June, according to the London Bullion Market Association. This was the highest level since August 2023.

Gold ETFs drew largest inflow in five years during first half of 2025, WGC says - Physically backed gold exchange-traded funds recorded their largest semi-annual inflow since the first half of 2020 from January to June, data from the World Gold Council showed. The active first half of the year follows a modest net inflow to gold ETFs in 2024 after three years of outflows caused by high interest rates. Gold ETFs recorded an inflow of \$38 billion in the first half of 2025 with their collective holdings rising by 397.1 metric tons of gold, said the WGC, an industry body whose members are global gold miners. This raised the total holdings to 3,615.9 tons by the end of June, the largest since August 2022. Their record was 3,915 tons in October 2020. "Despite slowing momentum in May and June, Asian investors bought a record amount of gold ETFs during the first half of the year, contributing an impressive 28% to net global flows with only 9% of the world's total assets under management," the WGC added.
