A Daily Report on Agriculture Commodities 16 May 2024

MARKET NEWS/UPDATES

- India's vegetable oil imports rose 26% on year to 1.32 mln tn in April from 1.05 mln tn last year, the Solvent Extractors' Association of India said in a release today. India is the world's largest importer of edible oils. "In the last one month, the price trend has been downward, which encouraged higher imports during April," SEA said. The vegetable oil basket comprises edible and non-edible oils. India's edible oil imports in April rose by 28% on year to 1.30 mln tn. The international prices of refined, bleached and deodorised palmolein and crude palm oil declined by nearly \$100 per tn. Similarly, soybean oil prices were down by \$40 per tn, while sunflower oil prices were down \$15 per tn in the last one month, SEA said. However, sunflower oil prices seem to have stabilised after reaching a low point, the association said. Imports of crude palm oil rose 36% on year to 536,248 tn in April, SEA said in the release. However, imports of sunflower oil in April fell to 234,801 tn, compared with 249,122 tn a year ago.
- The Cotton Association of India has retained its projection for the country's cotton output in 2023-24 (Oct-Sep) at 31 mln bales (1 bale = 170 kg), according to a release. The association updates its estimates almost every month, based on information received from its members in 11 cotton-growing states and other trade sources. The total cotton supply till the end of April is estimated at 31.6 mln bales, the press release said. Production of cotton in the north zone, which comprises Punjab, Haryana, and Rajasthan, is estimated at 4.6 mln bales, up 300,000 bales from last year. As of Apr 30, production in the region was 4.4 mln bales. The estimate for the central zone, which comprises Gujarat, Maharashtra, and Madhya Pradesh, is 18.5 mln bales, down from 19.5 mln bales last year. As of Apr 30, 16.7 mln bales of cotton had been produced in this zone. The estimates for the south zone are seen at 7.3 mln bales compared to 7.5 mln bales last year. As of Apr 30, production here was 6.5 mln bales. Other states account for the rest of the output. The opening stock for the season starting October was estimated at 2.9 mln bales, the association said. Although there is no change in the total cotton output numbers estimated for the entire year, for Telangana, numbers are estimated a bit higher by 100,000 bales at 350,000 bales, the association said in a release. However, the output numbers for Tamil Nadu for the current crop year have been reduced by 100,000 bales to 550,000 bales against 650,000 bales a year ago. The total supply of cotton for the 2023-24 season is estimated at 35.9 mln bales, up from 35.5 mln bales a year ago. The association has estimated imports in 2023-24 at 2.04 mln bales, higher than the 1.25 mln bales imported in 2022-23. The association has estimated domestic demand in 2023-24 at 31.7 mln bales, up from 31.1 mln bales the previous year. It pegged exports at 2.2 mln bales, up from 1.6 mln bales the previous cotton season. Consumption till Apr 30 is estimated at 19.2 mln bales.
- The government's wheat stocks with Food Corp of India were down 17.3% on year but up a massive 245.8% on month at 26 mln tn as of May 1, data from the nodal food procurement agency showed. This is the lowest wheat stock level for May 1 since 2008. The buffer norm for wheat stocks for the period is 7.5 mln tn (operational stock of 4.46 mln tn and strategic reserve of 3 mln tn). The government fixes the buffer requirement of food grains for every quarter and the Food Corp has to maintain the level mandated. In the 2023-24 (Jul-Jun) season, India is likely to harvest 112.0 mln tn of wheat, higher than last year's output of 110.6 mln tn, according to the government's second advance estimate. However, agricultural research firm Agriwatch has a conservative estimate of 105.8 mln tn. As of May 1, total stocks of wheat and rice were at 57.9 mln tn, up 53.6% on month and 4.2% on year. In 2023, combined stocks of wheat and rice were at 55.5 mln tn as of May 1, according to the data. Meanwhile, the government's rice stocks with FCI rose 5.8% on month and 20.4% on year to 31.9 mln tn as of May 1. A year ago, the rice stocks were 26.5 mln tn, the data showed.
- India's soymeal exports declined 20.3% on year in April to 176,000 tn from 221,000 tn a year ago, the Soybean Processors Association of India said in a release on Saturday. For Oct-Apr, soymeal exports increased to 1.52 mln tn from 1.40 mln tn a year ago, SOPA said. India exported soymeal to more than 70 countries from October to April, of which Bangladesh, Iran, Nepal and the UAE were major buyers, according to data released by the association. In April, production of soymeal fell to 750,000 tn from 798,000 tn a year ago. The output in Oct-Apr rose to 6.07 mln tn from 6.02 mln tn a year ago, the association said. Soybean, a kharif oilseed, is sown during Jun-Jul. Soybean arrivals in spot markets were at 500,000 tn in April, down from 700,000 tn a year ago. During Oct-Apr, arrivals were down at 8.2 mln tn from 8.4 mln tn a year ago. By the end of April, plants, traders, and farmers were left with around 5.54 mln tn of soybean stock, down from 6.48 mln tn a month ago, the association said. The meal stock at the end of April was 199,000 tn against 180,000 tn a month ago. Soymeal is primarily used as poultry and livestock feed. Indian soymeal is non-genetically modified and considered rich in protein. The data is collected from various sources including government and trade. The numbers, however, are estimates only, the association said.

Trading signals is prepared based on statistical analysis and is purely on technical indicators like exponential moving averages (EMAs), Relative strength Index (RSI) and stochastic, putting altogether provides an idea about intraday, short, medium and long term trend of the commodities. It also signals the risk of an investment in both agricultural and global commodities as well. Based on all listed indicators above, investors were able to fix a daily, near term and long term trends. However, must be cautious especially for real-time intraday traders/jobbers.

Trading Strategy based on EMA

Trading strategies mentioned in the report is mainly based on 3, 5, 13, 22, 45 & 60 days exponential Moving Averages. 3 and 5 day EMA has taken for developing Intraday trading strategy, 13 days and 22 days EMA for Short term and Medium term, while 45,60 days EMA for Long term. Here, we use EMAs for POSITIVE and NEGATIVE signals. POSITIVE signal is formed when a short-term moving average (eg: 30 day) crosses from below a longer-term average (eg: 60 day), which is considered bullish. Likewise, NEGATIVE signal is formed when a short-term moving average (eg: 30 day) crosses from above a longer-term moving average (eg: 60 day), which is considered bearish.

REGULATORY DISCLOSURES:

Geojit Financial Services Limited's Associates consists of companies such as Geojit Technologies Private Limited (GTPL - Software Solutions provider), Geojit Credits Private Limited (GCPL- NBFC Services provider). In the context of the SEBI Regulations on Research Analysts (2014), Geojit Financial Services Limited affirms that we are a SEBI registered Research Entity and we issue research reports /research analysis etc that are prepared by our Research Analysts. We also affirm and undertake that no disciplinary action has been taken against us or our Analysts in connection with our business activities.

In compliance with the above mentioned SEBI Regulations, the following additional disclosures are also provided which may be considered by the reader before making an investment decision:

1. Disclosures regarding Ownership:

GFSL confirms that:

It/its associates have no financial interest or any other material conflict in relation to the subject Commodity futures covered herein at the time of publication of this report.

Further, the Research Analyst confirms that:

He, his associates and his relatives have no financial interest in the subject Commodity futures covered herein, and they have no other material conflict in the subject Commodity at the time of publication of this report.

2. Disclosures regarding Compensation:

During the past 12 months, GFSL or its Associates have not received any compensation or other benefits from any entity/ third party in connection with the Commodity futures mentioned in this report.

3. Disclosure regarding the Research Analyst's connection with the Commodity futures:

It is affirmed that I, Anu V Pai, employed as Research Analyst by GFSL and engaged in the preparation of this report have no substantial ownership or financial interest over any Commodity futures mentioned in the report.

4. Disclosure regarding Market Making activity:

Neither GFSL nor its Research Analysts have engaged in market making activities for the subject Commodity futures. Copyright in this report vests exclusively with GFSL
