A Daily Report on Agriculture Commodities 13 May 2024

#### **MARKET NEWS/UPDATES**

- There is a 49% chance that La Nina conditions, considered favourable for the southwest monsoon, may develop over the equatorial Pacific, according to the Climate Prediction Center of the US-based National Weather Service. The weather bureau said there is a 69% chance of La Nina conditions developing in Jul-Sep. It has forecast a transition from El Nino to El Nino-Southern Oscillation-neutral next month. The El Nino-Southern Oscillation is a recurring climate pattern involving changes in the temperature of waters in the central and eastern tropical Pacific Ocean. During April, below-average equatorial sea surface temperatures emerged in small regions of the eastern Pacific Ocean while above-average sea surface temperatures prevailed across the rest of the equatorial Pacific, it said. The coupled ocean-atmosphere system reflected the continued weakening of El Nino and transition towards ENSO-neutral, the weather forecaster said. The India Meteorological Department in April said La Nina conditions are likely to develop during the second half of the monsoon season. The IMD has predicted the southwest monsoon rainfall to be above normal at 106% of the long-period average.
- Production of crude palm oil in Malaysia rose 7.86% on month to 1.50 mln tn in April, according to preliminary data from the Malaysian Palm Oil Board. Exports of palm oil in April fell 6.97% on month to 1.23 mln tn, while biodiesel exports rose 123.06% on month to 35,298 tn, the data showed. Palm oil is also used to make biofuel. Total stocks of palm oil in the country rose 1.85% on month to 1.74 mln tn at the end of April. Malaysia is the world's second-largest producer of crude palm oil, and India is the largest consumer of edible oils.
- The area under rabi crops in Telangana was at 6.8 mln acres (1 acre = 0.40 ha) as of Wednesday, 6.6% lower than the rabi crop area of 7.3 mln acres a year ago, according to data from the state government. The acreage exceeds the normal rabi crop area of 5.5 mln acres for the entire season by 23%, the data showed. Maize, Bengal gram, jowar, and groundnut are the main rabi crops grown in Telangana. The total area under major millets, which include jowar, bajra, maize, and ragi, rose to 915,322 acres from 786,225 acres a year ago, the data showed. The area under maize rose to 668,754 acres from 648,901 acres a year ago. The season's normal area for maize is 511,521 acres, and it covers the most area under major millets, as per data. Jowar, the second major millet in the state, was sown across 232,992 acres, higher than 126,997 acres a year ago. However, the area under paddy and pulses fell. Paddy acreage was down 8% on year at 5.2 mln acres, though it was higher than the season's normal acreage of 4.05 mln acres. Area under pulses fell 26% on year to 319,919 acres. The normal rabi acreage for pulses is 421,163 acres. The acreage of Bengal gram was down at 255,368 acres from 364,163 acres. The area under food grains fell to 6.4 mln acres from 6.9 mln acres last year. Oilseed acreage was at 281,824 acres, down from 332,337 acres a year ago. The normal area for oilseeds in the season is 371,037 acres. Groundnuts accounted for 74.5% of the total oilseed acreage at 209,960 acres, down from 242,781 acres a year ago. Telangana received 15.2 mm rainfall in May, down from 42.6 mm last year. The cumulative rainfall in the state since June has been normal at 945.3 mm, down from 1,369.0 mm a year ago, the data showed as of Wednesday. The water level in major reservoirs in the state as of Wednesday was 214.31 bln cu ft, down from 318.99 bln cu ft a year ago, according to government data.
- India received 8.8 mm of rainfall in the week ended Wednesday, 25% below the normal weighted average of 11.8 mm for the period, according to the India Meteorological Department. During the week, all four regions received below-normal rainfall. Rainfall in east and northeast India was 12% below normal at 33.3 mm, while northwest India received 91% below-normal showers at 0.6 mm, according to the data. In the central parts of the country, rainfall was 21% below normal at 2.4 mm during the week, while precipitation in the southern peninsula was 4% below normal at 12.9 mm. Of the 36 subdivisions, rainfall was "large deficient" in 11 subdivisions and deficient in four. No subdivision received excess showers and five received normal rainfall. There was no rainfall in 10 subdivisions, while there was "large excess" rainfall in six subdivisions, the weather bureau said. Since Mar 1, India has received 69.8 mm of rainfall, 16% below the normal level of 82.7 mm for the period.
- The area under summer crops in Maharashtra was up 2.6% on year at 414,977 ha as of Monday, according to the final summer acreage data for 2023-24 (Apr-Mar) released by the government of Maharashtra on Tuesday. A year ago, summer crop acreage in the state was 404,357 ha. The average summer crop acreage in the state for five years from 2016-17 to 2020-21 is 349,759 ha, the data showed. Summer crops are grown for a short period between the kharif and rabi seasons, mainly during Mar-Jun. The total area under cereals rose to 296,809 ha from 279,518 ha a year ago. The area under rice, the second major summer crop after groundnut, was at 167,714 ha, up from 164,089 ha a year ago. The state's five-year average acreage for rice is 83,011 ha. The area under maize fell to 57,449 ha from 63,045 ha a year ago. The area under food grains rose to 309,930 ha from 294,012 ha a year ago, according to the data. The area under pulses was at 13,121 ha, down from 14,494 ha a year ago. The area under moong fell to 11,462 ha from 12,477 ha a year ago, the data showed. Maharashtra is the third-largest producer of moong. Oilseeds acreage fell to 105,048 ha from 110,345 ha a year ago, according to the data. Groundnut was sown across 77,716 ha, up from 72,689 ha a year ago. The water level in dams in Maharashtra is at 26.77% of the capacity, compared with 38.63% a year ago, according to data from the Maharashtra water resources department.

Trading signals is prepared based on statistical analysis and is purely on technical indicators like exponential moving averages (EMAs), Relative strength Index (RSI) and stochastic, putting altogether provides an idea about intraday, short, medium and long term trend of the commodities. It also signals the risk of an investment in both agricultural and global commodities as well. Based on all listed indicators above, investors were able to fix a daily, near term and long term trends. However, must be cautious especially for real-time intraday traders/jobbers.

Trading Strategy based on EMA

Trading strategies mentioned in the report is mainly based on 3, 5, 13, 22, 45 & 60 days exponential Moving Averages. 3 and 5 day EMA has taken for developing Intraday trading strategy, 13 days and 22 days EMA for Short term and Medium term, while 45,60 days EMA for Long term. Here, we use EMAs for POSITIVE and NEGATIVE signals. POSITIVE signal is formed when a short-term moving average (eg: 30 day) crosses from below a longer-term average (eg: 60 day), which is considered bullish. Likewise, NEGATIVE signal is formed when a short-term moving average (eg: 30 day) crosses from above a longer-term moving average (eg: 60 day), which is considered bearish.

#### RISK DISCLOSURE

Geojit Financial Services Limited and/or its Affiliates and its officers, directors and employees including the analyst/ authors shall not be in any way be responsible for any loss or damage that may arise to any person from any inadvertent error in the information contained in this report. Investors may lose his/her entire investment under certain market conditions so before acting on any advice or recommendation in these material, investors should consider whether it is suitable for their particular circumstances and, if necessary, seek professional advice. This report does not take into account the specific investment objectives, financial situation/circumstances and the particular needs of any specific person who may receive this document. The user assumes the entire risk of any use made of this information. Each recipient of this report should make such investigation as it deems necessary to arrive at an independent evaluation of an investment in the Commodity/(ies) referred to in this report (including the merits and risks involved). The price, volume and income of the investments referred to in this report may fluctuate and investors may realize losses that may exceed their original capital.

The investments or services contained or referred to in this report may not be suitable for all equally and it is recommended that an independent investment advisor be consulted. In addition, nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to individual circumstances or otherwise constitutes a personal recommendation of GFSL.

#### **REGULATORY DISCLOSURES:**

Geojit Financial Services Limited's Associates consists of companies such as Geojit Technologies Private Limited (GTPL - Software Solutions provider), Geojit Credits Private Limited (GCPL- NBFC Services provider). In the context of the SEBI Regulations on Research Analysts (2014), Geojit Financial Services Limited affirms that we are a SEBI registered Research Entity and we issue research reports /research analysis etc that are prepared by our Research Analysts. We also affirm and undertake that no disciplinary action has been taken against us or our Analysts in connection with our business activities.

In compliance with the above mentioned SEBI Regulations, the following additional disclosures are also provided which may be considered by the reader before making an investment decision:

1. Disclosures regarding Ownership:

#### GFSL confirms that:

It/its associates have no financial interest or any other material conflict in relation to the subject Commodity futures covered herein at the time of publication of this report.

#### Further, the Research Analyst confirms that:

He, his associates and his relatives have no financial interest in the subject Commodity futures covered herein, and they have no other material conflict in the subject Commodity at the time of publication of this report.

2. Disclosures regarding Compensation:

During the past 12 months, GFSL or its Associates have not received any compensation or other benefits from any entity/ third party in connection with the Commodity futures mentioned in this report.

3. Disclosure regarding the Research Analyst's connection with the Commodity futures:

It is affirmed that I, Anu V Pai, employed as Research Analyst by GFSL and engaged in the preparation of this report have no substantial ownership or financial interest over any Commodity futures mentioned in the report.

4. Disclosure regarding Market Making activity:

Neither GFSL nor its Research Analysts have engaged in market making activities for the subject Commodity futures. Copyright in this report vests exclusively with GFSL
