## Ratio Update

Ratio	Price	Ratio	Price
Gold / Silver Ratio	90.21	Crudeoil / Natural Gas Ratio	47.16
Gold / Crudeoil Ratio	9.80	Crudeoil / Copper Ratio	9.08
Gold / Copper Ratio	89.00	Copper / Zinc Ratio	3.51
Silver / Crudeoil Ratio	10.86	Copper / Lead Ratio	4.26
Silver / Copper Ratio	98.66	Copper / Aluminium Ratio	3.64

## TECHNICAL SNAPSHOT

**BUY ALUMINIUM APR @ 208 SL 207 TGT 209-210. MCX**

### OBSERVATIONS

Aluminium trading range for the day is 206.5-210.1.

Aluminium gains over concerns over slow recovery in production in China's Yunnan.

There are expectations for an increase in production in May, but the drought situation in Yunnan may bring uncertainty.

China's aluminium output was 3.333 million mt in February, up 7.81% YoY.

**TECHNICAL SNAPSHOT**

**BUY COPPER APR @ 757 SL 754 TGT 762-767. MCX**

**OBSERVATIONS**

Copper trading range for the day is 755.2-767.

Copper gains as China's top copper smelters proposal of a 5-10% production cut.

Chinese manufacturing activity is likely to have contracted for a sixth straight month in March.

Copper output in Chile, grew 9.95% year-on-year in February to 420,242 metric tons.

## TECHNICAL SNAPSHOT

**BUY ZINC APR @ 215 SL 213 TGT 218-220. MCX**

### OBSERVATIONS

Zinc trading range for the day is 215.1-218.7.

Zinc gains as the output of China's smelters dropped significantly.

Domestic refined zinc production in March 2024 likely to decrease 8.78% year-on-year.

Global zinc market moved to a surplus of 58,700 metric tons in January - ILZSG

## News you can Use

Recent disappointing inflation data affirms the case for the U.S. Federal Reserve to hold off on cutting its short-term interest rate target, Fed Governor Christopher Waller said, but he did not rule out trimming rates later in the year. "There is no rush to cut the policy rate" right now, Waller said in a speech at an Economic Club of New York gathering. Recent data "tells me that it is prudent to hold this rate at its current restrictive stance perhaps for longer than previously thought to help keep inflation on a sustainable trajectory toward 2%." Rate cuts are not off the table, however, Waller said, noting that further progress expected on lowering inflation "will make it appropriate" for the Fed "to begin reducing the target range for the federal funds rate this year." It could take a few months of easing inflation data to gain that confidence, but until then, a strong economy gives the Fed space to take stock of how the economy is performing, Waller said. Pushing back the start of rate cuts will likely affect how much easing happens this year, he said. "It is appropriate to reduce the overall number of rate cuts or push them further into the future in response to the recent data."

Broad money growth (M3) continues to increase year-on-year after declines in the second half of 2023. The recovery is very small for the moment, and mainly driven by net external assets contributing positively. This is caused by a fast recovery of the trade balance now that energy costs have moderated. A small contribution to the increase in money growth comes from credit to the private sector. Bank lending to households has shown small increases month-on-month again as the housing market starts to recover in quite a few eurozone markets. Bank lending to non-financial corporates remains volatile right now. February saw a tick-up compared to January, which had been sharply down. Still though, corporate borrowing has grown in five out of the last six months. Overall, the monetary environment shows some improvement compared to the second half of last year, indicating that the most significant impact of rate hikes on money growth and bank lending is behind us. At the same time, we do see that at the current pace of lending, investment will remain muted for the foreseeable future thanks to the high interest rate environment.
