Technical Snapshot

BUY GOLD OCT @ 68800 SL 68500 TGT 69200-69400. MCX

Observations

Gold trading range for the day is 68280-69810.

Gold dropped as investors look for fresh cues, which could clarify whether the US enters a recession

Fed officials resisted the idea that weaker-than-expected July jobs data indicates a recessionary freefall, warning that the Fed will need to cut rates.

ANZ predicts gold will move towards \$2,500 or beyond if upcoming economic data from the U.S. is weaker.

Vietnam's gold demand hits highest level since 2014

Technical Snapshot

BUY SILVER SEP @ 79200 SL 78500 TGT 80000-80600. MCX

Observations

Silver trading range for the day is 77585-81075.

Silver steadied supported by its safe-haven appeal as markets became more risk-averse.

Investors continued to evaluate the likelihood of a US recession following weak economic data

Fed's Daly stated that she was open to cutting interest rates if necessary

Traders anticipate 100 basis points of easing this year from the Fed, with a 50 bps cut in September priced in at over 70% chance.

Gold dropped as investors look for fresh cues, which could clarify whether the United States (US) enters a recession. Also, market participants await signals about how much the Federal Reserve (Fed) will reduce interest rates this year. Meanwhile, the overall outlook of the Gold price remains firm due to multiple tailwinds.

India premium drops as buying moderates; China demand lags - Gold premiums in India fell, as a recovery in prices tempered a buying frenzy led by the government's decision to ease import tax, while dwindling consumer sentiment weighed on demand in China. Indian dealers charged a premium of up to \$7 an ounce over official domestic prices. Last week, they were charging a premium of up to \$20 an ounce, their highest level since 2014. In China, dealers were offering a \$2 discount to \$8 premium an ounce on international spot prices, compared with \$10 discount to \$2 premium offered last week. In Singapore, gold was sold at a \$1.25 discount to a \$1.25 premium per ounce, while in Hong Kong, it was sold between a \$1 discount to a \$1.20 premium. Dealers in Japan sold gold at a \$3.0 discount to a premium of \$0.25. After the interest rate hike by the Bank of Japan, the price of gold in yen fell sharply.

India's duty cut to revive gold demand after weak June quarter, World Gold Council says - India's gold demand in the June quarter fell 5% from a year ago, but consumption in the second half of 2024 is set to improve due to a correction in local price following a steep reduction in import taxes, the World Gold Council (WGC) said. The recent 9 percentage point reduction in import duty on gold, implemented before the main festival season beginning in September, is expected to revive gold demand, further supported by good monsoon rains. India slashed import duties on gold to 6% from 15%, a move industry officials said could lift retail demand and help cut smuggling. India's gold consumption in the April-June quarter fell 5% to 149.7 metric tons, as a 17% fall in jewellery demand offset a 46% rise in the investment demand during the quarter, the WGC said.

Slump in jewellery consumption hits gold demand in Q2, says industry body - Global gold demand excluding over-the-counter (OTC) trading fell 6% year-on-year to 929 metric tons in the second quarter as jewellery consumption tumbled 19% amid high prices, the World Gold Council (WGC) said. The second quarter "saw price sensitivity bite into jewellery demand and it may be a while before consumers fully adjust to higher prices", said the WGC. Gold jewellery consumption in April-June saw its weakest second quarter since 2020, when demand was feeling the worst impact of the COVID-19 pandemic, the WGC said. However, total demand including the opaque OTC trading rose 4% to 1,258 tons, marking the strongest second quarter in the WGC data series going back to 2000. Global central banks, which actively bought gold in 2022-2023, increased purchases for their reserves by 6% to 183 tons in the second quarter.

Swiss June gold exports fall to the lowest in more than two years - Swiss June gold exports fell to the lowest level since April 2022 owing to reduced shipments to China and India, customs data showed. Switzerland is the world's biggest bullion refining and transit hub while China and India are the largest consumer markets, where demand depends on the season and is often sensitive to high gold prices. With spot gold prices up almost 20% so far this year, Swiss gold exports to China, India and Turkey fell sharply month-on-month in June, while deliveries to Hong Kong rose, the data showed.
