

Witness a new era of growth opportunities.

Time to ride the manufacturing wave.

Invest in
Invesco India Manufacturing Fund

An open ended equity scheme following manufacturing theme

**NFO Period:
25 July - 8 August, 2024**

This product is suitable for investors who are seeking*:

- Capital appreciation over long term
- Investments predominantly in equity and equity related instruments of companies following manufacturing theme

***Investors should consult their financial advisers if in doubt about whether the product is suitable for them.**

SCHEME RISKOMETER

Investors understand that their principal will be at Very High Risk

BENCHMARK RISKOMETER

Benchmark riskometer is at Very High Risk

As per AMFI Tier 1 Benchmark i.e. **Nifty India Manufacturing TRI**

Note: The product labelling assigned during the NFO is based on internal assessment of the Scheme characteristics or model portfolio and the same may vary post NFO when the actual investments are made.

Indian economy gearing for 2.5x growth over the next decade

Economy to grow from ~US\$3.6 trillion today to ~US\$9 trillion by 2034

E- Estimates, FY – Financial Year, GDP Gross Domestic Product.

Note – GDP shown is Nominal GDP. Economy is projected to grow at a CAGR of ~9.65% from 2024 to 2034. USD 1 trillion is approximately INR 83 lakh crore.

Manufacturing is going to be the driving force behind achieving India's immense economic growth potential

Manufacturing – Catalyst as well as beneficiary of expanding economic cycle

Source – World Bank

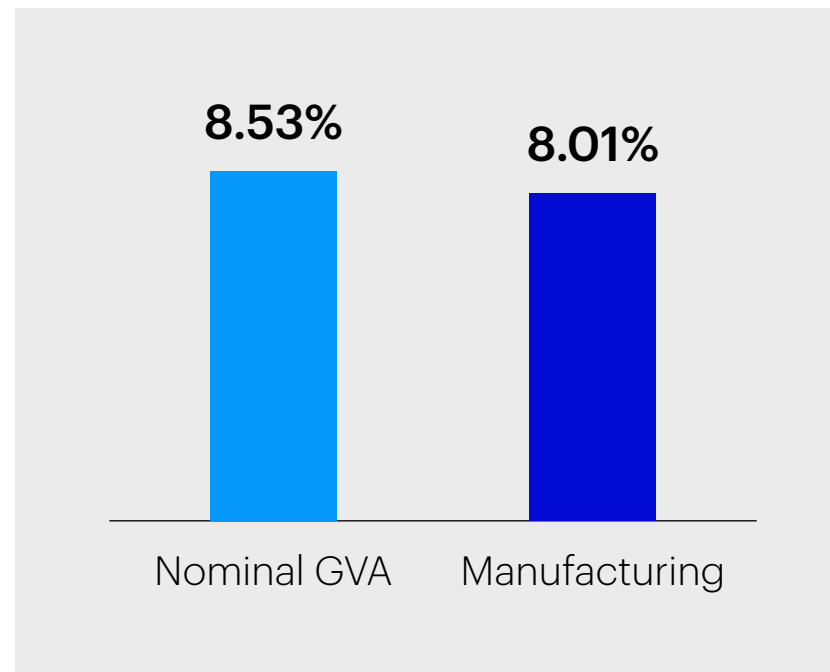

Disclaimer – The above chart shows the GDP of Manufacturing oriented countries during high growth phase and how manufacturing has contributed in driving this growth. Contribution of manufacturing to GDP can be gauged by the change in Manufacturing (% of GDP) at the beginning and end of the mentioned period. The above is for illustration purposes only and should neither be used for the development or implementation of an investment strategy nor construed as investment advice to any party.

In India, Manufacturing growth is gaining momentum after seeing a subdued performance in last few years

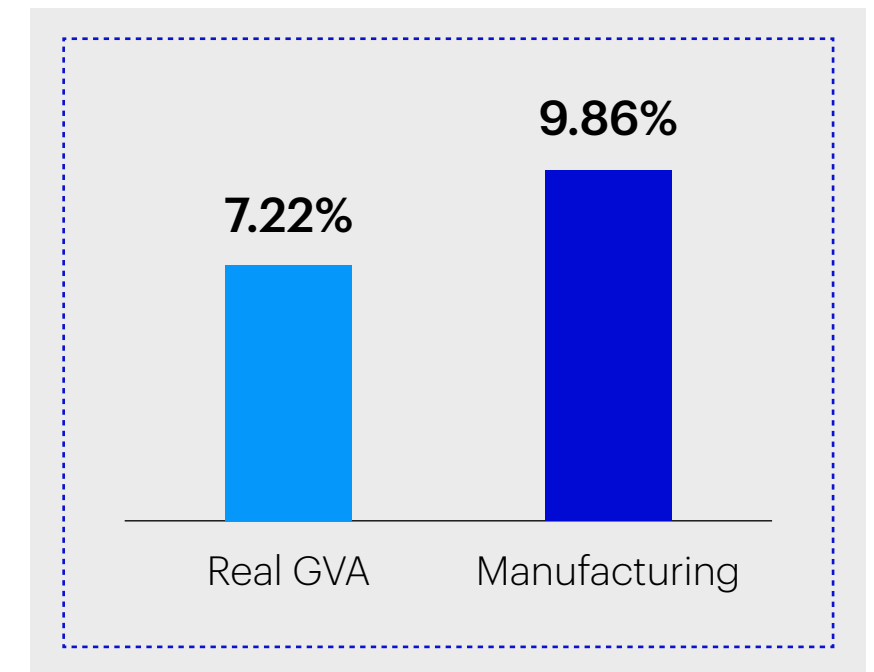

Manufacturing growth has lagged Nominal GVA growth in the past (8 years CAGR growth)

Today, Manufacturing growth is in line with Nominal GVA growth (over past 1 year)

Further, Manufacturing growth has surpassed Real GVA growth (over past 1 year)

CAGR- Compounded Annual Growth Rate, GVA – Gross Value Added

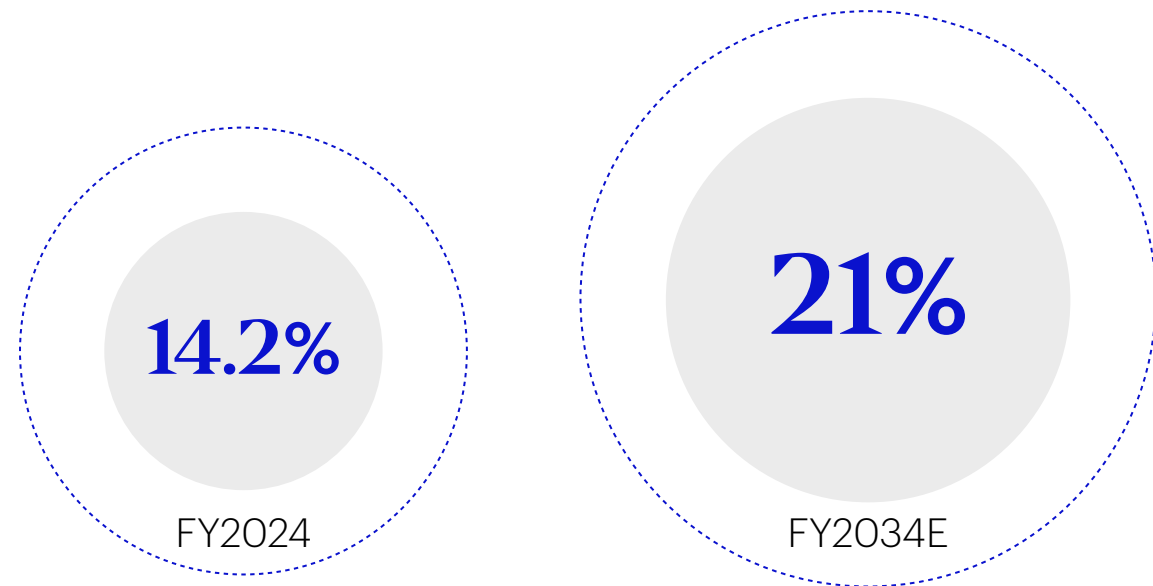

Note -Data shown is based on GVA for FY24. Source – Niti Aayog

Disclaimer - The charts are for illustration purposes only and should neither be used for the development or implementation of an investment strategy nor construed as investment advice to any party. It should not be construed as a promise on minimum returns and safeguard of capital. The IAMI/IMF is not guaranteeing or forecasting any returns.

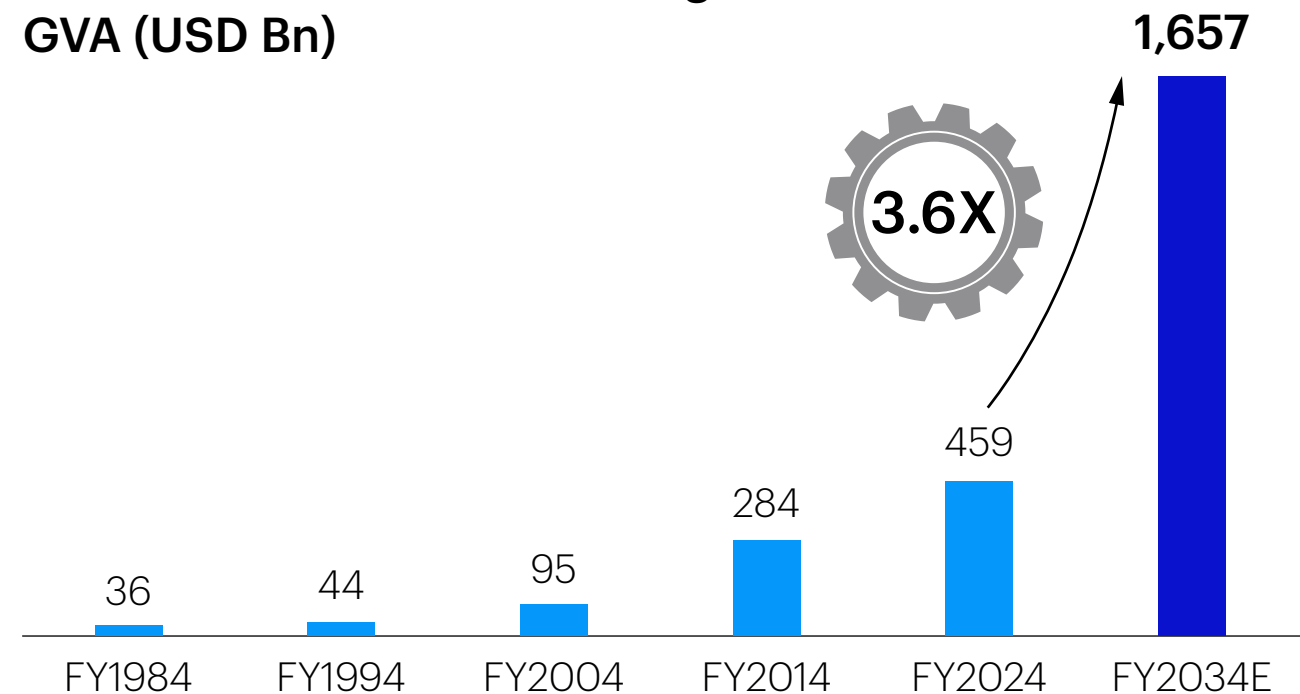

In next 10 years, India has the potential to become a manufacturing hub

Manufacturing GVA is projected to grow ~3.6x to USD 1.6 trillion by 2034

Manufacturing share in nominal GVA to rise

Trend in India's Manufacturing GVA (USD Bn)

E- Expected, GVA – Gross Value Added, FY - Financial Year. USD 1 billion is approximately INR 8,300 crore.

What makes India a preferred destination for manufacturing?

Opportunity is Big!

Strong domestic demand & one of the fastest growing consumer market

Economies of scale

Export potential

Competitive advantage

Well positioned on 'Factors of Production' i.e.

Labour & Energy

Land

Capital

Entrepreneurship

Government initiatives & reforms

Measures to enhance project viability

Measures to boost productivity

Measures to increase Total Addressable Market

Opportunity is Big!

Manufacturing demand buoyed by large and fast growing domestic market

Consumption as a % of GDP (CY2023)

5 year average consumption growth, Nominal (CY2023)

CY – Calendar Year

Source –Morgan Stanley Research

Disclaimer - The countries shown above are on basis of consumption as a percentage of GDP and the average consumption growth on 5 year YoY basis. Based on growing working age population, India is expected to be the fastest growing consumption market. The above charts are for illustration purposes only and should neither be used for the development or implementation of an investment strategy nor construed as investment advice to any party.

Rising exports further strengthen the case for manufacturing

Merchandise Exports (USD Billion)

FY – Financial Year

Source – Avendusspark

Disclaimer - The above chart is for illustration purposes only and should neither be used for the development or implementation of an investment strategy nor construed as investment advice to any party.

Industries to benefit from economies of scale as size increases

Segments	India Market Size (FY24)	Largest Market Size (CY23)	India's size vs. largest market	
	Volume/Value	Volume/Value	FY24	FY30 E (assuming 8% growth across segments)
PVs	4.2 Mn units	20 Mn units	21%	33%
ACs	10 Mn units	43 Mn units	23%	37%
Cement	400 Mn units	2,140 Mn units	19%	30%
Steel	129 Mn units	940 Mn units	14%	22%
Chemicals	USD 215 Bn	USD 1,842 Bn	12%	19%
Pharmaceuticals	USD 65 Bn	USD 847 Bn	8%	12%

Even if these market segments in India grow at 8% CAGR till FY30, we will still be a fraction of what the world's largest market is today

PVs- Passenger Vehicles, Acs – Air Conditioner, E – Estimates, Mn – Million, Bn - Billion. CAGR - Compounded Annual Growth Rate.

Source – SIAM, IBEF, India Steel Association, Media Reports, Internal estimates

Note- Decimals are rounded off. India's size vs. largest market is computed based on volume except in case of chemicals and pharmaceuticals where it is computed based on value.

Disclaimer - The above table is for illustration purposes only and should neither be used for the development or implementation of an investment strategy nor construed as investment advice to any party. Presenting

Invesco India Manufacturing Fund

(An open ended equity scheme following manufacturing theme)

Scheme which aims to invest in manufacturing and allied businesses to capitalize on the Government's focus on manufacturing and making India a Global manufacturing hub.

Investment framework

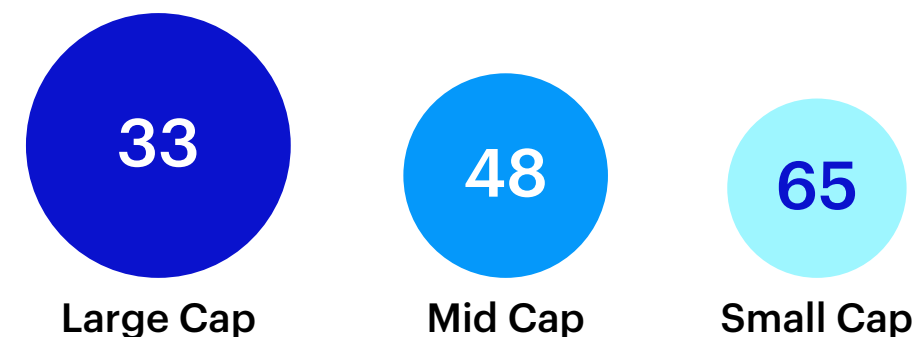

EV – Electric Vehicle, ICE - Internal Combustion Engine. Note: Categorized stocks and eligible Manufacturing universe are based on our internal stock categorization framework and are subject to change from time to time. Categorized stocks as on June 28, 2024. ¹Based on our current views and strategy.

Disclaimer: The sectors mentioned above are some of the sectors related to manufacturing theme and is not an exhaustive list of sectors comprising manufacturing theme. The sectors referred above should not be construed as recommendations, advice to buy, sell or in any manner transact in the sector and neither should it be considered as Research Report from Invesco Asset Management (India) Private Limited and/or Invesco Mutual Fund.

Broad based and well diversified opportunity set

Sectors	Sub sectors	No. of stocks in eligible universe
Consumer Discretionary	Auto OEM, Auto Ancillaries, Building Materials, Consumer durables, Retail consumer goods, etc.	44
Materials	Aluminium, Steel, Cement, Chemicals, etc.	36
Industrials	Capital Goods, Industrial consumables, Defence, etc.	36
Health Care	Pharma, API, CDMO, etc.	18
Consumer Staples	Food & Beverages, FMCG manufacturing etc.	8
Energy	Refineries, Petrochemicals, etc.	3
Information Technology (IT)	IT hardware	1
Total		146

Stocks categorization based on Market Capitalization - Number of stocks

A diverse basket encompassing consumption, industrial capex and industrial consumables, as well as domestic and global economic dependent sub-sectors

OEM -Original equipment manufacturer, APIs - Active pharmaceutical ingredients, CDMO - Contract development and manufacturing organization, FMCG - Fast Moving Consumer Goods
 Note - Categorized stocks are based on our internal stock categorization framework. Number of stocks under each category are subject to change from time to time. Pursuant to para 2.7 of SEBI Master Circular dated May 19, 2023: Large Cap companies mean 1st - 100th company, Mid Cap companies mean 101st - 250th and Small Cap companies mean: 251st company onwards in terms of full market capitalization based on average of full market capitalization of the stock on all such stock exchange or such other companies specified by SEBI, which is updated every six months as on end of June and December, each year.

Disclaimer: The sectors/themes referred above should not be construed as recommendations, advice to buy, sell or in any manner transact in this sector and neither should it be considered as Research Report from Invesco Asset Management (India) Private Limited and/or Invesco Mutual Fund. The Scheme may or may not take positions in these sectors and allocation is subject to change without any prior notice.

How manufacturing has fared so far?

Nifty India Manufacturing TRI has outperformed Nifty 500 TRI & Nifty 50 TRI (CAGR returns)

CAGR – Compounded Annual Growth Rate. Source: ICRA MFI Explorer. Data as on June 28, 2024

Past performance may or may not be sustained in future.

Performances based on Total Return Index (TRI) indices. Returns shown are CAGR. Since index Inception returns are calculated based on the Base date of Nifty India Manufacturing TRI i.e. April 01, 2005.

Disclaimer: The above analysis is based on performance of broader indices and is not exhaustive. The above analysis is to show the performance of Manufacturing index vis-à-vis broad-based indices. The indices referred above should not be construed as recommendations, advice to buy, sell or in any manner transact in the sector and neither should it be considered as Research Report from Invesco Asset Management (India) Private Limited (IAMI) and/or Invesco Mutual Fund (IMF). It should not be construed as a promise on minimum returns and safeguard of capital. The IAMI/IMF is not guaranteeing or forecasting any returns.

To summarize – Why invest now?

In an era of rapid economic expansion, manufacturing could emerge as one of the high growth sectors in India.

With consumption expected to rise substantially, manufacturing sector will play a vital role in meeting the domestic demand.

India is well placed to drive its manufacturing growth due to its competitive edge in four factors of production and improving infrastructure.

Government's focus on making India a 'Global Manufacturing Hub' through sector-specific policies, incentives and subsidies augurs well for Manufacturing theme.

Manufacturing will help reduce India's dependence on agriculture and imports.

A timely and attractive investment opportunity to gain exposure to companies which are directly or indirectly engaged in manufacturing.

Invesco India Manufacturing Fund - A fund dedicated to invest in companies across traditional as well new age manufacturing sectors

Key Facts

Type	An open ended equity scheme following manufacturing theme		
Investment Objective	To generate capital appreciation from a diversified portfolio of Equity and Equity Related Instruments of companies following the manufacturing theme. There is no assurance that the investment objective of the Scheme will be achieved.		
Asset Allocation	Instruments	Indicative Allocation (% of Net Assets)	
		Minimum	Maximum
	Equity & equity related instruments of companies following manufacturing theme	80	100
	Other equity & equity related instruments	0	20
	Debt & Money Market Instruments	0	20
	Units issued by REITs and InvITs	0	10
Minimum Application Amount	Lumpsum: Rs. 1,000/- per application and in multiples of Re. 1 thereafter. For Systematic Investment Plan (SIP):		
	Options	Minimum Amount	Minimum Installments
	Monthly	Rs. 500 per month and in multiples of Re. 1 thereafter	12
		Rs. 1,000/- or more per month and in multiples of Rs. 1 thereafter	6
	Quarterly	Rs. 1,500/- per quarter and in multiples of Rs. 1 thereafter	4
Plans¹/Options (Applicable to Direct Plan also)	Regular Plan and Direct Plan <ul style="list-style-type: none"> • Growth Option • Income Distribution cum Capital Withdrawal (IDCW) Option <ul style="list-style-type: none"> • IDCW Payout • IDCW Reinvestment option (If IDCW under payout of IDCW is equal to or less than Rs.100/- then the IDCW would be compulsorily reinvested in the respective plan/option of the scheme)		
Exit Load²	For each purchase of units through Lumpsum / Switch-in / Systematic Investment Plan (SIP)/ Systematic Transfer Plan (STP) and IDCW Transfer Plan exit load will be as follows: <ul style="list-style-type: none"> • If units are redeemed/switched-out on or before 3 months from the date of allotment : 0.50% • If units are redeemed/switched-out after 3 months from the date of allotment : Nil • Switch between the Plans under the Scheme: Nil 		
Fund Managers	Amit Ganatra and Dhimant Kothari		
Benchmark	Nifty India Manufacturing TRI		

¹Direct Plan will have a lower expense ratio excluding distribution expenses, commission for distribution of Units etc.

²Exit Load charged, if any, will be credited back to the scheme, net of Goods & Services Tax.
